Dear Dr Ilyas

Re: Craig Healy – 15/06/1993 - 2-1, 42 Viewpoint Place, Glasgow, G21 3AR

Thank you for referring Mr Healy to The Glasgow Psychological Trauma Service. Their referral has been accepted and placed on to our assessment waiting list, but due to current demand, they may need to wait for an initial appointment. We will, of course, be in contact as soon as we can be but wanted to make you aware of the current situation.

Please can you give the information of Future Pathways to your patient, this organisation may be able to offer him a range of supports which he can access due to being in care.

Should there be any concern about increased risk over this waiting period we recommend you contact their local CMHT.

Yours sincerely

Tracy MacMillan
Art Psychotherapist
Glasgow Psychological Trauma Service

Dear Craig,

Re: Attend Anywhere Appointment

We would like to invite you to attend an appointment. Attend anywhere is an NHS video calling service to which you require access to a smart phone, electronic tablet or computer with Google. An appointment has been made for you for the following:

Date: Thursday 30 April 2026

Time: 14:00

Video link: <https://nhsattend.vc/the-anchor-glasgow-psychological-trauma-service>

Clinician: Dr Christine McMahon, Principal Clinical Psychologist

Please read the important information below.

Important Information:

- A video call appointment is just like an appointment we would offer at Anchor. We are currently offering video call appointments due to guidance on COVID-19 social distancing and to keep you safe due to infection control at this time. This video call will make the session similar to the face-to-face clinic environment.
- Your appointment should last no longer than 60 minutes.
- Please contact the above number immediately if this appointment is unsuitable or you do not have the correct equipment or data to do video calling.
- Please read the attached guidance on Attend Anywhere.
- We would ask you to be available at the time on your appointment letter as we will need to use the full session.

- It would be helpful if you are alone, you're not in a public space and that there are no children present. This is to make the conversation private and confidential, like it is in a clinic setting. It also protects others from hearing things which may be upsetting for them and protects your confidentiality.
- Afterwards you may feel tired so please factor that into your day.
- Later that day we would encourage you to plan something you enjoy doing, something that is distracting or plan to be around people you enjoy being with.

We look forward to talking to you.

Yours sincerely

Heather McCarthy

-	---
<u>13/02/2026</u>	<u>Ms Lisa Fox (Clw) at Fernbank Medical Practice</u>
Comment	CLP - T/call: supportive conversation. Trying to consciously eat more. Poor sleep. Reports days feeling same and time passing without realising "lost in thoughts". Feeling overwhelmed, self critical in conversation. Discussion re self care and compassion. Discussed at length social supports of interest in NGCFI. Craig has plans to meet with local allotment manager this week with a view to managing own allotment, hoping to get out more. Interested in outdoor pursuits, discussed Men Matter services, not keen on participating in resources at this time, struggling with trust and anxiety, will consider. Craig aware support available to attend resources at his own pace if required. Discussed coping

	strategies used mindfulness In past
-	---
<u>06/02/2026 11:34</u>	<u>Mr Gary McBride (Anp) at Fernbank Medical Practice</u>
Problem	Complex Trauma
History	History - Presented to discuss medication options in the context of complex trauma history - Reports experiencing sexual abuse from approximately age 14 to 17 whilst in foster care, perpetrated by a male supervisor - Describes feeling overwhelmed by the complex situation that occurred many years ago, with ongoing questions and emotional symptoms - Reports feeling emotionally low and flat relating to the trauma history - Has discussed the situation with friends who advised against medical treatment - Currently wishes to avoid pharmaceutical interventions but remains aware that this option is available if needed - Expressed preference for non-medical support approaches Past Medical History: - History of complex trauma including sexual abuse during foster care placement from ages 14 to 17 - Previous disclosure to female authority figure at the time who dismissed the allegations and advised keeping the matter confidential Assessment & Plan: <u>1. Complex trauma with ongoing emotional symptoms</u> - Referral to counselling services arranged - Referral to psychological services completed today - Referral to Mod Anderson Charity Organisation for additional support (Done) - Community linked services engagement planned - No pharmaceutical treatment initiated at present as per expressed preference - Patient appeared satisfied with the consultation plan
Comment	-
New Referral	(NHS), , , 8H....: Referral for further care (SCI Gateway Referral)
-	---
<u>06/02/2026</u>	<u>Ms Lisa Fox (Clw) at Fernbank Medical Practice</u>
Comment	CLW - T/call with pt, initial intro. Discussion re resources and interests. Agreed to send links. Craig noted he feels on a "path of self destruction" - on further discussion, denies alcohol/illicit drug use, no suicidal ideation, no deliberate self harm, though notes very poor self care excessive energy drinks, smoking, not eating. Isolated. Keen for support to make positive change but anxious re same. Links sent re llttf, Nook, walking routes locally and interest groups. Follow up agreed.
-	---

-	---
<u>30/01/2026 17:39</u>	<u>Mr Gary McBride (Anp) at Fernbank Medical Practice</u>
History	Plan: Will refer to Moira Anderson, Ref to psychological services and plan to discuss medication
-	---
<u>30/01/2026 10:26</u>	<u>Mr Gary McBride (Anp) at Fernbank Medical Practice</u>
Problem	Complex trauma
History	History First consultation regarding childhood trauma and recent psychological distress. Reports feeling not himself since a significant traumatic experience 3 years ago (locked in a house for 2 years during a relationship). History of childhood abuse, including physical and sexual abuse, and further abuse while in foster care; many memories suppressed. Experiences intrusive thoughts, including visualisations of self-harm; denies current suicidal intent and can resist acting on them. Emotional state described as numb; previous limited support from family discouraged discussion.
Examination	Past Medical History: Trial of mirtazapine months ago; ineffective, caused emotional numbing. Telephone consultation Assessment & Plan: <u>Childhood trauma / complex PTSD</u> Trauma involves physical and sexual abuse; psychoeducation provided regarding self-blame and long-term impact. Counselling recommended as most effective long-term treatment; process involves paced discussion of traumatic events. Medication options (SSRIs, mirtazapine) discussed, including potential effects on mood. Researching local charity counselling services for faster access; NHS referral offered if preferred. Follow-up call scheduled today (14:0018:00) to discuss treatment preferences (counselling, medication, or both).
Comment	

25/06/2024	Dr Paul Gallagher at Medication Course Commence

Comment	Telephone encounter phoned craig but no answers left a message for him.
17/11/2023	Dr Colin McLennan at Telephone Consultation
Problem	Discussed low mood & social withdrawal - struggling to re-assimilate after jail time - in particular there are issues with job seeking as can't get the clearance to work - I think CLW could be very helpful here - will ask to get involved. Also directed again to self-refer to lifelink. No change to citalopram currently.

History	Attended minor injuries last week. Had in jury to hand on way to work at new job - has fractured his first metacrapal bone and is due an op for this on Friday. Says job centre need fitnote to advise unfit for work. Works in a warehouse so certainly this won't be possible with his injury. Says he is comfortable currently with wrist splint and was given co-codamol by minor injuries which is helping. Will issue fitnote. Extend as necessary.

Examination	Asthma annual review
Comment	telephone consultation due to covid 19 - re asthma. Feels things are well controlled on Clenil and salbutamol. He does use salbutamol most days but he himself relates this to smoking. He thinks both his smoking and his poor living conditions impact on his chest. Main symptom is sob first thing in the morning. No night waking and no issues getting to sleep. No cough or wheeze. Happy to continue current inhaled meds. Encouraged to continue reducing cigs with a view to stopping. Tells m he is getting a house move soon. Knows to double up Clenil if astham flare. Advised seek review if increase in symptoms

15/02/2021	<u>Dr Andrene McCall at Telephone consultation during COVID-19</u>
History	1/52 Hx slight CP and struggling to breathe. thinks due to where he is staying. in house a few yrs now but had to duct tape window because of severe drafts coming through and hole under cupboard. Renting from DHA. had joiners out to look at windows but said cant replace though bad windows.. affecting health. PMHx asthma attack. 'housing refuse to have duty of care as struggling to breathe due to flat and refuse a prepayment meter so large bills'. has a heating system and no dampness or mould. dry heater. panic attacks due to breathing. no suicidal ideation or intent fed up though living there. lost job recently as mechanic. would like to get back into work again. downloaded calm app in past wk and it helps. x1 episode sharp pain in L side lung then panicked and freaked out. lasted 30secs. dad died bowel ca/ heart disease aged 55yrs. smoker 20cpd: reduced thereafter in past week. rash w patches. no fever or cough/ occas mucous related to smoking. no haemoptysis. no sob no N/V/ no radiation. chest pain related to belching? ?trapped wind but was not in that area. wednesday was out walking and felt struggling to breathe walking home from shop heart rate quickening though not doing anything strenuous. no wheeze. using ventolin. x2p bd. note no Rx from us in 5yrs. in date ventolin borrowed from gf. agrees to restarting clenil and Nurse RV in few months time. refer smoin class. Imp: non cardiac and non concernig one off atypical episode P/ lots of stress and anxiety ongoing may have been trigger. signposted MH resources too and wsg adv given if not improving .would like to look into counselling. .

Dear Dr Blair ,

**Craig Healy; D.O.B: 15/06/1993; CHI: 1506936172
2/1 42 Viewpoint Place, Glasgow, G21 3AR**

Craig was seen back in clinic today. You will recall he had closed reduction and percutaneous pinning for a Bennett's fracture dislocation of base of left thumb.

Check x-ray today shows the anatomical reduction achieved at time of surgery has been maintained after removal of the wire. He continues with his Rhizo Forte splint. I have explained he can start to wean himself out of this. He feels that his pain is only towards the end of the day and is still improving.

He has been given a hand and wrist exercise information sheet and discharged from hand clinic at this time.

Yours sincerely,

Iain McGraw FRCS

Consultant Hand and Orthopaedic Surgeon

Dear Dr Spence ,

**Craig Healy; D.O.B: 15/06/1993; CHI: 1506936172
2/1 42 Viewpoint Place, Glasgow, G21 3AR**

Craig had a Bennett's fracture dislocation at the base of thumb on the left side treated with closed reduction and k-wiring under GA.

The wires that have been in for approximately 4 weeks now were removed in clinic today. He is comfortable with the wires out. We've given him a PUSH splint and he can mobilise otherwise and wean out of this splint over the next few days/weeks.

We will see him in 2 weeks for further x-rays of his left thumb. If all is well at that point then we may reasonably discharge him.

Yours sincerely,

Iain McGraw FRCS

Dear Dr Spence ,

Craig Healy; D.O.B: 15/06/1993; CHI: 1506936172
2/1 42 Viewpoint Place, Glasgow, G21 3AR

Diagnosis: Left wrist Bennett fracture

This patient attended hand clinic for consenting and planning his surgery. He was booked last week however, he his flat was under refurbishment and he could not come.

We are planning to see him in Stobhill tomorrow and if this cannot be accommodated then Friday Theatre L will be the option. He has given informed consent and pre-op started.

We will keep you updated.

Yours sincerely,

Mr Grzegorz Sianos MD BDS EDHS
Consultant Orthopaedic Hand Surgeon
Glasgow Royal Infirmary

CLINICAL INFORMATION**History of presenting complaint****Presenting complaint**

Description: ?Complex Trauma

Comment: I would be grateful if you would consider a review of Mr Healy, whom I have seen twice in the past week.

We have had in-depth discussions regarding a worsening low mood and depressive symptoms over the past four months, triggered by intrusive flashbacks related to historical sexual abuse experienced in his early teenage years. At the time, Mr Healy was living in foster care and was abused by the male partner in the household, who subsequently left when Mr Healy was around 17 years old.

Mr Healy disclosed the abuse to the female carer at the time but felt this was dismissed and not appropriately addressed. Since then, he has attempted to suppress the trauma; however, he now reports that these memories are becoming overwhelming, significantly affecting his sleep.

He describes prominent anxiety, hypervigilance, and nocturnal distress, with symptoms increasingly impacting his day-to-day functioning.

Given the complexity of his trauma history and the current deterioration in his mental health, I would be very grateful for your assessment and ongoing support.

Dear Dr Spence ,

Craig Healy; D.O.B: 15/06/1993; CHI: 1506936172
2/1 42 Viewpoint Place, Glasgow, G21 3AR

Diagnosis: Left MUA and k-wiring of Bennett's fracture – 13.10.2022

This young boy attended the nurse led clinic following the above procedure where he is 15 days post surgery. Today he attended for review where his theatre backslab was removed.

On examination the pin sites are fine, clean and healthy, no signs of infection or cellulitis. These were cleaned and re-dressed with Inadine, Atrauman and gauze swabs and a new lightweight short Bennett's cast was applied. Full instructions were given regarding cast and skin care.

A return appointment has been made for 4 weeks on the Wednesday, where he will return for review to the trauma hand clinic, with cast off, wires out and review thereafter.

Yours sincerely,

Pamela McKirdy

Parental concerns: enter R - raised and problem discussed

Feeding/diet ☐	Illness ☐	Crying ☐	Appearance ☐	Behaviour ☐	Hearing ☐
Eyes ☐	Movement ☐	Toilet Training ☐	Growth ☐	Other ☐	

Are you brushing your child's teeth daily? (Y/N) ☒

Have you registered your child with a dentist? (Y/N) ☒

Development: In the row of boxes for each development area, enter: O - if reporting direct successful observation, H - if from history or mother's report, or X - if not achieved.

In the summary box for each development area, enter N - normal, A - abnormal, D - doubtful or uncertain or I - if this area was omitted or not completed satisfactorily, plus any relevant comment.

Gross motor	Runs smoothly and fast ☒	Takes a running kick at ball ☒	Alternates feet going up stairs ☒	Summary ☒
Comment				
Manipulative skills (fine motor/vision)	Builds tower of 7-8 cubes ☐	Completes 6 shape formboard easily ☐	Imitates a circle ☐	Imitates a cross ☐
	Note handedness: right ☐	left ☐	uncertain ☐	
Communication and hearing	Listens to stories ☒	Speaks clearly in sentences of at least 4 words ☐	Recounts experiences to parents ☒	
	Speech intelligible to others ☒			
Social skills and behaviour	Separates from mother ☒	Imaginative play ☒	Complete self feeding ☒	Reliably toilet trained by day ☒
	Pulls pants down and up ☒			
Comment

For each of the items below, enter: N - normal; A - abnormal; D - doubtful or uncertain; I - not done or incomplete. Detail abnormalities in the "problems" section below.

Examine for: Gait ☒	Testes: right ☒	left ☒	Genitalia ☒	Visual acuity: right ☒	left ☒
Check if indicated from earlier examinations: Heart ☐	Hips: right ☐	left ☐	Eyes (squint): right ☐	left ☐	
Hearing: right ☐	left ☐	Test used ☐	Posture ☐	Muscle tone ☐	

Comments _____

Problems ongoing and identified at this examination (including specific diagnoses):

This section will be "READ" coded. Enter diagnoses or other problems that are likely to be relevant to the continuing health and development of the child in order of their significance. Include congenital anomalies. If the child is referred or has been referred for other assessment or services, enter the appropriate code numbers in the "referral" boxes and "outcome" boxes.

Problem identified (Y/N) ☐ If no, proceed to History report

Handwritten text, likely a medical note or prescription, is visible but extremely faint and illegible due to the quality of the scan. The text appears to be organized into several lines, possibly separated by a horizontal line. There are also some small, dark, circular marks on the right side of the page, which could be punch holes or ink smudges.

Technical drawing of a mechanical part, likely a piston or a similar component. The drawing shows various views and dimensions. Key features include:

- A central vertical axis with a horizontal cross-section.
- Curved lines representing the profile of the part.
- Dimensions indicated by numbers and lines.
- Handwritten notes and markings, including "100" and "100" near the bottom right.

LD switch to cephalexin susp. 725g TID (10P)

review (E spec)

consider going back on prophylaxis therapy

(20/12/95) Urine spec - BSG - clear ; not in suitable container for MSSU

NHS Confidential: Personal data about a patient

Date		
19.12.95	PC	Mother wanted advice re child still having dyspepsia - was being lactated after by grandmother - eating solids mainly today. Advised to encourage feed intake with milk or similar products + soup. Advised also that it was imperative that a sample is obtained in view of consultant's letter dating from 5 weeks ago. Also that in view of a change from Augmentin to 1g of Cephalexin in 1g that no further change would be appropriate. If child is not going to cooperate then she would have to encourage forcibly this evening. Referral to RCTSC may be necessary if he is not cooperating.
20/12/95 5.30pm	NS	Mother phoned - apparently not taking antibiotics - still appears to have discharge as passing urine. Urine spec. today was -ve on testing with BSG stick - advised to bring child along tomorrow for another specimen (fine)
21/12/95		Reviewed today - still having discharge as PU aphidite (T36°C) old soft - no tenderness or masses no spec. available → refer to RCTSC → phoned ✓ letter ✓
27/12/95	QNA	
17/1/96		Asymptomatic at present awaiting OPD review no specimen today to hand one in. resvar trimethoprim 200/5ml purplish-red. (200mg tabs)
3/1/96		Asymptomatic at present - continue trimethoprim 200mg tabs.
21/1/96		Sauterated unwell 200 (OP)

CLINICAL INFORMATION**History of presenting complaint****Presenting complaint**

Description: Referral for Covid-19

Comment: dear Dr

fever overnight- felt cold shivery then hot and sweaty and currently feels cold with heating on. has longstanding cyst on neck posterior neck top of spine which in last 2 days ahd got bigger and red and burst this am leakign small amounts pus and blood. pain with movign head upwards btu otherwsie able to move neck in all other direction. no vomttiing. e and d ok. states lump slightly bigger than a grape. given history of fever i have advised covid testing via nhs inform and self isolation till result back but abscess may be driving this. i am unsure whether can be managed with antibiotics or if requires draining by surgical team? He will require hub transport as has no access to a car. thank for seeing him and assesing
S.Lawrence GP

I would be grateful for your opinion and advice on the above named patient. A brief outline of history, symptoms and signs is given below:

Dear Doctor

I would be grateful for your advice concerning this child who recently presented with symptoms of a UTI. MSSU was taken and confirmed a proteous urinary tract infection. This was treated with Cephalixin and subsequently settled. However, in view of the fact that this has been a problem episode of UTI, I would be grateful for your advice on the need for further investigation at this stage. His general health and development is otherwise satisfactory.

Many thanks for seeing him.

Yours sincerely

Dr A G Rollo

Dear Dr Rollo

CRAIG HEALY DOB 15 06 93 HN 453093
FLAT 15/6 16 PINKSTON DRIVE GLASGOW G21 1NW

Craig was seen in the clinic today. He is now 3.6 years old and continues to thrive. I note that he has been off his antibiotic prophylaxis since last July, but his mother says that he has had a further symptomatic infection in December. I was unclear from her history whether this was diagnosed on an MSU culture and perhaps you could kindly let me know. It does seem that he has had at least 3 proven infections in all and because of this I think it would be wise to do a DTPA reflux study which I am therefore organising.

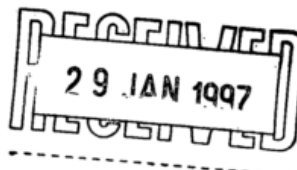

Clinical examination remains normal. He is normotensive and his genitalia are normal.

If we find he has reflux then I would recommend going back on the antibiotic prophylaxis, otherwise I would simply re-start it if he is having trouble with frequent symptomatic urine infections.

He will be seen in 4 months' time.

Yours sincerely

Dear Dr Trollen

**CRAIG HEALY DOB 15.6.93 HN 453093
128 RONALDSAY STREET GLASGOW G22 7AR**

Craig was seen in the clinic today. He is 3.9 years old and has not had any urine infection now since May 1996. As you know he had a normal DMSA scan when first investigated in 1995 and his DTPA reflux study done recently was also normal. He is not troubled with wetting and is not constipated.

He remains normotensive.

I feel we can now discharge him to your care. I would simply treat symptomatic urine infection as they arise. If you find he has a recurrence of frequent symptomatic urine infections I will be pleased to review him and will probably repeat a DMSA scan.

Yours sincerely

M P WHITE

Dear Dr Rollo

CRAIG HEALY DOB 15.6.93 HN 453093
FLAT 15/6 16 PINKSTON DRIVE GLASGOW G21 1NW

Thank you for referring this 2 year old child up to the clinic with a single proven symptomatic urine infection with proteus.

Craig is the first of twins born by SVD at 36 weeks and he has had no neonatal problems. His past medical history is also unremarkable.

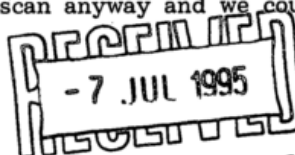

His development is appropriate and his immunisations complete to date. In the family history I note that a 4 year old sibling has also been investigated at this hospital for urinary tract infections.

On examination he is a sturdy boy with his weight just above the 25th centile and height just below the 50th centile. Examination was entirely normal and he was normotensive with a BP of 80/40.

I explained to the mother how we always investigate even one proven urine infection. We have sent a urine for culture and analysis and I will arrange an abdominal x-ray a renal and bladder ultrasound and an Isotope DMSA scan.

In view of his young age I think it would be prudent to keep him on antibiotic prophylaxis currently. I have given a prescription for Trimethoprim prophylaxis 20mgs at night and I would be grateful if you could continue this.

I have not arranged a micturating cystogram because even if reflux was not demonstrated on a cystogram I would still advise antibiotic prophylaxis currently as reflux might only occur during an infection. I think it is kinder to do an Isotope ~~scan~~ scan anyway and we could do this when Craig is about 3½. DTPA

Dear Craig Healy

This is the third time I have written to remind you that your asthma check due.

It is IMPORTANT to have this check to ensure that your asthma is controlled and because you are prescribed medication on a regular basis.

An appointment has been made for you to see Sister K. Riley on:-

Tuesday the 23/08/05 at 6.30

If you refuse to attend the surgery on this occasion, we would be unable to take responsibility for your health in relation to your Asthma control. Your co-operation in this matter will help us to maximise our care for you.

If you are unable to make this appointment please telephone reception to re-arrange it.

Please bring your inhalers at time of appointment.

Yours Sincerely

Dr B Trollden

Dear Dr Rollo

CRAIG HEALY DOB 15 06 93 HN 453093
FLAT 15/6 16 PINKSTON DRIVE GLASGOW G21 1NW

Craig came back to the clinic today. I note that in December he came up to Yorkhill Casualty, he had been crying when he passed urine and was thought to have a urine infection. There was some protein on stix testing. A urine culture was sent off and was negative but he had been treated with antibiotics prior to this being collected. Since then he has been back on his Trimethoprim prophylaxis and has had no further urine infections or symptoms.

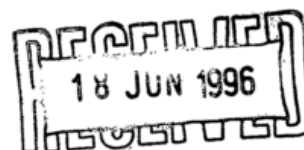

Examination remains normal.

I advised the mother to try stopping the Trimethoprim again in about 3 months' time and I plan to see him in 6 months'. If we find that the second attempt at stopping Trimethoprim causes further urine infections, then I will go on and do a DTPA reflux study. If the attempt at stopping Trimethoprim is unsuccessful then please would you restart it.

Kind Regards.

Yours sincerely

M P WHITE

I would be grateful for your (1) diagnosis and advice on ☐ (2) diagnosis and treatment of ☐ the above named patient. A brief outline of history, symptoms and signs is given below:

Thank you for seeing this lad who's mother is concerned about his vision.

His sister Lisa wears glasses this is the main reason why the mother is concerned. Examination of Craig's eyes is unremarkable but I would be grateful if you would see him to reassure his mother.

Yours faithfully,

Dr. Robert. M. Trolle.

Dear Dr Rollo

CRAIG HEALY DOB 15.6.93 HN 453093
FLAT 15/6 16 PINKSTON DRIVE GLASGOW G21 1NW

Craig came back to the clinic today. He is thriving and has had no further urine infections. The result of his investigations are to hand now, his renal ultrasound abdominal x-ray and DMSA scan were all satisfactory apart from the fact that some faeces was noted in the colon. Mum says that Craig is never constipated and moves his bowels normally twice a day. As his DMSA scan shows no scarring and there is no upper tract dilatation I feel that we can stop his Trimethoprim prophylaxis and I would only go on to do a reflux study if he has a recurrence of his infections.

We have given his mother some sterile galli pots and containers so that she can obtain specimens of urine whenever Craig has any fever, urinary symptoms, tummy pains etc. If you find that his urinary infections do recur and are symptomatic then I would restart the Trimethoprim prophylaxis 20mgs at night. He will be seen in 6 months.

Yours sincerely

DR M P WHITE

SUMMARY REPORT FROM AGENCY HEALTH ADVISER

Date completed 01.05.2009

Telephone Review With Mrs McGarvie – Foster Carer and Tracy Scott – Social Worker

Summary of current health status

Changes in health since last assessment

Craig's last health assessment was completed by myself February 2008. Craig had been offered two appointments with the LAAC Health Team in order to review his health, however, he has declined these. Therefore, a telephone review was completed by both Mrs McGarvie and Tracy Scott. There has been no significant change in Craig's health in the past year.

Illnesses/ accidents / Immunisations – All immunisations are currently up to date, therefore, nil required. There has been no significant illness or accident in the past year.

Present physical health and dental health

Mrs McGarvie states that Craig is taking less responsibility for his own health and is turning day into night. There are no concerns with his appetite and with regards to dental health he is currently refusing 6 monthly dental appointments.

Medical Problems - Craig has asthma and should attend the Asthma Nurse at the G.P. surgery every 6 months for review. He is prescribed both a preventor and reliever inhaler which he uses twice daily and the reliever as required.

Opticians – Craig currently does not wear glasses, however, again is refusing and annual eye check with the Optician.

Dentist – As previously stated, Craig is currently refusing to attend any dental appointments. Health promotion leaflets have been sent around this area.

Hearing – No concerns.

Toileting issues – No concerns.

Developmental/educational concerns

Until recently, Craig attended All Saints Secondary School, however, he now has a college placement. Mrs McGarvie states that this placement is not going too well at the moment as Craig has recently been suspended due to his behaviour.

Friendships – Craig has no difficulty making new friends, however, again Mrs McGarvie feels that these are not always the best influence on him. Craig also has kept friends in Glasgow.

Emotional and behavioural development

Last year when I met with Craig, he had concerns with regards to controlling his own anger. This has been an ongoing problem for approximately the last 2 ½ - 3 years now. At this time, I gave Craig strategies in order to help with his anger and should he require a referral onto Mental Health Services, then he could speak to Tracy around this. However, I am aware that there are no outstanding referrals or existing appointments to Mental Health and at this moment, Craig is currently unwilling to engage with services.

Family contact – This has increased to 4 overnights at home a week from Friday – Mondays. Craig is feeling ambivalent about going home in the future and a mixed emotions around this.

Sleep pattern – Mrs McGarvie states that Craig is turning day into night and is seizing an adequate amount of sleep.

Carers/parenting issues in current placement

Diet – Mrs McGarvie states that Craig has a poor diet. This includes Craig missing a breakfast which is not a new concern, however, will continue to have an effect on his health and concentration.

Exercise – Craig currently is not taking part in any physical activity other than walking.

Personal Hygiene – Craig attends to his own – age appropriately.

Smoking – Mrs McGarvie has concerns with regards to Craig's smoking cigarettes and occasional cannabis misuse. He has been requested not to smoke in his bedroom due to health and safety concerns. Occasional alcohol misuse.

Initial Assessment

History

pain in sole of left foot started yesterday after work. progressed through day. better after resting but then returned today. was on feet most of day before it started. no slight swelling laterally by sole. no heat or redness. no injury. no prev issues with foot or ankle.

also asthma admitted once last year for attack - first one didn't know what it was or how to manage main reason he was admitted. aside from that well controlled. felt bit chesty past few days but feels getting better now. no spit. no temps.

Examination

foot - minimal swelling laterally mildly tender small area just above sole of foot. FROM ankle and toes passive and active. no redness or heat. tender sole mid foot to ball of feet. worse more laterally.

chest clear talking easily sats 98% air hr 100 temp 36.9

Diagnosis

plantar fasciitis

Treatment

RICE not back at work till 5th. exercises explained. cant take NSAID with asthma so mild co codamol

Clinical Coding

N245. Pain in limb

Prescription Details

co-codamol (codeine and paracetamol) tablets 8mg+500mg 1-2 tablets four times a day 30.00

Dear Dr. Ewart,,

**Craig Healy; D.O.B: 15/06/1993; CHI: 1506936172
FLAT 13-4, 160 LINCOLN AVE, Glasgow, Lanarkshire, G13 3PN**

Procedure:

Excision of multiple scrotal sebaceous cysts.

Surgeon:

Alistair McKay/Mr. H. Qazi (GA Dr. Evans).

Details:

Patient positioned and draped. Over twenty scrotal sebaceous cysts confirmed. These varied in size from less than a pea to about 2.5 cm across. One by one, each of these cysts was excised. A number of cysts were stuck to the skin and required a wedge of skin to be excised along with the cyst. Bipolar diathermy was used to control small bleeders at the base and all the rest closed with 3/0 interrupted Velosorb. No bleeding was seen at the end and it was dressed with Opsite spray, blue swabs and scrotal support.

Post op:

Home later.
Routine out patient appointment.

Yours sincerely

Electronically Signed: Mr Hasan Qazi, Consultant

Attendance: Specialty - Urology; Clinic - STHQUR3-UROL ACH DR QAZI TUESDAY AM
Date and Time of Appointment - 08/09/2015 10:00

Clinical Comments:

Diagnosis

Multiple scrotal sebaceous cysts

Outcome

Excision of sebaceous cysts (G.A. Day Surgery Unit)

Thank you for referring this gentleman to the Urology Clinic. Ever since he can remember, he has had a number of sebaceous cysts which have grown over the years causing significant cosmetic embarrassment.

On examination a large part of his scrotum was replaced by sebaceous cysts. These varied in size, measuring up to about 2.5cm across.

I have had a detailed discussion with this gentleman and it may not be possible to remove them all in one sitting. I will therefore admit him for removal of the larger cysts at the Day Surgery Unit in due course. He is aware that he may require a second procedure. He is aware of the risks of bleeding, haematoma, infection, further scarring, recurrence of cysts, cosmetic dissatisfaction. He will require an overnight stay.

Yours sincerely

Mr Hasan Qazi
Consultant Urological Surgeon

Clinical Comments:

Dear Doctor,

This 20 year old gentleman was first admitted to WIG on the 10/6/14 with SOB and wheeze. This has been present for the past 2 weeks and has increased in severity in the last day prior to admission. He has also noticed becoming increasingly wheezy and noticed a productive cough

He has childhood asthma but has not experienced any symptoms nor had any admissions for a long time. He thinks this episode may have happened as he is staying with his sister who keeps guinea pigs.

At WIG, he was started on nebulisers, IV hydrocortisone, antibiotics.

After a day of close observations he was feeling clinically better and was transferred to ward 6C GGH on the 12/6/14.

At that point, it was felt that this episode of severe asthma was resolving (his PEFR has improved from his first admission) and thus he was switched to oral steroids, antibiotics (for which he should finish the course) and was started on a regular inhaler as well as PRN salbutamol. His nebulisers were

Healy Craig

CHI: 1506936172

IDL 13/06/2014 v1

stopped and he was observed for a further period of time before discharge home.

He is a smoker and it has been strongly advised for him to cease smoking
He was also seen by the asthma nurse specialists and will be followed up in the asthma clinic in 6 weeks time
Kind regards

Treatments: None recorded.

Follow-up arranged: asthma clinic 6/52

Planned Outpatient Investigations: nil

Final Discharge letter to follow: yes

CLINICAL INFORMATION**History of presenting complaint****Presenting complaint**

Description: Multiple large scrotal sebaceous cysts

Comment: This 22 year old man has multiple multiloculated sebaceous cysts on his scrotum. These are large and deforming, causing discomfort at times when the catch on his clothing.

Needless to say he is extremely embarrassed by the appearance of his scrotum. It is having a significant effect on his ability to establish any significant intimate relationship.

I would be grateful for your assessment and advice regarding any possible operative solution.

Dear Dr. Geddes,

**RE: CRAIG HEALY – CHI 150693 6172
FLAT 1-1, 89A PANMURE STREET, GLASGOW G20 7SJ**

Thank you for your referral for the above.

I am writing to advise that Mr. Healy did not attend his appointment on 15th May 2013 and he has not responded to a further letter requesting he contact me to arrange another appointment.

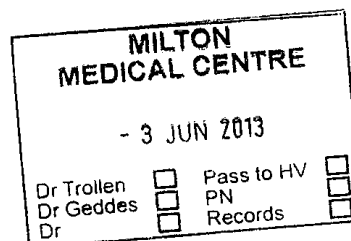

I have therefore discharged him from the Shawpark Centre back to the care of yourself.

Yours sincerely,

Re

L Stirrat

CLINICAL INFORMATION**History of presenting complaint****Presenting complaint**

Description: Expressing suicidal ideation and previous attempts at self harm

Comment: I would be grateful for your assessment and advice re management of this man. He has recently joined or list after moving from Kilmarnock where he was taken to hospital after attempting self harm. His previous GP referred him to a mental health clinic but he apparently only attended once before moving. He was taken into care aged 14yrs after his father died and he sounds as if he possibly has unresolved grief issues. At the age of sixteen he was living alone but was working but felt he was struggling to cope and then attempted to commit suicide by cutting his wrists and was taken to hospital but doesn't seem to have been kept in. He lost his job apparently as the result of his suicide attempt. He has now moved up to Glasgow where his mother and sister are. He is currently in a flat but seems about to lose this because of debt arrears he had in Kilmarnock. He has a social worker but says the social worker cannot help him because of the debt arrears. His sister has a flat near him but this seems to have been arranged through Barnardos and he cannot stay with her. He does not seem to have a good relationship with his mother although sees her from time to time. He is keen to work but can't get a job and seems about to lose his accomodation and is feeling life is pretty hopeless. He is not currently on any medication. Thank you for seeing him and advising

Dear Dr Trolen,

CRAIG HEALY 77 MORRIS CRESCENT HURLFORD 15.06.1993

Attended: 18th May 2011

Diagnosis: Bruising to right leg

- 20mm

This young man was clipped by a car whilst on the pavement and sustained bruising to the area around about his fibula on the right. He also had some abrasions to his face and his knuckles but no other clinical evidence of bony injury or other significant injury. X-rays taken showed no evidence of a break in the fibula, and he was able to mobilise with crutches and was brought back for review.

Today at the clinic bruising over the lateral aspect of his leg is more prominent, and he is still tender round about the neck of his fibula. There is no evidence of any distal neurovascular deficit and he is able to weightbear now without crutches.

I have advised him with regards to ice and analgesia, and continue gentle mobilisation and I have referred him for some physiotherapy.

We will see him back in a few weeks time to assess his progress.

Yours sincerely,

Mr David Chung, Consultant
Department of Emergency Medicine

CLINICAL INFORMATION**History of presenting complaint / examination findings / investigation results****Presenting complaint**

Description: MH/JR Dictated 05.12.12

Comment: I would be grateful for your help in the management of this young man. He says that he was taken into care age 14 due to an alcoholic, physically abusive mother. He had a very good relationship with his father and was devastated to be taken out of his childhood home. He and his twin sister were taken into care. He went slightly off the wall at this age and stole and drank, dabbled in drugs at times, including Cannabis and legal highs, however, has not taken any drugs for several years. He was planning to move back into his family home age 16 but, unfortunately, his father died the day before his 16th birthday due to bowel cancer. He tells me he was absolutely devastated when this occurred and struggled majorly at this time. He managed to pull himself together and got himself a job as an apprentice mechanic and says he has been working there for 3 years. Age 18 he moved out from his carer into his own flat and started to decorate this but has never quite managed to complete this. Three weeks ago he tells me he attempted to hang himself and either his mother or sister's friend were worried and informed the Police who broke into his house and took him to A&E. He says he was assessed by the Mental Health Team and was told to register with a GP which he has subsequently done. He has told me he is waiting on an appointment.

He has self-harmed in the past but has not for 3 weeks. There are a few scars on his arms. His mood is low with anhedonia, poor sleep, poor appetite. He has ongoing thoughts of wishing he were dead, however, he has come asking for help today and I do not feel he is actively suicidal at present.

I feel he would greatly benefit from your service. Social Work are involved with in his case as they are visiting him today at 5.30 pm.

I phoned the Duty CPN who told me that the Police had raised an Adult Protection Alert for this young man. Thank you very much for your help in his management.

Examinations and Investigations

If referral is urgent, has this been discussed with duty clinician:	Yes	-
1.Are there current active thoughts of self harm, is there a plan?:	No	-
Previous self harm comments:	Says attempted to hang himself 2-3 weeks ago and was taken to A&E	-
Is there a History of suicidal or self harm injurious behaviours?:	Yes	-
Suicide/Self harm comments:	Has self-harmed in the past, scars on arm and says attempted suicide 2-3 weeks ago	-
Any history or current threat of violence or aggression, considerations to staff safety?:	No	-
Any social circumstances or previous psychiatric history impacting on current presentation?:	Yes	-
Social circumstances/previous psychiatric history comments:	Has just lost his job due to poor attendance after suicide attempt and says is at risk of eviction	-
Considerations of vulnerability /Child Protection Issues/ First presentation Psychosis/ Peri-Natal:	No	-
Current smoker:		04-Dec-2012 00:00
