Dear Dr McDonald

Henry Young, 16/O Chalmers Crescent, Edinburgh, EH9 1TP DOB: 22/01/1963

DATE OF ADMISSION	28/08/12	DATE OF DISCHARGE	28/08/12
DIAGNOSIS	Perianal abscess		
FOLLOW UP	Further care arranged at the Western General Hospital, Edinburgh.		

The above patient presented as an emergency under our care with a history of perianal pain of the preceding 48 hours. He was systemically well. He was found to have a painful swelling in the perianal region.

As the patient lives in Edinburgh and he was merely visiting family in Perth, arrangements were made with the Surgical Team at the Western General Hospital in Edinburgh for him to present there the following morning in order that definitive surgical intervention could be provided and that local follow-up could be arranged thereafter.

Kind regards

Yours sincerely

Authorised on 17/09/2012 12:49:39 by SPR 4 PRI.

Dear Dr Hamilton,

Henry Young, 220163-0232
3b Tulloch Road, Perth, PH1 2RW

DATE OF ADMISSION 28/10/07

DATE OF DISCHARGE 28/10/07

Mr Young previously had a perianal abscess drained earlier this year. He presented with a 3-day history of perianal pain but no discharge. On examination he was well. There was a small area of induration on the right side of the anus but no obvious abscess. He was therefore discharged home with some Metronidazole. Should he have any further problems we will be more than happy to see him.

Kind Regards

Yours sincerely

Oliver Young

Dear Dr Hamilton,

Henry Young, 220163-0232
1a Angus Court, Perth, PH1 2TQ

Thank you for your letter about this man. He gives a history of intermittent PR bleeding over the last 4 years. The blood has always been fresh, associated with some sensation of prolapse. His bowel habit has been a little irregular but there has been no recent change. There is no significant past history.

On examination today there was nothing to find in his abdomen. Rectal examination and rectoscopy were normal. With the proctoscope he had some moderate piles and I have banded these. I hope this will be sufficient to improve his symptoms and I have not arranged further review at present.

Yours sincerely

Alan Boyd
Consultant Surgeon
