Medical History

26/05/2026 Patient record requested by solicitor MMA Legal request full records Mrs Claire Finbow
23/04/2026 Letter encounter from patient Biochemistry Result North Sector Labs Unknown Ms Lauren Eusebi
23/04/2026 Seen by health care assistant attended for bloods as per FMCN bloods obtained and sent no issues advised will be contacted if follow up required Ms Jacqueline McLachlan
16/04/2026 Telephone encounter Spoke to explained DSNs rejected referral for GLP-1 agonist suggested gliclazide.
Main symptom is of polyuria. Will check PSA with phlebs if raised needs DRE. Weight still going up won't be eligible for private GLP-1. Will refer to GWMS. Trial gliclazide. says has BM monitor at home bought privately - check HbA1c in 3 months time. Dr Fraser McNab
13/04/2026 Third party encounter Very hungry and thirsty and getting up at night to PU since stopped SGLT2 but thrush and balanitis a lot better. Will refer to DSN for consideration of injectable GLP-1 agonist. Will let them know if referral rejected.
Dr Fraser McNab
02/04/2026 Seen by health care assistant attended for HbA1c as per FMCN bloods obtained no issues pt thought U&E to be checked also explained only HbA1c been requested last U&E result in Oct 25 satisfactory advised will be contacted if any issues, pt happy with plan Ms Jacqueline McLachlan
20/03/2026 Third party encounter Michael in background. Weight going up now 108kg. Also lot of thrush with SGLT2. Note switched to dapagliflozin made no difference to this. Current penile thrush. Stop SGLT2 inhibitor and get HbA1c checked as planned in april - advise come for updated weight with HCA as well as blood test. will make appt after getting blood test done injectable GLP1 if weight going up. Dr Fraser McNab
20/02/2026 Telephone encounter Has had a recurrence of thrush/ balanitis Note last entry regarding same presentation due to empagliflozin fluconazole worked well; actually using clotrimazole cream just now which seems to be helping plans to get Fluconazole OTC again Discussed diabetes meds, not on metformin as went straight to SGLT2 because of suspected CCF Has since had a normal echo says not keen on metformin. had bad side effects on this Plan: Switch Empagliflozin to Dapagliflozin Reiterated sick day rules HbA1c due to be checked in April If ongoing issues on dapa needs GLP1 Dr Maeve Doherty
10/02/2026 Medication requested req rescue pack has a chest infection and going away on friday Dr Richard Parkins
20/01/2026 Consultation F2F Started empa in Oct has been checking sugars - have been better. 2/12 Hx of foreskin
looked - thrush. Has been using OTC topical Rx - helped, but not away. Wondering about continue with empa or ? consider injectable as BMI and feels this affects breathing. Note cardiology input Nov/25 - no heart failure, feel down to BMI and COPD. O/E - AP. HR 70. Sats 99. Candidal balanitis noted. Chest - clear, not overloaded, no wheeze. Periph oedema noted (states better than usual) Plan: Fluconazole 150mg one/off- Restart empa- If recurrent issues with thrush stop and switch- R/V prn Dr Allan McNeill
24/10/2025 Other medication management Call with re request to sync meds. Advised Pregabalin CD so need to remain monthly. Issued all Rpt meds due and 1/12 Amlodipine to help sync Mr William Hayden
22/10/2025 Medication requested Pharmacy want meds synced as patient getting confused. Unable get on phone - added next available call slot to try again. If pt rings back please reassure i'll call Frim PM to discuss Mr William Hayden
22/10/2025 Unsuccessful attempt to contact patient by telephone Will try again Friday when next in Mr William Hayden
21/10/2025 Telephone encounter Spoke to in portugal loaded with cold. HbA1c still low but creeping up slowly. Suggest SGLT2 as per RP for cardioprotective benefits as well as improve diabetes and help lose weight. No hx of thrush or UTI - advised medicine can cause this. Can also cause euglycaemic ketoacidosis so if vomiting need to stop and seek review. Will leave script for reception. Dr Fraser McNab

18/09/2025 Letter encounter from patient Blood Pressure Readings Shettleston Health Centre Ms Lauren Eusebi

11/09/2025 Telephone encounter Feels that Michael was like new man after prednisolone given for chest ??inflammation in joints - resolved knee pains ??element of gout or psoriatic arthritis. Upcoming wedding and honeymoon early october. Asking for low dose of prednisolone long term - not indicated in my opinion. Agreed to give JIC supply with upcoming wedding/honeymoon - would be worth coming back to see GP f2f in future re this. Also ankles much less swollen on bumetanide - been using at one daily. Agreed to issue further given upcoming wedding etc but needs U+E checked. ... will get checked early october when HBA1c due. Dr Fraser McNab

02/09/2025 Telephone encounter Spoke to michael previously given permission to discuss medical information/care with her.1) HBPM - planning to hand this in, not managed as been busy at work.2) Flare guttate psoriasis to legs. Seen 2023 and felt to have guttate psoriasis then. Given cetiraben but didn't work much. Agreed trial doxobet - if not helping then need to make f2f appt.3) and michael have productive cough green sputum at present for few days. Michael wheezy. feels needs abx and steroids which has had before. Known T2DM and COPD. Agreed to issue no severe chest pains. If not improving again need to book f2f appt/seek review.4) Ankle swelling again an issue recently - has commenced amlodipine of note. Has started bumetanide and very effective. Going to trial off this. If requiring further would require check of U+E - could get done with PN when has appt for HBA1c in october. Any concerns or worsening seek review.5) Asking for echo and ECG results done yesterday at stobhill. ECG looks similar to previous some PVCs seen SR no significant new changes from previous ECG. Echo showing "slightly dyssynchronous LV but preserved LV function, no obvious valve abnormality (note mentions trace AR PR TR and MR in report), E/A reversal. Advised looks ok no significant cardiac disease await feedback from cardiology. Dr Fraser McNab

08/08/2025 Telephone encounter is with Michael currently. She manages his medication and he is happy for her to speak to me. Had not been taking gabapentin at all this year as not feeling great on it, reports AMCN suggested stopping this 16/7. Had previously been taking this for neck/back/nerve pain. Seen by FMCN 28/7 who started pregabalin 50mg BD, no side effects of this yet. Advised I will take gabapentin of repeats and they can hand any boxes back to pharmacy. He will continue pregabalin, and will let us know if any issues with this. Dr Bethan Collier

08/08/2025 Failed encounter Duty GP Message from pharmacy - "boots pharmacy called to inform us that pt has collected pregabalin rx which was done on 28/07 and then collected a repeat rx of gabapentin but shouldn't be taking both" Tried to call patient x3 - no answer and no ability to leave message. Has been on gabapentin long term, on repeat. Pregabalin prescribed 28/7 but no clear indication of reason for this in consultation entry. Dr Bethan Collier

04/08/2025 Administration NOS Pt gives permission for any/all of his info to be shared with his Pargeter-Keown DoB 25/11/73 (07368 428940). States he supplied written consent previously. Ms Deborah Spiers

28/07/2025 Letter encounter from patient Biochemistry Result North Sector Labs Unknown Mrs Jade Deavy

28/07/2025 Doing ok has started plant based sterols instead of statin as intolerant of second statin recently. Also eating healthier diet. Explained CXR heart looks normal no evidence of effusion or cardiac decompensation. Getting left sided nosebleed for few days - short duration, none currently. Runny nose - ongoing cough and sputum despite recent amoxicillin. BP readings at home from slightly above recommended level. Would be keen for compression stockings for chronic oedema to legs. OE: oedema bilaterally at calves as before, pulse 75, sats 95%, chest auscultation few bibasal creps as before, U+E taken, BP slightly above target. Imp: Stable just now. Further abx given. Will refer lymphoedema ?suitable for compression bandages for oedema in calves. Naseptin cream - if recurrent epistaxis needs to seek further review. Advised get HBA1c rechecked and lipids in 3 months with PN. Add in amlodipine hopefully won't affect oedema adversely. thinks dehydrated recently when sample sent). Hand in BP readings in 3 weeks time. WSG advice any concerns or ongoing cough etc seek review. Dr Fraser McNab

22/07/2025 Administration NOS CXR shows no evidence of cardiac failure, clear lungs and normal heart size, no effusions. Will advise Michael when attends on 28/07. Dr Fraser McNab

16/07/2025 Consultation F2F Attended for review. Feeling good bit better than this morning. Still bit of headache and room spinning feeling, with nausea. Keen for something to try and help with that. Clear exact same way felt with Atorva. Has review in place with FMCN on 28/07. Note recent dip eGFR - down to hotter weather/not drinking enough - has been trying harder - plan in place for rpt. O/E - Undist. AP. HR 75. Sats 90% (states about N for him). BP 140/70mmHg. Chest - couple bb creps. CNs and PNS grossly intact. Periph oedema noted - bilat - states R side always tends to be worse - not new, no ^ pain. Nil cerebellar. Plan:- STOP statin, record AE- Rx issued for stemetil if needed for symptoms next 24 hrs or so until Sx settle- If not settling -> seek review- R/V appt in place Dr Allan McNeill

16/07/2025 Consultation DUTY GP states prev issue with Atorva - feels dizzy/nausea/drunken/flushes/restless. Tried Simva when seen on 14/07. Last dose last night. Few hours after - felt same way as did with Atorva. Restless, frontal headache, flushing, nausea, dizzy (worse on moving head). Nil visual dist. Nil periph neuro. No CP. No muscle pains. No breathing diffs. No rashes. Drinking ok this morning. PU ok. Has gone out into garden - feeling better "alright" now. wondering if anything should give just now. Advised fluids, hold off statin and review. Not feeling needing seen today - happy to see FMCN tomorrow PM. can attend. Any issues in interim -> seek review. Concern ?class effect to statin - states is very sensitive to med SEs generally. On reflection - agreed examine today. will bring and go a bit later to work Dr Allan McNeill

16/07/2025 Consultation DUTY GP Put on duty screen as medication reaction this morning - called back immediately - confirmed no emergency/anaphylaxis. Caller wanted dealt with this morning as at work this afternoon and so cannot take call then. Will call back later this morning. Immediate call back was to confirm no life threatening reaction. Dr Allan McNeill

15/07/2025 Third party encounter Spoke to eGFR down from 48-49 to 32 ?related to ramipril and furosemide. They managed to get bumetanide yesterday - stop this for now - also will issue reduced dose ramipril. Advised would be easier to make decisions about diuretics with acute on chronic renal failure hospital admission as daily blood monitoring and clinical review - she will pass on to Michael. Keep appt with me in 2 weeks to repeat eGFR. Also has T2DM from bloods. At appt will also consider dapagliflozin if very symptomatic. Has PN appt in due course - will ask if T2DM can be discussed then also. If more unwell seek review need to seriously consider admission if more unwell. Dr Fraser McNab

14/07/2025 Letter encounter from patient Biochemistry Result North Sector Labs Unknown Ms Jacqueline Boyce

14/07/2025 Letter encounter from patient Biochemistry Result North Sector Labs Unknown Ms Jacqueline Boyce

14/07/2025 Consultation Planned appt - seen with Feeling bit better since previous week. handed in

further BP readings at home - much better now in region of 126-146 systolic and 67 to 80 diastolic. Still significant headache. Doing ok with ramipril but headache worse. Breathlessness improved with furosemide but ankles more swollen with this. OE: few right midzone and basal creps bilaterally, sats 93% - ok for michael, pulse 88bpm, BP 138/80, bilateral pitting oedema as before, still panting and bit dyspnoeic. Imp: Hypertension improved, ??degree of CCF ??cause for headache. Await CXR result will let them know this when arrives. Commence simvastatin happy to try this. Bloods taken today for U+E and HBA1c. Given bumetanide script - looks like may be out of stock at pharmacy - can collect when available to trial as diuretic - needs U+E checked 2 weeks later. Given appt for this in overflow in 2 weeks but can cancel if doing ok and unable to get bumetanide. Advised get BP and LFT for statin checked 4 weeks with nurse. Add amoxicillin as has slight cough and creps in chest. WSG advice. If more unwell seek review. Dr Fraser McNab

08/07/2025 Letter encounter from patient Imaging Result - XR Chest Glasgow Royal Infirmary Imaging Dr Colin Noble Mrs Elaine Deary

08/07/2025 Letter encounter from patient Advice Letter Glasgow Royal Infirmary Cardiology Professor Mark Petrie Mrs Jade Deavy

08/07/2025 Third party encounter (got consent from michael yesterday for this). Explained bloods below - cholesterol raised, glucose high at 8.4, eGFR stable at 49, BNP mildly raised at 411. Prof Petrie has written BTR letter from referral yesterday I can see on portal advising referral via HFDP as quickest way to get echo done apparently. Will organise this. Add in furosemide to ramipril - monitor for postural hypotension. Check HBA1c along with U+E at appt next week and consider statin. says thinks pain episodes may not have been cardiac as related to coughing wonders about bronchospasm. If significant chest pains or worsening SOB still need to consider admission. Dr Fraser McNab

07/07/2025 Consultation Not been well last 4 weeks.

Feeling more breathless and pain if take deep breath in at times. Also pressure like chest pains at times at rest or on exertion. Ankles chronically swollen. Also been taking BP readings over past 24 hours - high - mostly in range of 160-170 systolic over 85-102. Some headaches especially when standing, also nosebleeds - they were concerned re hypertension. OE: gasping for breath RR24, HS pure, BP 168/92, sats 89-94% (his normal range), pulse 94bpm regular, bilateral pitting oedema right big bigger than left no obvious DVT, chest bibasal fine creps and left midzone creps. ?Unstable angina/CCF or PE. Advised hospital review ?IV diuretics. He declines this long wait in past to be seen. Aware could be very unwell/die if not treated properly. Agreed commence ramipril and GTN (warned re worsening headache). Get CXR done bloods checked today. Refer RACPC. FU appt 1 week with me f2f. Will phone with bloods tomorrow/to review. If more unwell/changes mind re admission then seek review. Dr Fraser McNab

21/03/2025 Administration NOS boots abbeyhill called, pt did not collect rx from 11/02/25, and they had to destroy it as they only keep for 4 weeks, have req new rx which I have done 21/03/25 Ms Jacqueline Boyce

19/09/2024 Telephone encounter returned pts call re inhalers discussed with pt in background Having ulcers and irritated throat since starting trimbow. Happy to switch to trelegy one puff daily and SABA as req. Requested spare SABA to keep one in house and one to take out Advised to contact if any issues and arrange further r/v if not improving Sister Rachel Cuthbert

14/08/2024 Administration NOS PN to contact re cholesterol - has CKD and high ASSIGN so statin indicated but didn't tolerate simva or atorvastatin in past - can try rosuvastatin in low dose if patient agreeable Dr Stirling Bruce

13/08/2024 Letter encounter from patient Haematology Result North Sector Labs Unknown Ms Jacqueline Boyce

13/08/2024 Consultation Note recent check at AAU -self discharged, would be very reluctant to reattend.

Has started coughing worse and bringing up dirty discoloured sputum again. Had 2x courses of amoxicillin and prednisolone - felt much better whilst on these. Some ongoing sore throat and glands in neck swollen for last week. No severe DIB, chest pains, haemoptysis. CXR report not back yet on clinical portal. OE: rr20, no increase in WOB, sats 96%, pulse 84bpm, temp 36.2, oropharynx no tonsillar swelling uvula central, chest auscultation left midzone and basal creps heard, nil ankle oedema at present. Imp: LRTI. He feels given too short courses of abx previously. Agreed can try 2 week course of clarithromycin. Also given further steroids. Check throat swab today (mentions she was tested for corynebacterium ulcerans as dog had this recently - tested -ve) and hand in sputum sample. If no better 1 week return for review. WSG advice sounds like he would be very reluctant to consider hospital review. Dr Fraser McNab

13/08/2024 Chronic obstructive pulmonary disease annual review On spiromax, braltus and SABA Ongoing chest infection- pt feels not cleared. Waiting to be seen by duty GP CAT score 14- coughing more recently and bringing up phlegm. No chest tightness. SOB ++ feels worse recently however been bad since covid- states would struggle to walk to the health centre car park without stopping. Not disrupting sleep. Goes out once a week and manges ok. feels lacking energy MRC grade 3/4SPO2 93% Good inhaler technique demonstrated plan-switch preventer to trimbow and stop braltus/ spiromax continue saba prn advised to arrange appt in 4 weeks to re review if not improving otherwise r/v annually Sister Rachel Cuthbert

06/08/2024 Consultation B/G noted Attends with . Quite agitated about recent events - long wait in IAU for 9h, eventually self discharged. Repeat trop ok - informed. Was annoyed as reports his main concern is throat pain while no one has so much as looked at. Breathing doing well, has chronic cough but no worse than normal. Managing to swallow but feels like sandpaper. No fevers. Also mentions last 48h has been peeing ++ though no other LUTS, no polydipsia. Also needing follow up with asthma nurse regarding inhalers - will book in for this. Also not sure what was supposed to happen in terms of follow up from blood tests last year - found to have CKD3 and pre-diabetes in Feb 2023 but nothing happened since. Advised should be for annual bloods follow up. Also struggling with arthritic pains, prev good effect with NSAID but taken off due to kidneys. Limited benefit with topical brufen. On going leg swelling as mentioned before but does think this is down a bit since yesterday O/E = looks well. HS Pure, Chest clear. Throat slightly red, but no exudate. No neck swelling. HR 71, BP 145/88, Sats 94% (patient norm). Urinalysis - NAD. Plan: Asthma review with nurse as planned. Due annual bloods, check BNP as well. Try diclofenac for pain relief - prev good effect from PO Diclofenac, can't tolerate any opiate or paracetamol so limited options. Worsening advice Dr Two Locum

06/08/2024 Letter encounter from patient A&E Letter Glasgow Royal Infirmary Accident & Emergency Dr Daniel Rodgers Miss Frances Shankland

22/03/2023 Medication requested spoke to pt's with Michael's consent ralvo, ibugel 10% using for LBP, spinal stenosis previously been given ralvo, feels helping has recently been using ralvo patches - feels helping nil change in nature of back pain advised against using medications not prescribed for self worsening advice given issued Dr Jessica Lui

02/03/2023 Chronic kidney disease stage 3 Dr Fraser McNab

02/03/2023 Third party encounter with Michael's permission. Asking re PLT - have improved. Also prediabetes. Explained should make dietary changes and increase exercise in first instance. Also raised cholesterol/trigs - he is not keen on statin adverse affects previously. Have cancelled PN appt tomorrow at her request. Asking if can go back on naproxen for back and joint pains - advised not good idea as looks like has CKD3. Suggest tries ibuprofen gel double strength. No help from pain clinic when went there before. Can get cholesterol rechecked in 3 months after dietary modifications. WSG. Dr Fraser McNab

 Orthopaedic OP Yorkhill ACH Miss Catherine Arbuckle
 10/12/2020 Letter encounter from patient Hospital Clinic Letter West Glasgow ACH - Yorkhill Orthopaedics WACH ESP
 Ortho Spine Mrs Lisa Dignon
 04/11/2020 Low back pain C19(tel). Request for amitriptyline. Recent flare up of back pain - attended
 ED in August - given Ralvoand diazepam Then referred for OP MRI via ortho spine. Back pain slightly better than at that time but has been giving him leftover amitriptyline from years ago 25mg nocte with good effect on sleeping and pain. Slightly foggy in mornings but otherwise ok. Mobile independently around house, takes dogs out back garden. MRI shows L4/5 spinal stenosis with disc impingement. Has ortho FU december. Already on gabapentin 300mg tds.
 states he was previously on both as per pain teambut I can't find documentation of this. I note he was on amitriptyline until 2014 then it seems he was switched to gabapentin. Amitriptyline was restarted Feb 2015 and titrated up from there. Seems to have stopped again in 2017. Discussed with pt - pain very severe, ok at rest but limitingall movements and feels he can't do anything. Gabapentin doesn't seem to be much help. Amitriptyline helping with sleep and possibly taking edge off pain. Only takes 300mg gabapentin at lunchtime and night. Agreed - gabapentin 300mg morning and afternoon then amitriptyline 25mg nocte. Rediscuss if any issues. Dr Stacey Grant

18/01/2016 Telephone encounter On advice of Dr Walker contacted Pt to ensure follow up. Asked to make appointment in 3-4 weeks time to check on breathing and pain symptoms. May refer onwards if not resolved. Would also like to check FBC in the meantime. Agreed to make appointment with treatment room. I will request. Dr Craig McKenna

18/01/2016 Refer to pain clinic complaining that pain never controlled. Have tried numerous different medications. Cannot take opiates. Had a bad experience with codeine in the past where felt awful and vomited, refuses to take more. Currently only on Naproxen and Amitriptyline. Has previously tried Gabapentin. Felt this was no good. Patient keen for referral to pain team. Agreed that I can do this if he wishes. Dr Craig McKenna

18/01/2016 Breathlessness symptom Not taking inhalers at present as thought responsible for chest pain. Keen on changing back to old inhalers in case this is the cause. Explained this is unlikely as it should not be going down the same way if we are assuming this is oesophagitis. Has also been tolerating until now. Asked that if worsening or uncontrolled SoB to come back and see us for review of inhalers. Do not wish to change medications unless based on breathlessness/chest symptoms. Dr Craig McKenna

18/01/2016 Chest pain Pain in chest for last 3-4 weeks. Long term issues with acid reflux. On Omeprazole. Has doubled dose since symptoms started. Stopped inhalers as he felt they were the cause. Had not discussed this with anyone. Increased breathlessness as a result. Pain from back of throat to epigastric region. No radiation anywhere else. Lasts around 5-10 minutes. Onset and resolution spontaneous. Occurs up to 10 times per day. Feels it is very severe. No exacerbating factors identified. Drinking milk has helped. Increase in burping. Water brash. No vomiting. Frequent nausea. No other abdominal pain. No change in bowel habit. No PR bleeding or malaena. No dizziness, palpitations, trauma or heavy lifting. No recent change in diet. Did however, overindulge somewhat at Christmas and New Year's. Normally does not drink alcohol. Had a full bottle of Tia Maria to himself. Drank with Coke (normally does not drink fizzy soft drinks either). Symptoms started around this time. O/E: Appears somewhat breathless at rest. Chest clear but reduced AE at bases, RR 16, HS I+II+0, Abdo SNT BS present and normal. Imp: Oesophagitis secondary to some overindulgence over festive period. Breathlessness secondary to discontinuation of inhalers. Discussed my thoughts with patient and advised that things may not have settled down as the area has been damaged/sensitized by this insult. They are in agreement that this makes sense when thinking about when this started. Plan: C/w increased Omeprazole at present 40mg OD. Prescribed some alginate to help tide him over during this time. Asked to come back if feels things are getting worse or this is not helping. Also asked to come back if any new symptoms such as blood in faeces, vomiting etc. Dr Craig Mckenna

25/09/2015 Chronic obstructive pulmonary disease monitoring 3rd letter Miss Catherine Arbuckle

06/08/2015 Medication requested called to request seretide - is to resume with this instead of symbicort - states resp have advised. Dr Andrew Little

06/08/2015 Telephone encounter spoke to pt about inhalers - was changed from seretide to symbicort when seen at hosp due to rash - was a message that symbicort was issued and should have been seretide - pt not sure what he is on - his other half deals with inhalers, in any case rash still present and change of inhaler made no difference to this and was intending making an appointment - so advised to do this. Dr Katherine Grosset

15/08/2014 Medication review done by pharmacist polypharmacy initial work up. I. On naproxen 500mg bd & aspirin for Leiden Factor V mutation. Increased risk of GI bleed. Already on omeprazole 20mg bd. Ensure naproxen sufficiently effective to keep taking. 2. Review effectiveness of gabapentin 300mg caps tds. NB eGFR 48ml/min so already on max dose advised in BNF. 3. Overlap of amitriptyline & gabapentin for pain control. Not ordered amitriptyline since Feb 14. Can this be removed from rpt? 4. Cetirizine 10mg started during cough Sep 13. Is there a continued need? 5. Asthma. Ex smoker. From ordering may be using terbutaline up to 4 doses a day. If using more than 2 or 3 times a week should consider increasing steroid. Try increasing to clenil modulite 200mcg 2 puff bd if needing terbutaline daily. Dr Locum Locum

31/07/2012 Letter encounter from patient Result Glasgow Royal Infirmary Biochemistry Mrs Mary Flannagan
31/07/2012 Failed encounter Sister Patricia Mcgougan
24/07/2012 Referral to nurse Please check fasting blood glucose Dr Catherine Curran
24/07/2012 Patient reviewed in to discuss medication request.On long-term aspirin and typically takes 1 diclofenac/day for

various aches and pains. Discussed risk of GI bleeding with aspirin/NSAID, also long-term risk of cardiovascular disease/renal impairment. Agreed will try alternative analgesic but can't take anything paracetamol-based as makes him vomit.Try codeine then.If requires to go back to long-term NSAID suggest 3-monthly U&Es.WRT recent bloods - cholesterol 6 - history of retinal artery emboli so probably should be on statin.Felt very unwell on atorvastatin 40mg. try simvastatin 10mg and aim to upitrate to 40mg if tolerated.Glucose 7.4 - for repeat fasting glucose. Dr Catherine Curran

18/07/2012 No drug therapy prescribed Diclofenac - diclofenac is not recommended in patients taking aspirin. Please see us if you would like to discuss this. Dr David Paton
