Dear NEIL MORRISON

Final reminder: We need to carry out a safety check on your gas boiler

We've written to you twice with appointment times to carry out the annual safety check on the gas boiler and any other gas appliances in your home. The Gas Engineer was unable to access your home at both these appointments.

Your appointment

We've re-scheduled your appointment and it's important that you let the gas engineer into your home to carry out these safety checks. You must contact us if this time isn't suitable so we can rearrange your appointment.

Your safety is our priority and **having your boiler checked** allows us to make sure it is working safely.

If the Gas Engineer is not able to **access** your home at this final appointment, we will need to arrange to force entry under the **terms** of your tenancy agreement.

Your appointment is now planned for:

02/09/2025 between 7:30:00 AM and 12:10:00 PM.
