

Evidence Extraction Sheet - GP Record Pages

Review of: Record 1, record 2 and records 3 (one photographed page in each PDF)

Scope and limitation. These three files are isolated one-page medical-record printouts rather than a complete GP file. Findings below are limited to what is visible on those pages. No inference has been made that medication, mental-health symptoms, self-harm or substance use were caused by childhood care experiences unless the record expressly says so.

Document-by-document findings

Document	PDF page	Relevant findings	Care/abuse link
Record 1	1	Current demographic, GP and practice-registration information; current physical-health problem list.	No childhood care setting, in-care address, disclosure of abuse, mental-health symptom, self-harm or substance-use entry visible on this page.
record 2	1	Single major depressive episode; alcohol dependence syndrome; repeated overdoses; repeated suicide/self-inflicted injury codes; intentional self-harm overdose.	Evidence of mental-health, self-harm and substance/alcohol history. No explicit link to childhood care, trauma or abuse is recorded.
records 3	1	Repeat prescriptions include mirtazapine, fluoxetine and diazepam.	Treatment evidence only. The indications and any relationship to trauma, care or abuse are not stated.

Detailed extraction schedule

Entry 1			
Document / page	Record 1 - PDF page 1	Date	08/09/2025
Clinician / author	Dr Rosalyn Wilson / Lennoxtown Surgery	Category	Administrative / neutral
Exact evidence	Date of registration shown as 08/09/2025; records held at Lennoxtown Surgery.		
Care setting / perpetrator	No care setting recorded.	Frequency / duration	Single current registration entry.
Injury / impact / treatment	Administrative context only.	Link to abuse	No link recorded.
Evidential value / follow-up	Neutral entry; does not establish childhood placement.		

Entry 2			
Document / page	record 2 - PDF page 1	Date	20/10/1990
Clinician / author	Ms McLintock	Category	Mental health
Exact evidence	Single major depressive episode.		
Care setting / perpetrator	None recorded.	Frequency / duration	Single coded episode on this page.
Injury / impact / treatment	Diagnosis/problem entry; treatment not shown.	Link to abuse	No link recorded.
Evidential value / follow-up	Evidence of mental-health history only.		

Entry 3			
Document / page	record 2 - PDF page 1	Date	18/06/1999
Clinician / author	Ms McLintock	Category	Substance / alcohol
Exact evidence	Alcohol dependence syndrome.		
Care setting / perpetrator	None recorded.	Frequency / duration	Single coded entry; duration not stated.
Injury / impact / treatment	Diagnosis/problem entry; treatment not shown.	Link to abuse	No link recorded.
Evidential value / follow-up	Evidence of alcohol dependence only.		

Entry 4			
Document / page	record 2 - PDF page 1	Date	16/04/2011
Clinician / author	Mrs Gargano	Category	Self-harm / overdose
Exact evidence	Overdose of drug - citalopram; a second overdose-of-drug entry is also recorded on the same date.		
Care setting / perpetrator	None recorded.	Frequency / duration	Two entries on same date.
Injury / impact / treatment	No treatment or outcome shown.	Link to abuse	No link recorded.
Evidential value / follow-up	Corroborative evidence of overdose history; intent is not specified for these two entries.		

Entry 5			
Document / page	record 2 - PDF page 1	Date	16/09/2010
Clinician / author	Mrs Gargano	Category	Self-harm / overdose
Exact evidence	Overdose of drug.		
Care setting / perpetrator	None recorded.	Frequency / duration	Single entry.
Injury / impact / treatment	No drug, treatment or outcome shown.	Link to abuse	No link recorded.
Evidential value / follow-up	Corroborative overdose history; intent not specified.		

Entry 6			
Document / page	record 2 - PDF page 1	Date	06/07/2009
Clinician / author	Ms McLintock	Category	Self-harm / suicide
Exact evidence	[X] Intentional self-harm overdose of drug.		
Care setting / perpetrator	None recorded.	Frequency / duration	Single explicitly intentional entry.
Injury / impact / treatment	No treatment or outcome shown.	Link to abuse	No link recorded.
Evidential value / follow-up	Direct coded evidence of intentional self-harm by overdose.		

Entry 7			
Document / page	record 2 - PDF page 1	Date	21/06/2008
Clinician / author	Author shown as "carolg"	Category	Self-harm / substance / alcohol
Exact evidence	Overdose of drug (Active Problem) - DIAZEPAM AND ALCOHOL.		
Care setting / perpetrator	None recorded.	Frequency / duration	Single entry; part of repeated pattern.
Injury / impact / treatment	No treatment or outcome shown.	Link to abuse	No link recorded.
Evidential value / follow-up	Direct evidence of overdose involving diazepam and alcohol.		

Entry 8			
Document / page	record 2 - PDF page 1	Date	02/07/2007
Clinician / author	Author shown as "carolg"	Category	Self-harm / overdose
Exact evidence	Overdose of drug (Active Problem).		
Care setting / perpetrator	None recorded.	Frequency / duration	Single entry; part of repeated pattern.
Injury / impact / treatment	No treatment or outcome shown.	Link to abuse	No link recorded.
Evidential value / follow-up	Corroborative overdose history; intent not specified.		

Entry 9			
Document / page	record 2 - PDF page 1	Date	27/10/2003
Clinician / author	UnknownUser	Category	Self-harm / substance / alcohol
Exact evidence	Overdose of drug (Active Problem) - LIBRIUM AND ALCOHOL.		
Care setting / perpetrator	None recorded.	Frequency / duration	Single entry; part of repeated pattern.
Injury / impact / treatment	No treatment or outcome shown.	Link to abuse	No link recorded.
Evidential value / follow-up	Direct evidence of overdose involving Librium and alcohol.		

Entry 10			
Document / page	record 2 - PDF page 1	Date	20/02/2000
Clinician / author	UnknownUser	Category	Self-harm / suicide
Exact evidence	Suicide and self-inflicted injury (Active Problem) - OVERDOSE.		
Care setting / perpetrator	None recorded.	Frequency / duration	Single coded entry; part of repeated pattern.
Injury / impact / treatment	No treatment or outcome shown.	Link to abuse	No link recorded.
Evidential value / follow-up	Direct coded evidence of suicide/self-inflicted injury by overdose.		

Entry 11			
Document / page	record 2 - PDF page 1	Date	15/06/1999
Clinician / author	UnknownUser	Category	Self-harm / suicide
Exact evidence	Suicide and self-inflicted injury (Active Problem).		
Care setting / perpetrator	None recorded.	Frequency / duration	Repeated coded entries across 1993-1999.
Injury / impact / treatment	No method, treatment or outcome shown.	Link to abuse	No link recorded.
Evidential value / follow-up	Corroborative evidence of repeated self-harm/suicide-related coding.		

Entry 12			
Document / page	record 2 - PDF page 1	Date	10/08/1998
Clinician / author	UnknownUser	Category	Self-harm / suicide
Exact evidence	Suicide and self-inflicted injury (Active Problem).		
Care setting / perpetrator	None recorded.	Frequency / duration	Repeated coded entries across 1993-1999.
Injury / impact / treatment	No method, treatment or outcome shown.	Link to abuse	No link recorded.
Evidential value / follow-up	Corroborative evidence of repeated self-harm/suicide-related coding.		

Entry 13			
Document / page	record 2 - PDF page 1	Date	29/05/1998
Clinician / author	UnknownUser	Category	Self-harm / suicide
Exact evidence	Suicide and self-inflicted injury (Active Problem).		
Care setting / perpetrator	None recorded.	Frequency / duration	Repeated coded entries across 1993-1999.
Injury / impact / treatment	No method, treatment or outcome shown.	Link to abuse	No link recorded.
Evidential value / follow-up	Corroborative evidence of repeated self-harm/suicide-related coding.		

Entry 14			
Document / page	record 2 - PDF page 1	Date	01/01/1993
Clinician / author	UnknownUser	Category	Self-harm / suicide
Exact evidence	Suicide and self-inflicted injury (Active Problem).		
Care setting / perpetrator	None recorded.	Frequency / duration	Repeated coded entries across 1993-1999.
Injury / impact / treatment	No method, treatment or outcome shown.	Link to abuse	No link recorded.
Evidential value / follow-up	Corroborative evidence of repeated self-harm/suicide-related coding.		

Entry 15			
Document / page	record 2 - PDF page 1	Date	20/12/1999
Clinician / author	Ms McLintock	Category	Mental health
Exact evidence	Single major depressive episode.		
Care setting / perpetrator	None recorded.	Frequency / duration	Single coded episode; another episode is recorded in 1990.
Injury / impact / treatment	Diagnosis/problem entry; treatment not shown.	Link to abuse	No link recorded.
Evidential value / follow-up	Evidence of recurrent depressive episodes on the available page.		

Entry 16			
Document / page	records 3 - PDF page 1	Date	07/02/2025
Clinician / author	Dr Rosalyn Wilson	Category	Mental-health medication
Exact evidence	Mirtazapine tablets 15 mg - one to be taken at night; repeat prescription; last issue shown as 01/05/2026.		
Care setting / perpetrator	None recorded.	Frequency / duration	Ongoing repeat prescribing from 07/02/2025 to at least 01/05/2026 on this printout.
Injury / impact / treatment	Medication only; indication, response and side effects not stated.	Link to abuse	No link recorded.
Evidential value / follow-up	Treatment evidence; antidepressant/sedating medication, but reason not stated.		

Entry 17			
Document / page	records 3 - PDF page 1	Date	17/09/2018
Clinician / author	Dr Lorna Davidson	Category	Mental-health medication
Exact evidence	Fluoxetine hydrochloride capsules 20 mg - 2 daily; repeat prescription; last issue shown as 28/04/2026.		
Care setting / perpetrator	None recorded.	Frequency / duration	Long-term repeat prescribing from 17/09/2018 to at least 28/04/2026 on this printout.
Injury / impact / treatment	Medication only; indication, response and side effects not stated.	Link to abuse	No link recorded.
Evidential value / follow-up	Treatment evidence consistent with long-term antidepressant prescribing; no causation stated.		

Entry 18			
Document / page	records 3 - PDF page 1	Date	03/06/2015
Clinician / author	Dr Lorna Davidson	Category	Anti-anxiety / sedative medication
Exact evidence	Diazepam tablets 2 mg - one tablet twice daily, dispensed weekly on Wednesday; repeat prescription; last issue shown as 28/04/2026.		
Care setting / perpetrator	None recorded.	Frequency / duration	Long-term repeat prescribing from 03/06/2015 to at least 28/04/2026 on this printout.
Injury / impact / treatment	Medication only; reason, response and side effects not stated.	Link to abuse	No link recorded.
Evidential value / follow-up	Treatment evidence; controlled/sedative medication. No trauma indication stated.		

Category review - findings and absences

Requested category	Finding on supplied pages
Evidence of placement in care	No children's home, residential school, foster placement, assessment centre, institutional address, supervision requirement or care-staff correspondence is visible.
Physical abuse / injury	No allegation or clinical entry linking an injury to staff, carers or another resident. The available pages contain no injury narrative or treatment account relevant to abuse.
Sexual abuse / indicators	No disclosure, examination finding, sexual-health indicator or safeguarding response is visible.
Emotional / psychological abuse	No description of humiliation, threats, rejection by staff, fear of a care setting or related disclosure.
Neglect	No evidence of medical, physical, emotional or safeguarding neglect.
Contemporaneous disclosures	No disclosure of abuse or feeling unsafe is recorded.
Mental health	Two coded single major depressive episodes are visible (1990 and 1999).
Mental-health medication	Mirtazapine, fluoxetine and diazepam are shown as repeat prescriptions. No indication or abuse/trauma link is stated.
Counselling / psychiatric care	No referral, therapy, psychiatric assessment or service correspondence is visible.
Self-harm / suicide	Repeated coded suicide/self-inflicted injury and overdose entries appear from 1993 to 2011, including an explicitly intentional self-harm overdose in 2009.
Substance and alcohol use	Alcohol dependence syndrome is recorded; overdoses involving alcohol with diazepam and Librium are recorded. No causal link to abuse is stated.
Physical consequences in adulthood	No adult physical condition is linked to childhood abuse or neglect on these pages.
Long-term personal/social impact	No employment, housing, relationship, parenting or social-impact narrative is visible.
Third-party / attached records	The supplied pages are summary printouts only; no hospital, psychiatric, psychology, social-work, police, court or safeguarding letters are included.
Contradictory / neutral entries	Record 1 is neutral current-registration and physical-health information. The supplied pages do not contain denials of abuse or conflicting accounts because no abuse allegation is present.

Overall assessment: The strongest information in the supplied pages concerns repeated self-harm/overdose history, alcohol dependence and long-term psychotropic prescribing. The pages do not establish placement in care and do not contain direct or indirect evidence of physical, sexual, emotional abuse or neglect. A complete GP record, including historical scanned notes and attachments, would be required for a comprehensive review.
