Administration Consultation 5/7 hx general malaise, shivery/ sweaty, cough with minimal sputum, sore throat, loss of appetite, some chest tightness while coughing, cough worsening pre-existing back pain, no sputum, no haemoptysis, no calf tenderness, no ankle swelling, no pnd/ orthopnoea, no clamminess, no crushing chest pain, no presyncopal features, constant frontal headache, no headache red flags, no visual disturbance, maintaining hydration with water/ tea/ soup, looser stools for 5 days, pu normal, no weight loss, hot and shivery overnight, no drenching night sweats, smokes cannabis mixed with tobacco infrequently, reducing amount, o/e appears well, temp 37.1, hr 92, sats 97, bp 115/87, crt 2 secs, hs pure, chest clear, no wheeze, no creps, no stridor, no cyanosis, calves snt, no ankle swelling, abdo snt, imp- likely viral/ flu-like illness, plan- WSG, continue simple measures, reassurance

05-Nov-2025 Miss Emily Bett Repeat Issue**05-Nov-2025 Dr Kirsty Hazelton Triage**

Diagnosis (P3) Triage 07850 629070 has a pain on left shoulder blade just under like someone stabbing him. pains down his left arm but anything cardiac he says. also feels as if pain in the back of his head, also asking for his meds as he is going to italy on sunday for morning from 9th-12th. then goes on egypt on the 12 for a week to egypt...he is on a weekly dispens.. // SHAUN 1140. RE MEDS- WHAT DAY DOES HE PICK UP?. // Tuesday he picks up meds, says he cant make it up to an appt as the bus wouldnt get him here till the afternoon., not happy and wants to speak to a dr, advised to phone back for afternoon triage and sad no // WILL NEED TO CALL BACK IN THE AFTERNOON THEN. CAN PICK UP 2 WEEKS OF MEDS BUT WILL NOT GET ANY MORE UNTIL 25/11

29-Oct-2025 Miss Julie Clacher Administration**10-Oct-2025 Miss Julie Clacher Administration****09-Oct-2025 Dr Kirsty Hazelton Repeat Issue****09-Oct-2025 Mrs Catrina Penny Repeat Issue**

02-Oct-2025 Dr Kirsty Hazelton Triage

Diagnosis (P3) Triage 07850629070, Patient called looking for Sildenafil 100mg tablets as going to Leeds on Saturday, says needs to help him walk// IT DOESNT HAVE A THING TO DO WITH WALKING. I HAVE DONE A SMALL SUPPLY BUT HE NEEDS TO MAKE A TEL APPT AS HE ABSOLUTLEY INSISTED I TAKE IT OFF REPEATS AND HE DIDNT WANT IT ANYMORE WHEN WE LAST SPOKE

02-Oct-2025 Miss Emily Bett Repeat Issue**01-Oct-2025 Mrs Diane Mc Farlane Repeat Issue****01-Oct-2025 Dr Graeme Duncan Repeat Issue****01-Oct-2025 Dr Kirsty Hazelton Administration****30-Sept-2025 Miss Julie Clacher Administration****30-Sept-2025 Dr Kirsty Hazelton Third Party Consultation**

Diagnosis (P3) Triage 07850 629 070 wants to speak to GP, phoned this morning as going to leeds 4-18 October as wife mum and dad not well. on weekly dispense due tablets 7th and 14th. secondly always feels like he wants to be sick but cant get anything out. feels like hes chocking when trying to be sick. ongoing since this morning. getting pain trying to be sick too // FINE TO RELEASE TABS. I WILL DO TAB TO TRY FOR SICKNESS

16-Sept-2025 Dr Kirsty Hazelton Telephone call to a patient

Administration Telephone encounter Long contentious telephone call re meds- chronic back pain for years. Says not fair not getting diazepam for back pain "as other patients have got it". Advised unable to comment on that but for his case diazepam is not an option and not willing to start down that road. Asking for increase to gabapentin- declined. Asking to go on monthly dispense- declined. Says is going down to Leeds a lot as wife's father ill but seems to be managing weekly collections. Says if misses collections for gaba sometimes takes extra dhc or buys co-codamaol- strongly counselled against this. At the moment not blatant over ordering of dihydrocodeine but will put on repeats with a lock (dont want to put on repeats now as last issued on 5/9/25 so will put it on closer to date is due). I advised Andrew if there is any evidence of over ordering then this will go onto weekly dispense. He says lidocaine patches and amitriptyline are not working so not taking them and wants it off repeats- taken off. Says sildenafil not using and wants it off too- done. Wants to try alternative to amit- can try small dose nortriptyline- if not helping then stop

05-Sept-2025 Ms Susan Napier Other

23-Jun-2025 Mr Adam Spence Repeat Issue

27-May-2025 Miss Linsay Graham Repeat Issue

Administration SMS text message sent to patient Hi Andrew, tried to call,
(P3) prescription issued. If you come into the surgery you can
collect it then go next door and they will dispense a full
month as discussed.

Administration Administration NOS chemist informed as below
(P3)

27-May-2025 Dr Kirsty Hazelton Repeat Issue

Diagnosis Triage happy with this but said he needs his
(P3) dihydrocodeine aswell// unhappy with this, said a script for
weekly dispense has been sent next door which is no
good to him. hes going on holiday for a months so cant
collect weekly and said even if he wasnt away he cant
collect from that chemist as too far for him to travel //
07850 629070 going on holiday on the 11th june for 2wks
but he gets a weekly script which is due today. asking for
a full months script today...also needs enough
dihydrocodeine as well...wants to discuss with dr... //
AMIRAH SORTED THIS LAST WEEK SO CAN ASK HER
ON THURS // OK FINE CAN PICK IT ALL UP FROM
CHEMIST AND GO BACK TO NORMAL WHEN HE IS
BACK// I have calculated his dhc and he has had enough
since 23rd april taking max 8 per day to do until he goes
away on holiday so have issued him 1 months worth so it
all runs at the same time but he will not be due any more
dhc until 9th July
Diagnosis Triage Have agreed can pick up monthly script as going
(P3) way on hol - dhc will now have enough until around 9th of
July

27-May-2025 Miss Vicky McMaster Repeat Issue

23-May-2025 Dr Graeme Duncan Administration

22-May-2025 Mrs Catrina Penny Repeat Issue

22-May-2025 Ms Amirah Ishrad Repeat Issue

Administration Unsuccessful attempt to contact patient by telephone
(P3) tried to call x2 as patient called to discuss dihydrocodeine rx but no answer - phone line not even ringing?

22-May-2025 Ms Nicola Cunningham Repeat Issue

22-May-2025 Ms Amirah Ishrad Repeat Issue

Diagnosis (P3) Discussed with doctor spoke with oncall gp Dr KH request for Gabapentin on Rx line- patient gets weekly disp due to overordering noted July 2024- due next rx wed 28th which would last until 25th- going on holiday 11-25th june and would run out of gabapentin on the day he is due back as per ordering dates- has agreed ok to give a couple days extra supply on shortfall rx so patient has a few days to contact GP for Rx before weekend

Intervention (P3) Drug not issued OS cetirizine - 2 month supply issued 30/4/25 - should still have further month which patient will have enough of to cover him whilst on holiday

Intervention (P3) Medication requested dihydrocodeine - patient called back to state dhc due - have re-calculated if he is using 2 tabs QDS (max per day of 8) then this would be due so have issued gabapentin - have issued on repeat usual monthly supply with disp weekly installments agreed additional couple of days as per dw gp noted below as pt going on holiday and will run out on day he is due back have forward dated these prescriptions to the day before they are due (27/5/25, due on 28/5/25) to enable community pharmacy to make these up in time have added note on acute rx that additional 2 days of gabapentin should be given with week 4 of disp weekly meds this means the [patient will have 2 days supply on return (thurs and fri) and this will given him time to order before weekend so he does not run out

08-July-2024 Mrs Flora Wands Repeat Issue

02-July-2024 Dr Scott Miller Surgery consultation

Administration Consultation D+V approx 3 weeks ago while in Turkey -
(P3) lasted 4 days. Bilious vomit - some streaks of red blood in
bile. No coffee ground. Watery diarrhoea. Settled for
approx 2 weeks. Last 4 days - similar symptoms. Vomiting
again - with streaks of red in bile. No haematemesis.
Watery diarrhoea. Reports 1x ep of incontinence following
flatulence. Reports home covid test -ve. Also, reports
recently stopped taking cannabis habitually. Had drank
alcohol - reports 3-4 cans while watchiung football which
made his symptoms flare approx 1 week ago so has not
been drinking since. O/E: Sats 99, Hr 93, Temp 36.5. BP
128/77. Abdo soft. Mild epigastric discomfort. BS
activeImp: gastroenteritis with gastritis and mallory weiss
tear. No convincing evidence of UGIBPlan - Omeprazole.
Reassurance. Strong worsening advice. 2. Back pain -
awaiting neurosurgery appt. Reports using gabapentin 2x
daily but had been advised to increase to 3x daily if pain
worsening. Pt reports pain subjectively worse since
stopping cannabis. Uses ralvo patches and amitriptyline at
night. Reports currently using 1-2 tabs of gabapentin 3x
daily. Wanted tablets on repeat increased as using more
and they are running out. Not repeat prescription has
been amended recently. Give acute prescription for 2
weeks. Advised take 3 tabs 3x daily while pain severe and
awaiting neurosurgery. Pt will cancel routine appt next
week if pain improved by then. WSG

Dear Nurse Boogie

Factual Report for Disability Living Allowance

I am writing to you about Mr Andrew McCracken

Date of Birth 14/02/1973

**Note. If the person has died or recently moved to another area please still
complete the report if you can.**

Your patient (or person appointed to handle their affairs) has made a claim for
Disability Living Allowance. This is a benefit for people with severe disability.
Entitlement is based on the amount of personal care or supervision needed or difficulty
with getting around as a result of this disability. In order to decide this claim we need
further information about their medical condition(s).

**We hold your patient's (or a person appointed to handle their affairs) written
consent to allow us to approach you for this information.**

We would be grateful if you would answer the questions on this factual report based
on your knowledge of the patient and their records. A special examination is not
required.

Please send us back the report as soon as possible. A reply by 04/08/2006 would be
appreciated. You can use the envelope we sent you. It does not require a stamp.

The person making the claim may, at any stage, request a copy of this report to be
sent to them.

DBD378(N) CPN/MH

09/02

Page 1

NHS Confidential: Personal data about a patient

DWP Department for
Work and Pensions

Andrew McCracken NZ155266D

If there is any information you think would be harmful to their health, for example an adverse diagnosis or prognosis unknown to them, please provide details on the appropriate section of the enclosed report, marked "**Harmful information**".

Please include in your report any relevant information contained in letters or reports from hospitals or consultants. If you think it is essential to send us originals or any copies of any letters from consultants, please obtain the author's consent for the correspondence to be used in connection with your patient's claim.

To ensure compliance with 'Rehabilitation of Offenders Act 1974', your report should not contain any reference to criminal convictions, whether spent or not, unless the information is directly relevant to the customer's condition or disability.

This report is not subject to the Access to Medical Reports Act 1998. The patient does not need to read it before it is returned.

The Disability Living Allowance and Attendance Allowance Helpline is set up to answer enquiries. Please get in touch with them if you want to ask about anything in this letter. To make sure you receive a good standard of service from the Disability Living Allowance and Attendance Allowance Helpline, our Managers may monitor or record telephone calls without warning.

Thank you for your help.

Yours sincerely

Benny Mutetwa

Harmful information – do not copy

We may have to send a copy of the report to the customer. Certain information may be withheld if it appears to the Decision Maker or Appeal Tribunal that its disclosure would be **harmful to this person's health** if they become aware of it. An example of what may be harmful information is a diagnosis or prognosis that is **not** known to them, such as malignancy, progressive neurological condition or a **major** mental illness.

Please note that we cannot withhold information on any other grounds. For example, information relating to comments or remarks likely to cause embarrassment to the customer, carer, the author or a professional colleague.

Please only write about harmful information on this page.

MCCRACKEN

Date of Birth 14/02/1973

Address "BC LANGLOAN ST"
COATBRIDGE
LANARKSHIRE
ML5 1HJ

Payment of Incapacity Benefits and the award of National Insurance credits are subject to an incapacity assessment. If a person meets, or is treated as meeting, the threshold of incapacity, medical certificates are no longer needed to support their claim.

As the patient shown above meets or is treated as meeting the threshold of incapacity under the Personal Capability Assessment you no longer need to issue NHS medical certificates for this person's claim for benefit. However, we may need to contact you for further information about your patient's incapacity in the future.

Proof of incapacity or illness may still be required for other interested groups or organisations such as employers and insurance companies. The provision of this information is not usually an NHS requirement.

If your patient makes another claim for benefit in the future, we will require medical certificates from the date of incapacity. You can find more information in IB204 'A guide for registered medical practitioners'. It is available on our website at www.dwp.gov.uk/medical.

Dear Dr McLaughlin

ANDREW McCracken: (d.o.b. 14/02/73)
8C LANGLOAN STREET, COATBRIDGE

This gentleman attended our service on only one occasion. I was not convinced of his motivation for attending and he seemed more concerned about inter-agency liaison – particularly with probation services.

Despite being offered further appointments he failed to attend. I have therefore discharged him from my caseload but would of course be happy to help in the future should the need arise.

Yours sincerely

Dear Doctor,

Your patient has claimed benefit due to incapacity and we now have to assess their capacity to perform any work, not just their own job, using the Personal Capability Assessment procedures. People with certain severe medical conditions can be accepted as meeting the threshold of incapacity for benefit purposes without undergoing the Personal Capability Assessment or, if the assessment has to be applied, without undergoing a medical examination.

From the information you have provided on a medical statement (for example form Med 3), or information otherwise available to the medical officer, it appears that this may be such a case. In order to advise the decision maker in accordance with the law, the medical officer requires further factual information. We would be obliged if you would answer the medical officer's questions overleaf clearly indicating on a separate sheet, any medical evidence that you think would be harmful to the patient's health. An example of what may be harmful information is a diagnosis that is not known to your patient such as malignancy, progressive neurological conditions or major mental illness.

Your patient has given written consent on their claim form to allow us to approach you for this information.

If you have agreed to treat this patient under the NHS (General Medical Services) Regulations 1992 as amended March 1998 and equivalent regulations in Scotland, and have issued, or refused to issue, a medical certificate to them, you are obliged by your terms of service to supply clinical information to a medical officer. A similar obligation applies to most hospital and community doctors working within the NHS. You are not obliged to do this if you have not agreed to treat the patient under the NHS but any information you are willing to provide will be much appreciated. Unfortunately, we will be unable to pay you for it.

A reply within 7 days will be appreciated and a business reply envelope is enclosed for your use. If you have any queries about this form please contact the medical officer at your local Medical Services Centre, see IB204 Guide for Registered Medical Practitioners (available at www.dwp.gov.uk/medical).

Thank you for your help.

Yours sincerely

On behalf of the Manager

Please answer the following questions from the information which is currently available to you.

1 Date patient was last seen or examined for the condition(s) causing incapacity.

28/11/15

2 Diagnosis of all relevant conditions and date(s) of onset.

Depression

3 Factual details of patient's condition.

Where possible, please include brief factual details of:

- present medical condition
- medication and other treatments (eg attendance at day care centre, hospital outpatient)
- outlook for your patient and any proposals for future management.

e/l

NHS Confidential: Personal data about a patient

About your patient – continued

- 4 Where available to you, please give brief details of what the patient has been told about the likely clinical course of their condition(s), and any future treatment.

--

5 Any other information.

- If you have evidence which indicates that, as a result of their medical condition, your patient would not be able to attend an examination by using public transport or by taxi please include this here.
- Any additional information about the effects of the medical conditions on daily living (self care, indoor mobility, judgement and compliance with medication) would be very helpful.

--

Only complete the section below if you have diagnosed a psychiatric condition at question 2.

- 6 Where available to you, please give brief details of any history of recent or serious attempts at suicide or other self injury, or any history of threatening or violent behaviour towards others.

--

Declaration

I understand

that if this person appeals, or asks for an explanation or reconsideration of the decision, a copy of the information I have given here may be sent to the person, their legal representative and the Appeals Service

I also understand

that the only information that can be withheld is medical evidence that would be harmful to the person's health. I have stated any medical evidence that I think may be harmful to the person's health on a separate sheet of paper.

Incapacity for work

Patient's name : MR ANDREW MCCracken
Date of Birth : 14 February 1973

Dear Dr. CONNOLLY,

This patient has been claiming Incapacity Benefit and National Insurance Credits because they are incapable of work. Their ability to work was recently assessed using the All Work Test.

We have assessed that your patient is capable of work from and including 13 September 2000. This is based on information given to us by your patient; a report from the medical assessment carried out by a doctor from our Medical Services; and information you provided about your patient's medical condition.

This means that you no longer have to give your patient medical certificates unless their condition becomes significantly worse, or they want to claim benefit because of a new medical condition.

If we have decided that there are any limitations or restrictions on your patient's ability to work, a summary of these will have been given to your patient.

Yours sincerely,

MARGARET MCMILLAN

Dear Dr Connolly

Re: **Andrew McCracken (14.02.73) 8137**
196 Whifflet Street, Coatbridge.

This young man's upper GI endoscopy looks normal and there is no explanation of his apparent melaena. For the moment I don't think I would do anything further. If however there is a repeat of his melaena, then I think we should probably see him urgently.

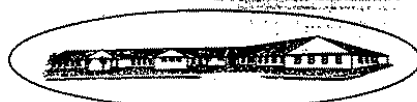

Yours sincerely

R.J. Holden

Dear Dr. Connolly

Our Client: Andrew McCracken (d.o.b. 14.2.73)
196 Whifflet Street, Whifflet, Coatbridge

We refer to the above and confirm that we are presently acting on behalf of the above named Andrew McCracken in connection with an Incapacity Benefit Appeal. Mr. McCracken has been taken off Incapacity Benefit as it has been decided that Mr. McCracken failed without good cause to attend for a medical examination on 16th May 2000. Mr. McCracken informs us that he in fact had an accident in the early hours of 16th May 2000 when he fell down the stairs of his home. Our client informs us that he attended Monklands Hospital and that he also attended your Office for treatment in respect of same. We understand that he was prescribed pain killers and bed rest.

We would be obliged if your records could be checked and if you could confirm whether or not Mr. McCracken did in fact attend on 16th May 2000 for treatment in respect of an incident in which he fell down a flight of stairs. We can confirm that we require this information for his Incapacity Benefit Appeal.

We would be obliged if you could also confirm whether or not you consider Mr. McCracken to be fit for work. Mr. McCracken informs us that he has a number of problems ranging from a stomach ulcer to a very painful back.

We enclose herewith a mandate signed by Mr. McCracken authorising the release of this information.

Dear Mr McCracken,

GP Appointments

It has been brought to my attention that you have missed a number of appointments with the Practice.

It appears from our records that in the last year you have made appointments with the surgery and have not attended on five occasions.

It is important that when you are unable to attend for your appointment that you inform the reception staff accordingly so that it can be offered to another patient who may need to see the Doctor or Nurse urgently. I am sure you would find it equally frustrating if you were unable to make an appointment because someone had not cancelled theirs.

We treat this situation very seriously in the Practice and would warn you that if you make an appointment in the future and do not attend for it without informing the staff in advance then we will have no alternative but to ask you to register with another Doctor.

I hope that we will be able to resolve this issue.

Yours sincerely,

Judith Milligan
Practice Manager

Dear Colleague

I would be grateful if you could consider this 25 year old gentleman for a vasectomy. He is the father of 3 children, with one more on the way and he is quite sure that he doesn't want to have any more in the future. Also his partner has had significant problems with all other forms of contraception, including IUD, injected progesterone's and OCP. I am happy therefore to commend him for the procedure. He is otherwise in good health apart from lower back pain.

I have explained to have that there is a small risk of failure and that the condition is not normally reversible.

Thank you for seeing him.

Yours sincerely,

Dr Trevor Thompson (Locum)

Dear Sir

Re: Mr Andrew McCracken, 196 Whifflet Street, Coatbridge DOB: 14.02.70

The above patient states that whilst walking on the 25 March 1997, he tripped in a hole on the pavement in Whifflet, Coatbridge. He fell to the ground and sustained a laceration above his left eye, with bruising about his forehead and nose.

He attended the accident and emergency department at Monklands District General Hospital, where examination and x-ray revealed no bony injury. His laceration was repaired using black silk sutures and he was advised that he would suffer headaches for a few weeks after the incident.

He was unwell for about one month following the injury and required analgesia during this time.

He has gone on to make a complete recovery and the scar above his eye is well hidden in the eyebrow line and should completely disappear in time.

Yours faithfully,

Dr E McLaughlin

Dear Doctor,

ANDREW McCracken, 196 WHIFFLET STREET, COATBRIDGE
D.O.B. 14.2.70

We act for the above named in connection with an accident claim. We understand our client suffered injuries to his face and head whilst out walking on 25th March 1997.

In order that we may proceed with our client's affairs, we shall be most obliged if you would please medically examine our client and thereafter provide us with your report.

We understand that Mr. McCracken is already a patient at your surgery.

We thank you in anticipation of your kind assistance and look forward to hearing from you.

Yours faithfully,

Dear Doctor Marcucelli,

ANDREW McCracken, 196 WHIFFLET STREET, COATBRIDGE(NOW AT 61 IONA, AIRDRIE)
D.O.B. 14.2.70

We refer to the above named patient and to our letter of 21st November 1997.

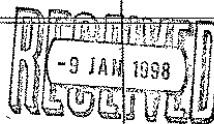

We understand that our client had in fact made an arrangement to see Dr. McLaughlin for the purpose of the report requested by us. The arrangement unfortunately was not suitable to our client and we wonder if you would be prepared to arrange a fresh examination by contacting Mr. McCracken either by telephone on 770253 or writing to him at his new address.

We thank you for your assistance and look forward to hearing from you with details of the report in due course.

Yours faithfully,

R E M I N D E R

Dear Sir,

REGARDING : ANDREW MCCRACKEN

DATE OF BIRTH: 14/02/1973

The above named person has applied to the Board for compensation for injuries, for which he has been seen by you / at your hospital. The applicant has signed an authority allowing us to seek a medical report. I would be grateful if you would complete the attached form by reference to the applicant's medical records and return it to us as soon as possible.

The report you provide will be treated in strict confidence. However you should be aware that we may be obliged to make any information on which we base our decision available to the applicant, or his or her representative on request.

In accordance with the scale agreed between the Treasury and the British Medical Association I am able to offer a fee of £ 21.70 for your report. To claim this fee please complete the attached payment voucher and return it with the report.

Yours faithfully,

MISS JOYCE BROWN
Criminal Injuries Compensation Board.

Dear Doctor

I have examined the above-named patient on **Wednesday 1 February 1995** and in my opinion HE is:-**OPINION A NOT INCAPABLE OF WORK FOR MEDICAL REASONS**

A copy of my report to the Adjudication Officer is attached. If you agree with this opinion, you should give your patient a statement on form Med 3 advising HIM that HE need not refrain from work. If you continue to issue statements advising your patient to refrain from work the Benefits Agency may ask for further advice. In that case it may be necessary to contact you again. The decision to issue further statements, whether open or closed is a matter for your own professional opinion.

Closed Statements. If you do issue a closed statement and your patient does not have a suitable job to which HE can return, HE will be invited to contact the local Employment Office and, if appropriate, to claim Unemployment Benefit. Also you may wish to explain to your patient that help in finding suitable employment can be obtained from the Employment Office where the Disablement Employment Adviser is able to give special assistance in those cases where it is needed.

Further Advice. The booklet entitled "Medical Evidence for Statutory Sick Pay (SSP), Statutory Maternity Pay (SMP) and Social Security Incapacity Benefit Purposes - a Guide for Registered Medical Practitioners" is helpful in explaining the various issues relating to the provision of Doctors' statements. It is obtainable from your local Primary Care Office.

OPINION B IS INCAPABLE OF ALL WORK FOR MEDICAL REASONS

I have reported accordingly to the Benefits Agency office dealing with your patient's claim.

If you agree with this opinion, you should continue to give your patient open statements on form Med 3. You should, however, issue a closed statement if you think your patient is, or becomes, capable of any form of work.

OPINION C IS CAPABLE OF SOME FORM OF WORK

As per Opinion A + If you wish to add the remark on Med 3:-

"Fit for some form of work"

INCAPACITY BENEFIT - REPORT TO ADJUDICATION OFFICER

CUSTOMER DETAILS

SERIAL NUMBER: 577/RGD/ICI/44Q

Name: MR ANDREW McCracken District Office No: 1811
Address: C/O 196 WHIFFLET STREET NI No: NZ 15 52 66 D
COATBRIDGE
ML5 4EB Normal Occupation: SECURITY GUARD
Date of Birth: 14/2/73 Date Last Worked: OCT 1994

1. Details of illness or injury and its effects on normal functions. Any treatment and its effects should also be included.

Your client is a young single man who gave up his work as a security officer because of persistent abdominal discomfort over the past month or two. He maintains that this only occurs when he visits the toilet and he has been helped by tablets given to him by his own doctor, although he still states that the pain does occur at times.

Today's examination was entirely unremarkable and I was unable to demonstrate anything that would prevent him from normal unlimited employment.

2. Ability to perform functions.

(Please grade functions using the following scale: 1 - Full function; 2 - Reduced function; 3 - Nil function).

Right Shoulder	Right Arm	Right Hand	Climbing Stairs	Climbing Ladders	Working at heights
1	1	1	1	1	1
Left Shoulder	Left Arm	Left Hand	Bending	Lifting/Carrying	Prolonged Sitting
1	1	1	1	1	1
Walking	Standing	Kneeling	Driving	Exposure to dust and fumes	Outdoor work in all weathers
1	1	1	1	1	1
Relevant Mental Function	Hearing	Vision	Skin Irritants		
1	1	1	1

2/93 (Rev 11/10/94)

NHS Confidential: Personal data about a patient

SERIAL NUMBER 577/RGD/IC/440**3. Comments on the grading of functions (as referred to in paragraph 2 above) and their effect on capability for work.**

As seen today I was unable to demonstrate any serious abnormality including negative findings on perusing his abdomen. I am of the opinion that any pain he may have will be transient and should not affect his working abilities.

4. Variability of symptoms.

Symptoms are only usually present when he visits the toilet and at other times it is not particularly severe.

5. Degree of discomfort likely to be experienced in work activities.

Discomfort should not interfere with his working capabilities.

6. I have examined the above named today and report that for the above reasons in my opinion he/she is

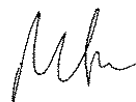

A
not medically incapable of work
including the above occupation.

B
medically incapable of all work.
No need to refer again for
months.

C
medically incapable of work at the
above occupation but is* medically
capable of suitable alternative*
work.

* If no occupation, delete words in italics.

Dear Sir/Madam

Andrew McCracken, 196 Whifflet Street, Coatbridge. DOB: 14.02.73

Thank you for your letter concerning this gentleman.

He has a history of low back strain. He has attended me on several occasions for this in the past. He is currently on no prescribed repeat prescription for this.

Sick Lines were issued as follows:-

4-14/3/94	URTI
1/7/94	1 week Bereavement
2/9/94	Back Condition
1-7/12/94	Viral Illness

I believe heavy manual work would exacerbate his existing although quiescent back condition and would advise against him undertaking this.

Yours faithfully

Dr S A Connolly

Dear Sirs,

Andrew McCracken
D.O.B. 14th February, 1995

14.2.95 210.196 Whiffles St.

We act on behalf of Andrew McCracken in relation to Community Service Breach. We understand that Mr McCracken received a 4 week sick note in relation to the death of his Grandmother. We also understand that Mr McCracken suffers from severe back injuries which result in him being unable to do heavy work. We would be grateful if you could confirm both of these points by return as we have a Breach of Community Service Proof on 31st January, 1995.

We enclose herewith duly completed medical mandate.

We look forward to hearing from you as a matter of urgency.

Yours faithfully,

McAfee

Re - Mr Andrew McCracken
c/o 196 Whifflet Street
COATBRIDGE
ML5 4EB

Dear Doctor

I have today examined your above-named patient and in my opinion he is not incapable of work for medical reasons.

A copy of my report to the Adjudication Officer is attached. If you agree with the opinion, you should give your patient a statement on form Med 3 advising him that he need not refrain from work. If you continue to issue statements advising your patient to refrain from work the Benefits Agency may ask for further advice. In that case it may be necessary to contact you again. The decision to issue further statements, whether open or closed is a matter for your own professional opinion.

Closed Statements. If you do issue a closed statement and your patient does not have a suitable job to which he can return, he will be invited to contact the local Employment Office and, if appropriate, to claim Unemployment Benefit. Also you may wish to explain to your patient that help in finding suitable employment can be obtained from the Employment Office where the Disablement Employment Adviser is able to give special assistance in those cases where it is needed.

Further Advice. The booklet entitled "Medical Evidence for Statutory Sick Pay (SSP), Statutory Maternity Pay (SMP) and Social Security Incapacity Benefit Purposes - a Guide for Registered Medical Practitioners" is helpful in explaining the various issues relating to the provision of Doctors' statements. It is obtainable from your local Family Health Services Authority.

The following findings may be of interest to you (delete if not applicable).

Yours sincerely

A N RENNIE

INCAPACITY BENEFIT - REPORT TO ADJUDICATION OFFICER

Customer details

Name: MR ANDREW McCracken
 Address: C/O 196 WHIFFLET STREET
 COATBRIDGE
 ML5 4EB

Date of Birth: 18.2.73

District Office Code No: 1811

NI No: NZ 15 52 66 D

Normal occupation: SECURITY GUARD

Date last worked: MARCH 1993

Serial Number: 74978 ANR/AM

1. Details of illness or injury and its effects on normal functions.
 Any treatment and its effects should also be included.

This pleasant young chap sustained minor right hand and right facial burns at work in March 1993. He was seen at hospital on a weekly basis for 2 months and was then discharged from review. He complains that very hot or very cold conditions cause a nipping sensation on the back of his hand but does not interfere with function. Otherwise he has no problems. On examination there is still some right facial erythema and very mild fibrosis at the mandibular angle. The right hand has some reddening on the dorsal aspect of the middle fingers still but his grip and function is normal. The vital systems are essentially normal. As seen today he appears fully fit for work. He was noted to have proteinuria and haematuria today.

2. Ability to perform functions.

(Please grade functions using the following scale:

1 - Full function, 2 - reduced function, 3 - nil function).

Right Shoulder	Right Arm	Right Hand	Climbing Stairs	Climbing Ladders	Working at heights
1	1	1	1	1	1
Left Shoulder	Left Arm	Left Hand	Bending	Lifting/Carrying	Prolonged Sitting
1	1	1	1	1	1
Walking	Standing	Kneeling	Driving	Exposure to dust and fumes	Outdoor work in all weathers

3. Comments on the grading of functions (as referred to in paragraph 2 above) and their effect on capability for work.

Hand can feel nippy in hot or cold extremes but this is tolerable and resolving and does not interfere with function.

4. Variability of symptoms.

Hot and cold extremes may cause some discomfort to the back of his hand.

5. Degree of discomfort likely to be experienced in work activities.

Mild.

6. I have examined the above named today and report that for the above reasons in my opinion he/she is

A	B	C
not medically incapable of work including the above occupation.*	medically incapable of all work. No need to refer again for months.	medically incapable of work at the above occupation but is* medically capable of suitable alternative* work.

Coatbridge.

Dear Dr. Thomson,

Andrew McCracken - 14.2.73
196 Whifflet Street,
Coatbridge.

This patient of yours attended the Casualty Department on 8.4.90 with a history of falling from a bike and sustained injury to the right knee. He was seen in the Casualty Department at which time he was not able to weightbear. There was slight effusion in the right knee joint according to the Casualty Officer.

X-ray of the right knee showed no evidence of any fracture.

He was referred to the clinic and when seen today examination of the right knee is essentially normal. There is no effusion in the knee joint and there is no positive physical findings. X-ray of the right knee shows no evidence of fracture. He has been discharged from the clinic.

Yours sincerely,

A.P. Rao,
Orthopaedic Registrar.

Type				
Dear Dr. Thompson, This 14 year old boy attended the A & E Department on 22.9.87 when he accidentally bicycled into the path of a car and was knocked from his bike. He was uncertain as to whether or not he had lost consciousness. He was complaining of a painful right shoulder, lumbar spine and right calf. On examination he was well orientated and had no neurological deficit. He was tender to palpation over the entire length of his right leg and right shoulder. He had a slightly restricted range of movement of his right shoulder. There was an abrasion over the lumbo-sacral spine right side. X-rays of skull, right shoulder, right tib and fib and lumbar spine were all negative. He was given tetanus toxoid booster. He was admitted to the Ward for overnight neuro observation and the following day he was found to be fit for discharge. There will be no further follow up. Yours sincerely,  DR. I. McLAREN, Consultant in Accident & Emergency Medicine.

Dear Ms Lutton

Re: Andrew McCracken, (D.O.B. 14/2/73)
402H Dundvyan Road, COATBRIDGE, ML5 4AX

Following from my previous letter you are aware that Mr McCracken did indeed have an x-ray of his right clavicle. This was requested by one of my colleagues.

When I examined Mr McCracken on the 19th March he had some obvious muscular strain affecting the right side of his neck. There was no specific deformity of his shoulder and he had good range of movement at the shoulders.

When he attended my colleague on the 27th April he was found to have a slightly tender clavicle. He again re-presented and was seen by one of the other doctors on the 5th May, where he was found to be tender along the right side of his neck.

Your letter did not give any detail on the type of community work Mr McCracken would have been expected to do. Obviously if he was expected to engage in any activity using his upper limbs this may have been difficult for him. I cannot really comment further without any more specific information.

Unfortunately attending Court on the 4th September would be extremely difficult for me.

I look forward to hearing from you if you require any further information.

Yours sincerely

Dr Liana McMillan

Coatbridge
ML5 3BJ

Dear Dr McMillan

17 AUG 2015

Andrew McCracken (dob 14/02/1973)We are writing on behalf of our client and your patient, the above named Andrew McCracken, and refer to your letter of 21st July 2015.

We note from your letter Mr McCracken did indeed report to your surgery regarding a shoulder injury, and that it appears to have been regarded as serious enough to warrant an x-ray of his right clavicle.

Mr McCracken is subject to an alleged breach of Community Payback Order, in which he states as a defence that he was unfit for work. We would be obliged if you could confirm that the pain he reported to you was sufficient in your opinion to prevent him from working.

We would also be obliged if you could advise us to your availability to give evidence at a Proof on 4th September 2015 at Airdrie Sheriff Court. Although not definite, we may need to cite you for that date.

We look forward to hearing from you in relation to this matter and thank you for your time.

Yours faithfully,

CARTYS

Dear Ms Lutton

Re: Andrew McCracken, (D.O.B. 14/2/73)
402H Dundyvan Road, COATBRIDGE, ML5 4AX

I can confirm that I saw Mr McCracken here at the surgery on the 19th March 2015. He reported to me at this time that he had had a fall a few weeks previously when he fell out of bed hurting the right side of his neck and his shoulder. He advised me that he had sought advice from Out of Hours regarding this and in fact there is an Out of Hours report in the notes from the 13th March regarding this. He told me that he had missed his community service because of this injury and requested a letter confirming this.

He re-attended the surgery on the 27th April when he was seen by one of my colleagues regarding ongoing pain in the shoulder. He proceeded to have an x-ray of the right clavicle which was reported as normal.

He was again seen by another doctor at the surgery on the 5th May regarding shoulder pain.

There have been no further attendances regarding the shoulder pain.

I hope this information is sufficient, however please do not hesitate to contact me should you require any other information.

Yours sincerely

Dr Liana McMillan

Payment of Incapacity Benefits and the award of National Insurance credits are subject to an incapacity assessment. If a person meets, or is treated as meeting, the threshold of incapacity, medical certificates are no longer needed to support their claim.

As the patient shown above meets or is treated as meeting the threshold of incapacity under the Personal Capability Assessment you no longer need to issue NHS medical certificates for this person's claim for benefit. However, we may need to contact you for further information about your patient's incapacity in the future.

Proof of incapacity or illness may still be required for other interested groups or organisations such as employers and insurance companies. The provision of this information is not usually an NHS requirement.

If your patient makes another claim for benefit in the future, we will require medical certificates from the date of incapacity. You can find more information in IB204 'A guide for registered medical practitioners'. It is available on our website at www.dwp.gov.uk/medical.

If you want to ask us anything about this letter, please get in touch with us. Our phone number and address are at the top of this letter.

Clinic: 22 June 2009
Typed: 24 July 2009

Mr Andrew McCracken
8C Langloan Street
Coatbridge
ML5 1HJ

Dear Mr McCracken

Your family doctor, Dr O'Sullivan, wrote to ask if we would see you at the clinic because of your chest symptoms. You had an appointment to see me this morning but I realise that you have not attended.

I have asked for a new clinic date to be fixed. There should be a card enclosed with this letter giving the details of the next available slot. I hope this will be suitable.

Please come to the clinic at least 45 minutes before the appointment time given on your card. This would allow some simple investigations to be carried out and we would have results available when you are seen.

Yours sincerely

A handwritten signature in black ink, appearing to read 'LGM'.

Lawrence G McAlpine
Consultant Physician (General & Respiratory Medicine)

Dear Dr O'Sullivan

ANDREW McCracken D.O.B. 4.02.1973 8536158
8C LANGLOAN STREET, COATBRIDGE ML5 1HJ

You wrote to me about this 36 year old man because of left sided pleuritic pain and possible minor haemoptysis.

He has now been offered 2 appointments at my clinic but has not attended on either occasion nor has he been in touch to cancel or rearrange the appointments. I did write to him after his first default.

I will leave matters there.

Yours sincerely

Dear Dr O'Sullivan

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 402H Dundyvan Road, Coatbridge, ML5 4AX

I was due to review Mr McCracken at the nurse led rapid access chest pain clinic today however he did not attend. It would appear Mr McCracken has also not had routine bloods done prior to this appointment. I would be grateful if routine bloods could be obtained and I shall forward him an appointment in due course.

Yours sincerely

Additional Administrative Information

SHOULD THE PATIENT BE TREATED WITH MILITARY VETERAN PRIORITY : No

Is Patient Transport Required: No

CLINICAL INFORMATION**History of presenting complaint / examination findings / investigation results****Presenting complaint**

Main presenting
Complaint: ? angina

Reason for
Referral: This man has been seen at the RACP clinic in September but was unable to perform the ETT as he had smoked cannabis earlier in the day.

He can be vague at times but does continue to complain of exercise induced chest pain which eases with rest. He also reports chest pain associated with cocaine misuse previously.

His blood pressure is ok at 132/80 and recent bloods are all ok.

Many thanks for seeing him.

Consultant: Nurse Fay Haggarty

Dear Dr Curle

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 402H Dundyvan Road, Coatbridge, ML5 4AX

Diagnosis: 1. Undetermined

Past medical history: Helicobacter pylori
Cannabis smoker
Hypertension (untreated)
Family history of CHD

I reviewed this gentleman at the Nurse Led Rapid Access Chest Pain Clinic today. He presents with a years history of central chest tightness and shortness of breath on effort. He first noticed these symptoms around a year ago whilst carrying shopping and walking on an incline. The tightness can be associated with sweating and is resolved with rest after ten to fifteen minutes. Mr McCracken more recently has experienced these symptoms whilst engaging in sexual activity and is now obviously quite distressed by this. He does admit to experiencing some erectile dysfunction also.

On examination today, his blood pressure was 135/90 and his heart rate was 80bpm and regular. The ECG confirms sinus rhythm with no acute changes seen. Cardiovascular examination was unremarkable, no evidence of cardiac decompensation.

In view of Mr McCracken's symptoms, I would have liked to have proceeded to an exercise test today however he had smoked cannabis this morning prior to coming to the clinic. I am therefore unable to undertake the exercise test today. I have given him an appointment for Monday 8th September to return to clinic. I have strongly counselled him that he cannot smoke any illicit drugs or consume alcohol prior to attending the clinic. In the meantime, I would be grateful if you could arrange for him to have a GTN spray and I have counselled him on its use. I shall write again with the results of the exercise tolerance test.

Yours sincerely

Sister Louise Thom

Consultant: Nurse Fay Haggarty

Dear Dr McMillan

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 402H Dundyan Road, Coatbridge, ML5 4AX

Diagnosis: Non cardiac chest pain

Past medical history: Smoked cannabis
Recreational use of cocaine
Family history of CHD

I reviewed this gentleman once more at the Nurse Led Rapid Access Chest Pain Clinic today. I remember Mr McCracken from his previous clinic appointment and it would seem that his symptoms have remained the same. He experiences tightness in the chest and finds it difficult to breathe particular when carrying heavy shopping or walking up hill. He also claims that he is unable to have sexual intercourse due to these symptoms. These symptoms have been presented for three to four years now and there has been no recent increase in frequency. Mr McCracken tells me that he can walk for four to five hundred yards on the slope and will feel extremely short of breath and experience tightness in the chest.

On examination today, his blood pressure was 120/72, heart rate 70bpm and regular. The ECG confirmed sinus rhythm with no acute changes seen. Cardiovascular examination was unremarkable. Mr McCracken assures me that he has not had any illicit drugs since Friday, I therefore elected to proceed to exercise testing today.

Mr McCracken exercised for ten minutes achieving 93% of target heart. No ST segment change noted and no chest pain experienced. Negative ETT at high workload.

I have discussed the results of the ETT with Mr McCracken and I have tried to reassure him that it is unlikely that his symptoms are of a cardiac origin. I have strongly advised him of the dangers of long-term drug abuse. I have also encouraged him to increase his exercise as I feel some of his symptoms could simply be due to being out of condition. I shall now discharge this gentleman back to your care.

Yours sincerely

Sister Louise Thom
Cardiac Nurse Specialist

Dear Dr McMillan

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 402H Dundyan Road, Coatbridge, ML5 4AX

Mr McCracken was due to be reviewed in the Nurse Led Rapid Access Chest Pain clinic. He has failed to attend.

We did attempt to telephone Mr McCracken to offer him an appointment but there was no reply. The appointment was therefore sent by post and for that reason we will offer one further appointment only.

Yours sincerely

Sister Fay Haggarty
Cardiac Nurse Specialist

CLINICAL INFORMATION**History of presenting complaint / examination findings / investigation results****Presenting complaint**

Main
presenting Complaint: Haemoptysis

Reason for Referral: I would be grateful for your review of this gentleman who attended the surgery with an episode of frank haemoptysis. This has been preceded by a left nostril nose bleed. He has not had any problems since. On examination his chest was completely clear and I reassured him however on looking through his notes he had a similar attendance in february after three episodes of frank haemoptysis with no preceding nose bleeds or cough etc. He has never smoked cigarettes but is a regular cannabis smoker. Chest x-ray at this time was reported as normal. We had wondered if he had a dental reason for coughing up some blood at this time however I would be most grateful for your review to ensure that we are not missing any other pathology given this has now become a recurrent problem for him.

17 AUG 2015

Dear Dr McMillan

Andrew McCracken (dob 14/02/1973)

We are writing on behalf of our client and your patient, the above named Andrew McCracken, and refer to your letter of 21st July 2015.

We note from your letter Mr McCracken did indeed report to your surgery regarding a shoulder injury, and that it appears to have been regarded as serious enough to warrant an x-ray of his right clavicle.

Mr McCracken is subject to an alleged breach of Community Payback Order, in which he states as a defence that he was unfit for work. We would be obliged if you could confirm that the pain he reported to you was sufficient in your opinion to prevent him from working.

We would also be obliged if you could advise us to your availability to give evidence at a Proof on 4th September 2015 at Airdrie Sheriff Court. Although not definite, we may need to cite you for that date.

We look forward to hearing from you in relation to this matter and thank you for your time.

Yours faithfully,

CARTYS

Dear Doctor Macmillan

16 MAR 2016

Work Capability Assessment Outcome Notification

Patients Name Mr A N Mccracken
Patients Address 16C Langloan St
Coatbridge
Lanarkshire
ML5 1HN

Patients D.O.B : 14 February 1973

This patient has been claiming Employment and Support Allowance. We recently assessed their ability to work using the Work Capability Assessment.

WCA Effective Date 19 February 2016

We have decided that your patient is capable of work from and including 19 February 2016.

This means that you do not have to give your patient any more medical certificates for Employment and Support Allowance purposes unless they appeal against this decision. But you may need to again if their condition worsens significantly, or they have a new medical condition.

We have sent a summary of the Work Capability Assessment to your patient.

If you want to ask us anything about this letter please get in touch with us. Our phone number and address are at the top of the letter.

Yours sincerely

George McLellan

4. HOW WE USE YOUR INFORMATION

The information you have provided will be used by the GP Practice to carry out its various functions and services including scheduling appointments, ordering tests, hospital referrals and sending correspondence.

Your information, including your name, gender, date of birth and address, will be passed to NHS National Services Scotland where it will be held on the Community Health Index (CHI). This information is used to register you with the GP Practice, transfer your medical records between GP practices in the UK, make payments to GP Practices for medical services provided, and to process and issue medical cards, medical exemption certificates and entitlement cards.

NHS National Services Scotland shares information about you within NHS Scotland to assist in the provision and improvement of NHS services and the health of the public. When we do this, we make sure that the information which identifies you as a person and your health information are separated or anonymised. Health condition and treatment information which could identify you will not be used for research purposes by the NHS unless you have consented to this.

For more information on how NHS National Services Scotland uses your personal information visit www.nhs.uk. If you have any queries or concerns about how your personal information is used by the NHS please ask for the leaflet 'Confidentiality – it's your right', visit the Health Rights Information Scotland website at www.hris.org.uk or ask your GP surgery.

NHS National Services Scotland is the common name of the Common Services Agency for the Scottish Health Service.

5. PATIENT DECLARATION

I declare that the information I have given on this form is correct and complete. I understand that, if it is not, appropriate action may be taken.

To enable NHS National Services Scotland to confirm my eligibility to lawfully register with a GP and for the purposes of prevention, detection, and investigation of crime, relevant information from this form will be disclosed to the NHS Business Services Authority, NHS National Services Scotland, the Home Office, Identity and Passport Service, HM Revenue and Customs, the General Register Office and Local Authorities.

Patient/Patient's representative signature _____ Date

Representative's name (if applicable) _____

Relationship to patient (if applicable) _____

6. FOR PRACTICE USE

Consultant: Dr Lawrence McAlpine

Dear Mr McCracken

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 16C Langloan Street, Coatbridge, ML5 1HN

Your family doctor, Dr McMillan, wrote to ask if we would see you at the Respiratory Clinic because there had been blood in your sputum. You had an appointment to see me today and the patient administration system indicates that you accepted the appointment – but then you did not appear.

I have asked for another clinic appointment to be made. The details of your appointment will be sent out to you under separate cover and I hope it will suit.

Please report to clinic reception at least 45 minutes before the time of your appointment. This would allow simple investigations to be completed before you are seen.

If you no longer need to be seen in the clinic, perhaps because the problem has settled, please telephone my secretary on 01236 712366. This would allow us to cancel your appointment and somebody else could be seen in your place and avoid the appointment being wasted.

Yours sincerely

Lawrence G McAlpine
Consultant Physician (General & Respiratory Medicine)

Complaint: SEE BELOW

Reason for
Referral: Dear Colleague,

I would be grateful if you could see this 43-year-old man who is a new patient to the practice, having joined us over the last few weeks. I gather Andrew is well known to your service, but currently he has no psychiatric support.

Andrew's problems started around 4 years ago with the death of his son. Since then he has been drinking to excess, as well as using Cocaine and Cannabis. He describes doing this to try and fill his sense of hopelessness and to try and block out negative thoughts.

He describes quite intense anger towards others, both within his family and outside also. He has been accused of assaulting strangers, police etc when drunk and has had several custodial sentences because of this.

On closer questioning Andrew describes a feeling that he finds it very difficult to trust people, he feels the sense of hopelessness and no sense of the way forward. He feels that he has been labelled as a violent person and as a result he finds it very difficult to move forward with his life.

He says that he came to Calderbank for a fresh start, but his anger and frustration seemed quite obvious today. He seemed visibly upset when was spoke about his son, but does wish to reestablish contact with the psychiatric services to try and help his mood and to try and deal with his addiction problems.

I have commenced him on some Quetiapine as an anxiolytic and your help would be greatly appreciated.

Yours sincerely,

DR. A. KOCHAR

Dear Colleague

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 63 Fir View, Calderbank, Airdrie, ML6 9SW

Diagnosis: (i) Recurrent haemoptysis – likely from the nose
(ii) Previous alcohol excess
(iii) Hiatus hernia
(iv) Cannabis smoker

Thank you for seeing this gentleman who was referred with recurrent haemoptysis and, from the history, it sounds as if the haemoptysis is due to nasal bleeding.

He had normal lung function and a clear chest X-ray. He has never smoked tobacco but he smokes cannabis.

Your help would be appreciated.

Yours sincerely

Dr Abdulla Al Aidi

Consultant: Dr Abdulla Al Aidi

Dear Dr Ross

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 63 Fir View, Calderbank, Airdrie, ML6 9SW

Diagnosis: (i) Recurrent haemoptysis – likely from the nose
(ii) Previous alcohol excess
(iii) Hiatus hernia
(iv) Cannabis smoker

Thank you for asking me to see this gentleman who has had 3 episodes of haemoptysis, 2 of them when he cleared his throat and one when he sneezed. He denied any cough, wheezes or shortness of breath. His wife noted that he has wheezes in the night. He denied any chest pain. He has never smoked tobacco but he is smoking cannabis and it makes him feel better and avoids him from drinking alcohol again.

Currently he is on Tramadol and Co-codamol tablets.

On examination his oxygen saturation is 98% and his chest X-ray is clear and the previous chest X-ray showed no active lung disease.

He had a pulmonary function tests today and it which showed normal dynamic and static lung volumes with no significant reversibility. His FVC was 4.59 litre which is 101%, FEV1 3.69litre which is 98%, percentage of FEV1 80. He has mild reduction of DLCO which was 72 and DLCO/VA was 83. His repeated chest X-ray today showed clear lungs fields.

From the symptoms this gentleman's haemoptysis is mainly from the upper airways. Clinically and radiologically, there is no evidence of any parenchymal or airways lung disease at present and the bleeding is mainly from the upper airways. For that reason I will refer him to the ENT Team for further advice.

I discharged him from the clinic, however, we are happy to see him again if you feel that it is indicated.

Yours sincerely

Dr Abdulla Al Aidi

Complaint: SEE BELOW

Reason for
Referral: Dear Colleague,

I wonder whether this man could be seen by a psychologist. Andrew has a longstanding history of low mood and anxiety and this was all triggered by the death of his son many years ago. Since his sons death Andrew has been very angry and has been indulging in self destructive behaviour, such as drinking, taking Diazepam etc. He has also been involved with the police on many occasions. He describes a sense of pervading hopelessness and says that he indulges in these behaviours because he does not care about the future. His thought patterns appear very very negative and he certainly is very lacking in self-esteem.

He is keen to engage with psychology to try and explore some of his issues and to develop different techniques and behaviours to try and deal with his stress and anxiety.

Your opinion on him would be greatly appreciated.

Yours sincerely,

DR. A. KOCHAR

Consultant: Mr Nicholas J Calder

Dear Dr Hogg

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 63 Fir View, Calderbank, Airdrie, ML6 9SW

Situation

Previous spitting up blood and epistaxis, probably secondary to cocaine use

Background

This gentleman has been referred from the respiratory clinic where he has been seen for possible haemoptysis. He had a history of spitting up some blood, particularly when clearing his throat in the morning and also epistaxis. This has improved since he stopped using cocaine and he has had no episodes for over two months. He is still smoking cannabis.

Assessment

Examination today shows normal nose, post nasal space, larynx, pharynx and neck. His mouth and oropharynx were also normal.

Recommendation

I have reassured Mr McCracken I cannot see any concerning lesions. I suspect the episodes were secondary to his cocaine use. I have discharged him from the ENT clinic.

Yours sincerely

Mr N Calder
Consultant ENT Surgeon

Dear Doctor Macmillan

3 MAY 2017

Work Capability Assessment Outcome Notification

Patients Name Mr A N Mccracken
Patients Address 63 Fir View
Calderbank
Airdrie
Lanarkshire
ML6 9SW

Patients D.O.B : 14 February 1973

This patient has been claiming Employment and Support Allowance. We recently assessed their ability to work using the Work Capability Assessment.

WCA Effective Date 26 August 2016

Customers with potential capability for work enter the Work-Related Activity group, whilst those who have limited or no capability for work related activity enter the support group

This patient meets, or is treated as meeting the eligibility criteria for Employment and Support Allowance [Work related activity group/Support group].

You no longer need to issue an NHS medical certificates for this person's claim to benefit. However we may need to contact you for further information about this person's illness or disability in the future.

Proof of illness or disability may still be required for other interest groups or organisations such as employers or insurance companies. The provision of this information is not usually a NHS requirement.

If your patient makes another claim for benefit in the future, we will require medical certificates from the date of illness or disability.

Complaint: SEE BELOW

Reason for
Referral: Dear Doctor,

I would be very grateful if you could see this 44-year-old gentleman who has had quite severe epigastric pain for a week and pain all the way down his gullet on swallowing. He is a non-smoker. He has had no weight loss.

On examination he has no masses. I have requested a helicobacter and commenced him on a low dose of Omeprazole.

I would be grateful if you would scope him to rule out any ulcer or malignancy, as he has had a past history of heavy drinking also.

Thank you for seeing him.

Yours sincerely,

DR. PAMELA ROSS

CHI: 1402735294
Enquiries to: Secretary
Direct Line: 01236 772204

Dear Mr McCracken

As you will be aware, Dr Kochar has referred you to the Psychological Therapies Team for an assessment appointment.

Sometimes, people agree to a referral when it is first discussed with them. They may decide later that the referral is no longer necessary. If we know this, it means that we can offer an appointment to someone else more quickly.

The purpose of this letter is to confirm you wish your name to be placed on our waiting list.

If you **do not wish** your name to be placed on the list: you do not need to take any action. Your name will *not* be placed on the waiting list and we will inform your referrer of your decision.

If you **do wish** your name to be placed on the list: please contact us within 14 days from the date at the top of this letter.

You can contact us:

- by telephone on 01236 772204
(please also give information asked for on enclosed sheet)
- or
- by returning the enclosed information sheet

Yours sincerely

[Signature]

**Secretary
Psychological Therapies Team**

Dear Mr McCracken

Your Reference: CHI Number 1402735294

You were referred to the Endoscopy Unit with symptoms thought to be coming from your stomach/bowel.

We wrote to you recently inviting you to contact us to make an appointment to attend the Endoscopy Unit, unfortunately you have not responded to our communication to you and you have been subsequently been removed from the Endoscopy waiting list.

We have copied this letter to both your General Practitioner and your Hospital Consultant. If you have any ongoing concerns you should discuss this with your General Practitioner.

Yours sincerely
Elizabeth Dolan

Complaint:

Reason for Dear Doctor,

Referral:

I would be grateful if this man could be seen at your clinic. He recently was seen in A&E at Monklands with chest pain and he describes central chest pain and radiating down his shoulder. He describes over the last few months pain on exertion and particularly when walking up hills and also very rarely at rest. Andre has a strong family history of ischaemic heart disease, many members of his family had MI's. He is a smoker and in addition to smoking cigarettes smokes cannabis.

Examination of his pulse was regular and BP 120/90. He had no obvious mummings. He was noted in monklands to have mild left ventricular hypertrophy on his ECG.

I have done his bloods as per protocol but I would appreciate your urgent review.

Yours sincerely,

DR A KOCHAR

Dear Sirs,

Our Client: Mr Andrew McCracken**Date of Birth: 14 February 1973**

We are instructed by Mr Andrew McCracken who resides at 402 H Dundyvan Road, Coatbridge, ML5 4AX in pursuance of a claim for damages in respect of an injury sustained on or around 18 October 2015..

We should be most obliged if you would let us have copies of all medical records held by you, including the records relating to treatment the client received for their injuries following the accident.

We enclose relative mandate.

Please note we need the client's full records.

We confirm that we will meet your reasonable copying charges in terms of the Data Protection Act 1998.

Consent form Reference : VMM/SM/nc/M01712
(Releasing health records under the Data Protection Act 1998)

About this form

In order to proceed with your claim your solicitor may need to see your health records. Solicitors usually need to see all your records as they need to assess which parts are relevant to your case. (Past medical history is often relevant to a claim for compensation). Also if your claim goes ahead, the person you are making the claim against will ask for copies of important documents. Under court rules, they may see all your health records. So your solicitor needs to be familiar with all your records.

Part a – your, the health professionals' and your solicitor's or agent's details

Your full name: Include Forename, Middle Name, Surname, Previous Surname when attended hospital	Andrew Norman Cowan Craig McCracken.
Sex:	MALE
Your address/address when you attended hospital (if different):	402 H DUNDYVAN ROAD COATBRIDGE ML5 6AX.
Date of Birth:	14-2-75.
Date of Incident:	18.02.19-12-15.
Solicitor's or agent's name and address:	Bonnar Accident Law, 83 Graham Street, Airdrie, ML6 6DE
GP's name and address (and phone number if known):	Dr McMillan COATBRIDGE FIRST STOP SHOP.
Name (and address if known) of hospital(s) you went to in relation to this incident:	NONE WAS REFUSED.
If you have seen any other person or organisation about your injuries (for example, a physiotherapist) or have had any investigations (for example, X-rays) please provide details:	PERSON NURSE. 

Part b – your declaration and signature

Please see the 'Notes for the client' over the page before you sign this form. **NEW DOCTORS ADDRESS. MR JAMES CALDERBANK SURGEON, MANX ST CALDERBANK AIRDRIE**

To health professionals
I understand that filling in and signing this form gives you permission to give copies of all my GP records, and/or any hospital records, to my solicitor or agent who details are given above.
Please give my solicitor or agent copies of my health records, in line with the Data Protection Act 1998, within 40 days.

Your Signature: 	Date: 13-11-17.
---	-----------------

Part c – your solicitor's or agent's declaration and signature

Please see the 'Notes for the solicitor or agent over the page before you sign this form.

To health professionals

I have told my client why particular parts of his or her health records are needed. I confirm that I need the full records in this case. I enclose the authorised fee for getting access to records

Dear Dr Kochar

Re: Andrew McCracken, 63 Fir view, Calderbank, Airdrie, ML6 9SW
CHI: 1502735294

Thank you for your referral on the 28/03/2017 to Airdrie Psychological Therapies Team, Mr McCracken was seen for assessment on the 21/07/2017.

Presenting Problem

Mr McCracken reported his main difficulties as anger towards his ex-partner. She is currently contributing to him feeling highly stressed and there is an allegation of fraud which may involve further police action. He reports in order to cope with his violent thoughts towards his ex-partner, that he drinks and smokes Cannabis. This is on a daily basis, and although it helps him to cope it can also contribute to him being involved in assaults against others. There is a 20 year history here of offending behaviour including assault and Mr McCracken has been imprisoned on a number of occasions. Mr McCracken is aware of the link between his drinking and drug misuse and violence. He advises me he is aware he has an addiction issue but does not like the addiction staff, he also refuses social work intervention. He does appear to be very angry with the social work department, with anger directed at particular individuals. Mr McCracken has undergone various treatment programs whilst in prison and is well aware of strategies to manage anger, having been through an anger management programme. He is aware that he is not using any helpful strategies at present and is aware that there is a danger of the cycle continuing unless he addresses these addiction issues. I am unable to offer psychological intervention to Mr McCracken given the addiction and anger issues here.

Whilst Mr McCracken did report his son's suicide, it seems the issue that maintains a lot of his anger is contact with his ex-wife and her family. Mr McCracken was also made aware that PTT was not appropriate for him at present and I have encouraged him to attend yourself to discuss and addiction referral again if he wishes to address this in the future. There is also a service of which you may be aware, 'Alternatives to Violence Project'. However I am unsure given his level of anger and history if this is even in fact appropriate.

LAT100

Not Confidential: Personal data about a patient

2/2

Risk Assessment

Mr McCracken has cut his arms and wrists on many occasions, the last episode being in 2014. He denies any current self-harm or suicidal thoughts. He does however express a lot of anger aimed at his ex-partner, especially since the death of his son 6 years ago. This is ongoing, particularly given his unhappiness regarding how she has treated his other children. There is current stress associated with her regarding benefits and both Tax Officers and the Police have been involved. Mr McCracken is aware of this tendency for impulsive violence under the influence of alcohol. I have encouraged him to utilise coping which he is aware of from psychoeducation regarding addictions and anger whilst in prison. I have encouraged him not to approach his ex-partner and to seek help with his current addiction.

He has reported there is an extensive history here of risk to self and others, however this was not reported in the referral form. This information is required in order to consider which clinician should be appointed and to consider which environment a client should be seen. During our assessment Mr McCracken was not aggressive towards me, however he did express anger at a number of people and he is again drinking and utilising Cannabis and this does again increase his risk for violence. He did not express any immediate plans to harm others at time of assessment, but was aware that when under the influence that he has injured others and has been arrested as a result. If you require any further information please do not hesitate to contact me.

Yours sincerely

Gail McKillop
Senior Psychological Therapist

If alcohol referral please detail type, amount, how often, how long and any features of dependency: Dear Colleague,

I would be grateful if you could review this 46-year-old who has been coming in to see us regarding shoulder pain and over use of his Co-Codamol. He is constantly seeking higher doses of opiates. He also reports that he has been smoking Cannabis, taking Cocaine and amphetamines to help with the pain. In addition to this he states that he constantly feels that he has withdrawal symptoms and is also looking for Diazepam.

He is in agreement with this referral and accepts that he may have an issue with an addiction to Co-Codamol.

I would be grateful if you could review him and offer your expert advice and opinion regarding further management.

Kind regards.

DR. GRAEME DUNCAN

Consultant: Nurse Fay Haggarty

Dear Dr Kochar

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 63 Fir View, Calderbank, Airdrie, ML6 9SW

Diagnosis Probable non cardiac chest pain

Risk factors for coronary heart disease - Smoking (including cannabis), premature family history

Mr McCracken attended the nurse led Rapid Access Chest Pain clinic. He describes a heavy or a burning type of pain in the lower chest and upper abdomen which can, on occasion, radiate in to the left shoulder and left side of his neck and laterally down his left side. The onset of this pain is unpredictable. It can come on when he is walking but he can equally experience it while just sitting and this has been the case 'on and off' for 3-4 years. I note he has been investigated by way of ETT in the past.

On clinical examination blood pressure was 130/89, resting ECG was sinus rhythm at 81 bpm. We proceeded to ETT today. He exercised for 12 minutes of Bruce protocol achieving over 100% of target heart rate, he was limited by fatigue. Exercise did not provoke chest pain nor undue breathlessness. There were no ST segment shifts. There were no signs of exercise induced ischaemia at high workload.

I have reassured Mr McCracken and discharged him to GP care.

Yours sincerely

Sister Fay Haggarty
Cardiac Nurse Specialist

Reason for
Referral: Dear Colleague,

I would be grateful if you could review this 47-year-old gentleman who reports that he had his drink spiked in the middle of July. He states that he had LSD put into his drink and was admitted and given fluids, but took his own discharge. He reports to me that he has been quite anxious, agitated and paranoid since then and that he feels that someone is "out to get him" and that he has been living with pals outside, staying away from his house in case people come after him.

Unfortunately he burnt himself on an open fire and when I spoke to him this took president over his mental health. He was advised to attend A&E for the wounds to his legs.

He denied any suicidal thoughts and is keen to speak to someone about his paranoid behaviour. He is aware that this is potentially as a result of the LSD and therefore has some insight.

He has a previous history of problems with drugs and alcohol, but denies any illicit drug use at the moment.

I would be grateful for your expert advice and opinion regarding his further management.

Kind regards.

DR. GRAEME DUNCAN

****Virtual Fracture Clinic****

This patient was not physically seen or reviewed in person.

The Patient's records were reviewed electronically by myself and the team in the virtual fracture clinic (VFC) today.

Diagnosis: Right shoulder dislocation

Plan: Treated in polysling. Return to clinic in 2 weeks' time for clinical assessment and referral to physiotherapy.

They will be phoned later today by one of the orthopaedic team, and the above will be discussed with them, and any questions they have will be answered.

If the patient has any issues in the interim period they should get in contact with the team on
01236 712293

Yours sincerely

Miss Sally-Anne Phillips MD, FRCS, Ed (Tr&Orth)
Consultant Orthopaedic Surgeon

Dear Dr Duncan,

Re: Andrew McCrackin, 63 Fir View, Airdrie, ML6 9SW
CHI: 1402735294

Thank you for referring the above named client to our Service.

Andrew failed to attend the initial assessment appointment offered and has not made contact with the service.
As a result of this he will be returned to your care and his case has now been closed ART.

I hope this meets with your approval, should you require any further information please do not hesitate to contact me on the above number.

Yours sincerely,

Gavin Sharkey

Date of Admission: 10/07/2020 **Ward:** ML Ward 17
Mode of Admission: **Consultant:** DR Nick Kennedy (INFECTIOUS DISEASES-A6)
Admission Reason: Intoxicated
Discharge Date: 12/07/2020 **Follow Up:**

Primary Diagnosis: Overdose, LRTI

Clinical Progress Mr McCracken was admitted following an overdose of LSD. He was severely agitated and required restraint from the police and eventually sedation and intubation was required. He was extubated on 10/7/20. He had an elevated CK likely from police restraint although his renal function was unaffected. He started treatment for a LRTI post ITU however wished to self discharge. He had capacity to make this decision and understood the risks involved. He unfortunately left without waiting for a supply of amoxicillin.

Allergy/intolerance	Reaction
ibuprofen	Unknown

Allergy records are as recorded at time and date of printing.

Consultant: Mr Manish Agarwal

Dear Dr Brodie

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 63 Fir View, Calderbank, Airdrie, ML6 9SW

Diagnosis: Low back pain with radiation to right lower extremity
Outcome: Referred for MRI scan LS spine

This patient was reviewed in the orthopaedic clinic at Wishaw today. His main complaint is low back pain for the past year. This affects his mobilisation, sometimes. He tells me that the pain sometimes travels down his right leg.

On examination, his gait is normal. The Trendelenburg test is negative. The limb lengths are symmetrical. Both hips have got a full range of movement with abduction of 60° and internal and external rotation of 20°. There is some tenderness in the lumbar spine midline. On neurological assessment of the lower extremities, the sensation is normal in all the dermatomes. The motor power is normal in all the myotomes. Both the knee and ankle jerks are normal. The bilateral straight leg raise is normal but produces a slight increase in the lower back pain. He denies any bladder or bowel problems.

His past medical history includes a vasectomy, and he is a current smoker. In the past he has used Cocaine and Cannabis. His current medication includes Sildenafil and Cetirizine.

I arranged x-rays of the pelvis, which are largely normal.

I am investigating this further with an MRI scan of the LS spine. We can move forward once the result is available. I have also referred him to Orthotics for a lumbosacral support and to Physiotherapy for back exercises.

Thank you.

Yours sincerely

M Agarwal
Consultant Orthopaedic Surgeon

Main presenting Complaint: SEE BELOW

Reason for Referral: Dear Doctor,

I would be grateful for your assessment of this 49-year-old man. He has been suffering from severe lower back pain since last August and has been unable to work since then as a result. He has severe pain on any mobilisation and has resorted to borrowing his friend's opioid painkillers to try to help. Initially he had radicular pain going down the left leg only but now he has bilateral sciatica. There are no other red flag features to suggest CES and there has not been any trauma. On examination his gait is antalgic and there is lots of MSK tenderness in the lumbar area but no focal bony tenderness. He has a positive straight leg raise on both sides. Lower limb neurology is otherwise intact. Given the evident bilateral sciatica I thought he probably needed urgent imaging and I would be grateful for your expert opinion. I have given him a trial of amitriptyline to help with his symptoms in the meantime.

Many thanks,
Dr Andrew Brodie
GP ST3

Dear Mr McCracken

Many thanks for attending the orthopaedic clinic recently. I had referred you for an MRI scan of your back.

I have reviewed the scan and the report. The scan quality is compromised by motion artefact. The scan reveals multilevel degenerative changes, (wear and tear).

I have referred you to Physiotherapy and I would be grateful if you could please attend when the appointment comes through.

Thank you.

Yours sincerely

M Agarwal

Main presenting
Complaint: SEE BELOW

Reason for
Referral: Dear Doctor,

I would be very grateful for your opinion on this 49-year-old man. I gather he has been referred to you previously. Unfortunately, through no fault of his own, he was unable to attend his appointment.

Andrew has a history of chronic back pain, which has been present for several years, but has worsened significantly over the last few months. It is now causing him great distress and he finds it difficult to walk, even a short distance, without pain.

He did undergo an MRI scan in May last year, which did show an L5/S1 nerve root impingement. He was also found to have multi level degenerative changes.

He does have obvious signs affecting his right leg with reduced SLR and reduction of power. He does not have any signs indicating cauda equina.

I am rather concerned by his degree of pain. He is quite resistant to medical therapy, in terms of Ralvo, Gabapentin and Co-Codamol, as these have very little impact.

I would therefore be grateful if you would consider whether there are any surgical options.

NOTE - he has been for physiotherapy, but this had very little impact.

Kind regards.

DR. A. KOCHAR

Date Typed: 12/09/2022
Ref: 101092535
Letter Ref: EMac

Dear Dr Duncan

Patient Name: Andrew McCracken
Patient DOB: 14/02/1973
Patient Address: 63 Fir View, Calderbank, Airdrie, ML6 9SW

The above named person has recently received input from the Rehabilitation Team. Below is a summary of this intervention.

Andrew was referred for physiotherapy with back and leg pain which was limiting his mobility. Initial referral received said he was unable to walk and was shuffling around his home on his bottom.

On assessment at home Andrew complained of lower back pain and right leg pain. He has had investigation with orthopaedics who had stated he has degenerative changes in his spine causing him pain. He had been referred to orthotics and given a brace for his lower back and a support for his right ankle. He was wearing these at the time of my visit however he didn't feel they were helping his pain. He was also wearing a tens machine he had purchased privately.

Physically Andrews spine was moving very well and no movements i asked him today either aggravated or eased his pain. He described the pain as constant and unremitting. He had no red flags. His dermatomes and myotomes in his lower limbs were normal. He did advise that his pain became worse when standing or walking for any length of time and the only thing that would ease it was if he crouched down or 'bends the knee' as he calls it.

Andrew demonstrated to me that he was able to walk around his home with no aids however he tended to walk on his toes on the right leg. He was issued with a walking stick and this improved his walking pattern and heel strike of his right foot. He was able to negotiate both his internal and external stairs independently with no issues. The bathroom in his house is on the ground level and he did advise that during the night he doesn't always make it to the toilet in time. We discussed purchasing a urine bottle to use over night at the bedside. He did not report any issues with attending to his personal care that would require a homecare package but did report that on occasion his partner had to help him if he was very sore.

NHS Confidential: Personal data about a patient

He has a wet floor shower area but had no seat or grab rails. A shower chair and grab rails were ordered. During my assessment he did crouch down to relieve his pain a few times. We discussed that it may be safer for him to sit to ease his pain rather than crouch down. A perch stool was ordered for use in his kitchen to facilitate this. He was also offered a 4 VWV for outside so he could sit on this if his leg pain became too bad when walking, however he declined this as he said he would be embarrassed to use it.

Andrew had pain killers from the GP but was not taking them due to side effects. His GP was contacted and asked to review his pain relief. He was also very annoyed that he had not had any follow up face to face appointment with orthopaedics and I arranged with them for him to be seen in due course to discuss his scan results.

Andrew was issued with the physiotherapy for back and leg pain booklet however he declined to try any of the exercise in it as he said he was too sore to do these.

At the time of my involvement Andrew was reporting to be housebound however he has subsequently been able to attend physio outpatients which seemed to have been a duplicate referral.

I have discharged him and my understanding is that he is attending outpatient physiotherapy now.

Consultant: Mr Manish Agarwal

Dear Dr Kochar

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 63 Fir View, Calderbank, Airdrie, ML6 9SW

Diagnosis: Low back pain with right sided radiation

Outcome: Referred for MRI scan

Co-morbidities: Current smoker
? previous substance abuse

Current medication: Naproxen
Omeprazole
Amitriptyline
Sildenafil
Raivo plasters

This patient was reviewed in the orthopaedic clinic with a relative and CSW, Leanne. His main complaint is pain in the lower back with occasional radiation to the right lower extremity. He was reviewed for this problem last year. He denies any bladder or bowel involvement.

I have re-examined him. His gait is normal. There is tenderness in the midline lumbar spine, (lower). The right SLR is positive at 20°. The left is free. Both hips have got a good range of movement. On neurological assessment, the sensation is normal but on the right side, there is a reduction in ankle dorsiflexion, (++++ L4).

I have sent him for a repeat MRI scan of his LS spine. We can proceed forward once the result is available. He has also been referred for a lumbosacral support.

Yours sincerely

M Agarwal
Consultant Orthopaedic Surgeon

Consultant: Mr Manish Agarwal

Dear Dr Kochar

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 63 Fir View, Calderbank, Airdrie, ML6 9SW

Diagnosis: Low back pain

Co-morbidities: Current smoker
Current substance abuse, (Cocaine/Cannabis)

Current medication: Naproxen
Omeprazole
Amitriptyline
Sildenafil
Ralvo plasters

This patient was seen in the orthopaedic clinic along with CSW Freya. This was following on from his previous visit when he was referred for an MRI scan. I have re-examined him today.

On assessment of his back, there is tenderness in his lower back. The sensation in all dermatomes is normal. The motor power is normal. The bilateral hips have got a good range of movement.

The MRI done simply reveals degenerative disc disease at the L5/S1 with some impingement of the L5 nerve root. However, clinically, the patient mainly complains of right sided radicular features.

The patient also says that for the last 2 months he has had a few episodes of wetting his bed at night and not being aware of it. I am unsure whether this is related to his spinal issue – but he has been referred to the oncall team for assessment and repeat MRI L5 Spine.

New problem while in the clinic

He also complains of some tingling in his left upper extremity. I have examined this today. The neck movements are normal. On examination of the neurology, in the left upper extremity, he has got normal sensation and normal power in all dermatomes and myotomes. All the deep jerks are normal.

I am investigating this further with an MRI scan of the cervical spine and also bloods including HbA1c, B12 and folic acid.

Addendum - HbA1c, B12 and folic acid - normal

Yours sincerely

M Agarwal

Consultant: Mr Agarwal

Dear Mr McCracken

I am writing on behalf of Mr Agarwal. We have been notified by the X-ray Department that you failed to attend for the scan of your lower back that was arranged for Friday 22 September. We have tried to contact you by telephone and text with no success. I have requested the scan again and would urge you to attend when the appointment comes through. You will also receive an appointment for a scan of your neck.

We will get in touch with you again once you have had the scans.

Thank you.

Yours sincerely

Dr Robert Sinnerton

Urgent Internal

Consultant:

Dear Neurology

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 63 Fir View, Calderbank, Airdrie, ML6 9SW

Diagnosis: T2 hyper-intensity changes on the MRI of the cervical spine at the T2 level
Co-morbidities: Current smoker
? substance abuse (Cocaine, Cannabis)

I would be grateful for your opinion and further management of this patient. He was seen in the orthopaedic clinic for low back pain. In the clinic, he complained of tingling in his left upper extremity. The examination was normal.

He was referred for an MRI of the cervical spine which reveals T2 hyper-intensity within the left hemi cord at the T2 level. A whole spine MRI has been arranged.

I would be grateful for your opinion.

Thank you.

Yours faithfully

M Agarwal
Consultant Orthopaedic Surgeon

Consultant: Mr Manish Agarwal
Fracture Clinic

Dear Dr Kochar

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 63 Fir View, Calderbank, Airdrie, ML6 9SW

Diagnosis

T2 hyperintensity in the left cord at T2 level (inflammatory or ischaemic)

This patient was seen in Monklands Fracture Clinic today. He was reviewed in August 2023 and he complained of tingling in his left upper extremity. He was referred for an MRI scan of the cervical spine, which revealed T2 hyperintensity within the left hemi-cord at T2, with differential of ischaemic or inflammatory.

The patient was contacted on 22/1/24 for an urgent whole spine MRI but he refused to come in. Following this, we tried to re-contact him on 23/1/24 and he was uncontactable. He was admitted around 26/1/24 for a whole spine MRI but it was cancelled due to diarrhoea and vomiting. He was then re-admitted but self-discharged on 2/2/24. The Trauma Nurse tried to contact him on Sunday 4/2/24 but got no answer, and again on 5/2/24 and 6/2/24 but again got no answer. On 6/2/24 the Trauma Nurse spoke to his partner but the Trauma Team did not receive a call back. After this, a fracture clinic appointment was posted out but the patient did not attend on 15/2/24. He has re-attended today.

I have taken the opportunity to re-examine him. He walks into the clinic normally. On examination, his motor power and jerks are normal in both upper limbs but he reports reduced sensation, which is non-dermatomal. He says that said reduced sensation is worst on the left upper extremity.

On examination of lower extremities, lateral straight leg raise is free, sensations are normal, motor strength is normal, jerks are largely normal.

I note from reviewing the PACS system that there is a partial whole spine MRI but there seems to be a lot of movement artefacts. It has not yet been reported but I have requested a report today. A neurology referral has already been done.

The patient also complains of headaches. I have explained to him that these are not related to his back problems. I would be grateful if you could please assess, treat and refer appropriately, if needed.

Primary Care Actions

Assess/treat headaches

Yours sincerely

Diagnosis: Syrinx at the T2 level in the spinal cord with degenerative changes in the cervical spine

I would be grateful for your opinion regarding this patient. He presented to the orthopaedic clinic with tingling in his upper extremity. His examination was largely normal.

He was referred for an MRI scan which reveals a syrinx at T2 and also degenerative changes at multiple levels, including C4/5.

I would be grateful for your opinion and any treatment this requires.

Thank you.

Yours faithfully

Dear Dr Kochar

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 63 Fir View, Calderbank, Airdrie, ML6 9SW

This gentleman turned up early for his appointment and then did not stay to be seen as the clinic was running late. This was on top of the fact that he failed to attend an urgent appointment a short time ago.

He has been referred by Orthopaedics with a syrinx. As I said in my previous letter this is a Neurosurgical issue and does not require neurological review. We are therefore taking him off of the waiting list. He will not have any further neurological reviews unless Neurosurgery feel this more appropriate after they have seen him.

Yours sincerely

Dr Sarah Miller

Dear Mr McCracken,

I have been trying to contact you by telephone. You will recall when you came to see me on the 02.12.2024 I was going to discuss your case further with Mr Hassan, your consultant neurosurgeon. He has reviewed your images and is reassured that no surgical input is necessary. We would encourage you to continue with conservative management with regards to your neck and back pain. He has asked me to review you and repeat your images in around 1-year and an appointment will be sent out to you at that point. Please contact me on 0141 201 2030 should you wish to discuss this further.

Many thanks.

Yours sincerely,

Dear Mr Agarwal,

Andrew Notman McCracken; D.O.B: 14/02/1973; CHI: 1402735294
63 FIR VIEW, CALDERBANK, Airdrie, ML6 9SW

Consultant: Mr Hassan

Outcome: One Year Review

Andrew was assessed today at the ESP neurosurgical outpatient clinic at the request of Mr Hassan, the consultant neurosurgeon in overall charge of his care. This was a face-to-face assessment today and Andrew was accompanied by his wife throughout.

Andrew is a 51-year-old gentleman who tells me that he has had low back pain over the years however he tells me around 3-years-ago he was aware of an increase in low back pain which radiated through initially his buttocks, posterolateral thighs into his calves. Along with this there was pins and needles, numbness however there was no overt weakness of his lower limbs. This then spread to incorporate cervical spine pain, bilateral scapular pain, pins and needles and numbness in his arms diffusely with no overt weakness.

He describes a burning sharp electric shock pain in his neck with transient symptoms in both his upper and lower limbs. He has no symptoms at all suggestive of cauda equina syndrome and his balance is not particularly affected at this point. He is aggravated by any prolonged weight bearing, walking, eased by rest and does interrupt his sleep at this point. Andrew has a history of drug and alcohol abuse and does smoke cannabis as well as cigarettes. At this point he is taking Ralvo plasters, Sildenafil, Co-codamol, Cetirizine, Amitriptyline and Gabapentin. He is not working at this point.

Today he entered the department independently. He had no antalgic gait today. Range of movement of his cervical spine was tight at end of range all movements. Upper limb myotomes were intact, reflexes were normal, he had diffuse altered sensation in his upper limbs. There was no evidence of

McCracken Andrew Notman

CHI: 1402735294

GCL 02/12/2024 v1

Hoffman's sign today. Tinel's sign was negative over cubital and carpal tunnel and Phalen's test was unremarkable.

He had severely restricted range of movement of his lumbar spine today with pain at end of range all movements. Straight leg raise was negative at 50 degrees bilaterally with no crossover signs, lower limb myotomes, dermatomes and reflexes were normal today and there was no evidence of clonus or babinski, hips were tight at end of range capsular pattern and also painful. His Romberg's test was negative, heel toe walk was mildly uncoordinated.

Andrew's whole spine MRI scan which took place on the 12.04.2024 does show a likely syrinx at T2 level with degenerate change mostly at C4/5 on the right and in the lumbar spine at L3/4, L4/5 and L5/S1 however there is no clear evidence of myelopathy or stenosis.

I discussed this gentleman's care with Mr Hassan who is reassured that no surgical input is warranted however he has asked me to review him and obtain MRI with contrast in one years time.

Many thanks.

Yours sincerely,

Mr Donald Sinclair

RE: MCCracken, Andrew, 63 Fir View , , Airdrie ML6 9SW

CHI: 1402735294

Dear Doctor A Kochar ,

Your patient attended University Hospital Wishaw on 21/03/2026 at 08:53

The presenting complaint was: SAS (OYF) fall

Diagnosis:

Diagnosis Notes:

Investigations:

Radiology Exams:

Procedures:

Medications:

Follow up:

Notes:

Additional Information: 53 male;fell 12 steps of stairs this AM;CT polytrauma: Comminuted left scapular fracture. Thoracic vertebrae fractures, new since previous scan. T4 fracture involves posterior wall with minor retropulsion of fracture fragment into spinal canal.referred and admitted under ortho with neurosurgery input.

Yours faithfully
Christa De Gala

Poor Mobility

Clinical Progress

Dear Doctor

Mr McCracken was admitted to orthopedics following a fall down 12 stairs sustaining the documented injury. Following discussion with the neurosurgeons he was discharged home with a TSLO for follow at the fracture clinic in two weeks at MDGH. For five days enoxaparin as per Dr Agarwal.

Discharge Medication

Drug	Dose/Route/Frequency	Duration	GP to continue	Quantity, Strength, Brand
CETIRIZINE 10 mg Tablets	10 mg Oral ONCE daily at 7am	L/T	Yes	
DIHYDROCODEINE 30 mg Tablets	60 mg Oral FOUR times daily - 7am;1pm;6pm;10pm	L/T	Yes	
ENOXAPARIN PF SYRINGE 40 mg in 0.4mL Injection	40 mg Subcutaneous Bolus Injection ONCE daily at 6pm	5	No	
GABAPENTIN 300 mg Capsules	900 mg Oral THREE times daily - 7am;1pm;10pm	7	Yes

Dear Dr Kochar

Patient Name: Andrew McCracken
Patient date of birth: 14/02/1973
Patient Address: 63 Fir View, Calderbank, Airdrie, ML6 9SW

Diagnosis:
1. Comminuted left scapular fracture
2. T4 fracture

Date of injury: 21/03/2026

I reviewed this patient in the fracture clinic today. This gentleman is 53 years old and he sustained the above injuries after he fell down 12 steps. He was later seen in the Accident and Emergency department on the 21/03/2026 where he underwent a CT poly trauma which confirmed the above injuries. With regards to the T4 fracture it involves the posterior wall and there is minor retropulsion of a fracture fragment into the spinal canal. However in the absence of prevertebral soft tissue thickening or stranding there was a suspicion it may be sub-acute. He subsequently underwent an MRI scan whole spine on the 24/03/2026 which confirmed T4 burst fracture and injury to posterior ligamentous complex at T4 T5 level. His MRI scan was discussed with the neurosurgeons and the plan was for him to mobilise in a brace with check x-rays at 2,6 and 12 weeks duration. This gentleman is now 2 and a half weeks down the line since the injury. When he presented to the fracture clinic today he didn't have the brace fitted and he tells me that he is finding the brace extremely uncomfortable and is very adamant to not use the brace. He is aware of the potential risks of developing neurological compromise in his lower limbs if there is any further collapse of the fracture and compression onto the spinal cord. With regards to his left scapular fracture he denies using a poly sling as well. He tells me he has been getting panic attacks if he tries using the sling or the brace. He is happy to accept the risks, however, he is very reluctant to not use the brace.

On reviewing his repeat check x-rays taken today this looks satisfactory and there is no significant progression of collapse of his T4 vertebral body as compared to his previous imaging taken at the time of injury. I have arranged for this gentleman to be reviewed in the fracture clinic again in about 4 weeks' time with repeat check x-rays of his thoracic spine and left scapula on arrival.

Yours sincerely

Keyur Mehta

Main presenting Complaint: SEE BELOW

Reason for Referral: Dear Doctor,

I would be very grateful for your opinion on this 49-year-old man. I gather he has been referred to you previously. Unfortunately, through no fault of his own, he was unable to attend his appointment.

Andrew has a history of chronic back pain, which has been present for several years, but has worsened significantly over the last few months. It is now causing him great distress and he finds it difficult to walk, even a short distance, without pain.

He did undergo an MRI scan in May last year, which did show an L5/S1 nerve root impingement. He was also found to have multi level degenerative changes.

He does have obvious signs affecting his right leg with reduced SLR and reduction of power. He does not have any signs indicating cauda equina.

I am rather concerned by his degree of pain. He is quite resistant to medical therapy, in terms of Raivo, Gabapentin and Co-Codamol, as these have very little impact.

I would therefore be grateful if you would consider whether there are any surgical options.

NOTE - he has been for physiotherapy, but this had very little impact.

Kind regards.

DR. A. KOCHAR

Complaint:

Reason Dear Doctor,
for

Referral: I would be grateful for your assessment of this 49-year-old man. He has been suffering from severe lower back pain since last August and has been unable to work since then as a result. He has severe pain on any mobilisation and has resorted to borrowing his friend's opioid painkillers to try to help. Initially he had radicular pain going down the left leg only but now he has bilateral sciatica. There are no other red flag features to suggest CES and there has not been any trauma. On examination his gait is antalgic and there is lots of MSK tenderness in the lumbar area but no focal bony tenderness. He has a positive straight leg raise on both sides. Lower limb neurology is otherwise intact. Given the evident bilateral sciatica I thought he probably needed urgent imaging and I would be grateful for your expert opinion. I have given him a trial of amitriptyline to help with his symptoms in the meantime.

Many thanks,
Dr Andrew Brodie
GP ST3

Complaint:

Reason Dear Colleague,
for

Referral: I would be grateful if you could review this 47-year-old gentleman who reports that he had his drink spiked in the middle of July. He states that he had LSD put into his drink and was admitted and given fluids, but took his own discharge. He reports to me that he has been quite anxious, agitated and paranoid since then and that he feels that someone is "out to get him" and that he has been living with pals outside, staying away from his house in case people come after him.

Unfortunately he burnt himself on an open fire and when I spoke to him this took precedent over his mental health. He was advised to attend A&E for the wounds to his legs.

He denied any suicidal thoughts and is keen to speak to someone about his paranoid behaviour. He is aware that this is potentially as a result of the LSD and therefore has some insight.

He has a previous history of problems with drugs and alcohol, but denies any illicit drug use at the moment.

I would be grateful for your expert advice and opinion regarding his further management.

Kind regards.

DR. GRAEME DUNCAN

If alcohol referral please detail type, amount, how often, how long and any features of dependency: Dear Colleague,
I would be grateful if you could review this 46-year-old who has been coming in to see us regarding shoulder pain and over use of his Co-Codamol. He is constantly seeking higher doses of opiates. He also reports that he has been smoking Cannabis, taking Cocaine and amphetamines to help with the pain. In addition to this he states that he constantly feels that he has withdrawal symptoms and is also looking for Diazepam.
He is in agreement with this referral and accepts that he may have an issue with an addiction to Co-Codamol.
I would be grateful if you could review him and offer your expert advice and opinion regarding further management.
Kind regards.
DR. GRAEME DUNCAN

Complaint:

Reason: Dear Doctor,
for

Referral: I would be grateful if this man could be seen at your clinic. He recently was seen in A&E at Monklands with chest pain and he describes central chest pain and radiating down his shoulder. He describes over the last few months pain on exertion and particularly when walking up hills and also very rarely at rest. Andre has a strong family history of ischaemic heart disease, many members of his family had MIs. He is a smoker and in addition to smoking cigarettes smokes cannabis.

Examination of his pulse was regular and BP 120/90. He had no obvious mummings. He was noted in monklands to have mild left ventricular hypertrophy on his ECG.

I have done his bloods as per protocol but I would appreciate your urgent review.

Yours sincerely,

DR A KOCHAR

Reason for

Referral:

Dear Doctor,

I would be very grateful if you could see this 44-year-old gentleman who has had quite severe epigastric pain for a week and pain all the way down his gut on swallowing. He is a non-smoker. He has had no weight loss.

On examination he has no masses. I have requested a helicobacter and commenced him on a low dose of Omeprazole.

I would be grateful if you would scope him to rule out any ulcer or malignancy, as he has had a past history of heavy drinking also.

Thank you for seeing him.

Yours sincerely,

DR. PAMELA ROSS

Complaint:

Reason Dear Colleague,
for

Referral: I wonder whether this man could be seen by a psychologist. Andrew has a longstanding history of low mood and anxiety and this was all triggered by the death of his son many years ago. Since his sons death Andrew has been very angry and has been indulging in self destructive behaviour, such as drinking, taking Diazepam etc. He has also been involved with the police on many occasions. He describes a sense of pervading hopelessness and says that he indulges in these behaviours because he does not care about the future. His thought patterns appear very very negative and he certainly is very lacking in self-esteem.

He is keen to engage with psychology to try and explore some of his issues and to develop different techniques and behaviours to try and deal with his stress and anxiety.

Your opinion on him would be greatly appreciated.

Yours sincerely,

DR. A. KOCHAR

CLINICAL INFORMATION**History of presenting complaint / examination findings / investigation results****Presenting complaint**

Main presenting Complaint: SEE BELOW

Reason for Referral: Dear Colleague,

I would be grateful if you could see this 43-year-old man who is a new patient to the practice, having joined us over the last few weeks. I gather Andrew is well known to your service, but currently he has no psychiatric support.

Andrew's problems started around 4 years ago with the death of his son. Since then he has been drinking to excess, as well as using Cocaine and Cannabis. He describes doing this to try and fill his sense of hopelessness and to try and block out negative thoughts.

He describes quite intense anger towards others, both within his family and outside also. He has been accused of assaulting strangers, police etc when drunk and has had several custodial sentences because of this.

On closer questioning Andrew describes a feeling that he finds it very difficult to trust people, he feels the sense of hopelessness and no sense of the way forward. He feels that he has been labelled as a violent person and as a result he finds it very difficult to move forward with his life.

He says that he came to Calderbank for a fresh start, but his anger and frustration seemed quite obvious today. He seemed visibly upset when was spoke about his son, but does wish to reestablish contact with the psychiatric services to try and help his mood and to try and deal with his addiction problems.

I have commenced him on some Quetiapine as an anxiolytic and your help would be greatly appreciated.

Yours sincerely,

DR. A. KOCHAR
