Dear Dr. Uppal,

**Re: Katrina MARGERY - dob 24.05.1967
49 Sheppey Beach Villas, Manor Way, Leysdown, Sheppey, Kent**

Thank you very much for sending this lady to our clinic who suffers from overactive bladder symptoms which are making her life very difficult. She has tried all anti-cholinergics but they have failed. You may remember in 2006 she was seen in Sheppey Clinic and at that time we decided to give her an intra-vesical botox injection but because she was trying for IVF the procedure was not done.

Today she told me that she has given up the idea of IVF and her symptoms are bothering her too much and she would like to be considered for intra-vesical botox injection. She had a previous flexo-cystoscopy which was normal and a previous urodynamic study under Mr Palmer has shown normal bladder activity.

As she has tried all the anti-cholinergics I have placed her name on the list for cystoscopy intra-vesical botox injection. I have explained to her about the possible complications of the procedure.

Yours sincerely
