Dear Dr P P D'Arcy,

Re: Katrina Margery 24/05/1967

David Rook 07/09/1957

49 Sheppey Beach Villas, Manor Way Leysdown-on-Sea Sheerness, Kent ME12 4QQ

I reviewed Katrina and David today.

In summary Katrina is now 39 and has primary subfertility of two years. She is ovulatory with a progesterone of 57. Her follicular phase hormones are normal with an FSH of 6.1 and oestradiol of 150. HSG has confirmed bilateral fill and spill. Semen analysis has shown a count of 17 million/ml, 9% motility and 6% normal count.

In view of this, she will need to undergo IVF/ICSI. I have asked her to register with the Assisted Conception Unit and have given her an information booklet.

I look forward to seeing her when she comes through.

Yours sincerely
