Wednesday Evening tea-time. [REDACTED] and Sharon had been niggling at each other. I was at the kitchen sink so had my back turned to the tea-table. A member of staff was at the table along with the 4 kids. Either Sharon or [REDACTED] hit the other and they retaliated. [REDACTED], in a temper, threw a table knife at Sharon and it struck her on the lower left side of ~~the~~ her back causing a wound which required 2 paper stitches. Sharon was treated at First Aid on the campsite. She calmed down fairly quickly and went out that evening.

[REDACTED] & Sharon Have been in Carolina House for two and a half years. Following initial settling in difficulties, they have now become fairly well settled and have become resigned to being in care. At times, they can be hurtful to each other but they are close and this is clearly shown at times of stress when they can be very caring. All the children keep in close contact with their Gran, [REDACTED] and visit her at least once per week. The Gran finds difficulty in controlling the children and generally takes the easy way out of any possible confrontations by giving in to the children. She has great difficulty in admitting that she finds them a handful at times and will not tell the children that she sometimes needs a rest from them. [REDACTED] is difficult to work with in that she does not support staff in their attempts to work with the children and she often undermines staff decisions involving her grandchildren.

[REDACTED] is a likeable boy who has a good sense of humour. He enjoys being funny and uses this in his relationships with staff and children alike. This sense of fun can often go too far and he can be a bit of a bully. [REDACTED] does not like being confronted by his misdeeds and tends to bluster and go in the huff when this happens, although at other times he loses his temper and becomes abusive.

[REDACTED] is, in many ways, similar to [REDACTED] in that she likes to act the 'clown' and has difficulty in realising when to stop. She finds it hard to show affection and does this by play fighting but again, she does not always realise when the limits have been reached. She is having a lot of problems coping with her adolescence and her

mood swings can be quite marked.

Sharon. is a very moody girl. At one time she can show a lot of affection but when she does not get her own way she becomes huffy and uncommunicative. Sharon can be lazy about personal hygiene and has to be constantly reminded of her obligations in respect of herself and her room. Like her brother and sister, Sharon has a good sense of fun.

School. All three children find schoolwork hardgoing and they all attend remedial classes for some of their school subjects.

Parental contact.

The parents have been separated for some time and neither keeps regular contact with the children. The mother occasionally writes and has telephoned. These contacts are not really helpful to the children as the mother usually tells them that she is almost set up and will soon be able to have the children back with her. This results in the children believing that they will soon be out of care and back with Mum, and the resulting disappointment is very painful.

It has become necessary to monitor telephone calls from [redacted] because they always come from some public house and she has usually been drinking. At these times, she becomes very abusive and on more than one occasion has agreed to come to Carolina House to discuss contact with her children, or has said that she would contact the social worker to this end, but so far she has not made contact in person.

In August of this year, [redacted] made contact with the children and made promises to them that they could live with him when moved to England. This has also fallen through.

Health.

[redacted] Is overweight and past attempts to get him to diet have met with a measure of success but the weight lost has been put back on fairly quickly. His general health is good but in May of this year he had to have an operation to correct a hip joint deformity.

[redacted] Enjoys reasonably good health but tends to make a lot out of minor ailments and hurts.

Sharon. Apart from being overweight, keeps good health.

[redacted] and Sharon have all shown recent interest in being fostered and have discussed this at different times with staff. Their ideas about being fostered are at times unrealistic but the idea does hold some appeal for them. This is probably more true of [redacted] and Sharon although, again, they change their minds from time to time about who should go with whom.

Report re: [REDACTED] 13.7.67
21.8.68
10.7.69

The children were admitted to Carolina House on March 24, 1980.

Initially they were unsettled and confused but as time passed all the children have settled reasonably well. The confusion, however, remains, as the children continue to get conflicting messages from their grandmother about her commitment to them - she tells the children that she is keen to have them, but in reality she is indicating very clearly that she has difficulty in coping with them and is happier now that contact has become, from her point of view, less pressured.

The children's mother is almost continuously in the Manchester area, with spasmodic visits to Dundee. We have tried to encourage [REDACTED] to contact the Social Work Department and ourselves about contacting the children, but she prefers to keep her visits secretive, and makes furtive arrangements to see the children. This the grandmother colludes with, and it creates guilt in the children who are caught up in their desire to see mother and their dislike of not being able to tell us of the contact. On the last occasion, [REDACTED] did tell us that his mum had seen them at the school. Following this a number of attempts have been made to "clear the air" on this and to put further contact on a more open basis, but neither grandmother or mother have agreed to meet with us.

[REDACTED] - is well liked by his peers and staff at Carolina House. He is overweight and this gives him the appearance of a "jolly character". [REDACTED] uses this "jollity" to make and maintain relationships but his sense of fun can go too far and [REDACTED] has difficulty recognising the boundaries in this. His "fun" often includes teasing and bullying younger children.

[REDACTED] has difficulty coping with confrontation about his bad behaviour. He usually tries to totally deny any involvement and if this does not work, he becomes verbally abusive. Over the past year he has twice (to our knowledge) stolen from other children within Carolina House. The first time it was postal orders and the second time it was money. On both occasions when it became obvious that we knew he was the culprit, [REDACTED] became very frightened and weepy. Both instances were dealt with within Carolina House and no other children knew of [REDACTED] involvement.

[REDACTED] general health is good, but in the past year he has undergone two operations on his hips, the first to insert pins and the second (in January of this year) to remove the pins. These operations are thought to have been successful.

██████████ - is in many ways similar to ██████████ in that she likes to "act the clown", and has difficulty in realising when to stop. She finds it hard to show affection and does this by play fighting, but again she does not always realise when the limits have been reached. ██████████ is having a lot of problems coping with her adolescence and her mood swings can be quite marked. She went through a stage of running away - this was seen as attention seeking as ██████████ contained her running away to the immediate area around Carolina House and always came back on her own accord. This "running away" is tapering off, but ██████████ still has temper tantrums during which she is verbally and physically abusive to staff. She is, however, working with staff on these issues, and we feel is making some progress.

██████████ general health is good, although she has a tendency to make the most of minor aches and ailments.

Sharon - is more of a fun loving, "feminine" type of girl than her sister ██████████. Like ██████████ she uses her overweight frame to present a "jolly" image to gain popularity in the house. She can be very manipulative and uses her moods in order to get her own way. On first impressions, Sharon can appear confident, but she is in fact very insecure and seems to have a poor self image. This manifests itself in her inability to sustain the image of herself which she prefers and it is not unusual to see Sharon with a dirty face, unbrushed hair, and her clothes grubby. She is also a compulsive thumb sucker.

Sharon is more able to openly show affection than either ██████████ or ██████████, and can be spontaneously emotional. She is also the one of the three who would have least difficulty in breaking with her family although she would require reassurance that they were alright.

Conclusion

It seems fairly clear that none of the family will be able to care for the children on a permanent basis. Neither mother, father or grandmother have shown any inclination to involve themselves with Carolina House or the Social Work Department in discussions about appropriate and less damaging contact. It would seem that they would be best to remain in Carolina House for the foreseeable future.

Sharon Andrews - DOB 10.7.69

Since the annual review in February, Sharon continues to reside in Carolina House. However, there have been a few changes in circumstances.

In June the living groups were restructured to age related groups whose focus is to prepare its members towards a more independent life style for the time they will eventually leave care. This is done through a programme of budgetting, cooking, etc with group members having a greater responsibility for themselves, as well as group chores.

Sharon is in the 13-15 age group and shares a room with one other girl. She needs a good deal of prompting in the areas of personal hygiene and laundry, and at times is reluctant to keep her room tidy or get involved in group chores.

Sharon and [REDACTED] are in the same group and although they tend to have the usual sisterly quarrels, they can be close and band together, especially in times of stress. Sharon appears to relate well with her peers in the group, although she can at times be the butt of their ridicule.

In July [REDACTED] moved in with Grandmother on a trial basis, which was made permanent following a hearing on September 21. Sharon was upset by [REDACTED] move as this meant she could no longer stay overnight with granny which she enjoyed, and in some ways she has not come to terms with this. Sharon maintains regular contact with Granny, normally day visits at weekends and occasional evenings. It would appear that Granny can still build up hopes by talking about getting a bigger house and have her home, which Sharon wants to believe, although past experiences indicate that Granny is unable to cope with more than one at a time.

Sharon still has contact with her natural parents, although this has tended to be on a secretive and furtive basis. Attempts to organise this on a more open and structured basis both by the social worker and ourselves have proved unsuccessful as yet, as neither Mum nor Granny co-operate in these attempts.

There have been some signs of Sharon beginning to gradually mature, although her huffy moods are still in evidence when she does not get her own way. Like most asolescents, Sharon finds it difficult to accept adult authority and advice and can react in a childish manner when confronted by her behaviour

Sharon/

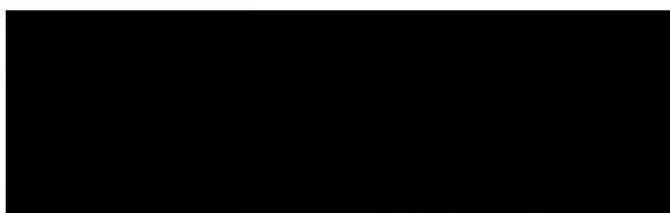

Sharon can, and at times does seek out staff to help her sort out muddles and worries. She can be openly affectionate and enjoys a cuddle.

Except for a nagging ear infection, Sharon is generally fit, although she tends towards being overweight. This was focussed on in a recent medical at school and it was recommended that Sharon be referred to a dietician; Sharon has rejected this decision.

Sharon attends Morgan Academy and appears to be coping reasonable well. There do not seem to be any serious problems and except for rare occasions her attendance is good.

In the past Sharon has expressed a wish to be fostered, but attempts to find suitable foster parents for her have met with no success.

It is felt that Sharon should remain at Carolina House for the foreseeable future.

Sharon Andrews, D.O.B. 10.07.69,
Carolina House, 281 Strathmore Avenue, Dundee.

Focus of Work

Since the last review, Sharon has continued to reside in Carolina House, using this as a secure home base and maintaining weekly contact with grandmother.

On September 14th, 1984 Carolina House moved to new premises. Sharon is still in the same house group as previous. Hers is a group of 13 - 16 year olds where the emphasis is upon helping group members move towards a more independent lifestyle. Thus they are encouraged to take more responsibility for budgeting, cooking, laundry and personal hygiene. Sharon still requires a fair amount of prompting in these areas although it is perhaps fair to say that she has recently been making more of an effort in these matters.

Treatment and Personal Progress

Sharon can be a very affectionate girl at times, although it is difficult to assess whether this affection is truly genuine or attention seeking. Sharon, like many other adolescents is prone to mood swings and can become huffy, stubborn and uncommunicative. Although these are features of adolescence, Sharon's immaturity coupled with outside pressures make it very difficult for her to cope with these feelings and how to channel them appropriately. It has been noted that Sharon has become more disruptive within the group and more aggressive towards staff. Perhaps this could be related to numerous outside pressures, some of these being [redacted] move to stay with grandmother, Mother's moving back down to Manchester recently, loss of key worker and the move to the new Carolina House.

Sharon's adolescence coupled with her emotional immaturity causes conflict which expresses itself outwardly at times in irrational ways i.e. physical and verbal outbursts which Sharon has to work through quickly in order to allow herself to come back on to good terms with everyone. As Sharon moves through adolescence these outbursts are becoming more open and regular, thus staff have at times greater difficulty in exerting control. This is compounded by the fact that Sharon is often manipulated by the stronger members of her peer group. However, after discussion Sharon can usually recognise her part in the situation and accept responsibility for her behaviour.

Family Contact

On September 14th [redacted] returned home to stay with grandmother. Initially Sharon was upset about this decision and was able to say that she would have

liked [redacted] to stay with her in Carolina House, but realised that [redacted] wanted to live with grandmother. Sharon also said that she would like to go also, but didn't see this happening in the immediate future. Sharon's weekend stays were also discussed with [redacted] and it was arranged that Sharon spend every weekend at grandmother. This has not happened as planned and although Sharon insists every week she only stays alternative weekends. When staff discuss this with Sharon she gives the reason that grandmother only wants her at these times, as she finds it difficult to cope with the two girls at once. Sharon also returned her with the suggestion that [redacted] be allowed to spend the weekend at Carolina House when Sharon visited grandmother. This suggestion was dismissed by both staff at Carolina House and Social Worker as not being in [redacted] best interests.

Sharon still has contact with [redacted] when she stays at grandmothers.

Contact with Mum has taken the form of monitored phone calls via Social Worker and occasional letters. Mum has visited Dundee on a number of occasions. These times have been fraught with tension and lack of communication. The family would try to conceal the fact that Mum had seen the girls despite being told this would be acceptable if only arranged with Social Worker. [redacted] came to Dundee in July of this year, supposedly to stay on a permanent basis. A meeting was held, at which it was clarified that future contact with Mum had to be arranged. Sharon's attitude towards Mum fluctuates dependant on her mood and has tried to use Mum as a threat towards staff when Sharon has been under pressure and confronted on issues.

More recently it came to note that Mum had not been mentioned for a while. When asked, Sharon said that Mum had gone on holiday, however, Mum started phoning on a regular basis, apparently from public houses. Staff again tried to talk to Sharon about Mum's whereabouts and it was discovered that Mum had gone back to Manchester to stay. Sharon mentioned that the reason for her secretiveness was she was afraid contact wouldnt be allowed. At present Mum works and stays in a hotel in Manchester.

Physical and Medical Condition

Sharon has suffered a few minor ailments such as throat and ear infections.

Sharon is quite sexually aware and curious about human anatomy.

Sharon is not very particular in areas of personal hygiene but makes sporadic attempts to rectify this matter.

Other Agencies

Sharon has no real outside interests and does not appear to have any close friends outwith Carolina House. She attended Ranger Guides on a few occasions but appeared to lose interest very quickly and didn't return.

Sharon has truanted on occasions from school or appeared to feign sickness as an excuse to be absent. Whilst at school she normally does not appear to cause any real management problems. However, it was brought to our notice that Sharon was misbehaving and being unco-operative at school last week, refusing to do any work set for her. The school asked that Sharon be returned to Carolina House on 12th November, and return the following day with a change of attitude. In the event of this not happening then Sharon was under threat of

being formally excluded.

Staff felt that Sharon was following the pattern of another girl in the house, by behaving in this way. After discussion with Sharon she appeared to realise the implication of her actions and returned to school. There have been no such repercussions since.

Prognosis

As stated previously in this report Sharon's behaviour has been an area of concern of late. Certain factors attributing to this are; adolescence, confusion about her future in relation to Mum and Grandmother and her ambivalent feelings about [redacted] moving to grandmothers.

It would appear that there are going to be difficult times ahead as Sharon continues to challenge authority, but it is felt that it would be in her interests to remain in Carolina House for the foreseeable future.
