Dear Doctor D'arcy,

The following patient from your practice attended the Minor Injury/Illness service. The treatment, diagnosis and referral was as follows:

Name:	Margery, Katrina	Date Attended:	09 May 2009
Date of Birth:	24 May 1967	Time Attended:	13:42
Address:	49 SHEPPEY BEACH VILLAS MANOR WAY LEYSDOWN-ON-SEA,	Presented with:	right arm/cast is loose and hand sw
Postcode:	SHEERNESS, KENT	Incident Type:	Redressing/Review
Tel No:	ME12 4QQ	Clinician:	Sister Graham
Episode Number:	01795511482 SH-09-004332-3		

Diagnosis:

POP problem, Site: Humeral Shaft Side: Right

Notes: Katrina would like her cast changed, I have explained we do not do these type of casts and she would need to attend MMH. her fingers are swollen and so far she has refused to remove her rings from ring finger. Advised heavily to do so but declines. bruising to most of arm, advised that it is very important that she keeps her cast on but it has slipped from shoulder and doesn't appear to be fitting snugly. Advised ++ to attend MMH but she states she has no transport (despite being driven here by a friend and despite being driven to MMH the other day. I have offered ambulance (PTS) transfer, which she also declines. Patient states she'll get someone to take her there, or might wait until clinic in 4 days. I have advised imp of using cast properly and advised visiting MMH but am not convinced patient will do so. Sens and circ intact. brisk distal refill noted, radial pulse intact.

On Air/On Oxygen?: Blood Pressure: Respirations: Pulse: Temperature:

Treatments:

1. Reassured., Verbal Guidance, Patient agreed to examination.

Patient Discharged to: A&E Medway

Yours sincerely

Sister Julia Graham
