Dear Miss Margery

You are invited to have a smear test and you are being asked to attend because you have either, never had a test before or it is a routine smear recall.

This painless test will only take a few moments of your time . For women aged between 25 to 49 your recall is every 3 years and for women aged 50 to 64 the recall is every 5 years. If you have previously had a hysterectomy you may not need to be re-tested, but if you are unsure you can check with the nurse.

Would you kindly make your appointment with our Practice Nurse who holds her clinics at our Sheerness Surgery and would remind you that you should not be menstruating whilst having the test.

We look forward to hearing from you.

Yours Sincerely
