Dear Dr Paul Hickman

Re: Robert Leitch, Cothouse Inn, Sandbank, PA23 8QS, CHI: 1508773076

This patient came to the department today to have a Total Nail Avulsion on both 1st nails today with Phenolisation to prevent re growth of the nail plate.

I have given some simple 5cm x 7.2cm island dressings to allow them to dress it themselves and a few sheets of Inadine. However this wound can take up to 6 weeks to fully heal and scab, and she may have to come back to your surgery to re order more if the wound is still leaking.

Please would you order some island dressings (we use 365 island dressings ordered from Pecos hospital procurement site, 50 in a box) to allow them to do this themselves over the next 4 -6 weeks.

Yours sincerely

Heather Gilmore
