History	Still low back and left leg sore, no urinary symptoms. On ESA. O/E mid lumbar area tender ++, no red flag symptoms. Looking for Med 3 extension.
Medication	Co-Codamol 30/500 Tablets 50 TABLET 2 TABS 3 TIMES DAILY
	Ibuprofen Tablets 400 mg 42 TABLET ONE TO BE TAKEN THREE TIMES A DAY
Additional	eMED3 (2010) new statement issued, not fit for work FitNote.pdf, (Diagnosis: Low back and leg pain; Duration: 16/11/2017 - 07/12/2017)

<u>07/12/2017</u>	<u>Dr Arun Rai at Clinic</u>
Problem (FIRST)	Mood swings Back and left leg pain persists. Says life long he had h/o mood swings, sometimes low mood and other times happy. Due to his mood swings and temper he lost several jobs and 2 marriages broken. Currently lives with partner for 2 years. Does not drink alcohol, stopped smoking also. Ruminating he never had counselling when mum died when he was 6 yrs old. He had contacted Goldenhill RC couple of wks ago. No h/o mental illness in immediate family. Comment Advised physio self referral, I will refer Psych. Medication Gabapentin Capsules 100 mg <i>100 capsule ONE TO BE TAKEN THREE TIMES A DAY</i> Co-Dydramol 10/500 Tablets <i>100 tablet ONE TO BE TAKEN THREE TIMES A DAY</i> Additional eMED3 (2010) new statement issued, not fit for work FitNote.pdf, (Diagnosis: Back and leg pain; Duration: 07/12/2017 - 18/01/2018)
<u>05/01/2018</u>	<u>Dr M S Haque at Dr Rai & Partners (18843)</u> T/C. Getting SOB and tired when goes out taking dog since 4-5 days but he did not think it could be anxiety or panic attacks as he never had panic attacks. Advised him to attend surgery for examination.
<u>05/01/2018 15:56</u>	<u>Dr Kate Makharoblidze at Dr Rai & Partners (18843)</u> 1 week duration of excessive sweating, lethargic, very SOB on exertion. Producing yellow sputum. Using inhaler more frequently with short leaved benefit. Stopped smoking 8 weeks ago but smoked for years before. Examination temp - 36.8C, sats - 90% - 91%. chest - reduced A E bibasally and left sided creps, no wheeze. Comment severe LRTI - options given - to be sent to hospital or try ABX + Steroid + inhaler, if any worsening on these over the weekend will go to A&E. Does not want to go to hospital - prefers the second option. Medication Salbutamol Cfc-free inhaler 100 micrograms/puff <i>2 inhaler 2 PUFFS QID PRN</i> Prednisolone Tablets 5 mg <i>40 TABLET EIGHT TO BE TAKEN IN THE MORNING</i> Doxycycline Hyclate Capsules 100 mg <i>8 capsule TWO TO BE TAKEN ON THE FIRST DAY THEN ONE TO BE TAKEN EACH DAY FOR 7DAYS</i>
<u>16/01/2018</u>	<u>Dr Samantha Ross at Dr Rai & Partners (18843)</u> Ongoing LRTI History See entry from 5/1/18 - generally feeling better but ongoing fever, cough, green sputum - no CP/sob/tightness/wheeze - E+D ok PU. Examination well and alert able to walk in today from home, RR 14 HR 80 reg oxygen sats 95% in air TC GAEB- noisy BS RLZ - no wheeze left ear also red and inflamed- right ok Comment Plan - see px and advised if worsening or not settling after abx to seek advice- happy with plan Medication Clarithromycin Tablets 500 mg <i>10 tablet ONE TO BE TAKEN TWICE DAILY</i> Gentamicin And Hydrocortisone Acetate Ear drops 0.3 % + 1 % <i>10 ml THREE DROPS TO BE USED IN THE AFFECTED EAR(S) FOUR TIMES A DAY</i> Additional eMED3 (2010) new statement issued, not fit for work FitNote.pdf, (Diagnosis: respiratory infection; back and leg pain; Duration: 16/01/2018 - 27/02/2018)
<u>06/02/2018</u>	<u>Dr Arun Rai at Dr Rai & Partners (18843)</u> Jackie - DNA Next day appt text sent, patient then phoned to say he was waiting on a lift that never showed up
<u>08/02/2018</u>	<u>Dr Arun Rai at Clinic</u> Has been seen in resource centre on 15/1 and 1/2/18. We do not have letter yet. Says he was told that he had moderate depression and get antidepressant. Wants gabapentin for left leg pain, helped bit. Medication Citalopram Hydrobromide Tablets 20 mg <i>56 TABLET ONE TO BE TAKEN EACH DAY</i> Gabapentin Capsules 100 mg <i>100 capsule ONE TO BE TAKEN THREE TIMES A DAY</i>
<u>16/02/2018 14:14</u>	<u>Dr Kate Makharoblidze at Dr Rai & Partners (18843)</u> SA113 completed

Medication	200mg capsules. Salbutamol Cfc-free inhaler 100 micrograms/puff 2 inhaler 2 PUFFS QID PRN Gabapentin Capsules 100 mg 100 capsule ONE TO BE TAKEN THREE TIMES A DAY
Additional	eMED3 (2010) new statement issued, not fit for work FitNote.pdf, (Diagnosis: Left leg pain and mechanical back pain; Duration: 27/02/2018 - 10/04/2018)
10/04/2018 10:47	<u>Dr Kate Makharoblidze at Dr Rai & Partners (18843)</u>
History	backpain is still there, missed PT as had flu, will self refer again. Also needs sickline. Gabapentin increased to 300mg TDS, 200mg helps for short time only.
Additional	eMED3 (2010) new statement issued, not fit for work FitNote.pdf, (Diagnosis: Mechanical back pain and left leg pains, awaiting for Physiotherapy; Duration: 10/04/2018 - 11/06/2018)
24/04/2018	<u>Dr Arun Rai at Clinic</u>
Problem (FIRST)	Hip pain
History	Still left hip and leg pain. Physio 1st appt thist week. Applied for housing as there are many stairs in current house, asking a support letter, I advised there is no need of it, if council wants they should contact us with his permission. Applying for PIP.
Comment	Get hip x ray. Wants citalopram script.
01/05/2018	<u>Dr Arun Rai at Clinic</u>
History	Had x ray today. Now says both knees, both ankles and hand joints are sore. Left hand little finger swells and painful in morning for 10 min. Wants test for arthritis! says it runs in family.
Test Request	Bone Profile - Requested, CRP - Requested, Urea and Electrolytes - Requested, Liver Function Tests - Requested, Full Blood Count - Requested, Rheumatoid Factor - Requested
04/05/2018	<u>Ms Shani Paulose at Dr Rai & Partners (18843)</u>
Examination	O/E - blood pressure Blood pressure reading 129/86 mm Hg
Comment	Bloods obtained as requested.
Test Request	Bone Profile - Completed, CRP - Completed, Urea and Electrolytes - Completed, Liver Function Tests - Completed, Full Blood Count - Completed, Rheumatoid Factor - Completed
29/05/2018	<u>Dr Arun Rai at Data Entry</u>
History	Copy of notes since 19/4/17 sent to court. In relation to last year's RTA.
01/06/2018	<u>Dr Arun Rai at Special Request</u>
History	citalopram, gabapentin
Comment	Citalopram request 2 weeks early.
Medication	Citalopram Hydrobromide Tablets 20 mg 56 TABLET ONE TO BE TAKEN EACH DAY Gabapentin Capsules 300 mg 100 CAPSULE ONE CAP TWICE DAILY
04/06/2018	<u>Ms Lynn Murray at Data Entry</u>
Comment	DNA appoint with GP - Angela sent DNA letter.
10/07/2018	<u>Ms Lynn Murray at Data Entry</u>
Comment	Script dated 01/06/18 for citalopram + gabapentin shredded and deleted as not collected.
20/08/2018	<u>Dr M S Hague at Dr Rai & Partners (18843)</u>
Problem	Feeling very depressed . Off citalopram since 5-6 weeks --stopped as he was getting diarrhoea all the time since he was taking citalopram but it was working well--mood was improving. Now wanted to try another antidepressant.
Examination	Patient health questionnaire (PHQ-9) score, 17 /27
Comment	Discussed and prescribed sertraline 50mg 1 tab dailyx56 and see in 5-6 weeks.
Medication	Sertraline Hydrochloride Tablets 50 mg 56 TABLET ONE TO BE TAKEN EACH DAY
Additional	Depression screening using questions
22/10/2018	<u>Dr M S Hague at Dr Rai & Partners (18843)</u>
Comment	SR--gabapentin and sertraline. Prescribed gabapentin 300mg 1 tab tidx100 and sertraline 50mg 1 tab dailyx56.

<u>29/10/2018 09:10</u>	<u>Dr Kate Makharoblidze at Dr Rai & Partners (18843)</u>
Additional	Seasonal influenza vaccination (Left arm) Batch NoRO4x Expiry 5/19
<u>29/01/2019 10:52</u>	<u>Dr Kate Makharoblidze at Dr Rai & Partners (18843)</u>
History	had dental extraction the day before yesterday, yesterday attended dentist again in pain asking for ABX and painkiller - was directed to GP??? the dental practice called and explained situation and informed that I am not happy to treat dental conditions - they offered an appointment to see the patient today...
<u>22/03/2019</u>	<u>Dr Arun Rai at Clinic</u>
History	Right hip pain back again, left leg pain also. No B/B symptoms. Power both legs ok.
Comment	Advised physio self referral again. Wants Med 3 for benefit office.
Medication	Naproxen Tablets 500 mg <i>56 tablet ONE TO BE TAKEN TWICE A DAY</i> Gabapentin Capsules 100 mg <i>98 capsule ONE BD 1 WEEK THEN TWO BD</i>
Additional	eMED3 (2010) new statement issued, not fit for work FitNote.pdf, (Diagnosis: Hip and Leg pain; Duration: 22/03/2019 - 19/04/2019)
<u>10/05/2019</u>	<u>Dr Arun Rai at Clinic</u>
History	Emergency appt: couple of months h/o right scrotal and groin pain on and off. No constipation. O/E no scrotal swelling, right testes normal size, retracted, epididymis tender. Wants inhaler also.
Comment	Treat as epididymitis. Come back if not resolved.
Medication	Ciprofloxacin Tablets 500 mg <i>20 tablet ONE TO BE TAKEN TWICE A DAY</i> Salbutamol Cfc-free inhaler 100 micrograms/puff <i>2 inhaler 2 PUFFS QID PRN</i>
<u>31/10/2019 11:21</u>	<u>Dr Kate Makharoblidze at Dr Rai & Partners (18843)</u>
History	Pleuritic pain in the right lower chest, cough. Also asking for flu immunisation - had this last year. Inhaler user, not requested this since May but states ended up having 4 inhalers as lost 2 and requested other 2 and then found the lost ones again, using them mostly for SOB on exertion PRN.
Examination	apyrexic, sats - 96%, chest - right basal few creps. No wheeze
Comment	will get ABX for LRTI, not for vaccination now, will come back once better.
Medication	Amoxicillin Capsules 500 mg <i>15 CAPSULE ONE TO BE TAKEN THREE TIMES A DAY FOR 5 DAYS</i> Salbutamol Cfc-free inhaler 100 micrograms/puff <i>2 inhaler 2 PUFFS QID PRN</i>
<u>11/02/2020</u>	<u>Dr M S Haque at Dr Rai & Partners (18843)</u>
Problem	C/C recurrence of back pain - had some gabapentin 300mg prescribed by Dr Rai in the past for backache which eased off pain but coming back now. Had NSAID.
Examination	Some tenderness on L/S spine and lower paraspinal muscle and both upper buttock. and some tenderness on right mid thoracic I/C muscles. Both SLR upto 100 degree. AB nad. Throat and chest clear.
Comment	Discussed and advised to attend physiotherapy. Prescribed naproxen 500mg 1 tab bdp as required and gabapentin 300mg 1 cap bdx56.
Medication	Naproxen Tablets 500 mg <i>28 TABLET ONE TO BE TAKEN TWICE A DAY</i> Gabapentin Capsules 300 mg <i>56 capsule 1 Cap BD</i>
<u>07/04/2020</u>	<u>Dr Arun Rai at Special Request</u>
History	gabapentin and naproxen to lloyds clan
Medication	Gabapentin Capsules 300 mg <i>56 capsule 1 Cap BD</i> Naproxen Tablets 500 mg <i>28 TABLET 1 Tab TWICE A DAY IF REQD</i>
<u>04/06/2020</u>	<u>Dr Arun Rai at Special Request</u>
History	gabapentin, naproxen, lloyds clan
<u>16/11/2020 18:33</u>	<u>Dr Kate Makharoblidze at Telephone Consultation</u>
History	Had a telephone appointment called twice, voice mail was on both times, saying the person was not available, message left.
<u>09/12/2020 09:21</u>	<u>Dr Eileen M Morley at Special Request</u>
Comment	Gabapentin & Naproxen (given omeprazole as gastroprotection), last U&Es N.
Medication	Naproxen Tablets 500 mg <i>28 TABLET 1 Tab TWICE A DAY IF REQD WITH FOOD AND TAKING AN OMEPRAZOLE TO PROTECT STOMACH</i> Gabapentin Capsules 300 mg <i>56 capsule 1 Cap BD</i> Omeprazole Capsules (Gastro-Resistant) 20 mg <i>56 CAPSULE ONE TO BE</i>

TAKEN EACH DAY

07/01/2021 10:13	<u>Dr Kate Makharoblidze at Dr Rai & Partners (18843)</u>
History	SR - Gabapentin and Naproxen
Medication	Gabapentin Capsules 300 mg 56 capsule 1 Cap BD Naproxen Tablets 500 mg 28 TABLET 1 Tab TWICE A DAY IF REQD WITH FOOD AND TAKING AN OMEPRAZOLE TO PROTECT STOMACH
18/01/2021 17:41	<u>Dr Kate Makharoblidze at Telephone Consultation</u>
History	About a week duration of left sided headache, few days later noticed the pain around the left ear and left eye as well, was shutting but this stopped, vision ok, hearing is ok, no rash/blisters around the ear or face. No eye watering, mild photophobia, no vomiting, at present the pain is constant and throbbing behind the left eye. Naproxen helped partially.
Comment	Sounds like Migraine, to have Paracetamol + Naproxen regular and Sumatriptan PRN, worsening statement given.
Medication	Paracetamol Tablets 500 mg 56 TABLET TWO TO BE TAKEN EVERY FOUR TO SIX HOURS WHEN REQUIRED (MAXIMUM OF 8 IN 24 HOURS) Sumatriptan Succinate Tablets 50 mg 18 tablet ONE TO BE TAKEN AT ONSET OF MIGRAINE; DOSE MAY BE REPEATED AT LEAST TWO HOURS LATER IF ATTACK RECURS

28/02/2022 16:45	<u>Dr Kate Makharoblidze at Telephone Consultation</u> Injured L ankle when plying football in November, attended A&E - no fracture was seen on Xray. On Gabapentin and Naproxen already for hip/ sciatica pain, this analgesia is not helping, works in COVID testing centre , needs to be on feet for long hours and this makes the pain worse, asking for sickline. Will speak to MSK specialist eMED3 (2010) new statement issued, not fit for work FitNote.pdf, (Diagnosis: Left ankle soft tissue injury; Duration: 28/02/2022 - 21/03/2022)
14/03/2022	<u>Mr Andrew McLafferty at Dr Rai & Partners (18843)</u> L ankle pain lateral > anterior and medial. Started 2/12 ago when playing football- inversion injury during tackle - twisting inwards when fell and impacting ankle. XR at A&E told no fracture. Constant pain. Aggs- stairs- acs= desc, walking (immed). Ease- painkillers (naproxen), elevate and rest. Sleep- wakens some nights- previously sleep more disturbed. Overall only 10-20 % better than previously. 24 hour- activity dep. Systemically well, no unexplained weight loss (13st est 5ft5), night sweats / fevers or lumps/bumps. Prev swollen but this has improved. Hx inversion injury when young and this feels the same and that took some time to improve. Works casual hours contract on feet cleaning or helping at events works- on feet a lot of the time. Activity- outwith work- also walking- prev 1.5 hour with dog; now much more limited. No regular football- first game in years. Smoker x 20/ day. No carer role. Ind all ADL- prev partner having to assist but now coping. No walking and and limp now resolved. Tel Ax. Able single leg heel raise- L 1/2 rom vs R. SLS unable L LL; SLS R able. OKC- Pf 1/2, Df advises fair rom, Inv 1/4 vs R, Ev able R and L (pain most notable ev, inv > Pf) Impression: subacute ankle inv injury- XR at A&E NBI- improving but slowly and keen for physio input. Poor ROM, strength and balance apparent on tel Ax. Red flags- trauma at onset but already XR. Note medial pain but much more lateral pain and note mechanism on injury- if doesn't progress might warrant consideration of further imaging via ortho re: ? syndesm injury. PPlan refer to msk urgent. Advised to re-attend if symptoms worsen, fail to improve or if has any other ongoing concerns. (NHS), , , , 8H...: Referral for further care (SCI Gateway Referral)
01/04/2022 Problem (FIRST) History Additional	<u>Dr Arun Rai at Data Entry</u> Ankle pain Med 3 today for 3 weeks , had gone back to work but ankle too sore. eMED3 (2010) new statement issued, not fit for work FitNote.pdf, (Diagnosis: Ankle pain; Duration: 01/04/2022 - 22/04/2022)

25/04/2022	<u>Dr Arun Rai at Data Entry</u> Sickline ran out Friday wants another 2 weeks. eMED3 (2010) new statement issued, not fit for work FitNote.pdf, (Diagnosis: Ankle Pain; Duration: 22/04/2022 - 09/05/2022)
24/08/2022	<u>Dr Arun Rai at Clinic</u> 1 week h/o productive cough, OTC not helped. Works as security guard at public events. Covid test today negative. Cigarette smoker, 20 Cigarettes/day Chest- bilat scattered crackles and wheeze L>R. Doxycycline Hyclate Capsules 100 mg 6 CAPSULE TWO TO BE TAKEN ON THE FIRST DAY THEN ONE TO BE TAKEN EACH DAY FOR 4 DAYS Prednisolone Tablets 5 mg 40 TABLET EIGHT TO BE TAKEN IN THE MORNING Smoking cessation advice

<u>29/08/2022</u>	<u>Dr Arun Rai at Special Request</u>
History	requesting more antibiotics and steroids has helped but not clear
Comment	If not resolved then F2F review will be required.
Medication	Prednisolone Tablets 5 mg 28 tablet FOUR TAB IN MORNING Doxycycline Hyclate Capsules 100 mg 8 capsule TWO TO BE TAKEN ON THE FIRST DAY THEN ONE TO BE TAKEN EACH DAY
<u>16/05/2023</u>	<u>Dr M S Haque at Dr Rai & Partners (18843)</u>
Problem	C/C coughing since a week with sore throat and spat out blood yesterday but no more today—added coughing out dirty phlegm—yellowish spits. Smokes 15–20 a day.
Medication	Amoxicillin Capsules 500 mg 21 capsule 1 CAP TID
Examination	Temp 36.8. P 100. BP 122/84. Oxygen sat 99%. Throat nad. HS both normal. Chest clear. AB nad.
Comment	Probable chest infection with haemoptysis ? cause. Prescribed amoxycillin 500mg 1 cap tid for a week and requested urgent CXR.
Test Request	XR Chest - Completed
<u>18/05/2023</u>	<u>Dr Arun Rai at Phone Encounter</u>
History	Message "coughing, taking panic attacks, sob - MOB". Still coughing fits with little spit, no haemoptysis, smokes 10-15/day. Last time steroid helped. To get CXR today.
Comment	will collect script.
Medication	Prednisolone Tablets 5 mg 30 tablet SIX TO BE TAKEN IN THE MORNING
<u>23/05/2023</u>	<u>at MJog</u>
Additional	SMS text sent to patient Type: Appointment Reminder Status: Message Delivered Message: Don't forget your appointment at 09:40 on Wednesday 24 of May at Dr Rai & Partners. Please call 0141 531 6464 if you can't attend or text CANCEL to 07903590756.
<u>23/05/2023</u>	<u>Dr M S Haque at Dr Rai & Partners (18843)</u>
Problem	Still coughing and getting panic attacks and tells me oral steroid given by Dr Rai helped his panic attacks but not cough/breathlessness and needs to continue steroid.—still smoking but less—may be 6-10 a day.
Examination	Temp 36.8. P 78. BP 160/71 ? Oxygen sat 98%.. Throat nad. Chest few exp wheeze in right lung. AB nad.
Comment	Probably smoking-related cough with wheeze. He has not been for CXR as yet—he was not feeling well and breathless—coughing etc etc but will go tomorrow with wife . I explained that steroid not for panic attacks it was for cough with wheeze and no need for further steroid. However I prescribed salbutamol inhaler—he used it before and knows the technique . However I offered Aerochamber but he preferred without it and advised to stop smoking completely.
Medication	Salbutamol Cfc-free inhaler 100 micrograms/puff 1 INHALER ONE OR TWO PUFFS TO BE INHALED WHEN REQUIRED UP TO FOUR TIMES A DAY
<u>24/05/2023</u>	<u>Ms Rene True at Dr Rai & Partners (18843)</u>
Problem	at
Comment	patient walked out swearing and calling me a waste of time , wife had taken his x ray form and I could not re print but if he had waited to see Mellisa she might have been able to re print this, Would not listen to what I was trying to tell him
<u>24/05/2023</u>	<u>Any Melissa Woolley at Dr Rai & Partners (18843)</u>
Comment	Patient left GP practise before being called to appointment. Was rude to reception staff as he had lost his Xray form.
<u>25/05/2023</u>	<u>Any Melissa Woolley at Dr Rai & Partners (18843)</u>
Comment	Routine bloods obtained as below.
Test Request	Glucose - Completed, Vitamin B12 - Completed, CRP - Completed, Urea and Electrolytes - Completed, Ferritin - Completed, Liver Function Tests - Completed, Lipid profile (inc. HDL) - Completed, Folate - Completed, Thyroid function tests - Completed, Full Blood Count - Completed
<u>25/05/2023</u>	<u>at MJog</u>
Additional	SMS text sent to patient Summary of text message sent to patient / Good Morning. Just to let you know we have a copy of the X-Ray request waiting at reception if you require it. If you want to re-book your bloods please call reception on 0141 531 6464. Thank You

<u>25/05/2023</u>	<u>Ms Lynn Murray at Dr Rai & Partners (18843)</u>
Comment	Reprinted X-Ray request due to patient's not having it.
Test Request	XR Chest - <i>Completed</i>
<u>30/05/2023</u>	<u>Dr M S Haque at Dr Rai & Partners (18843)</u>
Comment	RBS 12.3—probable Type 2 DM—had recent oral steroid—just to confirm would check fasting BS and HbA1c.

<u>19/06/2023</u>	<u>Dr M S Haque at Dr Rai & Partners (18843)</u>
Problem	Persistent high lipids and BS.
Comment	His cholesterol 7.4 triglyceride 6.6 and fasting BS 9 and HbA1c 64. I explained that he got type 2 DM and high lipids and he wanted to have medications for both DM and lipids. I discussed and prescribed atorvastatin 10mg daily to start with and put in repeat and metformin in acute till BS remained stable—1 tab daily for a week and then 1 tab bd and would repeat HbA1c and lipids in 2-3 months and dietary advice given. Requested for naproxen for joint pain-issued from repeat.
Medication	Metformin Hydrochloride Tablets 500 mg 112 tablet 1 TAB DAILY FOR A WEEK FOLLOWED BY 1 TAB BD Naproxen Tablets 500 mg 28 TABLET 1 Tab TWICE A DAY IF REQD WITH FOOD AND TAKING AN OMEPRAZOLE TO PROTECT STOMACH Atorvastatin Tablets 10 mg 56 TABLET ONE TO BE TAKEN EACH DAY
Test Request	Urea and Electrolytes - <i>Requested</i> , Liver Function Tests - <i>Requested</i> , Lipid profile (inc. HDL) - <i>Requested</i> , HbA1c - <i>Requested</i>
<u>09/12/2024</u>	<u>at MJog</u>

Additional	SMS text sent to patient Type: Appointment Reminder Status: Message Delivered Message: Don't forget your appointment at 10:30 on Friday 13 of December at Dr Rai & Partners. Please call 0141 531 6464 if you can't attend or text CANCEL to 07903590756.
<u>03/03/2025</u>	<u>Dr Arun Rai at Clinic</u>
Problem (FIRST)	Piles - haemorrhoids
History	4 days h/o PR blood mixed with stool. No constipation. Says bowel screening in Nov 24 was ok.

Examination	examined with his permission without chaperone. Clotted blood noted in anal area, poles at 9 O clock, tender, rectum empty, no lump.
Comment	Explained likely piles. If not resolved in 2 weeks come back. He is happy with plan.
Medication	Lactulose Solution 3.1-3.7 g/5 ml 300 ml 10 ML TWICE DAILY Scheriproct Ointment 30 GRAM APPLY SPARINGLY MORNING AND NIGHT AND AFTER EACH BOWEL MOVEMENT (MAX FOUR TIMES DAILY) FOR UP TO 7 DAYS
<u>28/07/2025</u>	<u>Dr Arun Rai at Dr Rai & Partners (18843)</u>
History	Message "severe cough ongoing - OTC meds not helped - MOB"
Comment	to be seen in afternoon F2F.
<u>05/09/2025</u>	<u>at MJog</u>
Additional	SMS text sent to patient Type: Appointment Reminder Status: Message Delivered Message: This is confirmation of your appointment at 11:10 on Mon, 08 of Sep at Dr Rai & Partners. If unable to attend please send CANCEL to 07903590756.
<u>05/09/2025</u>	<u>Dr Arun Rai at Special Request</u>
Problem (FIRST)	Type 2 diabetes mellitus
History	metformin
Comment	I see he was diagnosed with diabetes on 19/6/23, got one off metformin on acute. Needs to be discussed management on F2F consultation.
<u>07/09/2025</u>	<u>at MJog</u>
Additional	SMS text sent to patient Type: Appointment Reminder Status: Message Delivered Message: Don't forget your appointment at 11:10 on Monday 08 of September at Dr Rai & Partners. Please call 0141 531 6464 if you can't attend or text CANCEL to 07903590756.
<u>08/09/2025</u>	<u>Dr M S Haque at Dr Rai & Partners (18843)</u>
Comment	T/C He was diagnosed type 2 DM in June 23 and was prescribed metformin but he did not continue nor contacted us . Reason he stopped he had diarrhoea once but not very clear—very vague . However He wanted to try metformin again. I prescribed metformin and advised him to attend P/N for blood test HbA1c. I advised him to take metformin 500mg 1 tab daily for a week followed by 1 tab bd and would review in 4-6 weeks.
Medication	Metformin Hydrochloride Tablets 500 mg 112 tablet 1 TAB DAILY FOR A WEEK FOLLOWED BY 1 TAB BD
Test Request	HbA1c - Requested, Urea and Electrolytes - Requested, Liver Function Tests - Requested, Full Blood Count - Requested

Dear Doctor,

James M McLean; D.O.B: 08/11/1962; CHI: 0811626156
19 BRUNSWICK HOUSE, Clydebank, G81 4QH

GP Action Required: None

Presenting Condition: left buttock and leg pain

Physiotherapy Comments:

Onset of symptoms - 4 month ago as of 26/04/18

Mechanism of onset - insidious, first felt when walking.

Diagnosis - ?Lumbar stenosis with radicular pain ? Changing presentation

Treatment - lumbar flexion based exercises, ie. pelvic tilts, stationary bike, knee tucks)

Discharge Outcome:

James attended 3 appointments at the physiotherapy department and symptoms seemed to be unchanged throughout the appointments. His dermatomes, myotomes and reflexes were normal. His lumbar movements were normal with some back pain at end of range. His hip range of motion was relatively normal with some pain and tightness on lateral and medial rotation. His hip power was normal right to left. Flexion based exercises for the low back seemed to reduce his symptoms at the time of assessments but he unfortunately failed to attend with no further contact on his last appointment.

McLean James M

Additional	Depression interim review

02/03/2016	<u>Dr Margaret Dawson at Easterhouse Health Centre</u>
Problem (REVIEW)	Anxiety with depression
History	Saw previous GP in May 15 with symptoms of depression. See old GP notes. Started on sertraline and was reviewed in the July but did not return after that. Previous episode 20y earlier, took o/dose at that time. Marriage ended in Nov 15 and daughter died aged 23y of brain tumour in Jan. Feels no longer tearful but mood can be up and down, sometimes on top of the world and sometimes very low. Has 11 year old son and gets quite irritable with him. Has been looking for work but struggling and says advisors felt he wasn't in the right frame of mind to look for work. Agreed sick line for now and mentioned possibility of cruise but still too early for counselling.
Additional	eMED3 (2010) new statement issued, not fit for work FitNote.pdf, (Diagnosis: Anxiety with depression; bereavement; Duration: 02/03/2016 - 30/03/2016)

Problem (FIRST)	Abdominal pain
History	Longstanding abdo pain RIF. Worried he has a hernia there. Saw previous GP about it last year, advised muscular but still anxious and does not believe this. Muscles go into a tight knot and feels like there is a lump there
Examination	o/e abdo soft, non tender, no masses, bowel sounds normal, no hernia detected
Comment	for USS

Medication	Sertraline Hydrochloride Tablets 100 mg 28 TABLET 1 DAILY Salbutamol Accuhaler 200 micrograms/dose 1 INHALER ONE PUFF TO BE INHALED TWICE A DAY
Additional	Depression interim review
History	see recent admission and cxr results- discussed with him rptng cxr at some point in next week or 2 - forms given. he also asked for an inhalers- gets sob when exerting himself, also some chronic sputum production especially when walking. ?copd rather than asthma, especially given smoking hx
Comment	rpt cxr, spirometry
<u>10/06/2015</u>	<u>Dr Heather A Haywood at Docman</u>
Problem	See letter re CXR - discuss at next appt
<u>25/05/2015</u>	<u>Dr Heather A Haywood at CAMELON MEDICAL PRACTICE</u>
Problem (FIRST)	[X]Depression NOS
History	Had episode 20yrs ago - took OD Now some r'ship probs Has been low / tearful / sleeping+++ 4/52 Managing work as security but tired++ has had thoughts of self harm but says wouldn't do anything See recent discharge from last week with chest pains
Comment	Discussed home situation Start Px review 3/52
Medication	Sertraline Hydrochloride Tablets 100 mg 28 TABLET 1 DAILY
<u>03/07/2014</u>	<u>Dr Heather A Haywood at CAMELON MEDICAL PRACTICE</u>
Problem	Probable surgical hernia
History	Been at OOH with ?hernia & chest infection
Examination	Chest clear Still has cough Abdo soft Nil on lying On standing has palpable tightened area inf to chole scar ?hernia but not too troublesome at present
Comment	Symps may settle with treatment of chest consider SOPD referral if ongoing probs
<u>14/05/2013</u>	<u>Mrs Anne Hamilton at CAMELON MEDICAL PRACTICE</u>
Examination	Blood pressure reading 141/84 mm Hg pulse 95 O/E - height, 162 cm O/E - weight, 90 Kg Body Mass Index, 34.29
Social	Aerobic exercise 3+ times/week Alcohol consumption, 0 units/week Current smoker
Comment	Bp, bloods to lab as requested (fasted), urine - NAD, sent for C&S.
Result	Urine blood test = negative Urine glucose test negative Urine protein test negative
Test Request	U and E, PSA, Glucose
Additional	Health ed. - alcohol Health ed. - diet Health ed. - exercise Smoking cessation advice
<u>07/05/2013</u>	<u>Dr Kirsten Glen at CAMELON MEDICAL PRACTICE</u>
History	polyuria - some thirst Urge - urine stronger FH type 2 DM Suggest MSSU and urianlysis then check fasting bloods - check BP then also Advice re PSA testing
Result	"polyuria"
Test Request	U and E, Glucose, PSA, Urine
<u>02/07/2012</u>	<u>Dr Heather A Haywood at CAMELON MEDICAL PRACTICE</u>
Problem (FIRST)	Respiratory tract infection
History	Prod cough >1/52 SoB++ Recently reduced cigs to 4/day
Examination	Good AE Widesprad creps
Social	Thinking about stopping smoking

Medication	Current smoker Amoxicillin Capsules 500 mg 21 CAPSULE ONE TO BE TAKEN THREE TIMES A DAY
Additional	Health ed. - smoking Smoking cessation advice
12/09/2011	<u>Dr Paul Lim at CAMELON MEDICAL PRACTICE</u>
Problem (FIRST)	Upper respiratory tract infection NOS
History	Wheezing (Frequent) chesty and
Social	Smoker 20 Cigarettes/day
	Health ed. - smoking
Comment	Self care advice and SCC line in 1/52 if need
Medication	Amoxicillin Capsules 250 mg 21 CAPSULE ONE TO BE TAKEN THREE TIMES A DAY Salbutamol Accuhaler 200 micrograms/dose 1 INHALER ONE PUFF TO BE INHALED TWICE A DAY

Patient : James Mclean**Case No 85751****(Gender: Male) (DOB: 08/11/1962) (Age: 51 years) (CHI: 0811626156)****History**

Seen and examined and notes lost due to a computer malfunction so reconstructed, patient reporting wheezing, his mother died aged 31 from a lung condition presumed asthma and father died of lung cancer, he was alarmed today when NHS24 operator suggested he get abdomen examined as he could have cancer (when he complained of a lump) Smokes. Scar has variable lumpiness.

Examination

Probable incisional reducible hernia or lymph lump large scar of cholecystectomy.

ASSESSMENT

Oxygen saturation % 98.0
Systolic BP mmHg 131
Pulse bpm 88
Temperature C 37.1
Diastolic BP mmHg 82

ASTHMA ASSESSMENT CARE BUNDLE

Normal respiration
Rate of respiration 20

Diagnosis

Asthma and tracheobronchitis.
Incisional hernia

Treatment

Meds issue are aerochamber, salbutamol, steroids pred 5mg x 40 30mg daily amoxicillin see meds and to repay wife who gave Solpadol from her supply advised to contact again if worsens or not resolving advised to contact own GP if not resolving and get GP to arrange surgical follow up of lumpy sore scar tissue

Clinical Code(s)

H06.. Acute bronchitis/bronchiolitis
1737. Wheezing

Prescriptions

Aerochamber Plus spacer/holding chamber device [GLAXSK PHA]
duplicate 1.00
amoxicillin capsules 500mg one three times a day duplicate 21.00
salbutamol Inhaler cfc-free 100micrograms/actuation TWO puffs to be inhaled as directed or double by space duplicate 1.00
prednisolone tablets 5mg Take six tablets ONCE a day duplicate 40.00
co-codamol (codeine and paracetamol) tablets 30mg + 500mg Take ONE to TWO tablets every FOUR to SIX hours as required for pain relief duplicate 30.00

Informational Outcome(s)

Follow-up required by own GP - re effects of treatment and care of hernia

Dear Dr Nelson

JAMES MCLEAN (D.O.B. 08.11.62)
34 Fairlie Drive, Camelon

Diagnosis: Radial styloid fracture left wrist.

Outcome: Lightweight forearm cast. Remove in five weeks with mobilisation.

This 48 year old left-hand dominant security guard had a hyperextension injury when a football struck his wrist three days ago. He is otherwise fit and well.

Examination out of the backslab today shows he is bruised, swollen and tender over the distal radius. There are no particular signs of scaphoid tenderness. He is neurovascularly intact. There are no other injuries detected in the upper limbs.

X-rays show an undisplaced radial styloid fracture. I have explained the nature of these injuries to him, advised that we will place him into plaster for five weeks and will remove this just prior to his holiday abroad on 12 August. He understands it will be several weeks/months after his plaster is removed until his wrist becomes normal but this is to be expected.

Yours sincerely

Diagnosis/Problem List

J661. - Cholangitis

Additional comment (Progress, Investigations, Procedures, Complications etc)

Dear Doctor,

Mr James McLean (08/11/62) was admitted to SRI 18/10/10 with a 4 day history of LUQ pain radiating through to his back. Associated vomiting x2. No diarrhoea. No urinary symptoms.

He described the pain as "severe crampy" pain not relieved by oral analgesics. Exacerbated by lying flat. Unable to sleep due to pain. Reduced appetite. Last moved bowels on Saturday - normal movement. Recent discharge 15/10/10 with ?gallstones.

O/E

Tender LUQ with guarding. BS present. Not peritonitic.

AUSS - calculus in gallbladder neck. Mild oedema of gallbladder wall. Fatty liver change. Normal pancreas, spleen and kidneys. Increased WCC and CRP. Pyrexia. He was therefore commenced on IV antibiotics. He was reviewed over the next couple days but as his condition was not improving he was taken to theatre.

Pre-op: Informed consent was gained.

Op: Cholecystectomy 21/10/10 under general anaesthetic. Trial dissection but anatomy impossible to distinguish so conversion to open procedure with Kocher incision. Stone impacted in cystic duct removed. Total cholecystectomy performed in view of gangrene.

Post-op: He returned to the ward where he was given a PCA for analgesia control for 24 hours. He was encouraged to mobilise as able and eat and drink as normal. His observations improved and as his WCC and CRP were decreasing he was discharged 24/10/10. Pain settled on discharged. Antibiotics stopped.

Not for formal follow-up.

Dear Sirs,

James McLean (dob 08.11.62)
5 B Howcraigs Court, Clydebank

Thank you for your letter dated 10th September 1998. I have seen Mr. McLean since 1994 when it was found he suffered from various psychiatric problems. He had episodes of depression, anxiety and agitated states. I have been treating him particularly with antidepressants and also mild tranquillisers to tide him over acute situations.

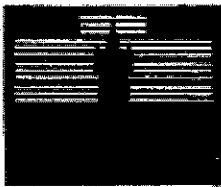

He has in the past taken overdoses. On the 14th February 1987 he overdosed on Ponstan and again on 31st August 1994 he overdosed, this time on Amitriptyline which he had been taking to treat his depression. He was seen by Dr. McAteer, Psychiatrist, at Gartnavel Royal Hospital in September 1994 who diagnosed him to be suffering from reactive depression due to his family problems. His Amitriptyline was stopped and he was kept under observation.

He attended me in March 1998 complaining of feelings of anxiety and was very restless when he talked to me. He also mentioned he was having panic attacks but did not have any suicidal intentions. I started him on Prozac 20mg daily. He saw me again on 16th April, 24th April and 22nd May 1998 with different ailments along with anxiety but he mentioned he was feeling better with Prozac which he is continuing.

I trust this information is sufficient for your requirements but if I can be of further assistance, please do not hesitate to contact me again.

Yours sincerely,

M.S. Haque
General Practitioner.

Dear Dr Haque

Hospital No : 411527 DoB : 08-Nov-1962
James McLean, 4C Dalmuir Court, CLYDEBANK, G81 4AA

Your patient attended for investigation of dyspepsia today and agreed to enter the NHS Executive study comparing breath test and endoscopy. They were randomised to the breath test for H pylori infection which was positive.

It was explained to him/her that their symptoms may be related to this infection and have therefore been given a course of H pylori eradication therapy consisting of :-

Omeprazole 20 mg bd, Amoxycillin 500 mg tid and Clarithromycin 250 mg tid for 1 week.

If the symptoms persist following this treatment, then it is possible that the infection has not been eradicated or that the symptoms are unrelated to the infection and due to reflux disease, non-ulcer dyspepsia, or some non-gastric condition.

If you wish to check that the infection has been eradicated by means of a breath test, or wish to have an endoscopy examination in the future, then these tests will be provided to this patient on an Open Access basis by telephoning Mrs Anthea Dickson on 0141-211-3261.

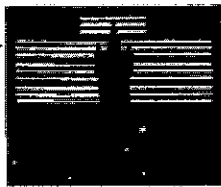

No routine hospital follow-up has been arranged though we will see the patient in one year to assess his/her outcome.

Yours sincerely

Dear Dr Haque

JAMES McLEAN DOB 8.11.62 411527
14 Myrtle Road Clydebank G81 3AG

Thank you for asking me to see this gentleman who has been troubled with epigastric pain for several years. It is increased by fatty or spicy foods. He smokes twenty cigarettes per day but does not take much alcohol. His father had a duodenal ulcer.

I believe he was given a course of triple therapy but this has not improved his symptoms.

Examination was normal.

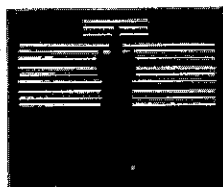

I am arranging for him to attend our Dyspepsia Unit in two weeks' time when he will have either a breath test for H Pylori or an endoscopy. He then be given the appropriate treatment.

Yours sincerely

A handwritten signature in dark ink, appearing to be 'KEM' or similar, written over the typed name.

Dear Mr McLean

Hospital No : 411527 DoB : 08-Nov-1962

Your general practitioner has referred you to the Gastrointestinal Unit at Gartnavel General Hospital for investigation of the cause of your upper gastrointestinal symptoms.

Recent research indicates that a simple non-invasive breath test for H pylori infection may be a more appropriate test than an endoscope examination for investigating your condition. In order to be sure whether this is the case the NHS Executive is mounting a study based in our Unit in Glasgow. This will involve patients, like yourself, being invited to be randomised to either the routine endoscopy or to the breath test and the benefits of the two investigations assessed one year later.

You will be interviewed by a specialist doctor in Gastroenterology and, if appropriate, will be invited to enter the study comparing the benefits of the different investigational approaches.

Following this single attendance, your further management will be by your general practitioner. However, in order to assess the benefits of the two investigations, we will arrange to see you on one further occasion one year later.

In preparation for these tests you may be asked to stop your medication for your stomach for 2 weeks prior to your appointment.

We appreciate your willingness to co-operate in this research which is aimed at improving the quality of the investigation of your condition.

Yours sincerely

Alison Dickey

CASE SUMMARY

Dictated 2.9.94
Typed 12.9.94

Dr Rahman
Clydebank Health Centre
Kilbowie Road
Clydebank
G81 2TQ

Dear Dr Rahman,

This 31 year old gentleman was admitted to the Acute Medical Receiving Unit on 31 August under the care of Professor Connell. He had taken 9 Amitryptiline 25mg tablets 2 hours prior to admission, and had presented to A & E with a reduced conscious level. He is normally fit and healthy, and had taken the tablets as a reaction to a domestic argument. He is currently on no other medication.

On admission he had a Glasgow coma scale of 5, and pupils were equal and reactive to light. There was no evidence of neck stiffness, and no extra signs of head injury. Plantars were downgoing, and reflexes were normal. There were no focal neurological signs, and a gag reflex was present.

Examination of the chest revealed it to be clear, and the abdomen was likewise unremarkable. Heart sounds were pure, and a blood pressure was recorded at 165/90. He was tachycardiac (130 per minute).

Mr McLean was admitted to the ward, where he remained stable overnight. In the morning he was alert, and there was no deterioration in his neuro observations. Routine blood tests were normal, and Paracetamol and salicylate were not detected. Mr McLean was seen by the psychiatrist who felt that he was fit to go home and he was discharged on 1 September with no arrangements for follow up.

No discharge medications were prescribed.

Yours sincerely

Scott Morris

SECRETARY 041.211.3703

Dr. A. Rahman,
Clydebank Health Centre,
Kilbowie Road,
CLYDEBANK,
Glasgow G81.

Dear Dr. Rahman,

JAMES MCLEAN (d.o.b. 8/11/52)
9 GRAHAM AVENUE, CLYDEBANK, GLASGOW G81.
HOSPITAL NUMBER : 020164

I reviewed this 32 year old man when he was admitted to the Western following an overdose of 8-9 tablets of 25 mg Amitriptyline. He split up with his wife in May and they have been briefly reconciled. She has been nagging him and threatening to leave with both her children. He took the Amitriptyline in front of her on impulse, and feeling drowsy called for an ambulance himself. He is relieved he is still alive especially for the sake of the children.

He has been on Amitriptyline since May for what sounds like reactive depression. It has had no effect so I suggest stopping it in the future. He appears to have a reactive depression due to his family problems and currently has no suicidal intent. We are discharging him back to your care but will of course see him in Gartnavel Royal in the future if you feel this necessary.

Yours sincerely,

Hemcater.

H. MCATEER,
SHO TO DR. WATT.

Dear Dr Rahman

James McLean Date of Birth 8/11/62
2 Brunswick House Mountblow Clydebank

This gentleman attended the Accident & Emergency Department of the Western Infirmary on 6 May having sustained a hyperextension injury to his left middle and ring fingers. He was bruised and swollen over the volar aspect of the PIP joint and X-rays showed a minor volar plate fracture.

At review today, he is still tender over the fracture site but has a good range of movement. I have replaced the garter strapping and will review him in a week having advised him to commence mobilisation.

Yours sincerely

CASE SUMMARY

Dr N C Jain
Health Centre
Kilbowie Road
Clydebank

Dear Dr Jain

This patient was admitted from the Accident & Emergency Department with a history of having taken a significant overdose of Ponstan tablets along with some antibiotics. This was apparently precipitated by an argument with his girlfriend.

Past medical history - nil significant.

Medications on admission - nil.

He is presently unemployed and lives with his father. He smokes and drinks moderately.

On examination was stuporous and non-responsive. There was no cyanosis or clubbing. Pulse was 108 per minute and regular, heart sounds were normal and the chest was clear. Abdominal examination was unremarkable. Neurological system showed a very restless person thrashing his arms and legs in the air with some generalised convulsions. He was sedated with iv Diazepam. Gastric lavage was not possible.

He was admitted to the ward for observation. He remained well, observations were normal, and urine was clear for blood and protein. Investigations showed a slightly raised creatinine and some rise in transaminases.

He was very well the following day and keen to go home. He was therefore discharged and advised to return to Gartnavel General Hospital for a repeat biochemistry profile. In any case, it would be reasonable to repeat his biochemistry in a week to ten days time. No further followup is necessary. Medication on discharge was nil.

Yours sincerely
