Comment	
-	----
<u>24/07/2023 12:25</u>	<u>User Locum Locum at Telephone Call</u>
Problem (FIRST)	Suicidal ideation Urgent extra TC. Note hx of anxiety, depression and previous etOH abuse. Reports recently anxiety and mood have deteriorated due to stress of death threats from people connected with her cousin who she currently has staying in the house. Received further threat this morning which was the "tipping point" - intrusive thoughts about ending her life but no specific plan or intent. Reports previous similar thoughts in the past but not as strong as current thoughts. Has been to police re: death threats this morning and advised to lock doors of house. Reports feeling very anxious which is affecting sleep badly. Previously tried courses of zopiclone which helped initially but then became ineffective. Lives with husband, cousin and youngest son who are supportive. Pt spoke to daughter who encouraged her to contact her GP. Feels talking to family members helps. Agreed they are strong protective factors. Reports previously trying antidepressants but did not find them effective but open to trying alternative options. Discussed cCBT which she agreed to try. No etOH recently. Imp: anxiety with depression, acute stress from death threat Plan: start citalopram, refer for cCBT, review in 4/52, strong worsening statement in meantime, agreed to keep herself safe and to discuss with family if thoughts becoming more intrusive, signposted to routes to access services. Dr P Shepherd, GMC 7446701
History	
Examination	Engaged well in consult, expressive and articulate. No abnormal rate or vol of speech. No obvious thought disorder.
Medication	Citalopram Hydrobromide Tablets 20 mg <i>28 tablet ONE TO BE TAKEN EACH DAY</i>
-	----
<u>24/07/2023</u>	<u>Mrs Nikki Kelly at Bridgeton Health Centre</u>
Comment	Pt called today. no calls left. Patient states feeling suicidal. Message sent to GP
-	----
<u>16/05/2023 14:27</u>	<u>User Locum Locum at Bridgeton Health Centre</u>
Problem (NEW)	Anxiety states See discussion Sept 22. Similar issues this time. Lots of stress regarding daughter's mental health. Has been a bit off the rails this week and then didn't hear from her at all over weekend. Got a call from daughter's employer on Monday saying hadn't turned up for her shift so mum had to call police for a welfare check. Subsequently found and all ok but Janice hardly sleeping. Just worrying a lot. Doesn't feel mood is an issue however. Primary concern is affect on sleep. Previously used zopiclone for same issues to effect. Agreed same. Aware not a regular prescription. GP Locum Dr I. Hansom
History	
Medication	Zopiclone Tablets 3.75 mg <i>14 tablet ONE TO BE TAKEN AT NIGHT</i>
-	----

Problem (FIRST)	Anxiety states Daughter attempted suicide twice in last few weeks and been in and out of Dykebar. Understandably low and anxious at present. Sleep is terrible as preoccupied by thoughts of current events. Otherwise well.
History	
Examination	Euthymic on phone.
Comment	2 week supply zopiclone. Chat again in a couple of weeks.
