01-Jan-1974 Dr Staff Unknown Member of Staff
Rhinoplasty NOS.

Consultations

22-Jun-2026 Dr Alistair Mcrobert Surgery consultation

Diagnosis (P3)	Patient reviewed 1) Rash - few spots on legs and crusted area left buttock - try fucidin 2) Past abuse - 76 year old who bravely attended to discuss his past childhood abuse. For 2 months he was a resident in cardross park which has been part of the scottish child abuse inquiry. He was there age 5 and *****while his ***** recieved medical treatment. HE remembers being slapped, punched, made to shower in front of multiple workers. He was locked in his room and givne sandwiches with wasps in them to eat. He has struggled throughout his life with depression and also with anxiety, particularly regarding his family when they travel and stay unfamiliar places. Since his stay in Cardross he has had to sleep with a light on. Plan - a legal team has spoken with him, he may pass our details on and I can do a report if needed. Will refer CMHT to see if counselling could be done
