DOB	15/08/1977	CHI No.	1508773076
Ref. Source	Church Street Surgery	Practice Code	84241
Referrer	Dr James McKelvie (Locum)	Exam Date	22/08/2023 15:07

Report Summary

Clinical History :

Swelling lower pole sickle and upper pole right testicle? Testicular pathology

US Testes

US Testes :

The patient describes his symptoms as having resolved since referral (February 2023).

Both epididymi appear normal, no focal abnormalities are identified.

Both testes appear normal in size, shape and echo texture.

Normal Doppler perfusion is noted bilaterally.

No focal intratesticular lesions are identified.

Left sided varicocele is noted.

Both kidneys were scanned and appear normal in shape and position.

The right kidney measures 13.1 cm and the left kidney slightly smaller measuring 10.7 cm in bipolar diameter.

Good cortical thickness is maintained bilaterally.

There is no evidence of mass, hydronephrosis or obvious calculi in either kidney.

Examination performed and reported by A Gilmour, Sonographer RA35695.

Last verified by: RA35695 (Audrey Gilmour (Sonographer))
