

Affiliate Submission API Documentation

Endpoint

POST `https://r2r.theclaimsystem.co.uk/api/v1/affiliate/{affiliate_id}`

This endpoint allows affiliates to submit claimant details, including personal information, contact details, and address data.

Authentication

Requests must include the following header:

- `API-KEY: {your_api_key}`
-

Required Headers

Accept: `application/json`
Content-Type: `application/json`
API-KEY: `{your_api_key}`

Request Body

The request body must be a JSON object with the following fields:

Root Fields

Field	Type	Description
<code>first_name</code>	string	Claimant's first name
<code>last_name</code>	string	Claimant's last name
<code>date_of_birth</code>	string (YYYY-MM-DD)	Claimant's date of birth

phone	string	Phone number
email	string	Email address
client_ip	string	IP address of the client submitting the form
user_agent	string	Browser User-Agent string
session_id	string	Unique session identifier
addresses	array of objects	Array of detailed address information (see below)

Address Object Fields

Field	Type	Description
line1	string null	Address line 1
line2	string null	Address line 2
line3	string null	Address line 3
line4	string null	Address line 4
buildingName	string null	Building name - required if buildingNumber not set
buildingNumber	string null	Building number - required if buildingName not set
thoroughfare	string	Street name
townOrCity	string	City or town
district	string null	District
postcode	string	Postal code

Example Request

```
{
  "first_name": "John",
  "last_name": "Doe",
  "date_of_birth": "1985-06-20",
```

```
    "phone": "07503 456789",
    "email": "john.doe@example.com",
    "client_ip": "203.0.113.42",
    "user_agent": "Mozilla/5.0",
    "session_id": "session_001",
    "signature": "signature base 64",
    "address": {
      "buildingNumber": "12",
      "thoroughfare": "High Street",
      "townOrCity": "London",
      "postcode": "EC1A 1AA"
    }
  }
```

OTP Verification Endpoint

POST

https://r2r.theclaimsystem.co.uk/api/v1/affiliate/{affiliate_id}/otp

This endpoint is used when the initial affiliate submission response returns a status of `authentication-required`.

You must provide the `challenge_id` returned by the previous API response along with the one-time code entered by the user.

Request Body

Field	Type	Description
<code>challenge_id</code>	string	The challenge identifier returned from the previous API call
<code>otp_code</code>	string	The one-time passcode provided to the user

Example Request

```
{
  "challenge_id": "chall_1234567890",
  "otp_code": "483920"
}
```

Response

The endpoint returns a JSON response indicating whether authentication is successful or if further steps are required.
