Consultant: Dr Selina Lamont

Dear Mr McDougall

**Patient Name:** Daniel McDougall  
**Patient date of birth:** 24/01/1969  
**Patient Address:** 96 Winton Crescent, Blantyre, Glasgow, G72 0QP

Bloods from your clinic visit with myself were all satisfactory except from a slightly low Folic Acid level. I note that this level was 3.2 and you had previously been on Folic Acid supplements, I would advise going back on them longer term. As planned given your symptoms we have requested an Upper Endoscopy and CT scan. I await your q-FIT test which is a stool sample for microscopic blood loss and if this is positive we will also put your name forward for a Colonoscopy.

Yours sincerely

**Dr Selina Lamont**  
Consultant Physician & Gastroenterologist
