Dear HELEN KANE

## OCT Surveillance Appointment Booked

Some people with diabetes can develop a condition affecting the eye called retinopathy, which can lead to partial loss of vision or possible blindness. Research has shown that regular screening for retinopathy in people with diabetes, and treatment for those affected, can reduce the risk of people losing their sight.

An appointment has been made for you for your OCT screening as follows:

Time:	<b>1:30 PM</b>
Date:	<b>Wednesday, 1 July 2026</b>
Venue:	<b>QEUH OCT Clinic, QEUH OCT clinic, Diabetic Eye Screening - OCT Clinic, Ophthalmology Outpatient Dept - Area I, Queen Elizabeth University Hospital - First Floor, 1345 Govan Road, Glasgow, G51 4TF</b>

P000N

It is important that you attend this appointment. If you find that you cannot attend at this time, please let us know as soon as possible on 0141 451 5424 between 9.30am and 4:00pm - Monday to Friday. We will then be able to re-arrange your appointment.

We may need to put eye drops into your eye(s), in which case you should note that your vision could be blurred for 4 - 6 hours, therefore it would not be advisable to drive after your appointment. If you wear spectacles, please remember to bring them with you.

If you have any new additional requirements for example; progressing mobility issues please contact 0141 451 5424 in advance of the appointment.

You may receive a text appointment reminder to your mobile. We are introducing this service currently. You can opt out of this service by calling 0141 451 5424

Yours sincerely

Greater Glasgow & Clyde Diabetic Eye Screening Service
