Dear Ms Sharon Green,

I am writing to you, as you have been referred to the osteoporosis service for a dexta scan following your recent hip fracture. We invite people along to have a blood test and attend for a dexta scan, to rule out osteoporosis.

Osteoporosis is a disease which causes the bones to become weak and fragile, increasing the risk of fractures.

Please contact us on 0131 537 2697 and let us know if this is something you would like to attend.

For further information on osteoporosis, please go to the Royal osteoporosis Society website.

Yours Sincerely
Tracey Reid
Osteoporosis Nurse Specialist
