17-July-2025 Dr Pete Paton Surgery consultation

Diagnosis Tinea pedis Trial alt cream
(P3)
Diagnosis Hyperthyroidism Pt is unsure if he is still taking
(P3) carbimazole or not. Feeling more fatigued recently. P:
Stop carbimazole and recheck ue fbc lft gammaGt CRP
TFT PSA this week and in 8 weeks time

17-July-2025 Mrs Shirley Broadfoot Triage

Administration Telephone triage encounter x2 issues, has stopped
(P3) cream issued for feet as appears to have made rash more
widespread, thinks has had this previously and not
helped. Over the weekend g=feeling unwell, weak,
abdominal pain and legs feel like going to collapse under
him, app issued

15-July-2025 Mrs Shirley Broadfoot Triage

Administration Failed encounter NOS 1005 message left on answering
(P3) machine

08-July-2025 Mrs Nicola Stevenson Medicine Management**25-Jun-2025 Dr Chong In Ra Surgery consultation**

Diagnosis Tinea pedis recurrence of athletes foot past 3 weeks or
(P3) so white moist lesions between toes both feet itchy so has
been scratching them wears same shoes that he's worn
for years currently painting house and likes to work on
motorbikes as hobby - wears boots all day well in self
otherwise has prev needed various antifungal creams
O/E: white, moist looking lesions between toes both feet
some breakdown of skin inbtween left 3rd and 4th toes
Imp: tinea pedis P: advised on general foot hygiene - dry
feet thoroughly between toes, pat dry not rub, don't
scratch lesions, change footwear every 2-3 days, replace
any old footwear, as much as possible wear shoes that
aren't occlusive and will keep feet dry PIL given from NHS
inform and royal college of podiatrists to read through
miconazole 2% cream for lesions advised to monitor for
any signs of spreading infection - heat/warmth, spreading
rednesspatient needing info re: PMH for universal credit
app - provided summary report

15-Apr-2024 Dr David Matthewson Administration

12-Apr-2024 Dr Catriona Mckinnon Other

Symptom (P3)	Complaining of weight loss Charlie feels he is losing weight unintentionally. Both fat and muscle mass. Others have commented that his face looks drawn in. He has previously been a heavy *****moker ***** but stopped this cold turkey 19 days ago. Didn't feel his appetite was huge while taking *****, but did state he had "munchies" in evening and would regularly eat 5-6 mars bars or a full packet of biscuits. He thinks he is now eating somewhat less. He continues to smoke roll ups and has done for several years. Prev alcohol abuse but been abstinent 15+. No abdominal pain or change in bowel habit. Generalised aches and pains in shoulders and legs but puts this down to arthritis. No LUTS. No breathing difficulties. Heavy jobs lifting white goods/furniture etc. Doesn't feel energy levels have particularly changed. Still managing out in his motorbike. Imp unclear cause ? related to stopping *****but seems WL has been ongoing before this. Suggest updating bloods in first instance with urgent CXR. For FBC/UE/LFT/CRP/ESR/Glc/Bone Prof/TFT/Haematinics/Iron studies/coeliac serology please. Will arrange XR. Plan to review with results. No particular symptoms pointing to a source. If weight loss continues ?CTCAP/RCDS (have added in bloods they may expect if needing referral)

25-Mar-2019	Examination	Serum albumin Albumin -:		
25-Mar-2019	Examination	Serum albumin Albumin -	43 g/L	(Range: 35 - 50)
25-Mar-2019	Examination	Plasma alkaline phosphatase level ALP - U/L:		
25-Mar-2019	Examination	Plasma alkaline phosphatase level ALP - U/L	78 IU/L	(Range: 30 - 130)
25-Mar-2019	Examination	Serum alanine aminotransferase level ALT - U/L:		
25-Mar-2019	Examination	Serum alanine aminotransferase level ALT - U/L	15 IU/L	(Range: 5 - 55)
25-Mar-2019	Examination	AST serum level AST - U/L:		
25-Mar-2019	Examination	AST serum level AST - U/L	19 IU/L	(Range: 10 - 45)
25-Mar-2019	Examination	Plasma total bilirubin level Bilirubin -:		
25-Mar-2019	Examination	Plasma total bilirubin level Bilirubin -	5 umol/L	(Range: 3 - 21)
25-Mar-2019	Examination	Serum calcium Calcium -:		
25-Mar-2019	Examination	Serum calcium Calcium -	2.5 mmol/L	(Range: 2.2 - 2.6)
25-Mar-2019	Examination	Corrected serum calcium level Adjusted Calcium -:		
25-Mar-2019	Examination	Corrected serum calcium level Adjusted Calcium -	2.44 mmol/L	(Range: 2.2 - 2.6)

25-Mar-2019	Examination	Plasma chloride level Chloride -:		
		Plasma chloride level Chloride -	101 mmol/L	(Range: 95 - 108)
25-Mar-2019	Examination	Plasma total cholesterol level Cholesterol -:		
		Plasma total cholesterol level Cholesterol -	4.8 mmol/L	(Range: 3.1 - 6.5)
25-Mar-2019	Examination	Serum creatinine Creatinine -:		
		Serum creatinine Creatinine -	100 umol/L	(Range: 50 - 120)
25-Mar-2019	Examination	Eosinophil count Eosinophils -:		
		Eosinophil count Eosinophils -	0.5 10 ⁹ /L	(Range: 0.1 - 0.7)
25-Mar-2019	Examination	Haemoglobin estimation Haemoglobin -:		
		Haemoglobin estimation Haemoglobin -	142 g/L	(Range: 133 - 176)
25-Mar-2019	Examination	Serum HDL cholesterol level HDL Cholesterol -:		
		Serum HDL cholesterol level HDL Cholesterol -	1.04 mmol/L	(Range: 1 - 1.5)
25-Mar-2019	Examination	Serum LDL cholesterol level LDL Cholesterol -:		
		Serum LDL cholesterol level LDL Cholesterol -	2.84 mmol/L	(No range available)
25-Mar-2019	Examination	Mean corpusc. haemoglobin(MCH) MCH -:		
		Mean corpusc. haemoglobin(MCH) MCH -	30.1 pg	(Range: 27.3 - 32.6)
25-Mar-2019	Examination	Mean corpusc. Hb. conc. (MCHC) MCHC -:		
		Mean corpusc. Hb. conc. (MCHC) MCHC -	341 g/L	(Range: 316 - 349)
25-Mar-2019	Examination	Mean corpuscular volume (MCV) MCV -:		
		Mean corpuscular volume (MCV) MCV -	88 fL	(Range: 82 - 98)
25-Mar-2019	Examination	Monocyte count Monocytes -:		
		Monocyte count Monocytes -	0.2 10 ⁹ /L	(Range: 0.2 - 0.9)
25-Mar-2019	Examination	Neutrophil count Neutrophils -:		
		Neutrophil count Neutrophils -	5.9 10 ⁹ /L	(Range: 1.5 - 6.5)
25-Mar-2019	Examination	Serum inorganic phosphate Phosphate -:	Below low reference limit	
		Serum inorganic phosphate Phosphate -	0.76 mmol/L	(Range: 0.8 - 1.5)
25-Mar-2019	Examination	Platelet count Platelets -:		
		Platelet count Platelets -	308 10 ⁹ /L	(Range: 150 - 400)
25-Mar-2019	Examination	Plasma potassium level Potassium -:		
		Plasma potassium level Potassium -	3.8 mmol/L	(Range: 3.5 - 5.3)
25-Mar-2019	Examination	Red blood cell (RBC) count RBC -:		
		Red blood cell (RBC) count RBC -	4.71 10 ¹² /L	(Range: 4.32 - 5.66)
25-Mar-2019	Examination	Plasma sodium level Sodium -:		
		Plasma sodium level Sodium -	143 mmol/L	(Range: 133 - 146)
25-Mar-2019	Examination	Plasma total protein Total Protein -:	Above high reference limit	
		Plasma total protein Total Protein -	83 g/L	(Range: 60 - 80)
25-Mar-2019	Examination	Serum triglycerides Triglyceride -:	Above high reference limit	
		Serum triglycerides Triglyceride -	2.03 mmol/L	(Range: 0.84 - 1.94)
25-Mar-2019	Examination	Plasma urea level Urea -:		
		Plasma urea level Urea -	4.3 mmol/L	(Range: 2.5 - 7.8)
25-Mar-2019	Examination	Total white cell count White Cell Count -:	Above high reference limit	
		Total white cell count White Cell Count -	10.6 10⁹/L	(Range: 3.7 - 9.5)
25-Mar-2019	Examination	Lymphocyte count Lymphocytes -:		
		Lymphocyte count Lymphocytes -	3.9 10 ⁹ /L	(Range: 1.1 - 5)
25-Mar-2019	Examination	Plasma glucose level Glucose -:		
		Plasma glucose level Glucose -	5.3 mmol/L	(Range: 3.3 - 6)
25-Mar-2019	Examination	Bone profile BONE PROFILE:

Allergies

This section is empty.

Vaccinations

20-Oct-2025

Administration of first inactivated seasonal influenza vacc
FLU - Adjuvanted Trivalent (St Quivox RC Church Mass Vaccination Clinic)
Intervention
FLUAQIV

06-July-2024

Pneumococcal vaccination
PNEU - Pneumococcal Vaccine (North Ayr HC)
Intervention
PNEUMOCOC

28-Oct-2022

Administration of first inactivated seasonal influenza vacc
FLU - Seqirus UK (Ayr Racecourse)
Intervention
FLUQIVC

28-Oct-2022

Administration of first dose of SARS-CoV-2 vaccine

C-19 Comirnaty (Ayr Racecourse)

Intervention

COVPFIZER

17-Nov-2021

Administration of first inactivated seasonal influenza vacc

FLU - Flucelvax Tetra (QIVc) (John Pollock Centre - Ayr)

Intervention

FLUQIVC

17-Nov-2021

Administration of first dose of SARS-CoV-2 vaccine

C-19 Booster Pfizer (John Pollock Centre - Ayr)

Intervention

COVPFIZER

18-May-2021 Dr Aileen Good

Admin sec dose SARS-CoV-2 vacc

C-19 AstraZeneca (By M Thomson)

Intervention

COVOXFORD

05-Mar-2021

Admin first dose SARS-CoV-2 vac

C-19 AstraZeneca (By I McCubbin)

Intervention

COVOXFORD

19-Jan-2021 Mrs Pauline Mcgahon

Administration of first inactivated seasonal influenza vacc

Flu Vaccine Age 18 to 64yrs

Intervention

FLU

19-Nov-2019 Mrs Pauline Mcgahon

Booster diphtheria vaccination

Intervention

DIPHTHERIA

19-Nov-2019 Mrs Pauline Mcgahon

Booster tetanus vaccination

Intervention

TETANUS

19-Nov-2019 Mrs Pauline Mcgahon

Booster polio vaccination

Intervention

POLIO

14-Oct-2019 Mrs Lorna Blane

Administration of first inactivated seasonal influenza vacc

Flu Vaccine Age 18 to 64yrs

Intervention

FLU

Financial Services Department - Council Tax,
P.O. Box 31,
Wellington Square,
A Y R
KA7 2PL

Dear Sir/Madam,

Mr. Charles Davies

I have in my possession a Council Tax Exemption application regarding the above Mr. Davies who is a patient of mine. Knowing his medical history, I do know he has long-standing [REDACTED] problems, but I would not say that comes under the category of being a severe impairment of intelligence and social functioning.

I have done reports regarding [REDACTED] but I am not sure if he is in receipt of that at present.

Yours faithfully,

John W. Wilson (Dr.)

TO WHOM IT MAY CONCERN
HOUSING DEPARTMENT, AYR:

Re: Charles Davies, 39B Port Street, Ayr KA7 1DJ
D.O.B. 9/9/58

I understand the above man is on the waiting list for council accommodation. He currently lives in a shared bed-sit type of accommodation.

He has been to see me recently with regard to various [REDACTED] problems for which I am referring him [REDACTED]. He has been unemployed for the last two or three years [REDACTED].

I would be grateful if this could be taken into account in his application for housing.

John W. Wilson

The above patient attended The Bruce Day Surgery Suite on

19/9/97

The procedure carried out was Ex. Sc. Cyst. Neck x2
under local / general anaesthetic.

The patient was discharged home following this.

We would be grateful if you could:-

- a) remove sutures in 7 days time.
- b) remove the theatre dressing in 7 days and dress thereafter as required.
- c) reduce the theatre dressing in 24 hours / 48 hours / 72 hours.
- d) dressing to remain intact until clinic appointment.

Comments

District Nurse visit requested by ansaphone / telephone call

Patient will contact surgery to make an appointment with the Practice Nurse. ✓

The patient has / has not a review appointment.

A more detailed letter will follow.

Should you require further information please contact us on the above extension.

Yours sincerely,

Changing ... for the better

Dr A C Gow
The Surgery
15 Barns Street
AYR

Dear Dr Gow

CHARLES DAVIES, 39B FORT STREET, AYR, (09/09/58)

As arranged this patient attended the Day Surgery Unit and had excision of sebaceous cysts. One from the upper part of the sternal region and the second from the posterior aspect of the neck. The cyst on the posterior aspect of the neck appeared to be recently infected.

Wound closure has been obtained with 4/0 Ethilon sutures and I will ask Mr Davies to come and see you in about 7 days time for removal of sutures.

Yours sincerely

M T HASAN
Surgical Specialist

8th April 1996

TO WHOM IT MAY CONCERN:

Re: Charles Davies, 398 Port Street, Ayr KA7 1D1

Mr. Davies attended our surgery on 20/3/96 stating that he had left his job as a labourer due to difficulty coping with reactions to recent life events. [REDACTED]

[REDACTED] his [REDACTED] died on 13/11/95 after a short illness. His difficulties were compounded by a lack of work at the time owing to weather conditions; this he found stressful as he did not have something to take his mind off his problems. He also attended surgery on 4/4/96.

He was seen by Dr. Cow on 4/12/95 with dyspeptic symptoms and later on 15/12/95 because of the passage of blood from the bowel. He was referred to Ayr Hospital where he underwent sigmoidoscopy and banding of haemorrhoids on 6/3/96.

DATE DICTATED: 06/03/1996

DATE TYPED: 07/03/1996

Dr Gow
The Surgery
15 Bams Street
Ayr

Dear Dr Gow

MR CHARLES DAVIES 48 WILSON STREET AYR (DOB 09/09/1958)

Thank you for referring your patient to my clinic where I saw him today. He gives a long history of intermittent bright red rectal bleeding occurring on average once a month. He usually noticed the blood on the toilet paper after defaecation but occasionally has passed a larger quantity of blood with the stool. His bowels move regularly each day. He denies a recent change in bowel habit. He complains of dyspeptic epigastric discomfort but no lower abdominal pain and has no anal pain on defaecation. His weight is stable and his appetite is good. There is no significant past medical history.

On examination today he looked well. His abdomen was soft and non tender with no masses palpable. Rectally no abnormality was apparent. Flexible sigmoidoscopy to 40 cms revealed a normal rectum and distal sigmoid colon. Proctoscopy confirmed the presence of small haemorrhoids at the classical positions and these were treated by rubberband ligation.

I think his small haemorrhoids are the likely explanation for his rectal bleeding. I have discharged him from further attendance but should his bleeding persist despite the banding it would be wise to arrange a barium enema to exclude any more proximal colonic pathology.

Many thanks for your referral.

Kind regards

Yours sincerely

COLIN WILSON MD FRCS
Consultant Surgeon

The above-named patient consulted me on 19.12.95 with a history of fresh bleeding on defaecation. Abdominal and rectal examinations were uninformative, and I arranged a Barium Enema at Heathfield Clinic. This was carried out on 25.1.96, and reported as showing no abnormality in the rectum and colon.

He continues to notice fresh blood on the toilet paper. Again, I have been unable to detect any abnormality on rectal examination, but in view of his history, I would be grateful if further investigation could be carried out to exclude any underlying pathology.

With kind regards,
 Yours sincerely,

Dear Dr Gow

RE: CHARLES DAVIES, 14 WILSON STREET, AYR DOB 9.9.58

Your patient had multiple cysts removed from his neck and both ears under local anaesthetic on 31.8.90 and excision of a further cyst on his left jawline on 26.10.90. He did not attend the follow-up clinic on 30.11.90 but this is not strictly necessary and I have discharged him from further follow-up.

Yours sincerely

Dosage and Administration

that the sections on Contra-indications, Precautions and Reactions must be studied before Pollinex is administered.

Notes

DO NOT USE DURING THE POLLINATING SEASON.

Injectons should be given at intervals of 7-14 days.

Dosage

The dosage scheme is outlined below. The three graduated doses constitute a complete course. Pollinex is intended for pre-seasonal use and the final injection should be administered before mid May.

Syringe No.	1	2	3
Dose - Noort units	300	800	2000
Date Given	21/3/96 21/3/96	28/3/96	7/4/96

NHS Confidential: Personal data about a patient

Long Term Benefits

The administration of an initial course of treatment should produce a significant improvement during the ensuing pollen season. However, for more permanent clinical improvement, it is recommended that a course should be given in each of three successive years.

If symptoms occur outside the grass pollinating season from mid May to mid July, or if patients do not obtain the benefit expected, additional allergens are likely to be involved. In such cases specific desensitisation may be indicated having established by case history and skin testing exactly which additional allergens are involved. Such vaccines are individually formulated to the patients own requirements and are available from Bencard.

Information on the management of Allergy and the use of Bencard products for diagnosis and treatment is available on request.

Brentford, England
Tel : 01-860 5151

PL 0038/0111

NHS Confidential: Personal data about a patient

Note: A severe local reaction, or severe systemic reaction such as urticaria or asthma, indicates that the standard vaccine is unsuitable for the treatment of the particular patient who should be referred to an Allergy Clinic or transferred to a suitably specialised desensitising vaccine (Alavac-S or SDV) obtainable from Bencard.
(For full prescribing information please refer to the relevant data sheets)

Dosage and Administration

Please note that the sections in this leaflet relating to "Contra-Indications", "Precautions" and "Reactions" must be studied before Pollinex is administered.

- Adrenaline Injection B.P. (Adrenaline 1 in 1,000) should always be kept at hand when giving any desensitising vaccine.
- A course should normally be started by mid-April in order to ensure completion before the onset of the grass pollen season.
- **DO NOT USE DURING THE GRASS POLLINATING SEASON.**
- Pollinex may be given to adults and children of six years and over.
- Injections should be given at intervals of 7-14 days.
- Injections should be given **SLOWLY** by the subcutaneous route.
- **DO NOT INJECT INTO A BLOOD VESSEL OR INTRAMUSCULARLY.**

Dosage

The dosage scheme is outlined below. The three graduated doses constitute a complete course.

Syringe No.	1	2	3
Dose - Noon Units	300	800	2000
Date given	15/3/82	22/3/82	29/3/82

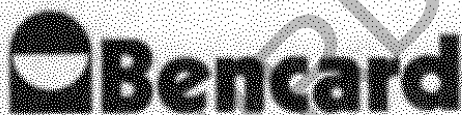

NHS Confidential: Personal data about a patient

Further information

The three equated doses of Pollinex constitute a complete course for one year. The administration of an initial course of treatment should produce a significant improvement during the ensuing pollen season. For more permanent clinical improvement, it is recommended that a course should be given in each of three successive years.

If symptoms occur outside the grass pollinating season from mid-May to mid-July, or if patients do not obtain the benefit expected, additional allergens are likely to be involved. In such cases, specific desensitisation may be indicated, having established by case history and skin testing exactly which additional allergens are involved. Such vaccines are individually formulated to the patient's own requirements and are available from Bencard. Information on the management of Allergy and the use of Bencard products for diagnosis and treatment is available on request.

The Bencard Medical Department will be pleased to advise on any aspect of treatment.

Dear Dr. Philip,

CHARLES DAVIES, 39 BLACKWOOD AVENUE, CATRINE.

Thank you for referring this patient. He suffers from chronic nasal obstruction and is worried about the deformity of his nose. It has been injured three times.

On examination the nose is markedly deviated to the right and the septum follows the curve of the nose causing marked obstruction. The rest of the upper respiratory tract is healthy.

I have put his name on the waiting list for S.M.R./rhinoplasty.

Dear Dr. McCrae,

Charles Davies, 39 Blackwood Ave. Catrine.

I saw this patient at the clinic here on 30th July and inadvertently failed to dictate a letter to you. I apologise for this. He has a three year history of acne which was moderately severe and he was obviously very worried about it.

As you know, he has been seen here in the past and given a course of Dalacin C.

As he has not been given oxytetracycline I would suggest it would be worth trying this and I would recommend that the course should last for at least three months. Locally I would suggest Benoxyl regular lotion and will see him again.

Yours sincerely,

D. T. Roberts

WELCOME TO THE PRACTICE

On registering with the Practice who have the right to express a preference to receive medical services or class of service from a particular doctor either generally or in relation to any particular condition. We shall endeavour to comply with any such preference as circumstances permit

As it takes some time for your medical records to reach us from your previous Doctor, it would be most helpful if you would complete the following questionnaire.

May we take this opportunity to invite you to attend for a brief initial medical examination.

This will include measurement of your blood pressure and a urine sample test. We sincerely hope that you will avail yourself of this invitation which will allow you to meet some member of the Practice Team and enable us to jointly plan your future medical care.

Dear Dr Hills

Re: Charles Davies, 33 Ferguson Street, Ayr
Dob: 09.09.58

Your patient was seen in the Orthopaedic Clinic today.

Please find overleaf a copy of my clinical findings made at the time of examination.

Yours sincerely

S GIBSON
CONSULTANT ORTHOPAEDIC SURGEON

Awarded for excellence

Not Confidential: Personal data about a patient

OUTPATIENT CLINIC – MISS S GIBSON

CHARLES DAVIES - 586042

18/07/08

HISTORY: I saw this man at clinic today. He has Dupuytren's disease affecting his right ring finger and there is a family history of this. A few years ago he sustained an injury to the base of his right little metacarpal and is complaining of pain around the ulnar side of his hand. He has associated this with his Dupuytren's disease, but I have explained to him the two conditions are not associated and surgery for Dupuytren's disease will not give him relief from this pain.

EXAMINATION: Mr Davies has a Dupuytren's contracture of 30° at the MCP joint of his right ring finger. There are no contractures of the lesser joints in this finger and no other finger is affected in either hand.

TREATMENT: I explained to Mr Davies what a Dupuytren's fasciectomy entails and also the postoperative period. He has previously declined surgery for this condition due to the time it entails off work, but feels that he would now like to proceed with this and I will put his name on the waiting list. He will hear due course regarding this.

Name placed on day surgery waiting list under general anaesthetic/regional block for Dupuytren's fasciectomy right ring finger. SGIBSON/as.

AYR

Dear Dr Hills

RE: CHARLES DAVIES, 33 FERGUSON STREET, AYR. DOB 09.09.1958

This patient attended the DSU for fasciectomy of his right ring finger. He was very anxious on arrival, having stopped taking Cannabis 2 days ago. He had eaten this morning and we therefore postponed him to be the last case on the list.

Unfortunately he became more agitated and left before his operation could be done.

This patient has only a reasonably minor contracture and this is not a life threatening condition, so I have not made any arrangement to see him again. I understand from him that previously on 2 occasions he has been too anxious to attend hospital for this condition. If in the future his contracture should worsen such that he wishes to reconsider surgery you could re-refer him to clinic.

Yours sincerely

S GIBSON
CONSULTANT ORTHOPAEDIC SURGEON

Dear Mr DAVIES

On checking your medical records it has come to our attention that it has been some time since your blood pressure has been assessed.

We are taking this opportunity to offer you an appointment with a member of our Practice Team to have this done. An appointment has been made for you on Friday 23rd June at 8.30am.

If this is unsuitable, please contact the surgery to make an alternative appointment.

Yours sincerely

16/12/05 CHARLES DAVIES - 586042
 Diagnosis: Dupuytren's band right ring finger + subluxation base of 5th metacarpal bone right hand and mallet deformity left middle finger

HISTORY:

This right handed gentleman was using a motorcycyle when he felt some thickening on the palmar side of his right hand. It gives him bother to change gear and use the motor cycle properly. It has gradually become worse, the fingers start to bend and give him some bother. He went to see his GP and the GP examined his hand and found some discomfort and pain at the base of the 5th metacarpal bone of his right hand. He also has a mallet deformity of his left middle finger due to a previous injury about 8 to 12 weeks ago. He is attending physiotherapy for his right shoulder.

EXAMINATION:

Today in the Clinic he has got a typical band bending his finger at the metacarpophalangeal joint about 30° but no involvement of the interphalangeal joint. There is no bending and it is straight. At the base of the 5th metacarpal bone of his right hand there is some tenderness with some clicking. It seems to be an old injury with subluxation at the carpometacarpal joint of his 5th metacarpal bone. He told me he had many injuries before. On examination of his left hand he has got typical mallet deformity of his left middle finger but this has been going on for a long time. I do not think treatment will help it but we have give it a try. Past medical history – No history of diabetes, asthma, high blood pressure, epilepsy, jaundice or liver disease. Social history – He smokes about 80 cigarettes a week for the last 30 years.

TREATMENT:

We have given him a mallet splint as a trial for his left middle finger. The carpometacarpal joint of his 5th metacarpal right hand I think is an old injury and difficult to deal with it. His Dupuytren's band, we are going to put his name on the waiting list for excision Dupuytren's band, right hand under general anaesthetic, Day Surgery. I warned him that anaesthetically it is a bit difficult to anaesthetise him with him smoking. He should cut down on his smoking and a week before he should stop smoking, and he should ask the physiotherapist for physiotherapy to his chest while he is attending physiotherapy for his shoulder.

Dear Dr McCulloch

CHARLES DAVIES, 33 FERGUSON STREET, AYR : DOB 09/09/1958

Thank you for referring this gentleman today to the Clinic who had noticed a very painful tender lump perianally a few days ago which disappeared following application of Proctosedyl cream. He says he had haemorrhoids in the past and he also had a colonoscopy for bowel screening in November 2010 which was negative, and the only positive finding was haemorrhoids. He tells me that he felt a big painful lump which has now disappeared and he denies any problems with his bowels.

On examination there was no evidence of any haemorrhoids or infection around his perianal area. I suspect he probably has had a thrombosed pile which has healed now and therefore reassured him and discharged him back to your care. However, I have advised him that if he happens a repeat of a thrombosed pile, then he should see us in A&E for incision and removal of the clot.

Yours sincerely

Dear Dr Wilson

CHARLES DAVIES, 33 FERGUSON STREET, AYR. DOB 09/09/1958

Thank you for referring Charles whom I saw in Day Surgery this morning for excision of a sebaceous cyst from his right earlobe. This surgical procedure was carried out under local anaesthetic. I will send a copy of the histology directly to yourself.

I have asked Charles to organise with your Practice Nurse for removal of sutures in seven days.

I have not made any follow up arrangements for this gentleman.

I hope this is to your satisfaction.

Yours sincerely

CLINICAL INFORMATION**History of presenting complaint / examination findings / investigation results****Presenting complaint**

Description: Haemorrhoids

Comment: I would be obliged if you could see and assess this 53 year old gentleman, who comes in with problematic haemorrhoids again. The gentleman was seen a few years ago for treatment and was told at some point he may need to come back for further treatments. He has been relatively symptom free, until the last few months when he seems to be getting increased discomfort.

I would be obliged if you could see and assess for further treatment of his haemorrhoids.

Many thanks for your help in this matter.

Dr Robert Kean

Enquiries to 01382 425678

Dear Doctor

This patient
0909583595, CHARLES DAVIES, 33 FERGUSON STREET AYR KA8 9QJ, registered with your
practice has recently returned a bowel screening test kit.

The test was positive and the following information was issued to them:

You recently sent a bowel screening kit for testing. Thank you for taking the time to do the test and returning it to the Bowel Screening Centre.

Your test result shows hidden blood in your bowel motion.

There are lots of simple explanations for this including bleeding gums, inflammation in the stomach, polyps in the bowel, haemorrhoids (piles) or broken skin around the back passage. Another important and more serious explanation could be that early bowel cancer sometimes bleeds. A colonoscopy is the best way of looking for the cause of bleeding which in some but not all cases may be due to bowel cancer.

What is a colonoscopy?

- A colonoscopy is an examination of the bowel using a fine flexible tube. The tube is passed into the bowel via the back passage.
- The tube allows a doctor or nurse to inspect the bowel fully.
- If found, 'polyps' can be removed without the need for surgery.
- Polyps are small growths of cells on the bowel wall.
- Removal of polyps can give long-term protection from bowel cancer.
- Remember, very few of the people who need a colonoscopy will have bowel cancer.
- This is usually done as a hospital outpatient appointment.

Your NHS Board will contact you in the next few days to explain the colonoscopy procedure to you. You will also be able to ask any other questions you may have about bowel screening. If you wish to contact them yourself, the details are:

Audrey Richmond, Bowel Screening Co-ordinator, Tel:01563 827736

Your GP practice has a copy of your test result and will know colonoscopy is planned. You will be invited for bowel screening again within 2 years.

Yours sincerely

Professor Bob Steele
Clinical Director

See how to do the test with language options and BSL at www.bowelscreening.scot.nhs.uk

Dear Dr Kean

CHARLES DAVIES, 33 FERGUSON STREET, AYR, KA8 9DJ
(D.O.B. 09.09.58) (CHI. 0909583595)

I assessed Charles on 21/06/12 and found him suitable for referral to Addaction. I then visited on 29/06/12 for a follow up appointment where Charles told me that he would engage with Addaction for support around his Cannabis use.

I have since discharged him from my caseload and made him aware of our open referral system for future reference.

Yours sincerely

CLINICAL INFORMATION**History of presenting complaint / examination findings / investigation results****Presenting complaint**

Description: See below please

Comment: I would be grateful for colonoscopy for this gentleman who has had problems mainly with loose stools for the past few months now. He has not noticed any particular weight loss or change in appetite although he does get quite a lot of abdominal cramps with this. His bloods are all essentially normal including blood count, and inflammatory markers.

I note he had a colonoscopy in 2010 as a result of Bowel Screening which was essentially normal at the time but given his new symptoms I would be grateful for investigation.

Examinations and Investigations

4. HOW WE USE YOUR INFORMATION

The information you have provided will be used by the GP Practice to carry out its various functions and services including scheduling appointments, ordering tests, hospital referrals and sending correspondence.

Your information, including your name, gender, date of birth and address, will be passed to NHS National Services Scotland where will be held on the Community Health Index (CHI). This information is used to register you with the GP Practice, transfer your medical records between GP practices in the UK, make payments to GP Practices for medical services provided, and to process an issue medical cards, medical exemption certificates and entitlement cards.

NHS National Services Scotland shares information about you within NHS Scotland to assist in the provision and improvement of NHS services and the health of the public. When we do this, we make sure that the information which identifies you as a person and your health information are separated or anonymised. Health condition and treatment information which could identify you will not be used for research purposes by the NHS unless you have consented to this.

For more information on how NHS National Services Scotland uses your personal information visit www.nhs.uk. If you have any queries or concerns about how your personal information is used by the NHS please ask for the leaflet 'Confidentiality - it's your right', visit the Health Rights Information Scotland website at www.hris.org.uk or ask your GP surgery.

NHS National Services Scotland is the common name of the Common Services Agency for the Scottish Health Service.

5. PATIENT DECLARATION

I declare that the information I have given on this form is correct and complete. I understand that, if it is not, appropriate action may be taken.

To enable NHS National Services Scotland to confirm my eligibility to lawfully register with a GP and for the purposes of prevention, detection, and investigation of crime, relevant information from this form will be disclosed to the NHS Business Services Authority, NHS National Services Scotland the Home Office, Identity and Passport Service, HM Revenue and Customs, the General Register Office and Local Authorities.

Dear Dr Good,

CHARLES DAVIES DOB: 09/09/1958 CHI No: 0909583595
33 FERGUSON STREET, AYR, AYRSHIRE, KA8 9QJ

This patient underwent a colonoscopy for intermittent rectal bleeding and a change in bowel habits. The colonoscopy was complete. No abnormality was seen except for mild diverticular disease.

The patient does not require any follow up.

Yours sincerely

COLONOSCOPY REPORT

Name: **Charles DAVIES (M)**
Date of birth: **09/09/1958**
CHI No: **0909583595**
Case note no.: **0909583595**

Address: **33 Ferguson Street
Ayr
KA8 9QJ**

GP: **Dr A Good
Racecourse Road Medical Group
3 Racecourse Road
Ayr
Ayrshire
KA7 2DF**

Procedure date: **26th June 2017 (15:39)**
Priority: **Elective**
Status: **Outpatient/NHS**
Hospital: **Ayr Hospital**
Referring Cons: **Mr.R.Muir
(General Surgery)**

Indications

Variable bowel habit with blood "on occasions" fresh rectal bleeding.
Clinically important comments: Scoped in 2010 and 2014 for similar symptoms - not noted in initial referral.

Report

Bowel preparation with moviprep was satisfactory.
A digital rectal examination was performed.
The colonoscope was inserted via the anus to the terminal ileum, insertion confirmed by Intent of procedure and confirmed with nursing staff. The caecum was identified positively by the ileocecal valve, the appendicular orifice, the tri-radiate caecal fold and ileal intubation. The scope was retroflexed in the rectum.
The examination to the limit of insertion was normal.

Medication

Continue medication.

Advice/comments

Normal colon. No diverticular disease. Featureless sigmoid colon.

Follow up

Return to the Referring Surgeon.

CLINICAL INFORMATION**History of presenting complaint / examination findings / investigation results****Presenting complaint**

Description: see below please

Comment: Dear Doctor,

Thank you for seeing this 58-year old gentleman who has long standing issues with his bowels but his symptoms have significantly changed in the last two months. He now describes passing loose stools multiple times in the morning and associated cramping abdominal pain. He describes urgency to pass stool and fresh PR bleeding. He has a history of haemorrhoids which were banded a number of years ago. He has no associated weight loss.

On examination his abdomen was soft with mild lower abdominal tenderness. There was no masses palpable. PR was difficult as he found it extremely painful. There was no obvious masses felt.

Due to the change in his bowel habit I would be grateful if you could arrange to see him on an urgent basis.

Yours sincerely,
Dr Aileen

Description: see below please

Comment: Dear Doctor,

Thank you for seeing this 60-year old gentleman presents with a Dupuytren's Contracture affecting his right ring finger. He feels that the fixed flexion deformity is interfering with the function of his right hand and he is keen to discuss the possibility of corrective surgery.

Many thanks for seeing him.

COELIAC SEROLOGY

TtG Ab (IgA) 1.1 U/mL (0.0-7.0)

Comments:

1 Coeliac Serology: IgA TtG Ab = IgA Tissue Transglutaminase Ab.

Normal = <7.0, equivocal = 7.0-10.0, positive = >10.0.

If screening for coeliac disease, this result is only valid if the person was eating gluten at least twice a day for previous 6 weeks
If known to have coeliac disease,

this negative result suggests adherence to gluten free diet.

IgA coeliac serology has reduced sensitivity if total IgA <0.2g/l

Date reported: 19.04.24

CLINICAL INFORMATION**History of presenting complaint / examination findings / investigation results****Presenting complaint**

Description: PLEASE SEE BELOW

Comment: Dear Colleague,

I would be grateful if you could see this sixty five year old gentleman who has developed hypothyroidism. He presented with weight loss and generally feeling more tired. His thyroid function has shown a T4 of 51.9, TSH <0.1 and T3 of 22.3.

On examination, there was no thyroid swelling or goitre to palpate.

I have commenced him on carbimazole 20mg BD and will recheck his TFT's in two weeks alongside his TR antibodies. I will adjust the dose of his carbimazole to try and bring his thyroid function within normal and would be grateful for your further follow up in due course. Many thanks.

Yours sincerely,
DOCTOR LEE-ANN HADDOW

OPERATION NOTE

Patient: Charles Davies
CHI No.: 0909583595
Surgeon: Miss Betts
Date of operation: 16/9/2019
Referring Health
Board/Consultant: A&A

Right ring finger needle fasciotomy

Pre-op:

This gentleman has a pretentious cord into his ring finger of his right hand, giving a 50° MCP contracture.

LA infiltration:

1ml 2% Lidocaine

Procedure:

Standard needle fasciotomy was carried out at three sites in the palm. Full passive correction was achieved. No neurological symptoms were reported. A very small skin tear occurred at the base of the finger. The wound was dressed with sterile dressings.

Post-op instructions:

Elevate hand

Patient can reduce dressings when he gets home. He has been shown stretching exercises.

No routine follow up has been arranged. Patient knows to get in contact if having any issues.

Miss Helen Betts
FRCSGla (Tr & Orth)
Consultant Orthopaedic Hand Surgeon

Dear Dr Good,

CHARLES DAVIES **DOB: 09/09/1958** **CHI No: 0909683595**
33 FERGUSON STREET, AYR, AYRSHIRE, KA8 9QJ

Please find enclosed a copy of the ETT and Echocardiogram done for Mr Davis, who had recently presented to us with chest pain and test were negative for NSTEMI with clinical features highly suggestive of Coronary Vasospasm.

He managed to only exercise for 2mins 17secs achieving MAX METS 4.6 and 83% of the target Heart rate. The test was stopped as the patient developed breathlessness. Interestingly during the short period of testing he had inferior T-wave flattening.

The patient also had an Echocardiogram which shows normal Left ventricle with no hypokinetic areas and normal valves with trace of AR with mildly dilated Atria.

I have commenced the patient on Bisoprolol, which could be continued with strict advice to refrain from recreational drugs.

Yours sincerely

Authorised on 23/09/2022 15:49:54 by Krishna Prasad.

EXERCISE STRESS TEST REPORT

Patient Name: Davies, Charles DOB: 09-Sep-1958
Patient ID: 0909583595 Age: 64 yr
Height: cm Gender: Male
Weight: kg Race: Caucasian
Study Date: 12-Sep-2022 Referring Physician: Dr Prasad
Test Type: Treadmill Stress Test Attending Physician: --
Protocol: BRUCE Technician: KM/AD

Medications:
Bisoprolol

Medical History:
sudden onset chest pain

Reason for Exercise Test:
Suspected Angina

Exercise Test Summary

Phase Stage Time Speed Grade HR BP Comment
Name Name in Stage (mph) (%) (bpm) (mmHg)
PRETEST STANDING 03:16 1.0 0.0 51 118/66
Exercise STAGE 1 02:17 1.7 10.0 113 01:09 heavy legs
01:24 breathing heavier
02:08 breathless
Recovery 08:05 0.0 0.0 54 120/66 09:45 very breathless

The patient exercised according to the BRUCE for 02:17 mins, achieving a work level of Max. METS: 4.6. The resting heart rate of 47 bpm rose to a maximal heart rate of 131 bpm. This value represents 83 % of the maximal, age-predicted heart rate. The resting blood pressure of 118/66 mmHg, rose to a maximum blood pressure of 180/62 mmHg. The exercise test was stopped due to Test stopped due to breathless and heavy legs, so.

Interpretation
Summary:

Resting ECG: sinus bradycardia.
HR Response to Exercise: appropriate.
BP Response to Exercise: normal resting BP - exaggerated response.
Chest Pain: none.
Arrhythmias: frequent VE's, couplets, triplet, bigeminy, SVE's.
ST Changes: inferior T-wave flattening.

Conclusions

Test stopped due to breathlessness and heavy legs, sore arms
83% of THR achieved.
Chest pain: None, Arrhythmias: frequent VE's, couplets, triplet, bigeminy and SVE's. ST changes: inferior T-wave flattening. Uneventful recovery.

Findings

ECG: Sinus bradycardia with HR of 45-50bpm.

Study Quality: Sub-optimal.

Left Atrium: Mildly dilated volume, indexed for BSA.

Right Atrium: Mildly dilated area.

Atrial Septum: Interatrial septum presents as intact with simple colour flow alone

Left Ventricle: Normal LV cavity dimensions and wall thickness with all regions contracting normally.

NHS Confidential: Personal data about a patient

Davies, Charles

0609583595

Page 2 of 2

LV Diastolic Function: Normal for age.

Right Ventricle: Normal RV cavity size with thickened RV free-wall. Normal systolic function, c/w TAPSE & RV s' Velocity.

Mitral Valve: Structurally normal mitral valve with good leaflet mobility. Normal Doppler forward velocity with trivial MR detected.

Aortic Valve: Trileaflet aortic valve with good cusp separation and normal Doppler flows. Trace of regurgitation.

Aorta: Normal Aortic root dimensions normal aortic arch and proximal descending aortic dimension and anatomy.

Tricuspid Valve: Normal tricuspid valve with trace TR- Incomplete Doppler trace to accurately assess PA pressure.

Pulmonary Valve: Normal valve structure and function. Trivial regurgitation.

IVC: Mildly dilated IVC dimension with normal collapse during sniff.

Conclusion

Normal LV dimensions and systolic function.

Non-dilated RV with mild RV hypertrophy. Preserved RV systolic function.

Mild biatrial dilatation

Trivial MR, TR and PR.

Trace of AR.

Dear Dr Good

Patient Name: Charles Davies **CHI:** 0909583595 **DOB:** 09/09/1958
Patient Address: 33 Ferguson Street, Ayr, KA8 9QJ

Diagnosis: Dupuytren's disease right hand

Outcome: Add to Waiting List for Needle Fasciotomy, right ring finger – LA Day Case

Thank you for referring this right hand dominant gentleman to the Hand Clinic. As you know, he has had problems affecting his right hand for a number of years. He has previously attended Ayr with it and was due to get surgery, however, when he attended for surgery he was not sufficiently fasted and he decided he couldn't wait.

He has a cord affecting his right ring finger for a number of years. It is getting in the way. He has a family history of Dupuytren's disease but no ectopic disease. He is not diabetic. He smokes 20cs of tobacco a week and also cannabis.

Past medical history includes depression. He is currently on antibiotics for paronychia. He also takes Solpadol, Omeprazole, Diclofenac and Citalopram and he has no known drug allergies.

On examination today, he has evidence of a pretendinous cord affecting the ring finger of his right hand. It gives a 50° MCP contracture. There is no other Dupuytren's within his hand.

I have explained to him what Dupuytren's is and talked about treatment options including needle fasciotomy and Fasciectomy. Having fully explained both procedures, he feels he would like to go ahead with the needle fasciotomy, understanding it has got a high risk of recurrence and neurovascular injury, however, it has a quicker recovery and I would expect it to give him a full correction although this cannot be guaranteed. There is also a risk of a skin tear & infection. He is happy to go ahead with this and I have therefore placed his name on my waiting list. He should hear word from the booking office about this in due course.

Yours sincerely

Miss Helen Betts
