AT	
	US KNEE Rt: Clinical History: .
	Right posterior knee fluctuant swelling for 3/12- purple skin - varicose veins noted
	hx of DVT on warfarin
	?bakers cyst ?cyst ?cause as appears may contain blood
	?dilated varicose vein ?popliteal aneurysm
	ENTERED BY: Tariq
	BLEEP: NOT KNOWN
	US Knee Rt: .
	At the time of scan today, there was a marked purple skin discolouration around the posterior aspect of the knee.
	Ultrasound examination did not reveal any collections or any cysts.
	The main popliteal vessels were difficult to interrogate on the ultrasound today.
	No evidence for a popliteal aneurysm.
	If symptoms persist then an MRI scan of the knee could be considered for further assessment.
	This examination has been reported by Dr Mohammed Sultan, Consultant Radiologist.
	Reported by: SULTAN MOHAMMED DR / 3431265

Thu 05 Oct 2017	10-11 - Surgery: Dr Jason Cockerill (General Medical Practitioner)	
JC	History: Came in to get urine dipped - says he has noticed it is darker in colour for a few days and wonders if that is a problem : no other LUTS and not malodorous etc. : reassured that urine presented to me today looks normal in colour and that urine dip is entirely clear : discussed that urine colour is linked to hydration : asked if urine colour can change with liver disease - discussed that yes it can, especially with gallstones but that recent LFTs and USS abdomen were normal with no evidence of either liver disease or gallstones : reassured

Fri 13 Oct 2017	16-24 - Surgery: Dr Jason Cockerill (General Medical Practitioner)	
JC	History: Asked to see pt. out of sequence as reception are concerned he looks so unwell and another GP has briefly assessed him and feels he needs urgent hospital assessment : pt. says he "feels like death" : 55yrs : ex l.v. heroin user (clean for 4yrs) : on methadone and continues to engage with Aspire : 2 previous episodes of VTE due to l.v. drug use now on lifelong edoxaban : on mirtazapine/diazepam for depression : c/o chronic CP, DIB, palpitations, headaches, nausea/vomiting, abdominal pain, left loin pain and fatigue : has also lost 13kg since July 2017 : currently c/o 6/10 CP, breathlessness and palpitations : CP has a pleuritic component : looks pale and sweaty : says has been to ED on 5 separate occasions this week with the same symptoms and has been told his ECG and bloods are normal : I also note previous admissions to hospital with normal FBC, U&E, LFT, CRP, diabetes screen, urine dip, USS abdomen and CT Head : I cannot see any recent d-dimer or troponin has been done	
	Examination: Alert, Orientated, Looks unwell, Pale, Sweaty, Dehydrated, Obs as below, PEARLA, FAST negative, JVP not elevated, Ankles not swollen, Right calf bigger than left but not red/warm and pt. reports this is longstanding following previous VTE.	
	Blood glucose level (X772z) 7.8 mmol/L	
	ECG - nil acute	
	Plan: Long chat with pt. : has been feeling unwell for several months now : has had several admission to hospital and A&E attendances and nil significant has been found to date : needs acute reassessment from CP/DIB point of view ? cardiac ?? PE : will then need primary care review to look for underlying malignancy and refer on as appropriate : chat with consultant on ACU : In view of current CP/DIB agreed to re-admit to PCH tonight for further assessment : will come back to primary care thereafter for overview.

JC	History: Spoke w/ pt. as f/u following admission above : says had a host of bloods and a CT scan but did not receive the results of any of the tests before being discharged : says he saw a consultant and was told to f/u with his own GP re: onward referral to Gastro and that they would phone him once the scan results were available : hasn't heard anything from them since discharge : feels "slight" at the moment : TTR to get pt. in with me next week for F2F review and with test results and discharge letter available to me
Fri 20 Oct 2017	18:54 - Surgery: Dr Jason Cockerill (General Medical Practitioner)
JC	History: Results from recent admission now available to me: - FBC - WBC low at 2.9 (with mild neutropenia), Hb normal at 136, Plts low at 88 [with FBC having been done earlier in the admission and normal therefore they comment ' artefact) - ESR - normal - Clothing - normal - U&E - normal

	- LFT - normal
	- TSH - normal
	- Random glucose - normal
	- Lipids - satisfactory
	- CRP <10
	- ESR - normal
	- Troponin - negative
	- D-dimer - negative
	- Hep B serology - negative
	- HIV serology - negative
	- ANA/ANCA - negative
	- Rh/rAnti-CCP - negative
	- TIG - negative
	- CXR - normal
	- Sputum for AFB x3 - negative (cultures to follow)
	- ECG's not available to me
	- CT C/A/P not yet reported
	I also note from previous ED attendances/admissions that he has also had normal urinalysis, USS abdomen and CT Head
	Plan: Phoned to div pt. but repeatedly no answer : needs FBC repeating urgently and F2F review as already requested (by task to reception)
