Mental State Assessment

(e.g. appearance, behaviour, speech, affect, mood, depersonalisation, derealisation, obsessional phenomena, self-harm thoughts and suicidal ideation, violent thoughts, perceptions, cognitive function, judgement, sleep, motivation, biological symptoms and insight)

casually dressed.

Behaviour appropriate though noticeably anxious.

Speech of normal rate and rhythm.

Describes mood as stable.
Tends to over sleep.

No problems with appetite
Difficulty with motivation.

Has occasional suicidal thoughts no plans. tends to phone the Samaritans or distracts himself and thinks about his son.

Described auditory hallucinations which are worse in the evenings.

Has insight into his illness.

Strengths and Potential for Positive Risk Taking

Engages with the mental health services.

Has a CPA

compliant with medication

Name <u>Leon Cotton</u>	CHI 11703751191	NHS File

Risk Indicators

The following are lists of common risk factors to be used to assist in the completion of the *Working with Risk* form and should **not** be used as a checklist.

Risks to Self

- Attempts on their life
- Expressing high levels of distress
- Use of violent methods
- Helplessness or hopelessness
- Misuse of drugs and/or alcohol
- Family history of suicide
- Recent publicity or clusters of suicides
- Major psychiatric diagnoses
- Separated/widowed/divorced
- Expressing suicidal ideas
- Unemployed/retired
- Periods of neglect
- Falling to drink or eat properly
- Considered/planned intent
- Significant life events
- Believe no control over their life
- A sense /feeling of hopelessness
- Difficulty communicating needs
- Denies problems perceived by others
- Unable to shop for self
- Insufficient/inappropriate clothing
- Difficulty managing physical health
- Difficulty maintaining hygiene

Risks Associated with Disability

- Sensory impairments
- Intellectual impairments
- Memory/cognitive impairment
- Physical suitability of home
- Mobility inside/outside the home
- Risk of falls
- Risk of wandering
- Risk of accidental injury
- Communication difficulties
- Inappropriate expression of sexuality
- Impulsivity
- Inappropriate demands on services
- Driving

Environmental Risks

- Ligation points, e.g. hinges, door handles
- Access to hazardous substances, e.g. cleaning fluid, drugs, alcohol, boiling water
- Access to ignition sources, e.g. lighters, matches, pressurised aerosols
- Presence of vulnerable adults
- Presence of children
- Access to objects that could be used as weapons e.g. plant pots, fire extinguishers, unsecured furniture
- Access to weapons, e.g. knives, guns, etc.
- Hazardous escape route for staff
- Presence of drug paraphernalia, e.g. syringes
- Presence of antisocial peers
- Living in inadequate accommodation
- No amenities, e.g. water, gas, electricity
- Living alone (without support)
- Lack of personal supports, e.g. relatives, friends
- Pressure of eviction/repossession

Physical Medical Risks

- Physical impairments
- Medical conditions
- Self-managing medication
- Monitoring medication side-effects
- Withdrawal from drugs/alcohol
- Self-injury (e.g. cutting, burning)
- Other self-harm (e.g. eating disorder)
- Risks from smoking (e.g. health, fire)
- Manual handling risks
- Incontinence

Risks to Others

- Supervision failures, e.g. non-compliance
- Incidents of violence
- Psychosis, e.g. paranoid delusions about others, violent command hallucinations
- Use of weapons -- carrying or using
- Misuse of drugs and/or alcohol
- Signs of anger and frustration
- Sexually aggressive behaviour
- Preoccupation with violent fantasy
- Expressing intent to harm others
- Admissions to secure settings
- Dangerous impulsive acts
- Cruelty to animals
- History of employment problems
- Diagnosis of Personality Disorder
- Relationship problems

Other Risks

- Lack of positive social contacts
- Experiencing financial difficulties
- Exploitation by/of others
- Stated abuse by others (e.g. physical, sexual)
- Abuse of others
- Harassment by/to others (e.g. racial, physical)
- Risk to child(ren)
- Risk to vulnerable others
- Culturally isolated
- Religious or spiritual persecution
- Wilful fire raising
- Risk to staff including threats
- Staff conveying clients in own transport
- Sexually inappropriate behaviour

Clozapine Monitoring (M1-1) (North Fife)

Care Pathways

Name: Leon Gratton	Ward / Dept: weston	Care Plan Number 2
C.H.I. Number 1703751191		Date Commenced 13/08/13 updated 09/12/16
Consultant/G.P. Dr Mawson	Care Pathway initiated by: T. Hedder S/N	Date Resolved

Description of Need:

Patients treated with clozapine, require close monitoring due to the risk of adverse effects particularly during the early stages of treatment.
Haematological monitoring is mandatory as set out by the Zaponex Treatment Access System (ZTAS). Additional clinical monitoring is required to identify other serious side effects and less serious side effects which can be minimised by dose reduction, reducing the rate of dose increase, adjusting the timing of the doses, or by prescription of additional medication to treat the side effect.

Objective/Expected Outcome:

To optimise the benefits and minimise the risks of treatment with clozapine by monitoring for and reporting side effects.

Actual Outcome

Clozapine Monitoring (M1-1) (North Fife)

	Date	Signature	Variance														
ACTION TO BE TAKEN																	
Patient education Prior to commencing treatment with clozapine, patients will be provided with information on clozapine including blood sampling requirements, benefits of treatment and possible side effects. This may be presented in various forms. For example: Zaponex Patient Handbook and DVD (available from ZTAS); Patient Information Leaflet (available on the ZTAS website www.ztas.co.uk Select "download forms" then "Zaponex Patient Information Leaflet (PIL)") Patient information leaflets available from Choice and medication http://www.choiceandmedication.org/nhs24/																	
Nursing staff education Nursing staff will familiarise themselves with the information contained within "Zaponex- your guide" and the background information contained in Appendix 1 of this Care Pathway. For comprehensive information refer to the Zaponex Summary of Product Characteristics (SPC) which is available on the ZTAS website www.ztas.co.uk On Homepage select "download forms" then "Summary of Product Characteristics"																	
Patient Consent to registration with ZTAS The consultant is responsible for informing the patient and/or carer(s) that patients' personal details will be saved on the ZTAS database and on the Central Non Re-challenge Database, if applicable. A "Consent Form" for obtaining a patient's consent for registration with ZTAS can be downloaded from the information section of the ZTAS website by healthcare providers who are registered with ZTAS. All personal information as received by ZTAS is handled in accordance with the Data Protection Act 1998. For patients with T2/T3 Treatment Plans clozapine must be specifically listed in the Treatment Plan.																	
Registration Medical staff must register the patient with ZTAS.																	
<table border="1"> <tr> <th>Date of registration</th> <th>ZTAS PIN Number</th> </tr> <tr> <td>05/06/2012</td> <td>10278890</td> </tr> </table>		Date of registration	ZTAS PIN Number	05/06/2012	10278890												
Date of registration	ZTAS PIN Number																
05/06/2012	10278890																
Venepuncture for mandatory full blood count (FBC) monitoring Nursing staff will ensure that the patient attends for venepuncture according to monitoring frequency and record current monitoring frequency below.																	
<table border="1"> <tr> <th>Monitoring frequency</th> <th>Date</th> </tr> <tr> <td>Weekly monitoring (date clozapine commenced)</td> <td>08/06/12</td> </tr> <tr> <td>Fortnightly monitoring commenced (advised by ZTAS)</td> <td>15/10/12</td> </tr> <tr> <td>Four weekly monitoring commenced (advised by ZTAS)</td> <td>18/06/13</td> </tr> <tr> <td>Any further changes in monitoring frequency to be recorded below</td> <td></td> </tr> <tr> <td></td> <td></td> </tr> <tr> <td></td> <td></td> </tr> </table>		Monitoring frequency	Date	Weekly monitoring (date clozapine commenced)	08/06/12	Fortnightly monitoring commenced (advised by ZTAS)	15/10/12	Four weekly monitoring commenced (advised by ZTAS)	18/06/13	Any further changes in monitoring frequency to be recorded below

Summary of contact

Cpn took mr gratton to his gp on 29 july as psoriasis continues to be causing problems , gp prescribed antibiotics but also chased up a dermatology referral. Cpn took leon to vhc later that day for treatment to be started. cpn visited following week twice daily to apply treatments as Leon due to negative symptoms appears not to be applying creams correctly or as often as he should be returning to dermatology On 1st 5th 8th 12th 15th and the 19th of august , unfortunately his skin condition is not responding as it should be mainly due to leon not being able to comply with the treatment plan , his Richmond support workers are not allowed to put creams on him and there dosnt appear to be service that would do this . the staff at the victoria would like to have leon attend daily inorder to ensure he is receiving the correct treatment bandaging his arms and torso and legs . Unfortunately leons mental state does not allow him to use public transport to attend their on a daily basis . Staff at dermatology have referred leon urgently to be seen by a visiting dermatology consultant (from ninewells) at the adamson hospital to try to facilitate a more robust treatment plan which can be carried out in the local area or at the adamson hospital . Again the problem will be getting him there as his mental health problem of paranoia restrict him from venturing out of the house. Unfortunately his cpn is on holiday for next three weeks .

4. Summary of contact

Mr Gratton attended a dermatology out patient appointment at st Andrews hospital with a Dr Dakin on Tuesday the 13th of September, Leons skin is much worse now than it had been prior to his attending the VHK on a regular basis several weeks ago. he was given a prescription for Epaderm cream twice daily, Dermol 200 daily, oilatum bath oil twice weekly, fucibet ointment 100g. DR Dakin will see him again next tuesday afternoon. Leon informed cpn he has also been seen by Dr Olley over the past few weeks. noticed today that his feet are swollen looks like inflammation from his eczema. unfortunately Leon has not handed the request for medication into his gp CPN attempted to do this late on the 14 however the surgery was closed for staff training, plan to deliver the prescription early on the 15th which will mean he will be unlikely to receive his treatment until early next week. CPN will try to speed this process along.,

4. Summary of contact

home visit today . have had a failed visit every day this week . Today Leon answered the door this afternoon , he did not answer this morning , as suspected he has not handed in his prescription and is running out of his creams for his skin condition , CPN has put script in in the hope it might be ready early next week . Leon has stopped using his E cigarette now , c/o of sleeping too much during the day and being awake through the night .skin very dry today advised to use his creams , also house very untidy carpet hasn't been hovered in some time lots of dead skin covering the carpet .

4. Summary of contact

home visit to take Leon to his out patients appointment with Dr Olley at Weston day hospital , Leon claimed to not know about the appointment and refused to go as he had no clean clothes to put on , C/O pain in his skin all over same looks painfully inflamed , cpn found some cloths for him to put on and persuaded him to attend the appointment . Taken to appointment and was seen by Dr Olley who has made a few adjustments to his prescribed psychiatric medication but advised to make a GP appointment for a review with a view to starting antibiotics . Leon stated he would make appointment next day. Returned home with cpn who helped him with some cleaning ,

4. Summary of contact

Home visit leon reports he is sleeping much more since he has had the small increase in his anti-psychotic abilify , his house was very untidy with clothes scattered around the room and the flooring and carpet doesnt look like it has been hovered for many weeks. Discussed cleaning and hovering and discovered his hover wasnt working well , on investigation it had a blockage and the rollers were clogged with hair and string , leon and cpn worked to clear blockage and then he was able to do a little hovering .Has a dermatology appointment for next Tuesday at 1520 hours at St Andrews hospital , CPN will take him to the appointment . Has lost his repeat prescription for his creams and has asked cpn to try to assist .

4. Summary of contact

home visit Leon had been at home on tuesday but did not hear the door or windows being chapped by cpn as a result has missed his dermatology review . Cpn had also left phone number to call for a repeat prescription for his creams the previous week again he indicated he would call but as yet has not , cpn sat with him and made him phone and put an order in over the telephone.He has bought a new plug in hover and intends to use it more regularly about the home , cpn suggested that they could work for a few hours together getting his bedroom and living room back into a livable condition.

4. Summary of contact

Weston day hospital having problems getting blood from Leon and him attending in order that they can try again to obtain bloods. Cpn contacted Leon on Tuesday to arrange to take him into Weston in order that bloods could be taken, also went to chemist to see if medication for his psoriasis was there. Pharmacist have not had a request for more creams, Cpn on returning Leon home found a repeat prescription sheet which was filled out and Cpn later handed it in to Gp practice. Leon has a CPA meeting due next month, his house remains very untidy with lots of dishes and rubbish and cloths scattered about the floors. He has bought a new hover which works well.
