Consultations

17-Jan-2026 14:36	Face to face consultation (Liaison Inverclyde) MCGAVIN, Marguerite (seniorunscheduledcarenurse)
Comment	Attended L South in IRH to review this 47year old man who had ? taken an overdose of Amitryptiline after appearing in court . He has allegedly been charged with sexual assaults on minors and vulnerable adults which took place 30 years ago.His partner found him lying in bed with empty packets by his side. Colin appeared angry when we introduced ourselves stating he didn't want to talk to us and that we should F... Off. ward staff were unconcerned , medics had written that they thought his presentation was behavioural rather than effects from overdose. Nursing staff spoke with Colin in the hope they could change his mind .Colin refused again to speak with us. We were unable to carry out an assessment but have advised medics and nursing staff that should colin change his mind we would be happy to review.
