Result: Urea and electrolytes ***** - Satisfactory - No Action

Serum sodium	137 mmol/L	(Range: 133 - 146)
Serum potassium	4.3 mmol/L	(Range: 3.5 - 5.3)
Serum urea level	8.1 mmol/L	(Range: 2.5 - 7.8)
Serum creatinine	57 umol/L	(Range: 59 - 104)
eGFRcreat (CKD-EPI)/1.73 m ²	90 mL/min/1.73m ²	(No range available)

eGFR results reported using CKD-EPI formula from 06/01/26. eGFR G 1 Normal to increased GFR eGFR is not recommended for use in individuals with unstable creatinine concentrations (including pregnancy, hospitalised patients, serious comorbidity conditions, AKI), and for persons with extremes of muscle mass and diet (including amputees, bodybuilders, muscle wasting disease, malnutrition). An eGFR of >60mL/min/1.73m² is considered normal in most patients if they do not have other signs of renal damage such as proteinuria. If concerned about kidney function then check urine albumin:creatinine ratio and consider requesting ultrasound of kidneys.

16-Jun-2026 Dr ***** Smith *****

Result: LIPIDSComment:) HDL values <1.0 mmol/L are associated with an increased risk) of coronary heart disease. This is also the case if the total cholesterol to HDL ratio is >5.0.)(***** - Satisfactory - No Action

This email is for Rafael Viola. It is about your request on 11 August 2026.

If you share this email address, please check the name above as this message is for them.

Dear Rafael

This is a standard reply to say we have got your request.

We expect to reply within one working day, Monday to Friday (except for public holidays). If we can see it's urgent, we will try to help as fast as we can.

Please answer your phone if you're expecting a call from the practice and remember that this may be from a withheld number.

When it is urgent or you are not well

If you think it is urgent or your health gets worse before you hear from the practice, please take action:

- For emergencies, call 999 or go to A&E, or where to get urgent help for a mental health crisis. 999 is free.
- During opening hours, call the practice.
- If you're not sure, read when to use the 111 service and when to go to A&E. 111 is free.
- If the practice is closed or you can't get through, call 111 or use the NHS 111 Website.

Please do not reply to this message. If you need to discuss it, please contact the practice.

Kind regards,

Chaucer Surgery

If you share this email address, please check the name above as this message is for them.

Dear Rafael

This is a standard security check message to let you know that we had a request from you using different contact details from your patient record.

Please ignore this message if you know about the request but we ask you to call 024 7638 3784 or e-mail cwibc.chaucersurgery@nhs.net if you don't.

If you would like to update the contact details on your record, we will be happy to do this for you.

Please do not reply to this message. If you need to discuss it, please contact the practice.

Kind regards,
Chaucer Surgery

Dear Dr

Re: Mr Rafael Viola NHS No: 400 147 5723 DOB: 21-Jul-1959
Gender: M EMIS No: 8986
101 Bradestone Road, Nuneaton, Warwickshire, CV11 4QS

Thank you for referring the above patient for dietary advice.

Dietetic Appointment Details

07-Jul-2026 BOLTON, Georgia Initial Home Visit
(Dietitian [REDACTED])

Actions for GP:

1) Oral Nutritional Supplement Prescription:

Oral nutritional supplements are required for the ACBS indication of disease related malnutrition:

<u>Action Required</u>	<u>Oral Nutritional Supplement</u>	<u>Daily Dosage and Presentation</u>	<u>Monthly Prescription and total volume/weight (28 days)</u>
Start	Nutricrem (Nualtra)	2 pots per day 125g per pot	56 x 125g 7000g

***Please prescribe the oral nutritional supplement as REPEAT.**

The patient was advised to build up to 2 pots per day as follows:

Day 1 and day 2: Take ONE pot of Nutricrem

Day 3 onward: Take TWO pots of Nutricrem

2) I would be grateful if you could please be aware and follow up with Rafael regarding the below for further discussion/investigation:

- Ongoing reflux symptoms regularly- sensation of "bile"/ "burning" in chest in the morning. Milk and fizzy drinks identified as possible triggers for reflux symptoms by

patient- consumes in small quantities. Taking omeprazole and lansoprazole as prescribed.

- Once weekly "brings up undigested food" from evening meal eaten the night before.
- When swallowing meat and bread, experiences "choking" ~ 3 times weekly. Rafael stated he does not seem to cough when this occurs. He reports cutting up meat into "very small" has helped him to manage this. He reports "glands are always swollen" and is unsure if this may be contributing to the sensation described. Consented for Dietitian to refer to Speech and Language Therapy for swallow.

Assessment:

Weight	Unable to obtain weigh on this visit. Patient is a wheelchair user. 06-07-26: Mid Upper Arm Circumference (MUAC): 27.5cm
Height	1.72cm
Body Mass Index	20-30kg/m2 based on estimate from MUAC. BMI visibly <20kg/m2.
Recent Weight Change	No recent weight. Latest available: 62kg-Sept 2024; BMI 21 (5.5kg loss from 2022). Patient reports arms and legs thinner over the last ~2 years. On visual assessment 06-07-26: thin appearance of arms and legs, likely element of muscle wasting; loose skin to arms.

Review: This patient will be reviewed by the dietitian (aim to obtain weight upon review using appropriate scales). We will keep you informed of the patient's progress and whether any changes to the oral nutritional supplement prescription are required.

If you have any queries regarding this request, please contact us on the above number.
