Dear Dr Uppal

RE: Katrina MARGERY, DOB: 24.05.1967
49 Sheppey Beach Villas, Manor Way, Leysdown on Sea, Sheerness, Kent,
ME12 4QQ

Diagnosis: Non union humerus

Background: -

IM nailing

Non union at 8 months

Management: - Removal of nail and bone graft application and anterolateral plating

Complication: - Post op wrist drop

This lady is 6 weeks down the line following a plating of a non-union of the humerus. She developed radial neuropraxia unfortunately, and currently has a wrist drop; but the whole hand seems to have altered sensation and weakness. There are some vague signs of recovery, but she was sent home without a splint. I will arrange one for her. I will also arrange some physiotherapy for her. In the meantime I have advised regular passive stretching exercises, and will review in 6 weeks, X-ray on arrival.

Yours sincerely

Mr Saif Ahmed MSc, FRCS (Orth)
Locum Consultant Surgeon
