It would appear from our records that your patient did not keep the above appointment and did not notify us that they would not be attending.

No further appointment will be offered, your patient has been removed from the waiting list and we would require a new referral if you consider this necessary. This is in line with the NHS Greater Glasgow and Clyde's Did Not Attend Policy.

Please note, your patient has also been notified of this removal.

Yours sincerely

Samantha Bell

Dear Dr Ho Chong Teck,

Re: Sharon McDonald DOB:- 05.01.1976 CHI:- 0501766405
C/o Charra Centre 99 Mansion Street, Possilpark, Glasgow, G22 5LL

The above named 42 year old woman was brought to hospital by ambulance at 22.51 hours on 2.5.18 with a suspected overdose of street valium tablets. She is currently residing at Charra House, emergency homeless accommodation and it was documented in the medical notes staff had been concerned for Sharon as she had become increasingly drowsy in the accommodation. On admission Sharon stated she had taken 40 x street valium tablets and denied other illicit drugs. She also denied alcohol. It was documented in the notes she voiced suicidal ideation on admission, however Sharon denied this at interview today. It was documented she had a recent admission in similar circumstances. She is known to the North Alcohol and Drug Recovery Service. Prior to my assessment she was reviewed by the Addiction Liaison Service who documented she has long standing polydrug and heroin misuse. They gave advice on medication and planned to review her prior to discharge.

At interview Sharon was drowsy but easily rousable and fully orientated. She told me she recently spent 6 months in Turning Point Rehab facility to address her addiction issues. She told me she found this helpful and stated she did well when she was there. This is in contrast to the worker from Charra House, whom I was able to speak with, who informed me that Sharon had in fact been put out of Turning Point because she was bringing in drugs to the establishment. Sharon told me that she found tablets in her room yesterday and presumed them to be street valium. She stated she ingested them for "a dunt". She was unable to recall events thereafter and had no recollection of coming into hospital. She denied taking the tablets with suicidal intent and had no active suicidal ideation at interview. She spoke of how she was looking forward to her daughter's 18th birthday on 13th May.

She denied previous overdoses but described a past history of self harm by cutting. She stated she had not engaged in this for 2 years. Her main contact with services has been via the Addiction Service. She spoke of the various bereavements she has

NHS
Greater Glasgow
and Clyde

NHS Confidential: Personal data about a patient

Sharon McDonald

2

CHI:- 0501766405

suffered including the death of her brother in 2010, her sister's suicide by hanging in 2012 and the death of her ex-partner in 2015.

Her medical history includes type 2 diabetes and a recent hospital admission with Pyelonephritis. She told me she was previously Hep C +.

Her current medication includes Methadone 85mls daily, Trazodone, Simvastatin, Metformin, Insulin.

She has a background of polydrug misuse including Heroin, street valium, cocaine and cannabis. She is currently involved with the North Alcohol and Drug Recovery Service and sees her addiction worker 2 weekly. She recently spent a 6 month period in Turning Point to address her addiction issues. She denied recent alcohol use. She denied any recent involvement with the police and is not aware of any outstanding charges.

She described a troubled upbringing and spent time in care home institutions. She has two daughters aged 24 and 17. She told me both her daughter's fathers are deceased. She spoke warmly of her children and became animated when discussing her youngest daughter's forthcoming 18th birthday which she is looking forward to. She told me her oldest daughter has her own tenancy and her youngest lives with a carer. Sharon is currently unemployed and in receipt of benefits.

At interview she presented as drowsy but was easily rousable and was fully orientated. Her speech was spontaneous and her mood appeared reactive. Subjectively she described her mood as variable as is her sleep pattern and appetite, although she stated she felt hungry today and was looking forward to having her lunch. Her concentration appeared intact and she did not report any difficulties with her memory. There was no evidence of psychotic symptoms or thought disorder. She denied suicidal intent in relation to her actions and had no active suicidal ideation at interview today. She spoke of future plans and as mentioned earlier is looking forward to her daughter's birthday and she is also keen to obtain permanent tenancy which she thinks will help her in the longer term.

Sharon was keen to engage with her addiction worker on discharge. I have left a message for her addiction worker. She is also keen to return to Charra House once medically fit and I was advised by nursing staff that Charra House will send a taxi to collect Sharon once she is considered medically fit. She will also have a review by the Addiction Liaison Service prior to discharge. She denied suicidal intent in relation to her actions and appeared reactive at interview. She is aware of the relevant crisis service contact details if she requires them on discharge and she also agreed to make an appointment with her GP for review. I therefore advised she can be discharged once considered medically fit.

Yours Sincerely

Tracey Singh
Liaison Mental Health Nurse

Dear Dr. N Haque,

Sharon Elizabeth McDonald; D.O.B: 05 Jan 1976; CHI: 0501766405
House 12a, 20 Harriet Place, Glasgow, Lanarkshire, G43 1HRAttendance: Specialty - Gastroenterology; Clinic - SULGGA8-NURSE L GRAHAM LIVER CLINIC
THURS PM
Date and Time of Appointment - 12/01/2023 15:00**Clinical Comments:****DIAGNOSIS:**

1. Successfully treated chronic Hepatitis C with Maviret August 2022
2. Fibroscan normal September 2022 – liver stiffness 3.6 kPa, IQR 13%

I reviewed Sharon at the Nurse Led Liver Clinic on the 12 January 2023. She was accompanied by Diane McCormick, HCV Addiction Nurse.

It is now three months since she completed her course of treatment for Hepatitis C.

She felt well. She denied any drug or alcohol use.

I am pleased to say that her Hepatitis C PCR is negative which would indicate that her treatment has been successful.

I have tried to contact her by phone as we had agreed but I have been unable to get an answer. I have therefore written to her with this result.

Her LFT's and FBC are also within the normal range.

We will simply see her again in three month's time and hopefully we can then discharge her from clinic.

McDonald Sharon Elizabeth

Dear Doctor

Name/Address: SHARON MCDONALD, FLAT D9, 30 ST VINCENT TER, GLASGOW, G3 8UT

Patient ID/CHI: 0501766405

DOB: 05-Jan-1976

Date of Gartnavel General Hospital Appointment: 01-Mar-2016

Please find a clinic summary sheet attached.

Summary:

Many thanks for referring Sharon who is currently in Turning Point and was accompanied by her Support Worker, Vivian Reid. She has had Type 2 diabetes for over 6 years with poor control in the context of a chaotic lifestyle. She now seems more motivated to get her health sorted out. However, despite seeing a Dietitian and maintaining her weight, her blood sugars have all been in the teens with HbA1c rising from 76 last year to 93 today. She is currently on Metformin 1g BD and Gliclazide 80 mgs BD. She has never attended eye screening and I have given her a phone number to rearrange this appointment. She had positive urinary ACR last year, but this may be driven by osmotic symptoms. She is troubled by recurrent thrush and UTIs, as a result of hyperglycaemia.

Other drugs include Mirtazepine, Simvastatin and Methadone.

This lady needs insulin and I have suggested to the DSN to start her on Humulin-M3 twice daily. She should stop the Gliclazide, but stay on Metformin. She will be with Turning Point for at least a couple more months, and there is nurse support which will be a good opportunity to improve her diabetes control, relieving her symptoms and reducing risk of future complications.

Next review: 03/11/2016

Yours faithfully

Our Ref JMcP/PMM

Dear Dr Ho Chong Teck

Sharon McDonald - DOB: 05.01.1976 - CHI: 050 176 6405
Turning Point Scotland, 218 Bath Street, Glasgow G2 4HW

I was asked to review the above named patient on Ward 11A of the QEUH on 10 December 2018. This was in relation to the patient having been admitted on 7 December 2018 after having taken a recreational overdose of street Diazepam. The referral to our service was made in the context of her admission not stated overdose and the presumption was that had engaged in self harming behaviour.

I spoke to the patient who was in the company of her mother initially and she stated that there was not self harm intent and that it was very much recreational use of substances in the company of her friends. The patient, prior to my arrival, had been reviewed by the Addictions Liaison Team in the QEUH and follow up is in place by her own Community Addictions Team.

As previously stated, the patient had engaged in recreational use of substances and currently has follow up in place by the Community Addictions Team. The patient stated that she was happy to engage with community based services on discharge and that she had no overt concerns at this moment in time and that she most definitely had no self harm ideation.

I hope this patient can engage with the appropriate community services to reduce her ongoing substance misuse and thus reduce her chance of accidental recreational overdose.

Yours sincerely

Jim McPhie
Liaison Mental Health Nurse

Professional contacts summary

NHS Confidential: Personal data about a patient

Susanne Millar
Chief Officer

Alerts (history of violence, offending history)				
No alerts on EMIS.				
Reason for referral (referrer's reason[s] for requesting assessment)				
Mum had contacted GP reporting deterioration in Sharon's mood. Sharon then attended QEUH ED for physical injuries caused by assault previous night. Continued to voice suicidal ideation whilst in department.				
Reason for attendance (Description of individuals main concerns, their perceptions of difficulties and hopes from the service)				
Sharon reports deterioration in mood over past 4-5 weeks in line with relationship difficulties and increase in drug and alcohol use. Reports fleeting suicidal thoughts no fixed plan or intent. States she wants help from services to 'put herself back together'.				
Psychiatric history (previous/ongoing mental health problems, diagnoses and interventions, via GP or mental health services, and their impact; h/o self harm/attempted suicide; previous admission/detentions)				
Sharon is currently open to addictions services and is on ORT. She is also prescribed trazadone and propranolol for mood but reports not concordant with this. Reports historical self harm from the age of 15-23 but denies any recent DSH. Reports tied belt round her neck last night in an attempt to end her life.				
Current medication details as given by individual (prescribed, over-the-counter, complementary, drug allergies)				
Medication	Dose	Frequency	Duration	Response
Insulin				
Trazadone				
Propranolol				
Diazepam	2mg			
Methadone				
Allergies:				
Dispensing frequency:		Medication concordance:		Reports concordant with Methadone but only 'sometimes' takes other

					prescribed medication
Any children/ dependents under the age of 18?					
	Child 1	Child 2	Child 3	Child 4	
Name					
Age					
Address if different:					
Child protection concerns/agencies involved:					
Impact of mental health on parenting and/or potential risk to children:					
Description of functioning before current difficulties:					
Reports low mood for past 4-5 weeks and increase in substance misuse.					
Substance use: (caffeine, alcohol, tobacco, non-prescribed drugs, novel psychoactive substances)					
<i>Pattern of current use</i>	Denies any use of alcohol or illicit substance since Saturday, for around 4 weeks prior to this reports daily cannabis and street Valium use and regular although not daily injecting of crack cocaine. daily alcohol.				
<i>Impact on individual</i>	Sharon recognises the detrimental effect illicit substances have on her mood.				
<i>Previous history</i>	Longstanding history with illicit substances. Previous IV heroin user.				
Mental State Examination:					
<i>Appearance</i>	Sharon appeared fairly well kempt, wearing jeans, jumper and jacket appropriate to weather. Hair short and dyed black. Wearing face mask. Right arm in sling and left thumb in brace.				
<i>Behaviour</i>	Sharon engaged well in assessment, good level of eye contact, tearful at times. Good level of rapport built. Becoming disgruntled at end of assessment, unhappy was returning home, heard to be shouting and swearing to mum on phone about 'point in coming here'. Accepting of guidance re appropriate behaviour whilst in MHAU.				
<i>Mood & Affect</i>	Sharon's mood appeared low however reactive.				

NHS Confidential: Personal data about a patient

Susanne Millar
Chief Officer

<i>Speech</i>	Speech of normal rate tone and volume.
<i>Thought form</i>	No evidence of formal thought disorder.
<i>Thought content</i>	Sharon voicing thoughts of 'not wanting to be here' but no fixed plan or intent. Reports this has been caused due to build up of stressors recently, mainly difficult relationship and physical assault.
<i>Perceptions</i>	No perceptual abnormalities detected.
<i>Cognition</i>	Not formally tested however orientated to time place and person.
<i>Insight</i>	Sharon appears to have a good level of insight.
Carers / Next of Kin / others views, concerns and expectations from services	
Not present at time of assessment.	
Additional notes:	

Summary

Name: Sharon McDonald	CHI: 0501766405
Summary of assessment (Key findings, relevant negatives, initial formulation considering predisposing, precipitating, perpetuating and protective factors)	
<p>Sharon was referred by QEUEH ED following her attendance due to injuries caused by assaults over weekend. Sharon reports being hit by bottle on Saturday and then assaulted by male neighbour Sunday night. She has multiple fractures to arm and hand and has been treated for same. Whilst in department Sharon voicing suicidal ideation and therefore transferred to MHAU Leverdale by taxi and assessed by G Livingston and J Brookes (both senior unscheduled care nurses). On arrival at hub Sharon c/o low blood sugar so was given and accepted sandwich, biscuits and cup of tea. During assessment Sharon engaged well offering good level of eye contact. She reports becoming involved in a relationship with a new man around 4-5 weeks ago. This does not appear to have been a happy relationship and Sharon increased her drug use over this time. She reports to injecting crack cocaine and drinking</p>	

NHS Confidential: Personal data about a patient

Susanne Millar
Chief Officer

alcohol almost daily alongside daily cannabis and street Valium use. Sharon recognises the negative effect this has then had on her mood. Sharon reports fleeting suicidal thoughts for a number of years but worsened following assault by partner on Saturday and then neighbour on Sunday night. States had attempted to tie belt around her neck on Sunday night and her Mum found her so contacted GP this morning. Denies any current suicidal plan or intent. Spoke of looking forward to birth of her grandson due in couple of months, is planning to pursue charges against neighbour for assault. States wants support from mental health staff to 'put herself back together'. Reports a number of traumatic experiences throughout her life which she feels she would benefit from further support of. Encouraged to liaise with own team to explore options and get support in first instance to re stabilise self from use of illicit substances.

Overall impression of risk (CRAFT to be completed separately)

See CRAFT for full assessment. Denies any current suicidal plan or intent. Appears future focussed and eager to seek support from services.

Immediate actions (Including information provided)

Sharon will return to Mum's address tonight. To liaise with own team tomorrow.

Outcome of MDT discussion/ Treatment plan (including follow up arrangements if relevant)

Sharon to follow up with own team for further support. States she does not have a mobile at present and unable to give alternative contact number. Advised she will contact services herself tomorrow.

Primary Diagnosis:

Any additional diagnoses:

Suitable for psychological therapies (Y/N):

Dear Dr Haque

Re: Sharon McDonald DOB: 05/01/1976 CHI: 0501766405
Address: House 12 20 Harriet Place, Glasgow, G43 1HR

The above named was referred to Mental Health Assessment Unit (MHAU) Stobhill by Police Scotland and was assessed by telephone on 19th May 2022.

Assessment

Sharon had self-harmed by superficially cutting her arm. Her friend contacted the Police to express concern. Both Sharon and the Police state that the wounds do not need medical treatment. Sharon explained to the writer that she was upset due to being exploited by people online. She states that they are trying to involve her in prostitution rings and have taken money from her. She describes feeling vulnerable when at home alone and has been staying with her neighbour. She has already been advised to break off contact and advised that she already has a new sim card and is waiting for a new phone.

Recommendation

Sharon denies any ongoing suicidal planning or intent. She states that she is exhausted and plans to stay next door with her neighbour again tonight. She spoke with the writer about her planned stay in the Rehabilitation Unit and is looking forward to this.

Risk

No acute risks evident at the time of assessment.

Yours sincerely

Joanne Brooks
Senior Unscheduled Care Nurse

Dear Dr Haque

Re: Sharon McDonald DOB: 05/01/1976 CHI: 0501766405
Address: House 12 20 Harriet Place, Glasgow, G43 1HR

The above named was referred to Mental Health Assessment Unit (MHAU) Leverdale by Police Scotland and was assessed by telephone on 21st May 2022.

Assessment

Sharon has been involved with communicating with strangers online and has sent money to same. Sharon states that she has been saving up and now she has no funds left through transferring it to these people online. Police have identified emails sent from Sharon and also the emails they have been sending her. Sharon advises that she continues to put her old sim card back in her phone and continues to respond to these people. Sharon strongly advised to destroy the old sim card and to stop responding to them. She denies any thoughts to harm herself. She is experiencing some paranoid thinking and writer will advise her own team of same. Sharon is going to stay with her neighbour this evening and she has been encouraged to contact NHS 24 as opposed to the police, Sharon in agreeance with same.

Recommendation

ADRS team tasked. Sharon encouraged to utilise NHS 24.

Risk

No acute risk identified.

Yours sincerely

Gillian Heggie

Dear Colleague

Re: Sharon McDonald DOB: 05/01/1976 CHI: 0501766405
Address: House 12A 20 Harriet Place, Glasgow, G43 1HR

ADRS Care Manager	Janie Rooney
-------------------	--------------

This patient continues to attend the Alcohol and Drug Recovery Service and I reviewed them on 15.02.23.

Drug Use: On methadone 105mls and diazepam 30mg since Stabilisation Unit. Was on street valium prior to that. Feels a lot better now she is off drugs. Previously was injecting heroin and crack cocaine before she went into the stabilisation unit. Smokes weed a couple times a week. Smokes tobacco. Planning to engage with the SCRn - has their number. Discussed buvidal with patient as previously keen to switch over. Explained process to switch, how it works, risks/benefits. Patient not keen to switch especially given mental health issues. We also discussed slow reduction of diazepam prescription, however currently difficult time for patient due to upcoming anniversary of siblings. Agreed to re-visit and aim to start reducing from May.

Alcohol Use: Nil

Physical Health: Feels a lot better. Type 2 insulin dependent diabetes. Not well controlled. On metformin, mirtazapine, humulin M3, atorvastatin. NKDA.

Mental Health: Depression. Anxiety. Suffers from low mood, goes up and down. GP review last week - mirtazapine dose increased. Feels a bit low at this time of year as coming up to her sister's and brother's death anniversary. Mum and daughter, grandson all live close by and visit her, or sometimes she will visit them. Also has SAMH input. No Si/TOSH. Previously self-harmed by cutting her wrists, prior to being in stabilisation. Feels she would like input with counselling following her partner's death as never spoken about this.

Contact with Children: Not looking after any children.

Legal: Witness in a court case soon, but no other legal issues. Not driving.

Social: Lives alone. Partner was murdered 4-5 years ago.

NHS Confidential: Personal data about a patient

Susanne Millar
Chief Officer

- Care and Treatment Plan**
1. CM to arrange ECG, BBV and UDS update
 2. CM to refer patient for counselling
 3. CM to continue regular reviews and aim to start reducing diazepam by 2mg per month from May.
 4. Continue on methadone and diazepam currently as prescribed.

Please add or update the above ADRS prescribed medication(s) to your practice record as medication prescribed by specialist services.

Yours sincerely

Preeti Krishan
Medical Officer

Dear Colleague

Re: Sharon McDonald DOB: 05/01/1976 CHI: 0501766405
Address: House 12A 20 Harriet Place, Glasgow, G43 1HR

ADRS Care Manager	Jane Rooney
-------------------	-------------

This patient continues to attend the Alcohol and Drug Recovery Service and I reviewed them on 18/01/2024.

Drug Use:

On methadone 105ml daily and 20mg diazepam daily currently. Used pregabalin and street valium a couple of times in the past couple of months, last time was before Christmas. Sharon stated that she thinks she was sexually assaulted by a drug dealer after taking what he gave her thinking it was pregabalin. She became aware of this event occurring after experiencing flashbacks. This happened with the same guy last summer too. He was sleeping with another girl and she knows to avoid him now. She does not want to report this and can deal with it herself. Discussed plans for BBV at next contact.

She also used some Dihydrocodeine 6 weeks ago but not since then. Denies any heroin use and has not used opiates since taking DHC. She is not wishing to use on top as aware of the dangers but feels impulses to do this sometimes due to poor mental health. Worries about risk of OD as she has overdosed in the past and family members have died through OD. Drug dealers across the road from the pharmacy so tends to go early to avoid seeing anyone or being tempted. Struggling at the moment and worried about resulting in relapse to illicit drug/opiate use. Initially she was requesting increase in methadone by 10ml. However after some discussion, she said that she is stable on the dose and was just looking for something to help her mental health. We agreed to keep this under review. She has been stable on this dose of methadone for years and she isn't using opiates. She understands the dangers of using and harm reduction advice was given today. She has a naloxone kit at home. She smokes weed everyday normally, but has not been using it recently.

Alcohol Use:

No alcohol.

NHS Confidential: Personal data about a patient

Susanne Millar
Chief Officer

Physical Health

History of IDDM (type 2), depression.

Feeling shivery, low energy, tired, low appetite, occasional vomiting and congested for past month, which is not improving. Seen at GP practice last week but states GP didn't check her and nurse was unable to take bloods after which she refused further attempts.

Has had one hypoglycaemic episode over the past month but snacking to avoid this happening again and has also reduced her insulin a little to accommodate the reduced appetite. Needs to speak to GP about this.

Changed mirtazapine to sertraline last week too. She feels she can't sleep now and has been sick with this so would rather be on mirtazapine. Also on humulin M3, metformin, atorvastatin, sertraline. NKDA.

Mental Health

Feeling down with increased anxiety for a couple months. Feels diazepam detox is making things worse as she has been suppressing certain thoughts for years. Not asking for dose increase today. Feels changing back to mirtazapine and getting support for mental health is what she needs. Sharon also feels she has mental health issues but has never had a diagnosis, as people assume it is related to drug use. Partner's son (step son) committed suicide at New Years, which has further dampened her mood. Will not be going to funeral as can't cope with it. She has suffered a lot of bereavements over the years. She has no energy and recently spending all day in bed including symptoms of anhedonia. Sharon has had TOSH but would not do anything due to her kids and mum. She is scared of dying and did not express any suicidal ideation or plans. She is keen for help now and happy she has reached out to services. Crying during initial consultation but during call back later this afternoon, she sounded much better and relieved to have reached out for support.

Contact with Children

Has contact with her grown up daughter and grandson, does not look after her grandson.

Legal:

N/A

Social:

Daughter works and has a 2 year old. She comes to visit but Sharon struggling to go out and not wishing to see them. Mum is not keeping too well either but they all came to visit last week as they were worried she had died due to her lack of contact. Has not been answering the phone to people. SAMH visit twice a week, but she has not been letting them in at times as embarrassed at the condition of her home. Has not been cleaning and has let things go.

NHS Confidential: Personal data about a patient

Susanne Millar
Chief Officer

Care and Treatment Plan

1. CM to liaise with SAMH to increase support to twice weekly for patient over the next few weeks
2. CM to refer for Mental health review
3. I called GP practice asking them to arrange physical health review today if possible and also to discuss antidepressant medication with patient - they have contacted her.
4. Continue methadone 105ml and continue diazepam 20mg. Detox paused at present.
5. CM to arrange home visit for UDS and BBV and review of patient in person. Offered patient to come and see me tomorrow but said she would struggle.

Please add or update the above ADRS prescribed medication(s) to your practice record as medication prescribed by specialist services.

Yours sincerely

Preeti Krishan
Medical Officer

Dear Dr Haque

Re: Sharon McDonald DOB: 05/01/1976 CHI: 0501766405
Address: House 12A 20 Harriet Place, Glasgow, G43 1HR

The above named person was referred to the Mental Health Assessment Unit (MHAU), Leverdale by Police Scotland, and was assessed by telephone on 03/02/2024.

Situation

Forty eight year old lady referred to MHAU by Police Scotland today (incident number 2306). Sharon had voiced thoughts to end her life to SAMH who phoned the Police for a welfare check.

Assessment

Sharon was slightly slurred in her speech but denied being under the influence of any substances- was vague when asked about current drug use. She reports that she has been struggling with her mental health for around a year and a half, stating that "everything is out the window". Sharon feels that she has been ruminating and has lost all routine and structure which is causing a deterioration in her mood- she feels that she has an underlying mental illness which has never been addressed because her addiction issues have overshadowed everything and is keen for a diagnosis. Sharon described numerous recent stressors including losing her step-son to suicide earlier this year and having potentially been raped by a man who gave her drugs a few months ago. Additionally, she discussed several traumas throughout her life including having been in homeless accommodation for three and a half years, having found a murdered man's body which had been lying for a week, losing both her brother and sister and having accidentally overdosed on street valium.

NHS Confidential: Personal data about a patient

Sharon also has ongoing stressors in relationships with both her own mother and her children who she feels only see her addiction issues. Her daughter has informed her that if she presents at her door then she will phone the police which Sharon understandably finds distressing as she wishes contact with her young grandson. Sharon reports that she has lost her bank card and is struggling to buy food and necessities as a result. She is not attending to her diabetic care and states that she has hardly eaten in five days. Her concentration is poor as is her self-care at present and Sharon reports having no energy to attend to her usual tasks. Sharon feels she has no one to support her and was derogatory towards SAMH who she states refuse to support her with her mental health. Sharon reports that when she begins to ruminate on her past, the emotional pain this causes leads to her feeling angry and that this triggers thoughts of self-harm and of suicide. She denied clear plan or intent to act on these thoughts and was keen for help, stating that she has never had anyone to speak to about her difficulties. Sharon was objectively and subjectively low in mood and became tearful at times. She was otherwise appropriate in conversation though, as previously noted, did sound under the influence and spoke over writer on several occasions. She was tangential at times but was coherent in conversation and not evidently thought disordered. Sharon describes ongoing thoughts to harm herself as noted above though was clear that she did not wish to act upon these. Her cognition was not formally assessed but appeared intact and she demonstrated good insight into her current difficulties.

Recommendation

Referred to CDRS. Email sent to own team asking that they make contact on Monday. Encouraged to utilise NHS24.

Risk

At risk of harm or death due to potential illicit substance misuse.

Yours sincerely

Aimee Middleton

Unscheduled Care Nurse

Dear Dr Haque

Re: Sharon McDonald DOB: 05/01/1976 CHI: 0501766405
Address: House 12A 20 Harriet Place, Glasgow, G43 1HR

Your patient was in contact with the Mental Health Assessment Unit on (date/time) and was assessed via the telephone by (nurse name and title).
 Please see details below.

Situation	Referral from Police Scotland after Sharon had contacted them to report an assault from her brother and daughters boyfriend. Whilst Police were in attendance, Sharon voiced thoughts of suicide.
Background	48y/o lady open to the South ADRS Team - on ORT, 105ml Methadone. Previous history of DSH and overdose, previously attempted to tie a belt around her neck.
Assessment	I spoke with Sharon via the telephone this evening, she engaged well in assessment process. Sharon informed me that she was 'not good' – she reported that trauma from her past had been triggered today and she has never been shown how to manage her thoughts, feelings and trauma memories which she finds distressing. Sharon told me that she had phoned Police today due to being assaulted by her brother and

CHI: 0501766405

Page 1 of 3

03/05/2024

Susanne Millar
Chief Officer

	<p>daughters partner. She states that they 'spat on me, called me junkie, they were pushing me'. She reports that her mum was present during this assault and was 'allowing it' as she was just standing there as if she was scared. Sharon reports that her family are painting her out the be the bad one, she reports telling her brother; 'You're dads a beast for what he done to me as a child'. She feels that her brothers assault on her today triggered memories of abuse from step-dad. Sharon reports that her daughters partner has not been letting her see her grandson, Kian. She states she has only seen him 3 times in about 6 months. Saw him today through window but daughters partner came downstairs and attacked her. Sharon reports that she is 'unsure' when she last had any illicit drugs and describes being fully compliant with her prescribed Methadone and Mirtazapine. She reports feeling like she needs something to 'calm her down' and does not feel that 2mg Diazepam twice daily help. Sharon reports that she recieves twice weekly support from SAMH but that she doesnt find some of the support workers particularly helpful. She reports that support worker Eileen, who is there at the moment, is supportive and helpful. Sharon reports that she was at her GP the other day who informed her that she was 'underweight' and 'heading into an early grave' due to her poorly controlled diabetes. Sharon reports having an appointment with the diabetes specialist next Tuesday which she plans to attend.</p> <p>I asked Sharon about any current suicidal thoughts, plan or intent; she informed me that she had experienced suicidal thoughts earlier due to feeling triggered by the assault but that at present she has calmed down and has no ongoing suicidal ideation, plan or intent. Sharon was future focused and plans on attending her housing and Diabetic appointments next week. She was also going to go to Aldi after our phone call to get some shopping.</p>
<p>Recommendation</p>	<ul style="list-style-type: none"> - Discharge from MHAU caseload - Encouraged Sharon to have something to eat - Sharon encouraged to contact services if required - I will make own care team aware of todays presentation.
<p>Risk</p>	<p>03/05/2024 - No current suicidal ideation, plan or intent. Not invited for face to face assessment at Leverndale MHAU int he absence of acute risk and Sharon forward planning; keen to get to Aldi for her shopping.</p>

Regards

Dear Dr C Ho Chong Teck

Re: Sharon McDonald
Address: 206 Kent Road
Glasgow
G3 7HD

CHI Number: 0501766405

Speciality: Podiatry

It would appear from our records that:

- Your patient has not responded to our recent letters inviting them to arrange an appointment.
- Your patient has indicated that they no longer require an appointment.
- Your patient has refused two reasonable offers of appointment.

We therefore assume that your patient no longer needs this appointment. We have removed their name from the waiting list. This is in line with NHS Greater Glasgow and Clyde's Did Not Attend Policy.

If you still wish your patient to be seen, we will require a new referral.

Yours sincerely

Dear ,

Sharon McDonald; D.O.B: 05/01/1976; CHI: 0501766405
Turning Point Scotland, 218 Bath Street, Glasgow, G2 4HW

GP Action Required: Referral to the Continence Service if not already done

Presenting Condition: Low back pain

Physiotherapy Comments:

Onset of symptoms - 3 year history

Mechanism of onset - Gradual onset

Diagnosis - Mechanical low back pain / general poor mobility

Treatment - Exercise programme

Further Info - Poor compliance with exercise programme and generally inactive at this time as she says she can't get out much.

Discharge Outcome:

The patient completed a course of treatment and symptoms are now:

Unchanged.

The patient has an exercise programme to continue with self management.

Dear Dr. C Ho Chong Teck,

Sharon McDonald; D.O.B: 05 Jan 1976; CHI: 0501766405
Turning Point Scotland, 218 Bath Street, Glasgow, G2 4HW

Attendance: Specialty - Podiatry; Clinic - MLGNSR178-PODIATRY NAIL SURGERY THURSDAY
 Date and Time of Appointment - 01/02/2018 11:00

Clinical Comments:

Sharon attended a nail surgery appointment this morning with her support worker. On arrival Sharon appeared quite distressed, pale, sweaty and very anxious. Support worker explained that Sharon was not really sure why she was here and what we were going to do. S- I have had bother for ages with my both big toenails. I seen a female podiatrist in Partick a couple of years ago and she cut them back and it really helped for a long time. The last podiatrist I seen had mentioned me getting my nails off but I don't really know what that means. I'm really worried about this and I haven't been very well recently. I don't know if I want it done. O- Both 1st nails involuted with heavy onychophosis at both borders. Last HbA1c 88 mmol on 12/1/18. A- Discussed the nail surgery procedure, approximate healing times, self management of dressings with Sharon. Taking into consideration Sharon's level of anxiety, her recent health problems and her current HbA1c we decided not to continue with nail surgery at this point. Conservative treatment given - Both 1st nails cut back, filed and cleared. All lesser nails cut and filed and advice given regarding filing nails between treatments. P- Continue with conservative treatment at this time. E- Patient willing to consider nail surgery at a later date when she physically feels better to proceed. Happy with outcome of appointment today. R- Appointment given at William St clinic for review on 21/3/18 contact if problems prior to this date. Alma Rae, podiatrist

Electronically Signed: ,

NHS24 Summary

Symptoms: referred from A & E - patient had been seen by them earlier but now requires prescription for unrelated medications

Remarks:

BP:	PR:	Temp:
Doctor/Nurse: Winchester,Victoria(A32)	Follow Up: No Follow Up -	

Consultation(s):

By: Winchester,Victoria(A32)	Start 04/10/2014 23:14	Finish 04/10/2014 23:29
-------------------------------------	-------------------------------	--------------------------------

Clinical Assessment Details:

Started- 04/10/2014 23:14:11

Finished- 04/10/2014 23:29:45

Initial Assessment**History**

Appears intoxicated. States has been taken to Loch Lomond by "friend" who physical and mentally abused her. Perpetrator is now in jail, police aware of situation. Attended A&E earlier for suturing to scalp wound. Now in looking for meds, states on methadone, requesting same. Has been unable to attend pharmacy to collect methadone today, has also lost keys to house. Staying with mum tonight.

Examination

Report Statistics:

Report produced by Adastra Version 3 - 05/10/2014 00:31:20

NHS Confidential: Personal data about a patient

patient within 1 Hr

Triage details:

History Pt takes 22 units humalog bd. Has been on this dose for 2 years. Due diabetic review in 20 days.

Has been staying at turning point for 10 days following hospital d/c - renal impairment.

Last BM reading 31. was 27.8. has been high 20's for 4 days. (lowest reading 14) is eating well.

Urine dipped every day for ketones and tongith 1+. had been going to ask Gp to review insulin on monday but feel it may be better to do now.

Given well and has biphasic insulin only no benefit in dose tonight inc to 26 units mane and if Bm's still high tomorrow I think this could be her BD dose. Check with usual Gp.

HOME VISIT WITHIN 4 HRS... Outcome: Home Visit within 4 Hrs

Consultation details:

NHS Confidential: Personal data about a patient

History - 47F, Unsure why put as a HV as patient is clearly capable. Hx noted. As I attended home patient took a long time to enter and when knocked again shouted "you cant expect me to open that quick, I am putting my top on". On opening door, patient is clearly intoxicated and has a very strong smell of cannabis which she admits to. Due to the overwhelming smell and state I decided not to enter the house. Pt briefly informs me has cut on left heel which she has discharge from and wants Abx and also LUTS as described.

Examination - Intoxicated, very strong smell of cannabis.

Diagnosis - Cut on left heel, ver small, no spreading erythema or discharge

Diagnosis - UTI and superficial cut

Treatment - Offered pt to be seen in PCC. Pt declines. Offered Script from outside door based on given Hx. Further history or exam not done as not appropriate in communal area. Pt follows me to the car to get a starter dosage of Nitrofurantoin 100mg M/R (?potential pregnancy) and script for remaining balance as well as Fusidic acid cream. Patient however films me on her mobile phone on approach to the car as well as driver Stuart Dunsmuir.

Barr Street,
Glasgow.

Dear Dr. Muir,

RE: SHARON McDONALD, 14 WALKMILL STREET, G46 8EN
DOB: 05.01.76

This lady was admitted in early pregnancy with hyperemesis and having earlier been referred for consideration of termination of pregnancy. She remained miserable despite IV fluids and following discussion with the Social Work Department and the Women's Health Clinic she attended the Day Surgery Unit and had a suction termination of pregnancy at about 11 weeks gestation on 24th September and she was keen to go home that night. a Flagyl suppository was given as prophylaxis.

I am afraid it is not clear what contraceptive plan has been made for Sharon and can you please check up on this at the next opportunity. She remains on Methadone as before.

Yours sincerely,

Stewart Pringle

Dear Dr Robertson

Sharon McDonald DoB 05.01.76
21 Riverbank Street, Glasgow

Your patient was admitted on 16 November 1999 at about 11 weeks gestation with symptoms of hyperemesis. As you will be aware she is a previous drug abuser on Methadone and Nitrazepam. Her symptoms settled the following day and a scan confirmed an on-going pregnancy of 12 weeks gestation. She was keen to go home and was discharged on 17 November 1999.

Yours sincerely

Dear Dr Robertson

Sharon McDonald - DoB 05.01.76
21 Riverbank Street, Glasgow

This girl has failed to keep her follow up appointment at the ante-natal clinic having been in with us in November at around 11 weeks. I wonder if you could investigate the situation for me and let me know whether she is still pregnant and requiring to be booked at the Southern. If she is of course I would be delighted to send for her again.

Best wishes.

Yours sincerely

Dear Dr. Copeland

Re: Sharon McDonald - DOB: 5.1.76
146 Dykemuir Street, Glasgow G21 4LG

Many thanks for referring your patient for confinement at this hospital. I understand from the Southern General Hospital that her EDD is 20.2.94. An ultrasound scan today showed a baby of a good size with normal liquor and normal activity. Blood pressure was 110/60. She returns to us in four weeks time and we would be grateful if you could see her in a fortnight. I have written to Dr. Hawthorn at the Southern General for any extra details which may be of help to us.

Best wishes
Yours sincerely

Dear Dr Muir
 Re: Sharon McDonald, d.o.b. 5/1/1976
 31 Iona Court 14/6 G51 2ET

Thank you for referring Sharon McDonald. Although she was first sent an appointment in November and we have made repeated attempts to get her to attend, we did not see her until 29/2/2000. I understand in the interim she has been in the Southern General on several occasions with vomiting and urine infections. She has not been booked for delivery there but has had a scan and was told that her estimated date of delivery was 28/5/2000. Her main problem when we saw her last week was vomiting which had become a lot worse over the last few days and she was unable to keep down her methadone. She was very distressed and said she had not been able to sleep for several nights. We arranged for her to be admitted to the hospital. While in hospital her vomiting settled completely, she only remained in two days and was discharged home at her own request on 2/3/00. We have booked her for delivery at the Royal Maternity Hospital and have taken over her methadone prescribing.

Sharon mentioned that she has had thrombosis in both her arms in 1993 when she was admitted to Stobhill Hospital. I see from your letter she had self-inflicted lacerations in November 1993. I wonder if you could let me know if there is any history of significant deep venous thrombosis or not? Thanks for your help.

Yours sincerely,

Dr Shelagh King
 Staff Grade Obstetrician

Dear Dr Dunn

SHARON MCDONALD - DOB 05.01.76
12 NEWARK DRIVE, GLASGOW G41 4QE

As you know this girl was admitted early in her pregnancy with a history of vomiting in the middle of July. An ultrasound examination showed an ongoing singleton pregnancy of 8+ weeks. She returned to clinic today for formal booking at 15+ weeks by dates and scan.

Her estimated date of delivery is 21 February 1994. Her blood pressure today was 100/60, and urine analysis was negative.

She has been booked for shared care and is returning to the clinic in 13 weeks. I have asked her to attend surgery monthly in the interim. We have checked her Serum AFP today.

Kind regards.

Yours sincerely

Speech & Language Therapy – Swallowing Report

Date of report: 11/07/2017
 Client's name: Janet Wilson
 Client's address: Hogganfield Care Home, 1791 Royston Road,
 Glasgow G33 1AF

Date of birth: CHI:

Prescription required: Yes – 175g tins of Nutilis Clear thickening powder

Reason for referral

Patient referred for assessment of swallow.

Background information

Referral received from GP as Care Home staff have reported noticing resident having difficulties and coughing when eating and drinking.

Current diet and fluid intake prior to SLT assessment: Normal Fluids & Normal Diet (although description of consistencies chosen are more equivalent to a Texture 5/fork-mashable Diet).

PMHx: CVA (Left-sided weakness); Dementia; Diabetes.

Consent

Assessment completed in best interest. Fully compliant with assessment.

Summary of assessment

OROMOTOR Assessment: Resident was able to follow instruction re examination. Upper dentures in situ, no lower dentition; mild/moderate dysarthria evident - fully intelligible with listener care; slight weakness on left side of mouth; dry swallow of saliva appeared within normal limits; able to produce an effective volitional cough on request.

(independent for oral intake, although needs some assistance with use of cutlery)

Your patient was seen at the clinic on 18/03/2013 and at this visit, LLETZ (Loop Excision) treatment was performed.

No smear was taken.

A LLETZ biopsy of the cervix was taken and the result was CIN2.

Your patient has been treated for High Grade CIN and has now been discharged from the colposcopy clinic. I recommend that a follow up smear should be taken in 6 months time.

Your patient has been advised of the results and that she will be invited to attend for her next smear test. Your patient will therefore appear on your Recommended Call List (RCL) on SCCRS in due course.

Yours sincerely

	Address	D9 30 St. Vincent Terrace, Glasgow G3 8UT

I regret to inform you that we have been unable to persuade your patient to attend the colposcopy clinic. No further appointments will be arranged for her to attend the clinic. I would appreciate it if you could encourage her to attend.

I have written to her asking her to contact you or alternatively to contact the clinic directly and we will do our best to try and accommodate her.

If she has changed address or moved from your practice I would be grateful if you could let us know.

Yours sincerely

Dr C Mackie

Consultations

Consultations	
<u>16/01/2018</u>	<u>Dr Chris Ho at Woodside Health Centre</u>
History	asking about podiatry for nail avulsions, prev seen William Street podiatry service. has diabetes. also prev DNA with incontinence team due to change of address. in with addiction worker. using street whites 30/day
Comment	advised can contact prev podiatry service for nail issues. also req sphere clinic referral again, had changed address. refer back. bloods if not settling. Glucose - Requested, Amylase - Requested, Vitamin B12 - Requested, Bone Profile - Requested, CRP - Requested, Urea and Electrolytes - Requested.
Test Request	Ferritin - Requested, Gamma GT - Requested, Liver Function Tests - Requested, Lipid profile (inc. HDL) - Requested, Folate - Requested, Thyroid function tests - Requested, ESR - Requested, Full Blood Count - Requested, HbA1c - Requested
<u>11/12/2018</u>	<u>Dr Chris Ho at Woodside Health Centre</u>
History	seen at 450m. says feeling better. has ate and drank BM 13.8. Urine ketones/pmt/gluc ++. yet to pick up antiemetic.
Comment	supportive chat. new px given. worsening statement again
<u>11/12/2018</u>	<u>Mrs Cathie Paterson at Woodside Health Centre</u>
Comment	Discharged from hospital last night after overdose, nauseated and vomiting through the night. Says OCH attended and got an injection to stop sickness also a prescription for pills, has put prescription into pharmacy unsure of what. (no OCH slip available as yet) Cap glu 16.5mmol/L (glucose meter given) Urinanalysis +++ketones, ++ protein, +++haemolysed blood BP 129/88 pulse 92bpm/req. Got quite a fright being in hospital. has taken 26 units of insulin this morning. fluids and diet encouraged. Feels OK at present, no pear drop smell from breath. Says was not eating in hospital before she came out. Will go home for some lunch and return for review with GP this afternoon. Knows to get seen urgently if unwell (support worker Lauren Barbour present) ? menses due - follow up non visible haematuria.
<u>11/10/2018</u>	<u>Ms Lesley Dunn at Woodside Health Centre</u>
Comment	Don't see much need to check blood glucose as unlikely to have a typo.
<u>23/08/2018</u>	<u>Ms Lesley Dunn at Woodside Health Centre</u>
Comment	Removed Freestyle Optium test strips as not Pomulary. Give Glucomen Area or GlucoRx Nexus meter at next visit.
<u>06/08/2018</u>	<u>Dr Chris Ho at Woodside Health Centre</u>
History	abscess R groin area. just went into supported accomodation. prev in homeless shelters. using street valium again. not eating regularly. still using diabetic meds
Comment	says her CAT worker aware of street valium use. angling for detox but declined. abx, supportive chat
Medication	Clarithromycin Tablets 500 mg 14 tablet ONE TABLET TWICE DAILY
<u>18/04/2018</u>	<u>Dr Chris Ho at Woodside Health Centre</u>
History	low mood. sister's anniversary of suicide 8 yrs ago. has been misusing street drugs - whites, heroin, crack/cocaine, last few weeks seen CAT team today but no change to methadone. reluctant to increase. nil else to offer. clearly methadone and trazodone not working. not sure what she wants. maintain meds
<u>07/02/2018</u>	<u>Mrs Joanne Evans at Woodside Health Centre</u>
History	attending initially alone - insists she has a UTI - called support worker Dunja Stanzel for some clarification
Examination	ONE - BP reading apyrexial, T 36.2 C. Blood pressure reading 112/75 mm Hg
Comment	CHE - pulse rate 98 beats/minute SpO2: 98%, wax in right ear canal, tender on advance of ear piece, membrane not visualised, urine dipped. NAD most convoluted, disfunctional consultation - not happy with any treatment she ever received. be it in hospital, tuning point etc. etc and there was appear to be a problem with compliance - get basic bloods and take it from there
Medication	Amoxicillin Capsules 500 mg 15 CAPSULE ONE TO BE TAKEN THREE TIMES A DAY

18/10/2017 Dr Chris Ho at Woodside Health Centre
seen cathie. BM now high, Ketones +++, has had N&V today. also had insulin today. been drinking sugary drink. lives alone. ?DKA, refer medics. blue light arranged

History O/E - BP reading
Blood pressure reading 110/70 mm Hg

Examination

18/10/2017 Dr Chris Ho at Woodside Health Centre
was at 218 yday and BM was down and ketones up.

History Urine dipstick test prot/blood/ketogluc

Examination abx

Comment

16/10/2017 Dr Chris Ho at Woodside Health Centre
urinary incontinence, headache and vomiting, not eating, not taken insulin. says meter ran out of batt so not checked BM either. advised simple measures tonight. come in tomorrow am for meter/batt change, and with urine sample.

History

16/10/2017 Mrs Ann Giggins at Woodside Health Centre
Sharon called to ask if Cathie would give her a call, she said that she has had a pounding headache since Saturday and was vomiting through the night, I passed this to Cathie.

Comment

22/09/2017 Mrs Ann Giggins at Woodside Health Centre
Sharon called to say that she has a blister on her leg that is about to burst, she had called yesterday about this and was going to see the gp today. She called at 5.45 looking for the COH number for advice. I told her if it was going to burst she should make her way the A/E - the pharmacy had told her it was serious if it burst

Comment

11/09/2017 Mrs Joanne Wilson at Woodside Health Centre
Letter sent with appointment for diabetic clinic

Comment

04/09/2017 Mrs Joanne Wilson at Woodside Health Centre
Called to say she had an abscess in her arm, advised to come in and be seen. CP

Comment

17/08/2017 Dr Chris Ho at Woodside Health Centre
Urine dipstick test nausea, sweaty, leu/nit. also using street heroin/diazepam 8 months. heroin injecting and smoking, attending CAT and on 75ml methadone. last used last week. worker advised increasing dose but she has resisted. advised maybe appropriate.

History

19/08/2017 Mrs Cathie Paterson at Woodside Health Centre
DNA spoke to her yesterday and she agreed to this appointment.

Comment

09/08/2017 Dr Chris Ho at Woodside Health Centre
2/52 pains both legs, grandfather RA, no injury/trauma. told sciatica in past but never seen physio. advised this. also depressed still in day, note housing issue. has some osteophytes of knuckles for many years... bloods as below. also amenorrhoeic for 3/12 but negative preg test last week. mother early menopause aged 37. given as below.

Comment	Advised to attend for diabetes review in a few weeks, has failed to attend last 2 hospital appointments, hospital will send her out another appointment.
Test Request	Glucose - Completed, Urea and Electrolytes - Completed, Liver Function Tests - Completed, Lipid profile (inc. HDL) - Completed, Thyroid function tests - Completed, HbA1c - Completed
30/11/2016	<u>Dr Chris Ho at Woodside Health Centre</u>
History	ran out of lancets to test bms still low despite trazodone 100mg, agreed short course anxiolytic only, myriad of diarrhoea, cold, urinary symptoms, for mssu
Medication	Bd-Microfine + Lancets type a, 0.30 mm/30 gauge 50 lancet USE AS DIRECTED Diazepam Tablets 2 mg 21 TABLET ONE TO BE TAKEN THREE TIMES A DAY WHEN REQUIRED
09/11/2016	<u>Dr Chris Ho at Woodside Health Centre</u>
History	frequency/nocturia, vomited last week, 2/52, also thinks trazodone not helping, bad time of the year, anniversary of some deaths, not sleeping, more anxious.
Examination	Urine dipstick test protein ++
Comment	increase trazodone, n1/12
Medication	Trazodone Hydrochloride Capsules 100 mg 28 capsule ONE TO BE TAKEN EACH NIGHT Trimethoprim Tablets 200 mg 6 TABLET ONE TO BE TAKEN TWICE A DAY
20/06/2016	<u>Mrs Judy McAdam at Woodside Health Centre</u>
Comment	Did not attend diabetic diabetes appointment, Laura Gillespie, Dietitian
03/06/2016	<u>Dr Chris Ho at Woodside Health Centre</u>
History	citalopram making her nauseas, asking for meds in dosettebox as poor memory..... stopped propranolol too.
Comment	try trazodone instead, agreed dosettebox
Medication	Trazodone Hydrochloride Capsules 50 mg 28 capsule ONE TO BE TAKEN EACH NIGHT
25/05/2016	<u>Dr Chris Ho at Woodside Health Centre</u>
History	see discharge from Turning point, 'up to high dose' apparently, complaining that they didn't prescribe her benzos/sleeping tabs, stopped taking miz 2:7 ago anyways, says low and wants sleeping tabs, declined this, on methadone, offered to change antidepressant to sertraline as she thinks miz not helping anyways, lots of unfortunate events in her life, dissatisfied that not getting any benzos and walked out
Medication	Citalopram Hydrobromide Tablets 20 mg 28 TABLET ONE TO BE TAKEN EACH DAY Sertraline Hydrochloride Tablets 50 mg 28 TABLET ONE TO BE TAKEN EACH DAY
19/01/2016	<u>Mrs Cathie Paterson at Woodside Health Centre</u>
Comment	DNA diabetes review.
15/12/2015	<u>Mrs Joanne Wilson at Woodside Health Centre</u>
Comment	DNA Diabetic clinic at surgery
04/11/2015	<u>Dr Cheryl NG at Woodside Health Centre</u>
History	Due Px of diazepam, discussed reducing dose, go down to 2mg x 4 daily, not keen, would rather wait to see Dr Muir next week, keep on same dose meanwhile
04/11/2015	<u>Mrs Cathie Paterson at Woodside Health Centre</u>
Comment	OF - weight 74.5 Kg Blood to lab, (lab did not process last sample) get results and Sharon agrees to referral to diabetes consultant.
Test Request	Urinanalysis = no abnormality HbA1c - Completed Urine Albumin (ACR or 24 hour) - Completed
28/10/2015	<u>Dr A. J. Muir at Woodside Health Centre</u>
Problem	Review
History	Feels a bit better
Comment	Continue diazepam for another week
22/10/2015	<u>Mrs Cathie Paterson at Woodside Health Centre</u>
