Medical History

04/07/2014 Administration NOS Removal letter faxed to PSD, PM sent separate letter to patient. Dr M C Duffy

26/06/2014 C/O - insomnia very troubled by insomnia, wishes help, having effect on him and his family. long discussion, several years history of insomnia. first we looked at options to help this by not taking benzodiazepines. patient does not wish mirtazapine/citalopram/amitriptyline, rejects suggestion to restart antidepressant and finds suggestion of amitriptyline appalling. very fixed on view only sleeping tablets can help. explained they have risk of addiction, he argued there are some with no addiction risk. Settled on short prescription of 2w along with lifestyle advice, mentioned also moodjuice. laughed off suggestion to explore internet and wishes referral to a clinic. explained there is no such clinics I am aware of, patient becoming very angry and does not believe. not happy with offered help and arguing in a very disrespectful way, aggressively. after a long discussion when I had nothing else to offer he suddenly said "Why do you keep staring at me?" stating he came for two problems and wishes now to find out results of x-rays. I felt very intimidated and pressurised. computer logged me out of vision then so suggested reception to print out his results from ice as he wished his diagnoses written down after all. overall very disrespectful, aggressively demanding and pressurising consultation. student present and appalled about his behaviour. Dr Eva Deubel
