Administration (P3)	SMS text message sent to patient Dear Patient Due to GP absence, we are only able to offer emergency appointments over the next few weeks. If you already have an appointment and have not heard from us, then you should still attend. Thank you Overtoun Medical Practice {Patient Group All 010426}	

08-Jun-2026 Ms Megan Irwin Administration

Examination	O/E - blood pressure reading	130 / 87 mm Hg
Administration (P3)	Consultation Routine smear (overdue). LMP - 16 years ago . No bleeding since. No post coital bleeding. No abnormal discharge. External exam normal and cervix normal. Sample obtained and sent to lab. Aware of results process. Mammograms up to date. Is breast aware.	
Diagnosis (P3)	Chronic obstructive pulmonary disease annual review On Proxor - 2 puffs morning. Uses salbutamol when required. Has started using salbutamol more the last 2 weeks. Almost taking due to feeling slightly sob. Heavy smoker - encouraged to reduce. Does have a cough most days. Clear phlegm on occasion. Given the use of salbutamol has increased, advised to increase Proxor to 2 puffs bd as prescribed. Does not rinse mouth after use - advised to do this to prevent oral thrush. CAT score - 10.	
Examination	Cigarette smoker	20 / / cigarettes / cigars / tobacco
Examination	Smoking cessation advice	/ / cigarettes / cigars / tobacco

Examination	Serum urea level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	3.6 mmol/L
Examination	Total white blood count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	5.1
Examination	Total white blood count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	5.1
Examination	Total white blood count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	5.1

Examination	Percentage lymphocytes SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	1.3
Examination	Percentage lymphocytes SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	1.3
Examination	Percentage lymphocytes SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	1.3
Examination	Plasma glucose level SPECIMEN ID: 4097649250SPECIMEN TYPE: Flu ox	**6.3 mmol/L**
Examination	Plasma glucose level SPECIMEN ID: 4097649250SPECIMEN TYPE: Flu ox	**6.3 mmol/L**
Examination	Plasma glucose level SPECIMEN ID: 4097649250SPECIMEN TYPE: Flu ox	**6.3 mmol/L**
Examination	Serum amylase level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	**145 U/L**
Examination	Serum amylase level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	**145 U/L**
Examination	Haemoglobin A1c level - IFCC standardised SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	36 mmol/mol
Examination	Haemoglobin A1c level - IFCC standardised SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	36 mmol/mol
Examination	Haemoglobin A1c level - IFCC standardised SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	36 mmol/mol
Examination	Haematocrit SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	0.391 L/L
Examination	Haematocrit SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	0.391 L/L
Examination	Haematocrit SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	0.391 L/L
Examination	Basophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	0
Examination	Basophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	0
Examination	Basophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	0
Examination	Red blood cell distribution width SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	13.4 %
Examination	Red blood cell distribution width SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	13.4 %
Examination	Red blood cell distribution width SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	13.4 %
Examination	Differential whitecell count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	
Examination	Differential whitecell count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	
Examination	Differential whitecell count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	
Examination	Free T4 level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	17.7 pmol/L
Diagnosis (P3)	took a dozen of trazodone and 10 mirtazpaine with a bottle of red wine in an effort ***** - triggered by website called redress which deals with past childhood ***** - her memories of grew up at children home when she was from 14 to 16 - the horrible memories of ***** which prompted this - now angry - angry at herself - crying through the consult - has a friend who is around - no more alcohol since this episode - woke up on friday afternoon in her soiled in her poo and vomit - has clenaed herelf up and has had something to eat and drink since - not sure what she wants - no longer ***** - definitely	
Diagnosis (P3)	needs seen and bloods done and a chat - not suicidal at the moment just angry she did this - can come this PM with a friend - arranged f2F and bloods	
Administration (P3)	Comment note	
Diagnosis	(Non Coded Event - Plasma glucose level) Specimen Id: 4097649250Specimen Type: Flu oxNumber of Test(s): 1Lab comment: od|Reviewer comment: high (SK)Abnormal/Normal Flag: Abnormal	
Diagnosis	(Non Coded Event - Haemoglobin A1c level - IFCC standardised) Specimen Id: 4097649250Specimen Type: EDTANumber of Test(s): 1Lab comment: od|Reviewer comment: Normal (SK)Abnormal/Normal Flag:	
Diagnosis	(Non Coded Event - Full blood count - FBC) Specimen Id: 4097649250Specimen Type: EDTANumber of Test(s): 15Lab comment: od|Reviewer comment: Normal (SK)Abnormal/Normal Flag: Abnormal

Examination	GFR calculated abbreviated MDRD SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum> 59		
Examination	GFR calculated abbreviated MDRD SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum> 59		
Examination	**Serum albumin**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum: Serum albumin SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	44 g/L	(Range: 35 - 50)
Examination	**Serum albumin**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum: Serum albumin SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	44 g/L	(Range: 35 - 50)
Examination	**Serum albumin**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum: Serum albumin SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	44 g/L	(Range: 35 - 50)
Examination	**Serum albumin**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum: Serum albumin SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	44 g/L	(Range: 35 - 50)
Examination	**Serum alkaline phosphatase**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum: Serum alkaline phosphatase SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	96 U/L	(Range: 30 - 130)

Examination **Serum alkaline phosphatase**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum alkaline phosphatase SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 96 U/L (Range: 30 - 130)

Examination **serum alanine aminotransferase level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
serum alanine aminotransferase level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 15 U/L (Range: 5 - 55)

Examination **serum alanine aminotransferase level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
serum alanine aminotransferase level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 15 U/L (Range: 5 - 55)

Examination **Serum vitamin B12**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum vitamin B12 SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 269 pg/mL (Range: 197 - 771)

Examination **Serum bilirubin level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum bilirubin level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 3 umol/L (No range available)

Examination **Serum bilirubin level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum bilirubin level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 3 umol/L (No range available)

Examination **Corrected serum calcium level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Corrected serum calcium level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 2.35 mmol/L (Range: 2.2 - 2.6)

Examination **Corrected serum calcium level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Corrected serum calcium level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 2.35 mmol/L (Range: 2.2 - 2.6)

Examination **Serum chloride**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum chloride SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 102 mmol/L (Range: 95 - 108)

Examination **Serum chloride**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum chloride SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 102 mmol/L (Range: 95 - 108)

Examination **Serum creatinine**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum creatinine SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 65 umol/L (Range: 60 - 110)

Examination **Serum creatinine**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum creatinine SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 65 umol/L (Range: 60 - 110)

Examination **Eosinophil count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Eosinophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 0.1 (No range available)

Examination **Eosinophil count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Eosinophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 0.1 (No range available)

Examination **Eosinophil count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Eosinophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 0.1 (No range available)

Examination **Serum folate**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum: **Abnormal**
Serum folate SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum **2.27 ng/mL** **(Range: 3.9 - 26.8)**

Examination **Serum gamma-glutamyl transferase level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum gamma-glutamyl transferase level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 19 U/L (No range available)

Examination **Haemoglobin estimation**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Haemoglobin estimation SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 130 g/L (Range: 115 - 165)

Examination **Haemoglobin estimation**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Haemoglobin estimation SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 130 g/L (Range: 115 - 165)

Examination **Haemoglobin estimation**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Haemoglobin estimation SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 130 g/L (Range: 115 - 165)

Examination **Serum lactate dehydrogenase level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum lactate dehydrogenase level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 203 U/L (No range available)

Examination **Serum lactate dehydrogenase level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum lactate dehydrogenase level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 203 U/L (No range available)

Examination **Mean corpusc. haemoglobin(MCH)**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: **Abnormal**
Mean corpusc. haemoglobin(MCH) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA **35.4 pg** **(Range: 27 - 32)**

Examination **Mean corpusc. haemoglobin(MCH)**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: **Abnormal**
Mean corpusc. haemoglobin(MCH) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA **35.4 pg** **(Range: 27 - 32)**

Examination **Mean corpusc. haemoglobin(MCH)**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: **Abnormal**
Mean corpusc. haemoglobin(MCH) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA **35.4 pg** **(Range: 27 - 32)**

Examination **Mean corpusc. Hb. conc. (MCHC)**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Mean corpusc. Hb. conc. (MCHC) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 332 g/L (Range: 320 - 360)

Examination **Mean corpusc. Hb. conc. (MCHC)**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Mean corpusc. Hb. conc. (MCHC) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 332 g/L (Range: 320 - 360)

Examination **Mean corpusc. Hb. conc. (MCHC)**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Mean corpusc. Hb. conc. (MCHC) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 332 g/L (Range: 320 - 360)

Examination **Mean corpuscular volume (MCV)**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: **Abnormal**
Mean corpuscular volume (MCV) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA **106.5 fL** **(Range: 80 - 100)**

Examination **Mean corpuscular volume (MCV)**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: **Abnormal**
Mean corpuscular volume (MCV) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA **106.5 fL** **(Range: 80 - 100)**

Examination **Mean corpuscular volume (MCV)**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: **Abnormal**
Mean corpuscular volume (MCV) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA **106.5 fL** **(Range: 80 - 100)**

Examination **Monocyte count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Monocyte count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 0.3 (Range: 0.2 - 0.8)

Examination **Monocyte count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Monocyte count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 0.3 (Range: 0.2 - 0.8)

Examination **Monocyte count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Monocyte count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 0.3 (Range: 0.2 - 0.8)

Examination **Neutrophil count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Neutrophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 3.4 (Range: 2 - 7.5)

Examination **Neutrophil count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Neutrophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 3.4 (Range: 2 - 7.5)

Examination **Neutrophil count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Neutrophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 3.4 (Range: 2 - 7.5)

Examination **Platelet count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Platelet count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 230 (Range: 140 - 450)

Examination **Platelet count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Platelet count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 230 (Range: 140 - 450)

Examination **Platelet count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Platelet count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 230 (Range: 140 - 450)

Examination **Serum potassium**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum potassium SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 4.2 mmol/L (Range: 3.5 - 5.3)

Examination **Serum potassium**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum potassium SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 4.2 mmol/L (Range: 3.5 - 5.3)

Examination **Red blood cell (RBC) count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: **Abnormal**
Red blood cell (RBC) count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA **3.67** **(Range: 3.9 - 5.6)**

Examination **Red blood cell (RBC) count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: **Abnormal**
Red blood cell (RBC) count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA **3.67** **(Range: 3.9 - 5.6)**

Examination **Red blood cell (RBC) count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: **Abnormal**
Red blood cell (RBC) count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA **3.67** **(Range: 3.9 - 5.6)**

Examination **Serum sodium**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum sodium SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 139 mmol/L (Range: 133 - 146)

Examination **Serum sodium**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum sodium SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 139 mmol/L (Range: 133 - 146)

Examination **Serum TSH level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum TSH level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 1.81 mU/L (Range: 0.27 - 4.2)

Examination **Serum urea level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum urea level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 3.6 mmol/L (Range: 2.5 - 7.8)

Examination **Serum urea level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum:
Serum urea level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 3.6 mmol/L (Range: 2.5 - 7.8)

Examination **Total white blood count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Total white blood count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 5.1 (Range: 4 - 11)

Examination **Total white blood count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Total white blood count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 5.1 (Range: 4 - 11)

Examination **Total white blood count**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Total white blood count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 5.1 (Range: 4 - 11)

Examination **Percentage lymphocytes**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Percentage lymphocytes SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 1.3 (Range: 1 - 4)

Examination **Percentage lymphocytes**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Percentage lymphocytes SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 1.3 (Range: 1 - 4)

Examination **Percentage lymphocytes**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA:
Percentage lymphocytes SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 1.3 (Range: 1 - 4)

Examination **Plasma glucose level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Flu ox: **Abnormal**
Plasma glucose level SPECIMEN ID: 4097649250SPECIMEN TYPE: Flu ox **6.3 mmol/L** **(Range: 3 - 6)**

Examination	**Plasma glucose level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Flu ox: **Abnormal** Plasma glucose level SPECIMEN ID: 4097649250SPECIMEN TYPE: Flu ox	**6.3 mmol/L**	**(Range: 3 - 6)**
Examination	**Plasma glucose level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Flu ox: **Abnormal** Plasma glucose level SPECIMEN ID: 4097649250SPECIMEN TYPE: Flu ox	**6.3 mmol/L**	**(Range: 3 - 6)**
Examination	**Serum amylase level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum: **Abnormal** Serum amylase level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	**145 U/L**	**(No range available)**
Examination	**Serum amylase level**SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum: **Abnormal** Serum amylase level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	**145 U/L**	**(No range available)**
Examination	**Haemoglobin A1c level - IFCC standardised**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: Haemoglobin A1c level - IFCC standardised SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	36 mmol/mol	(Range: 20 - 42)
Examination	**Haemoglobin A1c level - IFCC standardised**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: Haemoglobin A1c level - IFCC standardised SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	36 mmol/mol	(Range: 20 - 42)
Examination	**Haemoglobin A1c level - IFCC standardised**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: Haemoglobin A1c level - IFCC standardised SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	36 mmol/mol	(Range: 20 - 42)
Examination	**Haematocrit**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: Haematocrit SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	0.391 L/L	(Range: 0.37 - 0.47)
Examination	**Haematocrit**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: Haematocrit SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	0.391 L/L	(Range: 0.37 - 0.47)
Examination	**Haematocrit**SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA: Haematocrit SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	0.391 L/L	(Range: 0.37 - 0.47)

Examination	Serum albumin SPECIMEN ID: 3037093042SPECIMEN TYPE: Serum	43 g/L
Examination	Corrected serum calcium level SPECIMEN ID: 3037093042SPECIMEN TYPE: Serum	2.46 mmol/L
Examination	Serum chloride SPECIMEN ID: 3037093042SPECIMEN TYPE: Serum	102 mmol/L
Examination	Serum creatinine SPECIMEN ID: 3037093042SPECIMEN TYPE: Serum	62 umol/L
Examination	Eosinophil count SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	0.1
Examination	Haemoglobin estimation SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	125 g/L
Examination	Mean corpusc. haemoglobin(MCH) SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	35.4 pg
Examination	Mean corpusc. Hb. conc. (MCHC) SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	326 g/L
Examination	Mean corpuscular volume (MCV) SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	108.5 fL
Examination	Monocyte count SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	0.3
Examination	Neutrophil count SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	2.9
Examination	Platelet count SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	242
Examination	Serum potassium SPECIMEN ID: 3037093042SPECIMEN TYPE: Serum	5 mmol/L
Examination	Red blood cell (RBC) count SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	3.53
Examination	Serum sodium SPECIMEN ID: 3037093042SPECIMEN TYPE: Serum	139 mmol/L

Examination	Serum TSH level SPECIMEN ID: 3037093042SPECIMEN TYPE: Serum	0.82 mU/L	
Examination	Serum urea level SPECIMEN ID: 3037093042SPECIMEN TYPE: Serum	2.9 mmol/L	
Examination	Total white blood count SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	4.5	
Examination	Percentage lymphocytes SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	1.2	
Examination	Erythrocyte sedimentation rate SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	9	
Examination	Haematocrit SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	0.383 L/L	
Examination	Basophil count SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	0	
Examination	Red blood cell distribution width SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA	14.7 %	
Examination	Differential whitecell count SPECIMEN ID: 3037093042SPECIMEN TYPE: EDTA		
Examination	O/E - blood pressure reading P 72 no ankle oedema -	135 / 75 mm Hg	
Examination	Free T4 level SPECIMEN ID: 3037093042SPECIMEN TYPE: Serum	14.6 pmol/L	
Diagnosis (P3)	Puffy eyelids		
Diagnosis (P3)	also having urinary s/s - urgency and freq last few days - puffy lids since 3/7 - nil else- eyes are ok - no itchy - the puffyness improves as day progress -		
Diagnosis (P3)	get bloods and see WSG		
Examination (P3)	O/E - blood pressure reading baggy eye lids - nil else -		
Diagnosis	(Non Coded Event - Erythrocyte sedimentation rate) Specimen Id: 3037093042Specimen Type: EDTANumber of Test(s): 1Lab comment: follow up on mild neutropenia hospital admission|Reviewer comment: Abnormal/Normal Flag:

15-Feb-2023 Ms Maria Habib Surgery consultation

Free Text	*Location Type: Main Surgery*
Diagnosis (P3)	Face to Face encounter with Lorraine today, first contact would normally be telephone triage. Lorraine discussed previously being booked in for TC appt with PCMHWN however has had to reschedule on a few ocassions since Nov 22. Discussed feeling overwhelmed regarding current situations, impacting her MH. Advised that she has recently broke her back, still waiting for physio to get back in contact with her. Discussed Cancer of the mouth? Awaiting results on Friday and feels most anxiety around this at present. Discussed other injuries she has had over the last 3 years, lost her ***** and her ***** is unwell. Feels like she cannot cope and is overwhelmed by it all. States that she has a small gym at home that helps clear her mind, feels she cannot utilise this to full extent due to recent injury. Advsied that she 'shuts herself away' when she feels everything is too much. At home alone, so now txts her ***** a reassuring message when she feels she needs time alone. States she ***** 3 years ago, denies thoughts of suicide/SH, no plans or intent, did state on occasion she can have feelings that she ***** and dealing with everything. Visits ***** and cares for her when she is able, feels limit at present due to injury - states she still feels like she has not dealt with the death of her *****, emotional/tearful during visit today. States she would feel benefit from speaking to someone about how she is feeling, feels ready to do this. Signposted to CRUSE and Living life. Discussed anxiety management, coping strategies - Lorraine states she loves to ***** and uses this to shut her mind off. Discussed mindfulness and relaxation, states she cannot sleep at night so keen to try techniques to alos aid a better sleep along side medication. Discussed reading resources on wellbeing Glasgow and looking at CalmDistress course and Sleepio. Plan: CRUSE, Living Life, Wellbeing G, Sleepio and CalmDsitress. Follow up F2F to discuss same on the 1/3/23 @1515hrs. pcmhwn ***** Habib

08-Feb-2023 Dr Lynsey Baird Surgery consultation

Diagnosis (P3)	[X]Depression NOS
Diagnosis (P3)	***** died last june . covid in october . broken wrist last month . mood lower consistently . staying home . sleep disturbed and worse since surgery for her wrist fracture- had really bleak thoughts not wantig to be here , just as low as in the past when on antidepressants but has been really reluctant to restart Rx . tends to keep feelings to self and not share . Family aware she is struggling and reluctantly accepting practical help at the moment since her wrist # surgery wouldn't do anything to ***** . Family are her rescue . NOw willing to accept Rx ... not mirtazepine as weight gain was bad wit that in 2019. start sertrliine . short pulse of night sedation to cover initiation . speak 3 weeks or sos .

28 TABS - 1 Tab Daily

15-Aug-2003 Clarithromycin TABS 250MG Acute Medication (Past)
14 TABS - 1 Tab Twice daily

15-Jan-2003 Pulmicort Turbohaler 200 Dose Dry Powder INHAL 100MCG/DOSE Acute Medication (Past)
1 INHAL - 2 Puffs Twice daily

05-Sept-2002 Trimethoprim TABS 200MG Acute Medication (Past)
10 TABS - 1 Tab Twice daily

05-Sept-2002 Dexarhinaspray Duo 110 Dose Cfc Free Pump Action Nasal 10ml Acute Medication (Past)
1 SPRAY - 3 times daily

17-Apr-2002 Sertraline TABS 50MG Acute Medication (Past)
28 TABS - 1 Tab Daily

13-Mar-2001 zyban tab 150mg Acute Medication (Past)
60 INVAL - 1 tab 3 days 1 tab bd As directed

04-Dec-2000 Citalopram TABS 10MG Acute Medication (Past)
35 TABS - 1 Tab Daily

29-Sept-2000 Cefalexin TABS 500MG Acute Medication (Past)
21 TABS - 1 Tab 3 times daily

21-Sept-2000 Clotrimazole Vaginal TABS 500MG Acute Medication (Past)
1 TABS - 1 Tab As directed

Allergies

22-Jan-2021 Dr J Lynch
Adverse reaction to Naproxen
abdominal pain and nausea
RCT001
Episodicity -

Vaccinations

02-Dec-2021 Mara Fraser
Seasonal influenza vaccin given by other healthcare provider
Intervention
FLUSOHP

23-Nov-2021
Administration of first inactivated seasonal influenza vacc
3079181A/ FLUQIVC/IM/Left Arm//FLU - Flucelvax Tetra (QIVc) (Fernhill Community Centre Covid Clinic)
Intervention
FLU

23-Nov-2021
Administration of first dose of SARS-CoV-2 vaccine
FH4751/ PF/IM/Right Arm//C-19 Booster Pfizer (Fernhill Community Centre Covid Clinic)
Intervention
COVOTHER

12-May-2021
Administration of second dose of SARS-CoV-2 vacc
*PV46688/ AZ/IM/LUA//C-19 (By H *****)*
Intervention
COVOTHER

27-Feb-2021
Administration of first dose of SARS-CoV-2 vaccine
PV46669/ AZ/IM/LUA//C-19 (By S Kholeif)
Intervention
COVOTHER

09-Oct-2019 Ms Michelle Connelly
Seasonal influenza vaccination
Batch No XXXXXXXX Exp 00/13
Intervention
FLU

12-Oct-2018 E Boud
Seasonal influenza vaccination
Batch No R04X Expiry 05/19
Intervention
FLU

17-Nov-2016 E Boud
Seasonal influenza vaccination
Seqirus 164001A exp 04/17
Intervention
FLU

13-Nov-2015 Ms Michelle Connelly
Seasonal influenza vaccination
Agrippal Batch: 151902 Expires: 04/16 (GMS)
Intervention
FLU

16-Oct-2014 Dr J Lynch
Seasonal influenza vaccination
Split Virion - Batch: L8207-1 Expires: 05-2015 (GMS)
Intervention
FLU

25-Oct-2013 E Boud
Seasonal influenza vaccination
Batch No AFLUA809AF EXP07/14
Intervention
FLU

16-Nov-2009 user3
PANDEMRIX - first influenza A (H1N1v) 2009 vaccination given
Site: Left Arm priority=2Batch Number: A81CA067AExpiry date: 01/07/2011Manufacturer: GlaxoSmithKlineProduct Name: Pandemrix
Intervention
PFLUGSK

02-Nov-2007 Ms Michelle Connelly
Pneumococcal vaccination
Batch Number: ND60010 Expiry Date: 7/2008 priority=2Batch Number: ND60010Expiry date: 31/07/2008Manufacturer: Sanofi Pasteur MSDProduct Name: Pneumovax II
Intervention
PNEUMOCOC

23-Mar-1999 E Boud
Booster polio vaccination
Polio Immunis.$$.clm - Repeat after an Interval 120MIn GP care
Intervention
POLIO

23-Mar-1999 E Boud
Booster tetanus vaccination
Tetanus Immunis.$$.clm - Repeat after an Interval 120MIn GP care
Intervention
TETANUS

Test Results

09-Sept-2024
Result: Serum albumin*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum albumin SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 44 g/L (Range: 35 - 50)

09-Sept-2024
Result: Serum albumin*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum albumin SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 44 g/L (Range: 35 - 50)

09-Sept-2024
Result: Serum albumin*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum albumin SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 44 g/L (Range: 35 - 50)

09-Sept-2024
Result: Serum albumin*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum albumin SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 44 g/L (Range: 35 - 50)

09-Sept-2024
Result: Serum alkaline phosphatase*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum alkaline phosphatase SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 96 U/L (Range: 30 - 130)

09-Sept-2024
Result: Serum alkaline phosphatase*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum alkaline phosphatase SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 96 U/L (Range: 30 - 130)

09-Sept-2024
Result: serum alanine aminotransferase level*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
serum alanine aminotransferase level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 15 U/L (Range: 5 - 55)

09-Sept-2024
Result: serum alanine aminotransferase level*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
serum alanine aminotransferase level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 15 U/L (Range: 5 - 55)

09-Sept-2024
Result: Serum vitamin B12*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum vitamin B12 SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 269 pg/mL (Range: 197 - 771)

09-Sept-2024
Result: Serum bilirubin level*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum bilirubin level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 3 umol/L (No range available)

09-Sept-2024
Result: Serum bilirubin level*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum bilirubin level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 3 umol/L (No range available)

09-Sept-2024
Result: Corrected serum calcium level*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Corrected serum calcium level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 2.35 mmol/L (Range: 2.2 - 2.6)

09-Sept-2024
Result: Corrected serum calcium level*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Corrected serum calcium level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 2.35 mmol/L (Range: 2.2 - 2.6)

09-Sept-2024
Result: Serum chloride*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum chloride SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 102 mmol/L (Range: 95 - 108)

09-Sept-2024
Result: Serum chloride*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum chloride SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 102 mmol/L (Range: 95 - 108)

09-Sept-2024
Result: Serum creatinine*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum creatinine SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 65 umol/L (Range: 60 - 110)

09-Sept-2024
Result: Serum creatinine*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum creatinine SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 65 umol/L (Range: 60 - 110)

09-Sept-2024
Result: Eosinophil count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Eosinophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 0.1 (No range available)

09-Sept-2024
Result: Eosinophil count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Eosinophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 0.1 (No range available)

09-Sept-2024
Result: Eosinophil count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Eosinophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 0.1 (No range available)

09-Sept-2024 **Result:** Serum folate*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum* Abnormal			
	Serum folate SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	**2.27 ng/mL**	**(Range: 3.9 - 26.8)**
09-Sept-2024 **Result:** Serum gamma-glutamyl transferase level*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*			
	Serum gamma-glutamyl transferase level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	19 U/L	(No range available)
09-Sept-2024 **Result:** Haemoglobin estimation*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*			
	Haemoglobin estimation SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	130 g/L	(Range: 115 - 165)
09-Sept-2024 **Result:** Haemoglobin estimation*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*			
	Haemoglobin estimation SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	130 g/L	(Range: 115 - 165)
09-Sept-2024 **Result:** Haemoglobin estimation*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*			
	Haemoglobin estimation SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	130 g/L	(Range: 115 - 165)
09-Sept-2024 **Result:** Serum lactate dehydrogenase level*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*			
	Serum lactate dehydrogenase level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	203 U/L	(No range available)
09-Sept-2024 **Result:** Serum lactate dehydrogenase level*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*			
	Serum lactate dehydrogenase level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum	203 U/L	(No range available)
09-Sept-2024 **Result:** Mean corpusc. haemoglobin(MCH)*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA* Abnormal			
	Mean corpusc. haemoglobin(MCH) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	**35.4 pg**	**(Range: 27 - 32)**
09-Sept-2024 **Result:** Mean corpusc. haemoglobin(MCH)*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA* Abnormal			
	Mean corpusc. haemoglobin(MCH) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	**35.4 pg**	**(Range: 27 - 32)**
09-Sept-2024 **Result:** Mean corpusc. haemoglobin(MCH)*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA* Abnormal			
	Mean corpusc. haemoglobin(MCH) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	**35.4 pg**	**(Range: 27 - 32)**
09-Sept-2024 **Result:** Mean corpusc. Hb. conc. (MCHC)*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*			
	Mean corpusc. Hb. conc. (MCHC) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	332 g/L	(Range: 320 - 360)
09-Sept-2024 **Result:** Mean corpusc. Hb. conc. (MCHC)*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*			
	Mean corpusc. Hb. conc. (MCHC) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	332 g/L	(Range: 320 - 360)
09-Sept-2024 **Result:** Mean corpusc. Hb. conc. (MCHC)*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*			
	Mean corpusc. Hb. conc. (MCHC) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	332 g/L	(Range: 320 - 360)
09-Sept-2024 **Result:** Mean corpuscular volume (MCV)*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA* Abnormal			
	Mean corpuscular volume (MCV) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	**106.5 fL**	**(Range: 80 - 100)**
09-Sept-2024 **Result:** Mean corpuscular volume (MCV)*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA* Abnormal			
	Mean corpuscular volume (MCV) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	**106.5 fL**	**(Range: 80 - 100)**
09-Sept-2024 **Result:** Mean corpuscular volume (MCV)*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA* Abnormal			
	Mean corpuscular volume (MCV) SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	**106.5 fL**	**(Range: 80 - 100)**
09-Sept-2024 **Result:** Monocyte count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*			
	Monocyte count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA	0.3	(Range: 0.2 - 0.8)

09-Sept-2024
Result: Monocyte count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Monocyte count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 0.3 (Range: 0.2 - 0.8)

09-Sept-2024
Result: Monocyte count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Monocyte count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 0.3 (Range: 0.2 - 0.8)

09-Sept-2024
Result: Neutrophil count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Neutrophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 3.4 (Range: 2 - 7.5)

09-Sept-2024
Result: Neutrophil count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Neutrophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 3.4 (Range: 2 - 7.5)

09-Sept-2024
Result: Neutrophil count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Neutrophil count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 3.4 (Range: 2 - 7.5)

09-Sept-2024
Result: Platelet count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Platelet count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 230 (Range: 140 - 450)

09-Sept-2024
Result: Platelet count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Platelet count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 230 (Range: 140 - 450)

09-Sept-2024
Result: Platelet count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Platelet count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 230 (Range: 140 - 450)

09-Sept-2024
Result: Serum potassium*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum potassium SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 4.2 mmol/L (Range: 3.5 - 5.3)

09-Sept-2024
Result: Serum potassium*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum potassium SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 4.2 mmol/L (Range: 3.5 - 5.3)

09-Sept-2024
Result: Red blood cell (RBC) count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Abnormal
Red blood cell (RBC) count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA **3.67** **(Range: 3.9 - 5.6)**

09-Sept-2024
Result: Red blood cell (RBC) count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Abnormal
Red blood cell (RBC) count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA **3.67** **(Range: 3.9 - 5.6)**

09-Sept-2024
Result: Red blood cell (RBC) count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Abnormal
Red blood cell (RBC) count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA **3.67** **(Range: 3.9 - 5.6)**

09-Sept-2024
Result: Serum sodium*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum sodium SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 139 mmol/L (Range: 133 - 146)

09-Sept-2024
Result: Serum sodium*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum sodium SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 139 mmol/L (Range: 133 - 146)

09-Sept-2024
Result: Serum TSH level*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum TSH level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 1.81 mU/L (Range: 0.27 - 4.2)

09-Sept-2024
Result: Serum urea level*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum urea level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 3.6 mmol/L (Range: 2.5 - 7.8)

09-Sept-2024
Result: Serum urea level*SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum*
Serum urea level SPECIMEN ID: 4097649250SPECIMEN TYPE: Serum 3.6 mmol/L (Range: 2.5 - 7.8)

09-Sept-2024
Result: Total white blood count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Total white blood count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 5.1 (Range: 4 - 11)

09-Sept-2024
Result: Total white blood count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Total white blood count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 5.1 (Range: 4 - 11)

09-Sept-2024
Result: Total white blood count*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Total white blood count SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 5.1 (Range: 4 - 11)

09-Sept-2024
Result: Percentage lymphocytes*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Percentage lymphocytes SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 1.3 (Range: 1 - 4)

09-Sept-2024
Result: Percentage lymphocytes*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Percentage lymphocytes SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 1.3 (Range: 1 - 4)

09-Sept-2024
Result: Percentage lymphocytes*SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA*
Percentage lymphocytes SPECIMEN ID: 4097649250SPECIMEN TYPE: EDTA 1.3 (Range: 1 - 4)

Patient date of birth: 02/04/1968
Patient Address: Flat 44, 3 Greenhill Court, Rutherglen, Glasgow, G73 2DH

Presenting Complaint
CLBP
Hip deconditioning
Outcome

- ☐ Symptom free
- ☐ Reduction in symptoms
- ☐ Minimal improvement
- ☐ No benefit

- ☐ Failed to Opt in
- ☐ Failed to attend initial assessment
- ☒ Failed to complete treatment

- ☒ Treated and discharged with advice
- ☐ Triaged and discharged with advice
- ☐ Treated – open appointment, no further treatment sought
- ☐ Triaged – open appointment, no further treatment sought
- ☐ Referred to GP / consultant / other
- ☐ Equipment supplied
- ☐ Met agreed goals

Additional Information
Pt failed to attend return appointment, if no contact is made within 5 working days the patient will be discharged from the physiotherapy service.

If you require any further details of this patient's condition, treatment programme or response to treatment, please email MSKHUB@lanarkshire.scot.nhs.uk including the patient's CHI number.

Kind regards,

Daniel Mullen
Physiotherapist

TerraPACE REPORT			
Time	01:20	Date	05/07/2026
PATIENT AND INCIDENT DETAILS			
Incident number		CR013420783	
Incident Location		OUTSIDE IN CAR PARK GREENHILL COURT RUTHERGLEN GLASGOW	
Name		LORRAINE MOFFAT	
CHI Number		0204686547	
Date of Birth		1968-04-02	
Additional Comments and Observations		999 call to 58 y/o female ?DIB Hxpc- Pt was drinking with a friend in the evening and reports choking on a curry between 21:30-22:00. Pt states she managed to dislodge food with her own fingers but since has had difficulty in swallowing. Pt states every time she swallows it's making her cough up a white frothy sputum. O/e- Pt was o/s and distressed o/a. Pt had increased resps, stated she couldn't breath and was unable to swallow. Pt had also wet herself in panic. Crew able to assist pt into ambulance for assessment. Pt was alert and orientated- no obvious [redacted] noted to back of throat (no food visible, no redness, no swelling). Pt able to talk in full sentences, sats normal. Upper resp wheeze of auscultation- salbutamol given to help relieve airway. Pt was continually coughing up white sputum. All other obs NIL acute findings. Plan- Crew suggested pt travel to QEUH for further assessment [redacted] to throat by fingers or food still lodged. Whilst waiting on it [redacted] pt coughed up 2x pieces of [redacted]. Pt states she felt instantaneous relief and was now able to swallow. Pt daughter arrived and pt decided she no longer wanted to convey. Crew explained to pt although food is now dislodged there may be trauma to throat. Pt still denied conveyance. [redacted] agreed to stay with pt this evening and keep an eye on her. Worsening advice given.

PATIENT AND INCIDENT DETAILS			
Incident number		CR012977908	
Name		Lorraine Moffat	
CHI Number		0204686547	
Date of Birth		1968-04-02	
Additional Comments and Observations		Pt does not wish to attend ED and crew agree this does not seem like the appropriate course of action presently, no red flags, worsened chronic issue and already seen by GP. Crew contacted ACC for AP callback incase further meds were required (FNC not available at this time), spoke to AP, no prescribers available today and pt does have own dihydrocodeine though she does not like taking it due to side effects. Advice for now is to continue with own pain medication as prescribed and to keep moving as much as possible, should pain worsen despite this advised to contact NHS24 today for F2F assessment or to contact own GP tomorrow. Pt and [redacted] informed of red flags to be aware of and to contact 999 should they arise. Pt now feeling much improved and walking about flat well, she is happy with this current course of action, daughter staying with her for next few hours also. WSG.

Dear Lorraine

After your appointment, I spoke with our Practice Community Psychiatric Nurse regarding other resources, which might be helpful to you as we discussed. I appreciated the difficulties around the Moira [redacted] Foundation that you explained.

There is an association called "Talk Now" which is support for survivors of [redacted] including [redacted] Their website address is www.talknow.org.uk and phone number in Lanarkshire 0800 042 0019.

There is also a centre called the Manda Centre in [redacted] which helps support people dealing with [redacted] loss and personal [redacted] and it's telephone number is 01698 329724.

Glasgow and Clyde [redacted] also support survivors of childhood [redacted] and they have an email contact which is info@rapecrisiscentre-glasgow.co.uk

I hope there is something in there which will be helpful to you

Best Wishes,

Yours sincerely,

Dr J [redacted]
MB Ch B, DRCOG, MRCGP

Dear Dr [redacted]

RE: LORRAINE MOFFAT, FLAT 44, 3 GREENHILL COURT, RUTHERGLEN, G73 2DH
CHI: 020 468 6547

Thank you for referring the above individual to the Eastvale Community Mental Health Team / Camglen Psychological Therapies Team. The referral was discussed at our weekly multi-disciplinary / allocations meeting and we would recommend the following resources.

Future Pathways is a free support service in Scotland for individuals who have experienced [redacted] or [redacted] while in care as children, offering tailored assistance to help them achieve their personal goals.

💻: www.future-pathways.co.uk
☎: **0808 164 2005.** Calls are free & lines are open Monday to Friday, 10am - 4pm.
✉: registration@future-pathways.co.uk

Individuals can also access the **NHS Lanarkshire Psychological Services Mindmatters website**: www.lanarkshiremindmatters.scot.nhs.uk, which offers a range of helpful online resources including access to free online programmes to assist with anxiety, low mood, and sleep (e.g. **Calm Distress, Daylight, Sleepio**, and **SilverCloud**).

We hope that these resources are helpful. The above individual will not be allocated to adult mental health services at Eastvale Resource Centre at this time.

Yours sincerely

On behalf of the Camglen Multi-disciplinary Adult Mental Health Allocations Team meeting

Dear Dr [redacted]

Patient Name: Lorraine Moffat
Patient date of birth: 02/04/1968
Patient Address: Flat 44, 3 Greenhill Court, Rutherglen, Glasgow, G73 2DH

Thank you for your referral to the Community Addiction Recovery Service for the above named patient.

Based on the information provided, unfortunately they don't meet the criteria for our service at the moment as there is no evidence of dependency on either alcohol or [redacted]

Below is a link to South Lanarkshire Alcohol and Drug Partnership's local services directory, which outlines a range of support options available in your area:

https://www.southlanarkshireadp.scot.nhs.uk/local-services/

In the meantime, should the individual currently wish to explore face to face opportunities for psychosocial intervention and/or peer support then they should be encouraged to contact:

The Beacons - 01698 755926

Healthy Valleys – 07859 062831

Esteem Clydesdale - 01555 729033

Should circumstances change, or you require any further information, then please do not hesitate to contact us on the above number.

Yours sincerely

Poppy Arkless
Nursing Team Leader

Address	Flat 44, 3 Greenhill Court Glasgow G73 2DH

Your patient was seen at the clinic on 04/06/2025 and at this visit, LLETZ (Loop Excision) treatment was performed.

No smear was taken.

A LLETZ biopsy of the cervix was taken and the result was CIN1.

Your patient has been treated for CIN1 and has now been discharged from the colposcopy clinic. I recommend that a follow up smear should be taken in 6 months time.

Your patient has been advised of the results and that she will be invited to attend for her next smear test. Your patient will therefore appear on your Recommended Call List (RCL) on SCCRS in due course.

Yours sincerely

Mrs A McGowan
Nurse Colposcopist

Dear Dr [redacted]

Lorraine Moffat; D.O.B: 02/04/1968; CHI: 0204686547
Flat 44, 3 Greenhill Court, Glasgow, G73 2DH

Lorraine failed to attend her Fracture Clinic appointment this morning. I spoke to this lady on the phone and she informed me that this was because her [redacted] is currently undergoing palliative care, end of life treatment.

I have sent her a repeat appointment for one week to see how her wrist is getting on but I have advised her to let us know if she is unable to attend this and we will see if there is any flexibility we can have in terms of trying to get a repeat x-ray of her wrist. She is happy with all of the above.

Yours sincerely,

[redacted]

Dear Doctor,

Lorraine Moffat; D.O.B: 02/04/1968; CHI: 0204686547
Flat 44, 3 Greenhill Court, Glasgow, G73 2DH

Diagnosis: Right distal radius fracture treated conservatively 26/10/24.

Plan:

Discharged with advice on graduated return to normal activities.

Wean from wrist splint.

I reviewed this pleasant 56 year old lady in the fracture clinic today.

Ms Moffat sustained a right distal radius fracture at the end of October and this was treated conservatively.

On review today she has minimal swelling and tenderness over the wrist and reasonable range of motion.

I have given her advice on graduated return to normal activity over the next several weeks and graduated weaning from the futuro splint.

Although Ms Moffat has been discharged, if she has any problems please feel free to re-refer her.

Yours sincerely,

Mr Jibu [redacted]

Regarding Lorraine Moffat, born 02 Apr 1968 (CHI 0204686547)

Dear Dr,

Your patient has been assessed for osteoporosis / fracture risk on **14 Nov 2024** following presentation to hospital with a fracture. This fracture was identified from a radiology report or medical records and this patient has not been seen in person by the Fracture Liaison Service. A report from this assessment is attached.

An appointment for full assessment by the Fracture Liaison Service, including DXA scan, will be now arranged.

Follow up

A DXA scan will be scheduled for your patient

Yours sincerely,

Leigh [redacted] - 0141 201 0105
Osteoporosis Nurse Specialist

CHI: 0204686547

Assessment report

Date:

- 14 Nov 2024

Fracture history:

- Radius/Ulna (Right) (aged 56)

Risk factors:

- Previous fragility fracture

Recommended treatment:

- Continue current calcium and vitamin D supplement
- Refer to comments

Recommended investigations:

- None

Future DXA Scans:
(to be arranged by GP)

- To be decided based on outcome of patient's next [redacted]

Recommended lifestyle changes:

- None

Comments:

Reference is made to a recent radiology report and hospital electronic information systems; this patient has not been seen in person by the Fracture Liaison Service.

Ms Moffat is due a monitoring DXA scan in February 2025 and in view of a new fracture we will arrange this. We note there is an inactive prescription for calcium + vitamin D which you may wish to review with her, +/- change to a vitamin D preparation.

Dear Ms Moffat,

As you will be aware Dr J [redacted] GP has referred you to the Clinical Health Psychology & ACCEPT Service for an assessment appointment.

Sometimes, people agree to a referral when it is first discussed with them. They may decide later that the referral is no longer necessary. If we know this, it means that we can offer an appointment to someone else more quickly.

The purpose of this letter is to confirm you wish your name to be placed on our waiting list.

If you **do not wish** your name to be placed on the list: ***you do not need to take any action.*** Your name will *not* be placed on the waiting list and we will inform your referrer of your decision.

If you **do wish** your name to be placed on the list: ***please contact us within 14 days from the date at the top of this letter.***

You can contact us:

- by telephone on 01698 752390
  (please also give information asked for on enclosed sheet)

or

- by returning the enclosed information sheet

Yours sincerely

Secretary
Clinical Health Psychology & ACCEPT Service

If you are unable to submit via email for any reason please contact us to discuss.

Referral Criteria and Guidelines for Clinical Health Psychology and Accept Service

NHS Lanarkshire

The Clinical Health Psychology Service is a small (3.6wte) specialist service for adults over the age of 16 who are experiencing severe and [redacted] psychological difficulties specifically associated with an ongoing medical condition and/or its treatment. Clients will be in regular contact with medical specialties and would benefit from a Clinical Health Psychology component to their multidisciplinary care. Referrals are usually accepted from the medical/surgical teams (e.g. renal, haematology, diabetes, oncology etc) at Monklands, Wishaw and Hairmyres Hospitals who are involved in the clients care and with the consent of the client.

ACCEPT (Adjustment to chronic conditions by engaging with psychological therapies) (3.0wte) is a primary care service that bridges the gap for patients with long-term health conditions and associated low mood and/or anxiety, who have little access to appropriate services in terms of their mental health needs. Referrals are usually accepted from GPs and practice nurses.

Please note that this is an out-patient only service and the Clinical Health Psychology and Accept Service cannot offer appointments to in-patients or home visits.

Clinical Health Psychology and Accept provide the following services:

- Clinical
  - Psychological assessment
  - Psychological formulation - a biopsychosocial understanding of the difficulties
  - Intervention - if appropriate & based on the psychological formulation. This may be offered as individual, couple, family or group therapy
- Non-Clinical
  - Consultation and advice to staff
  - Supervision
  - Training

Appropriate referrals include clients whose primary presentation is:

- Difficulty in adjusting to the diagnosis of a medical condition
- Ongoing difficulty in adjusting to an ongoing medical condition/multiple conditions or treatment/s e.g. loss of function, symptom management
- Psychological distress including mood-related difficulties associated with a medical condition (e.g. anger, anxiety, depression) that:
  - Do not resolve over time
  - Interfere with life activities and/or medical treatment
  - Cannot be dealt with by other members of the medical team
- Non-adherence to treatment/self-management problems
- Psychological distress which is compromising treatment or blocking ability to engage in rehabilitation e.g. panic, agoraphobia
- Phobias that are interfering with treatment e.g. needle phobia
- Psychological distress that is disproportionate to the severity of the medical condition/prognosis
- Family/Relationship/Sexual difficulties associated with current medical condition/treatment.
- [redacted] symptoms associated with a medical condition and/or treatment e.g. ICU

Inappropriate referrals for this service include:

- Long-standing mental health difficulties unrelated to a medical condition
- Primary or current drug or alcohol [redacted]
- Patients who are currently admitted to a ward

Dear Dr [redacted]

RE: LORRAINE MOFFAT, FLAT 44, 3 GREENHILL COURT, RUTHERGLEN, G73 2DH
CHI: 020 468 6547

Thank you for referring the above individual to the Eastvale Community Mental Health Team. The referral was discussed at our weekly Multi-disciplinary / allocations meeting.

As Miss Moffat has recently commenced on Mirtazapine and is engaging with Dietetics, we would recommend allowing time for this input to take effect. In addition, the following resource may be of benefit in relation to grief.

Cruse Scotland provide support for people who have experienced a bereavement. They can offer individual counselling, support groups, advice, and information. More information on the services provided can be found at:

🖳: www.crusescotland.org.uk .
☎: Free helpline on 0808 802 6161
✉: support@crusescotland.org.uk

In future, we would recommend the following resource in relation to [redacted] alopecia and addressing associated difficulties with self-esteem.

The **Clinical Health Psychology & ACCEPT (Adjustment to Chronic Conditions by Engaging with Psychological Therapies) Service** accepts referrals from primary care and the acute sector. Referrals to this service can only be made via the Clinical Heath Psychology & ACCEPT referral form which is available on the First port page http://firstport2/staff-support/clinical-health-psychology/default.aspx . This referral form provides access to both the Clinical Health Psychology and ACCEPT services. Health Psychology clinicians will screen referral forms to determine which service is the most suitable.

LAT100

/2. Lorraine Moffat chi: 020 468 6547

The **Clinical Health Psychology Service** is a specialist service for adults over the age of 16 who are experiencing severe and [redacted] psychological difficulties specifically associated with an ongoing medical condition and/or its treatment. Individuals will be in regular contact with medical specialties and would benefit from a Clinical Health Psychology component to their multidisciplinary care. Referrals are usually accepted from the medical/surgical teams (e.g. renal, haematology, diabetes, oncology, etc.) at Monklands, Wishaw and Hairmyres Hospitals who are involved in the individual's care and with their consent.

ACCEPT is suitable for people [redacted] a long-term condition who are presenting with mild/moderate low mood and/or anxiety. ACCEPT offers 1:1 psychological assessment and up to 8 sessions of psychological therapy. ACCEPT can also offer a 6 week course: "**Living Life to the Full: Reclaim your life,**" for people [redacted] a physical health condition. Referrals for group only intervention can also be made using the above referral form.

Individuals can also access the **NHS Lanarkshire Psychological Services Mindmatters website**: www.lanarkshiremindmatters.scot.nhs.uk, which offers a range of helpful online resources including access to free online programmes to assist with anxiety, low mood, and sleep (e.g. **Calm Distress, Daylight, Sleepio**, and **SilverCloud**).

If you need urgent help contact your GP or NHS 24 on 111. Call Breathing Space on 0800 83 85 87, the Samaritans on 116 123 or text SHOUT to 85258.

We hope the above resources are helpful. Miss Moffat will not be allocated to adult mental health services at Eastvale Resource Centre at this time.

Yours sincerely

From and on behalf of the Multi-disciplinary Team

Dear Dr [redacted]

Patient Name: Lorraine Moffat
Patient date of birth: 02/04/1968
Patient Address: Flat 44, 3 Greenhill Court, Rutherglen, Glasgow, G73 2DH

Thank you for your referral for the above patient to the Community Dietetic Service regarding unintentional weight loss. Ms Moffat attended at Rutherglen Health Centre Clinic on 12th December 2023 where her weight was 44kg, height 1.459m, BMI 21kg/m^2 and a MUST Score of 2.

Dietary assessment revealed that she is indeed following a high calorie/high protein diet, is having 3 main meals with snacks in-between, has an adequate fluid intake, however still continues to smoke heavily.

To promote optimal nutritional status and increase weight, the following plan was discussed:

- Food fortification.
- Change to whole milk.
- Try and reduce smoking intake.

Of note, her poor intake is due to ongoing mental health issues which commenced following the passing of her [redacted] 2 years ago which she feels she has not fully recovered from. I did suggest she make contact either with Citizens Advice or contact yourself in this matter. She has been given several contact number re mental health groups in NHS Lanarkshire.

I have since contacted my colleague within the Mental Health Team and as a referral has not been made to Mental Health she is unable to see this patient. I would therefore be grateful if you would consider referral to local CPN or Mental Health Services as this is impacting on her dietary intake.

A follow up appointment has been made for 8th February at Rutherglen Health Centre and I will keep you informed in due course.

NHS Lanarkshire

Yours sincerely

Dear Dr [redacted]

Patient Name: Lorraine Moffat
Patient date of birth: 02/04/1968
Patient Address: Flat 44, 3 Greenhill Court, Rutherglen, Glasgow, G73 2DH

Thank you for your referral for the above patient to the Community Dietetic Service regarding unintentional weight loss in 2023. The patient attended at my clinic on 12th December 2023 where her weight was 44kg, height 1.549m, BMI of 21kg/m^2 and a MUST Score of 2. Ms Moffat recalls being between 55-57kgs.

Dietary assessment revealed that Ms Moffat is well aware of how to increase her calorie intake and has switched to full calorie products and consuming additional snacks – crisps and chocolates during the day, in an attempt to gain weight. She has currently also ceased physical activity which she did find enjoyable regarding her mental health state, however again in an attempt to retain calories, has reduced significantly physical activity. Dietary assessment also revealed that over the last couple of years since her [redacted] passed away, she has struggled with mental health issues and , with friends and family commenting on her weight loss.

I have given her advice to increase her calorie intake by food fortification, to change to whole milk and attempt to try and reduce her smoking intake.

At the appointment she requested nutritional supplements to help her gain weight but I did not feel at this stage this was necessary as the main issue seems to be her mental health which is impeding her oral intake and indeed she said that she struggled to get to today's appointment due to mental health issues. In this instance, I would suggest a referral to the Mental Health Team or Psychiatric input to determine if there are any mental health issues that can be addressed.

A follow up appointment has been arranged in February 2024 so that I can assess again Ms Moffat's weight.

Should you have any queries, please do not hesitate to contact me.

NHS Lanarkshire

Yours sincerely

Flat 44, 3 Greenhill Court, Glasgow, G73 2DH

Attendance: Specialty - General Surgery; Clinic - GGJDGS7-MISS DOUGHTY BREAST THURS AM
Date and Time of Appointment - 23/11/2023 11:20

Clinical Comments:
Further to our previous letter in September, I saw Lorraine back at our Breast Clinic today for interval review of indentation to both breasts.

She attended the Breast Clinic in September and had a normal mammogram and targeted ultrasound of her left breast. It was thought that the bilateral indentation was secondary to her weight loss and loss of breast volume due to this.

Lorraine states today that she has not noted any further changes to her breasts and I note that a recent CT on 15 November 2023 for weight loss has not shown anything worrying.

On clinical examination today, there remained symmetrical indentation and loose breast tissue due to weight loss but I was unable to feel any palpable abnormalities in either breast or axillae, P1 bilaterally.

I have therefore reassured Lorraine and discharged her from the clinic today but if she has any new breast issues or concerns in the future we will happily see her again.

Yours sincerely

Report Summary

THIS REPORT HAS BEEN CHANGED
THIS REPORT WAS COMPLETED AS PART OF THE SCOTTISH NATIONAL REPORTING SERVICE (SNRRS)
Clinical Indications
Weight loss no localising symptoms
CT Chest abdomen and pelvis with contrast
No consolidation or pleural effusion.
No enlarged mediastinal or hilar lymph nodes.
No suspicious focal lung lesion seen.
No focal liver lesions.
Normal spleen pancreas adrenals and both kidneys.
No enlarged para-aortic or pelvic lymph nodes.
Faecal loading of the large bowel and no obvious mass lesion.
No free fluid. No pelvic mass lesions seen.
No destructive bony lesions seen.
Conclusion:
No mass lesion or lymphadenopathy.

Dear Dr Janis [redacted]

The following radiology request has been **RETURNED** for the reason below.

Patient: Ms Lorraine Moffat
Date of birth: 02-Apr-1968
CHI No: 0204686547
Date of Request: 17-Oct-2023

Examination(s) Requested: CT Abdomen and pelvis

Reason for Returning
This request has been identified as having no recent CXR and we are therefore returning this to you.
(Entered By RA33580 [redacted] on 17-Oct-2023 at 12:34)

In many cases additional information is all that is required. Can you please therefore review this patient and either submit another referral form, giving additional information or contact a Consultant Radiologist for guidance.

Yours sincerely

Diagnostics Administrator

Dear Dr. J [redacted]

Lorraine Moffat; D.O.B: 02 Apr 1968; CHI: 0204686547
Flat 44, 3 Greenhill Court, Glasgow, G73 2DH

Attendance: Specialty - General Surgery; Clinic - GGJDGS7-MISS DOUGHTY BREAST THURS AM
Date and Time of Appointment - 21/09/2023 09:40

Clinical Comments:
Thank you for referring this 55-year-old lady to the Breast Clinic where I saw her this morning.

She tells me that she has always had lumpy "fibroid" breasts, and "fibroids" in her breasts. She was seen in the [redacted] a long time ago in the 90's, and apparently was prescribed some Bromocriptine and something else at that time. She had an accident and broke her T9 vertebra in January, and from about May time, she tells me that she has lost about a stone and a half in weight. She had noticed some lumpiness in her breasts since her weight loss and she attended the surgery. You had noticed some indrawing on the left.
She has never had a mammogram previously, she is on medication as per your letter, she has no family history of note, she has 2 children, neither of whom she breastfed, and she tells me that her last period was at the age of 42, and she has never been on any hormones since then.

Examining in the Clinic today, she has slight indentation in the outer quadrants of both breasts, which would be the normal indentation that you get with the loss of volume due to weight loss. This looks symmetrical. This was only on sitting, and when she lay down and was on her side, the breast volume refilled without any obvious indrawing. She does have quite lump breasts, but all that I can feel just now is normal breast tissue because she has lost the fatty supporting tissue around that to make it more smooth. She had bilateral mammography in the Clinic this morning, and this was reported as, M1. The slight lumpy breast tissue on the left side was ultrasounded and that confirmed normal breast tissue with no suspicion.

I have reassured her that all the change in her breasts is due to her weight loss. There has been nothing worrying on examination or imaging today. However, as she has just noticed this, I have arranged to see her back in a couple of months' time just to make sure that there has been no obvious change in this area. We will see her back at that time and take things from there depending on that examination.
Kind regards,

Yours sincerely,
Dr Gillian [redacted]

Diagnosis: T9 insufficiency fracture, normal calcium, normal vitamin D on bloods, **previous bone densitometry treated on bisphosphonate**

Plan: discharged

I saw Lorraine today in the fracture clinic. She is doing fairly well. She is now 10 weeks post injury which was an insufficiency fracture. It has not changed on x-rays and she is comfortable. I have advised her as she is post menopausal to take calcium and vitamin D supplements. Otherwise, weight bearing exercises and core exercises should be done for her back.

I have discharged her back into your care if there are no further issues.

Yours sincerely,

Niak Puei Koh,

Senior Clinical Fellow

Dear Dr. [redacted]

Lorraine Moffat, DOB: 02-Apr-1968
Flat 44
3 Greenhill Court
Glasgow
G73 2DH

Following a recent presentation with fracture, your patient underwent DXA scanning with an osteoporosis and fracture risk assessment on 18-Jan-2023.

All patients receive a written summary of their DXA report by post. In addition, for your patient:

a) These results / suggestions have been discussed with them via a telephone consultation

b) A telephone consultation was arranged but we have been unable to contact them

(c) A telephone consultation is not required

Scan Date: 18-Jan-2023

Spine
L1-L4 BMD: 0.920 TScore: -2.100 ZScore: -1.300
Scan Conclusions:
Osteopenia
Scan Interpretations
L3 excluded, BMD inappropriate due to artefact. ?OA ?collapse
Possible degenerative disease may make this measurement an overestimate

Right Hip
Neck of femur BMD: 0.854 TScore: -1.054 ZScore: 0.070
Total hip BMD: 0.784 TScore: -1.797 ZScore: -0.869
[redacted] Conclusions:
Osteopenia

Osteoporosis Risk Factors
Past history of fragility fracture(s)
History in past 5 years of smoking
Previous significant exposure to oral steroid

Falls and Fracture Risk Factors
History of previous fracture (>50yr)
History in past 5 years of smoking

Fracture History
Left Radius and/or Ulna (Aged 53)
TV9 Grade 3 fracture (Aged 54)

Treatment Recommendations
No treatment required

Lifestyle Recommendations
Dietary calcium intake appears sub-optimal
Advise regular weight-bearing exercise appropriate to general health
Advise to stop smoking

Follow Up
DXA scanning should be repeated in 2 years. Please re-refer via [redacted] at that point unless, at that time, you feel follow-up would be inappropriate.

Comments
Ms Moffat was invited for DXA following her wrist fracture in early 2022. Unfortunately she sustained a fracture at TV9 last month after minor [redacted] We can see the severe fracture on today's assessment, but reassuringly no other obvious fractures are seen between the levels of TV4 and LV4.

The DXA assessment shows that bone density (BMD) is below average for age by 12-15% however it is out-with the osteoporosis range. Given her young age, Ms Moffat's risk of fracture is considered to be relatively low and we would not recommend bone protective treatment at this time. Instead suggest other strategies to optimise bone health such as the lifestyle recommendations indicated above. More information about osteopenia and strategies to optimise bone health can be found at the Royal Osteoporosis Society website.

Ms Moffat may find it helpful to visit Royal Osteoporosis Society website for information & support on [redacted] spinal fractures:- https://theros.org.uk/information-and-support/osteoporosis/spinal-fractures/spinal-fracture-videos/

Suggest repeat DXA scan in 2 years' time to reassess the spine, monitor BMD, and inform management thereafter.

Note recent relevant bloods: 25-OH vitamin D 122 nmol/l; no paraprotein on protein electrophoresis/quantitation of immunoglobulins; serum adj calcium 2.32 mmol/l; eGFR >60 ml/min

Dear Dr [redacted]
Date: 22/02/2023
Enquiries: 01698 687442

Patient Name: Lorraine Moffat
Patient date of birth: 02/04/1968
Patient Address: Flat 44, 3 Greenhill Court, Rutherglen, Glasgow, G73 2DH

We recently wrote to the above patient on two occasions requesting them to contact us to arrange a Physiotherapy MSK appointment within NHS Lanarkshire.

As the patient has not responded to either communication their waiting list entry has been removed and no appointment will be offered. They have now been discharged from the MSK physiotherapy service.

Outcome

- ☐ Symptom free
- ☐ Reduction in symptoms
- ☐ Minimal improvement
- ☐ No benefit
- ☒ Failed to Opt in
- ☐ Failed to attend initial assessment
- ☐ Failed to complete treatment
- ☐ Treated and discharged with advice
- ☐ Triaged and discharged with advice
- ☐ Treated – open appointment, no further treatment sought
- ☐ Triaged – open appointment, no further treatment sought
- ☐ Referred to GP / consultant / other
- ☐ Equipment supplied
- ☐ Met agreed goals

Additional Information

If you require any further details of this patient's condition, treatment programme or response to treatment, please email MSKHUB@lanarkshire.scot.nhs.uk including the patient's CHI number.

Kind regards,

[redacted]

Clinical Comments:
I reviewed this lady in Clinic today. She had lichenoid keratosis of her left upper lip with no evidence of malignancy or dysplasia. She has healed very well and although her lip is pulled to the left side I think this will settle over time. She is pleased with the scar at present and I have given her some scar management advice and stressed the importance the importance of sun damage as there was evidence of sun damage within the specimen.

I am discharging her back to your care.

With kind regards.

Yours sincerely

Sherilyn Tay

Diagnosis: insufficiency fracture T9

Date of Injury: 03/01/23

Management: conservative

Lorraine is a 54 year old lady who sustained this injury following a fall 3 weeks ago. She was admitted to hospital for PT/OT and analgesia as she was unable to manage at home. She progressed well and was discharged. She is back today for review as her discharge letter had said to review at 2, 6 and 12 weeks with x-rays of the T spine.

X-rays today show significant wedging of the T9 vertebral body, unchanged in appearance from her x-rays on 09/01/23. She is managing well, she is mobilising with the aid of a walking stick outdoors but this is more due to balance and fear of falling as opposed to any change in her lower limb strength. Indeed, she had 5/5 power ion all myotomes in the lower limbs today. She had normal sensation. She denies any bladder or bowel symptoms.

I am happy for her to go back to do light core strengthening exercises. She has a small gym at home. She has been told not to do any heavy lifting for another 6-8 weeks. We will see her back as her discharge letter stated 6 weeks with x-rays of the T spine on arrival. These would be beneficial to be standing thoracolumbar x-rays as opposed to plain film thoracic x-rays which will be requested as such, so standing thoracolumbar x-rays.

Yours sincerely,

Moffat Lorraine CHI: 0204686547 GCL 24/01/2023 v1

Dear Dr. [redacted]

Lorraine Moffat, DOB: 02-Apr-1968
Flat 44
3 Greenhill Court
Glasgow
G73 2DH

Your patient recently attended hospital having sustained a fracture.
She was subsequently assessed for Osteoporosis risk on 05-Jan-2023.

The following clinical risk factors have been reviewed:

Osteoporosis Risk Factors
Past history of fragility fracture(s)

Fracture Risk Factors
History of previous fracture (>50yr)

Fracture History
TV10 (Aged 54)
Left Radius and/or Ulna (Aged 53)

Treatment Recommendations
Treatment recommendation deferred until after further assessment at the clinic

Lifestyle Recommendations
(None)

Densitometry: Patient attending for DXA assessment at an alternative osteoporosis centre

This patient's fracture care was discussed by the [redacted] team GRI; this patient has not been seen in person by the Fracture Liaison Service.

This patient resides out with the GRI/Stobhill area and we will pass on their details to the appropriate team for assessment of osteoporosis. however this lady is already on the waiting list for DXA at QEUH following # left radius in January 2022.

Yours sincerely

Clinical Comments:	Dear Dr, Lorraine Moffat was admitted with back pain and found to have a wedge fracture of t9. She was managed with PT and analgesia and found suitable for discharge with fracture clinic follow up in 2, 6 and 12 weeks. On admission she was noted to have a neutropenia. This was investigated with a blood film which showed [redacted] neutropenia with mature morphology" and macrocytic cells and suggested a b12/folate screen. This screen was clear and she was treated with doxycycline for a chest infection. We discussed this with haematology who suggested a repeat blood in 6 weeks by yourselves would be most appropriate to see that this has resolved. Regards,

Clinical Comments:
Thank you for referring this 54 year old lady who had some Juvederm injection to her upper lip three years ago. She tells me that this became very bruised and swollen and has not really settled since. She has noticed two lesions on her left upper lip that have not healed and these look like ulcerated BCC's.

These will be amenable to excision and direct closure and unfortunately their placement makes it difficult to orientate the scar and she understands this.

She has eczema, bronchial asthma, alopecia, vitiligo, Sjogren's disease and she is on Trazodone and inhalers. She is allergic to Flucloxacillin. She lives alone and smokes 10-15 a day but will try and cut this down.

I will see her for follow-up once we have the results in roughly eight weeks.

With kind regards.

Yours sincerely

Sherilyn Tay

PERSONAL INDEPENDENCE PAYMENT

Request for Further Medical Evidence

Dear Doctor,
I am writing to you about a patient who has made a claim for Personal Independence Payment:

Patient's name: **Mrs Lorraine Moffat**
Date of birth: **02/04/1968**
Address: **FLAT 44, 3 GREENHILL COURT, RUTHERGLEN, GLASGOW, G73 2DH**

Independent Assessment Services is contracted to carry out assessments for Personal Independence Payment by the Department for Work and Pensions. It would be very helpful in assessing your patient's benefit claim if you could complete the enclosed factual report form. **Your patient (or a person appointed to handle their affairs due to the claimant's mental incapacity to do so) has given their consent for us to request this information from you.**

You should base your report on your knowledge of the patient and on her records. A special appointment is not required. Please include in your report any relevant information contained in letters or reports from hospitals or consultants. It may be helpful to your patient to enclose any relevant correspondence contained in their file, such as recent consultant letters or letters from a Community Mental Health Team. If the patient has died or recently moved to another area please still complete the report if you can.

To ensure compliance with the Rehabilitation of Offenders Act 1974 your report should not contain any reference to criminal convictions, whether spent or not, unless the information is directly relevant to your patient's condition or disability. This report is not subject to the Access to Medical Reports Act 1998. The patient does not need to [redacted] it before it is returned.

The patient may, at any stage, request a copy of this report to be sent to them by the Department for Work and Pensions. Harmful and embarrassing information should not be included in your report.

OP101

Providing assessment services on behalf of Department for Work & Pensions

NHS Confidential: Personal data about a patient

Delivered by Atos

Guidance on completion of section 6

The assessment for Personal Independence Payment considers the claimant's ability to carry out a series of everyday activities as per section 6.

In this section, please provide information on the claimant's ability to carry out the relevant activities, if you are able.

Write what has been observed by yourself or another healthcare professional in relation to these listed activities. For example: self-care [redacted] unaided from a chair in surgery, no bending difficulty noted"; getting around - "walks slowly with marked right sided limp using a walking stick, not breathless or very breathless when attends surgery for routine check".

Please only include observations, not opinions.

To consider when completing the form:

Here are **examples of information** that is particularly useful to us for the following conditions.

- **Respiratory conditions** including asthma and COPD - exercise tolerance, **recorded** variability, peak flow readings (including serial readings), spirometry results, treatment and compliance - prescriptions requested regularly / when was last prescription, oral steroids and hospital admissions in last 12 months.
- **Ischaemic Heart Disease** - investigations including results of formal exercise testing, exercise tolerance, clinical findings, response to treatment including nitrates, treatment compliance, hospital admissions in last 12 months.
- **Musculoskeletal conditions - recorded** symptoms, recorded history of falls, detailed clinical findings **including range of joint movements**, treatment including planned surgical treatment with dates, response to treatment and compliance - prescriptions requested regularly / when was last prescription.
- **Mental health conditions** - documented [redacted] detailed mental state findings, history of admissions - voluntary or compulsory, regular prescriptions and last one ordered.
- **Sensory impairment** - visual and auditory acuity.

OP101

Your GP Factual Report 716009014

Patient's name & Ref No Mrs Lorraine Moffat | NP799249B

Date when patient last seen by a health professional 1/1 2/ 22

Where and by whom DR Lynch at tele consult.

Notes:

- *Please record relevant information based on your knowledge of the patient and their medical records.*
- *Please write down facts rather than opinion. We require an objective report - please only include information about symptoms that are recorded in the patient's records and information about disabling effects that you or another healthcare professional have directly observed.*
- *It may be helpful to your patient to enclose any relevant correspondence contained in their file - for example, recent consultant letters or letters from a Community Mental Health Team. Please ensure that any third party information is removed. Third party information is any sensitive information that refers to someone other than the patient - for example, the patient's family*
- *Please complete all sections as fully as possible but write "not known" if appropriate. "Not known" can be helpful.*
- *Relevant information is anything that relates to health conditions or disabilities which impact on the patient's functional ability.*

1. Disabling conditions

Please list conditions or impairments which affect the patient's functional ability.

Depression
COPD with breathlessness
Recent fracture of radius + ulna Jan 22

2. History of condition(s). Include details of any relevant special investigations

Anxiety with depression on + off since 2016
currently depressed + under review

P30273713/000736/3/5

NHS Confidential: Personal data about a patient

7. Does the patient have a history of threatening or [redacted] behaviour?

No ☑ Yes ☐ Don't know ☐

If yes, tell us about their behaviour within the last 5 years. Use the space below at **Part 9**

8. Could your patient travel to an assessment centre by public transport or taxi?

Yes ☐ No ☑ Don't know ☐

If no, please tell us why. Use the space below at **Part 9**

9. Additional information

Use this section if there was insufficient space in one of the previous boxes OR to add important relevant factual information that has not been written in the body of the report. **Do not use the section to provide an opinion.**

Staying at home alot. not going out of house.

I understand that, in certain circumstances, this report will be released to my patient, their legal representative and any authority deciding an appeal in relation to their entitlement to benefit. I also understand that the only information that can be withheld is medical evidence that would be harmful to the person's health.

Guidance on completing section 6 is enclosed. Further information including more detailed guidance on completing your report can be found at www.dwp.gov.uk/healthcare-professional/guidance.

We enclose an invoice for you to claim a fee of £33.50. Please send your completed report and invoice together* in the enclosed business reply envelope. **Please reply within 5 working days.**

*A request for payment will only be accepted on the enclosed invoice form, which must be completed and include the GMC number.

If you have any queries regarding completion of the report or if you would like to discuss this request with our medical staff, please phone the number at the top of this letter. Thank you for your help.

Yours sincerely,

Ms [redacted] Sabourin (Nurse, 91F0116E)

Providing assessment services on behalf of Department for Work & Pensions

3. Symptoms and variability

This is especially helpful in conditions that fluctuate. It should be based on information in the clinical record. Include both day-to-day and longer-term fluctuations. Include the frequency and duration of exacerbations. Please also specify if the condition is well controlled.

Low mood at present [redacted] anxiety symptoms recently ↑ dose of Sertraline, poor sleep, poor concentration

4. Relevant clinical findings

Entitlement is based on the impact of the individual's impairment or health condition(s) on their everyday life. Please provide details of examination findings related to the severity or impact of any health conditions or impairments.

Low mood, anhedonia

5. Treatment - Current, planned, response and prognosis

Please provide details of drug and non-drug treatment and aids and appliances used (prescribed or, if known, non-prescribed). Please specify frequency of treatment and, for medication, dose as relevant.

Sertraline 100mg [redacted]zepam 5mg.
Salbutamol [redacted]

6. Effects of the disabling condition(s) on day to day life

If known, it would be helpful to have information on the patient's ability to:

- *Manage their health conditions and treatment*
- *Communicate*
- *Walk or move around*
- *Get somewhere on their own*
- *Make simple decisions*
- *Prepare, [redacted] and eat food*
- *Wash, bathe and use the toilet/ manage incontinence*
- *Dress and undress*

Only include information that has been confirmed by a health professional. Please state if this is not known.

Low mood + anhedonia → affecting daily functioning, requiring alot of support from daughter.
No eating [redacted] Requires aid of support [redacted] encouragement from daughter

Date and Time of Appointment - 22/02/2022 09:00

Clinical Comments:
Diagnosis: Open reduction internal fixation 11/01/2021

Outcome today: 6-week follow-up, check x-ray satisfactory, discharged to physiotherapy

I saw this very pleasant right hand dominant 53-year-old who unfortunately broke her wrist 6 weeks ago. She underwent open reduction internal fixation of this wrist on the 11th of January. She has done really well with regard to this. Her only ailment that she has is a little bit of scar sensitivity, which is understandable, and also she complains of a little bit of median nerve symptoms, however these were not reproducible in clinic today. I think it is probably more of a sleeping situation, because she only gets it when she wakes up in the morning, and it goes away for the rest of the day so I am not massively concerned, however if there are any concerns please do not hesitate to contact us back as she may require further evaluation of her median nerve function and integrity.

Nonetheless, she is discharged from our care to the care of the physiotherapists. She has got two more clinic appointments at least with them, and she is happy with how things are going. She is happy to be discharged.

Best wishes.

Yours sincerely,

Mr [redacted]

Date and Time of Appointment - 25/01/2022 09:30

Clinical Comments:
Diagnosis: ORIF left distal radius – 11/01/22

Plan: Mobilise left wrist as able. Follow-up in 4 weeks with check x-ray left wrist on arrival

I reviewed this 53-year-old lady. She is 2 weeks following the above operation. The initial injury was sustained on 07/01/22 after a slip on ice. She denies any significant issues since her surgery.

I note her medical history of COPD and Sjögren's syndrome.

On examination today, the left upper limb was neurovascularly intact. The wound was healing well with no evidence of infection. Sutures were removed today in clinic. She had intact tendon function throughout the left hand including EPL and FPL. Examination was otherwise unremarkable.

Check x-rays taken today of the left wrist demonstrate maintained satisfactory alignment of the fracture and the metalwork.

I have reassured Lorraine regarding the clinical and radiological findings. I have explained that she can now begin gently mobilising the left wrist as able. I have given her a wrist splint for support which she can wean out of as able. We will see her back in 4 weeks' time with further check x-ray of left wrist on arrival.

Kind regards.

Yours sincerely,

Greg [redacted]

CHI: 0204686547

Your patient recently attended hospital having sustained a fracture and they were subsequently assessed for osteoporosis / fracture risk on the above date.

The outcome at this stage is as circled below:

(a) An appointment for full assessment by the FLS with DXA will be arranged

b) Further assessment including DXA is not indicated – treatment as recommended

c) He/she declined further assessment &/or treatment

d) See below

Osteoporosis Risk Factors
Past history of fragility fracture(s)

Fracture Risk Factors
History of previous fracture (>50yr)

Fracture History
Left Radius and/or Ulna (Aged 53)

Treatment Recommendations
Withhold treatment until after clinic review

Lifestyle Recommendations
(None)

Densitometry: DXA scan will be arranged but will be delayed due to the impact of COVID19 and subsequent restrictions placed on this service.

This patient's fracture history and clinical risk factors were obtained from hospital electronic information systems and he/she has not been seen in person by the Fracture Liaison Service.

Due to current changes to outpatient clinics in response to COVID-19 there will unfortunately be a delay in appointing patients for DXA assessment. Your patient will be held on our waiting list and appointed when it becomes possible to do so.

We note that Ms Moffat required short courses of high dose steroids in September and again in December 2021. If she requires further high dose steroids (the equivalent to ≥7.5mg prednisolone / day for >3 months) please get in touch and we will upgrade Ms Moffat to a priority DXA scan.

Yours sincerely

Reason for Referral: Anterior Eye / Corneal

Mrs Moffat attended for a routine sight-test after noting a 'film like sensation across vision' that she has to blink away to get clear vision.On a full eye health check, I noted her to have evaporative dry eye with associated issues.I have advised Mrs Moffat on dry eye management techniques and have advised her to use comfort drops qds to alleviate symptoms. I would appreciate if you could prescribe her Clinitas 0.4% (Clinitas Multi), this may need to be on a repeat prescription basis as she has sjogren's sydrome therefore this may be a chronic issue. Many Thanks

Yours Sincerely,

9 JAN 2020

Clinical Comments:
DIAGNOSIS:

Alopecia areata

MANAGEMENT:

Gets annual wig prescription

Thank you for referring this 51 year old lady. Her referral letter stated that she was wishing to discuss Ruxolitnib. There are currently no biologic medications licensed for use for alopecia although I understand that there may be clinical trials starting soon. However, on meeting Lorraine today her main concern was regarding her wig prescription. She has been getting an annual wig prescription from [redacted] Moffat, the hair specialist nurse, and generally has been using this to obtain a hairpiece. However, in August she was advised by her hairdresser that she should try a wig instead. However she is not happy with the wig and was requesting a new prescription for a hairpiece for this instead. She states she is very distressed by this and tells me it is affecting her mental health. She tells me she is seeing a psychiatrist and has also attended the practice to discuss her low mood.

On examination she has hair regrowth over the top of her scalp with fine white hairs and currently has long thick hair around the sides and occipital regions. I will contact Specialist Nurse [redacted] Moffat to clarify the situation regarding her wig prescription.

Yours sincerely

Dr S. Drummond

Our Ref SC/PMM

Dear Dr [redacted]

Lorraine Moffat - DOB: 02.04.1968 - CHI: 020 468 6547
Flat 44, 3 Greenhill Court, Glasgow G73 2DH

I had the opportunity to review the above patient in my capacity as Consultant Liaison Psychiatrist at the Queen [redacted] University Hospital on 27 August 2019.

The patient was admitted following an [redacted] on 26 August 2019. I understand she took a packet of Sertraline 100mg tablets, she was unable to tell me how many tablets were in the packet. She took the [redacted] on impulse along with 4 to 5 units of alcohol. She told me she had not left a [redacted] note and that she had not had an argument with her [redacted] (as documented in the medical notes). She informed me that she had been feeling a "bit low" for the last 2 weeks, I understand that she has had Alopecia for 12 years as well as Sjogren Syndrome. She was previously using a weave hair-piece but was informed by her hairdresser that this was pulling out the hair and she was advised to switch to a wig. This caused her some distress and she felt that she was struggling to be able to do the things she would normally be able to do with a wig (such as swimming). She described being in a "bad mood" so she used alcohol to cope with this and then took an impulsive [redacted] She denied any suicidal intent and texted her partner who called an ambulance. She regretted the [redacted] and was glad to be alive. She told me "I was stupid". There was no previous [redacted]

She had been on Sertraline a year ago but discontinued this as she was doing well. She developed low mood 4 years ago following the death of her [redacted] She has never had any

NHS Greater Glasgow and Clyde

Lorraine Moffat
Chi: 020 468 6547

contact with Psychiatric Services in the past and she has never seen a counsellor or had any talking treatment. She understood that she was coming to terms with her current wig and she was hoping that her hair would grow back so that she could use a hair-piece again.

She is working full time in a pub and enjoys her job. She described herself as being quite an independent woman. She has 2 adult children who are in their 30's. She is currently in a relationship (for 2 years) which she described as being fairly okay but stated it has its ups and downs. She lives separately from her [redacted] She has a good support network of family and friends. She did not report any other symptoms other than feeling stressed and low in mood on and off for the last 2 weeks. Her mood was, however, not pervasively low and it had not impacted on her day to day functioning. There was no evidence of any negative cognitions about the future and she was forward planning, there was no hopelessness. She was not keen to consider any talking treatment for her Alopecia and she felt she could deal with this on her own. She also told me that she did not feel she was currently depressed and she did not want to go back on to antidepressants. I advised her that she should get in touch with her GP practice if she felt her mood was deteriorating in the future.

On **mental state examination**, she was well kempt. Her mood was euthymic, she was reactive and she described herself as feeling okay but embarrassed that she took an [redacted] There were no negative cognitions about herself or the future. There were no abnormal perceptions or any delusional beliefs. She was oriented in time, place and person and she had good insight.

Impression

[redacted] [redacted] whilst under the influence of alcohol. No evidence of suicidal intent. Patient does not have any pervasive low mood that would be in keeping with a depressive disorder at the current time.

Recommendations

Patient can be discharged home when medically fit. I have advised the patient get in touch with the GP Practice if she feels her mood has not improved following discharge or if it is deteriorating further. I have given her a list of emergency contact numbers for Out of Hours, NHS24 and Breathing Space which she can contact if required.

I have discharged the patient from Liaison Psychiatry.

Yours sincerely

Dr Shalini Cummings
Consultant Liaison Psychiatrist

Clinical Comments:

Dear Colleague,

Ms Lorraine Moffat (51y) was admitted to us on the 26/8/19 with a query serotonin syndrome following an [redacted]28 sertraline 100mg tablets, under the influence of alcohol. She described this as 'a moment of madness' and expressed no further suicidal ideation thoughts. On admission she was not hyper-reflexic and did not have clonus. She was reviewed by liason psychiatry and the stressor of alopecia in her life. She is now medically fit, serotonin syndrome has been ruled out [redacted] we are happy to discharge her back into your continuing care. Please follow up with Ms Moffat.

Dear Dr [redacted]

Lorraine Moffat; D.O.B: 02/04/1968; CHI: 0204686547
Flat 44, 3 Greenhill Court, Glasgow, G73 2DH

Many thanks for asking us to see Lorraine who as you know had a low grade smear most recently. As you know she has had abnormal smears in the past. She is a smoker and menopausal about 4 years ago.

Detailed colposcopic assessment revealed multiple acetowhite changes with features probably more in keeping with virus infection than [redacted] I have taken a biopsy to confirm diagnosis and will be in touch with the results and organise management based on histology accordingly.

Kind regards

Yours sincerely

[redacted] Hawthorn

Dear Miss Moffat

Missed Appointment

It has been highlighted that you appear to have not recently attended an appointment with the Practice on 20/03/2016 . We understand that mistakes happen, so please aim for this not to occur again, as it does stop us offering that appointment to another patient.

If you cannot attend, then please always try to cancel the appointment.

I hope you will now pre-cancel any appointments that you cannot attend.

Thank you for your anticipated help.

I have this lady's blood results available. Her full biochemical profile including thyroid function tests, creatinine kinase, c-reactive protein and bone profile were normal. Her full blood count was normal. Her ESR was 13. She was rheumatoid factor negative, her compliment levels were normal and her anti nuclear antibody remains positive at 1 in 2560 with a staining pattern consistent with anti Ro antibodies as previously identified.

As mentioned in my letter although I think this lady is likely to have sjögren's syndrome as her underlying rheumatological diagnosis, at present to specific treatment is required. I would however be happy to see her again in the rheumatology clinic at your request if you feel she is developing any new problems that may be related to this underlying diagnosis.

In the meantime she awaits review by physiotherapy.

Yours sincerely

Dr [redacted]

Consultant Rheumatologist

Dear Ms Moffat ,

Further to your Rheumatology clinic appointment I have the results of your investigations available. I did a number of blood tests on the day. Your kidney function, liver function, thyroid function and bone chemistry tests were all normal. Your blood count is normal. A blood test known as creatinine kinase which checks for inflamed muscles was also normal. Blood tests looking simply for inflammation known as CRP and ESR were also normal.

In terms of specific blood tests looking for auto-immune disorders, as before, your anti-nuclear antibody continues to be positive and you have an antibody in your blood known as anti-Ro antibody which was present previously. Blood tests for rheumatoid arthritis were negative.

As I mentioned in the clinic the antibody tests that are positive in your case are commonly seen in the condition known as Sjögren's syndrome. I do not think, however, that the type of joint pains that you were describing in the clinic fitted with the arthritis that people with Sjögren's syndrome normally have. I, therefore, do not think that any specific treatment for Sjögren's syndrome is required. I have sent the results of your tests to your GP in addition to yourself and they know that should your joint symptoms change in any way they can refer you back up to the clinic.

Created on 17/03/2014 10:04 by [redacted] Irvine Page 1 of 2

I have also made a referral to my Physiotherapy colleagues and they will contact you with and appointment in due course.

No further follow-up appointment with myself is required at this point.

Kind regards

Yours sincerely

[redacted]

Address:	72 Neilvaig Crescent Glasgow G73 4FH

Attendance

Attended:	27/02/2014 13:40
New/Return:	G N RHEUMATOLOGY
Referral Source:	General Practitioner
Consultant:	Dr [redacted] McCarey
Specialty:	Rheumatology
Clinic:	GRDMRH8-DR MCCAREY THURSDAY PM

Clinical Comments:

Thank you for referring this patient to the Rheumatology Clinic where she was seen today. Problems are as follows:

1. Right arm pain: She has had aches and pains on and off over the years, predominantly affecting her knees but, in the last year or so, she has developed pain in her right arm. This localises to the forearm muscles, the epicondyles of both elbows and her right shoulder. Occasionally, she has symptoms of pins and needles in the tips of her fingers but in no other areas. This is not in a median nerve distribution. There has been no joint swelling, early morning stiffness is not a major feature. Her symptoms generally are improved by movement and there is some inactivity gelling.

On examination, there was no evidence of joint swelling or deformity. All joints exhibited a good range of movement but, on examination specifically of the right arm, she had medial and lateral epicondylitis, +ve on provocation testing. She also had a painful arc affecting her right shoulder. The left arm was less affected.

She described her daily work to me. She [redacted] a newsagents and is lifting from below herself to above head height on a regular basis. She has been in this particular line of work on and off for 20 years. I have explained to her that she has clinical evidence of medial and lateral epicondylitis at the elbow as well as supraspinatus tendonitis at the shoulder. I am asking my physio colleagues to see her with respect to this. I think some targeted injections with the provision of an epicondylar clasp and also some advice regarding joint protection might be helpful.

There is no evidence to suggest that she has an inflammatory arthritis.

2. Probable Sjögren's syndrome: She has an interesting history of vitiligo and alopecia. She developed alopecia 5 years ago and this diagnosis was made in the SGH. She also has photosensitivity although this has become less prominent in recent times. She has an excessively dry mouth but does not have dry eyes. Her [redacted] is 1:160 and she was Ro +ve. On going through her musculoskeletal complaints, they do not sound typical of those associated with connective tissue diseases. Undoubedtly though, I think she does have anti-Ro Abs and dry mouth and it is likely that she also has Sjögren's syndrome as well as vitiligo. She does not meet the diagnostic criteria for lupus. I am repeating her immunology as listed below but assuming it has the same pattern, I do not think any specific treatment is indicated.

We should, of course, be vigilant in a patient who has a number of other auto-immune conditions for any emerging auto-immune major organ manifestations but I think that, overall, her risk of this is low.

I will inform you of the results of her immunology and repeat bloods when I have them available. Otherwise, she does not require any routine monitoring in the Rheumatology Clinic. Clearly, should any new symptoms appear, I would be happy to see her again at your request. From the point of view of her mechanical symptoms in her right arm, I hope that the input from our physio will be helpful.

Yours sincerely

[redacted]

Consultant Rheumatologist

Requested Outpatient Investigations:
FBC, ESR, biochemistry, CRP, [redacted] complement, rheumatoid factor, CK

Medication Note: Budesonide inhaler, Terbutaline inhaler, Tiotropium inhaler, Co-codamol

Follow-up arranged: Referred to physio but no routine rheumatology follow up

Electronically Signed: Dr [redacted] Consultant

Clinicians are aware that emotions play an important part in most illnesses. If your clinician knows about these feelings she or he will be able to help you [redacted]

This questionnaire is designed to help your clinician to know how you feel. [redacted] each item and **underline** the reply which comes closest to how you have been feeling in the past week.

Don't take too long over your replies; your immediate reaction to each item will probably be more accurate than a long thought-out response.

NHS Greater Glasgow

I feel tense or 'wound up':
Most of the time
A lot of the time
From time to time, occasionally
Not at all

I still enjoy the things I used to enjoy:
Definitely as much
Not quite so much
Only a little
Hardly at all

I get a sort of frightened feeling as if something awful is about to happen:
Very definitely and quite badly
Yes, but not too badly
A little, but it doesn't worry me
Not at all

I can laugh and see the funny side of things:
As much as I always could
Not quite so much now
Definitely not so much now
Not at all

Worrying thoughts go through my mind:
A great deal of the time
A lot of the time
From time to time but not too often
Only occasionally

I feel cheerful:
Not at all
Not often
Sometimes
Most of the time

I can sit at ease and feel relaxed:
Definitely
Usually
Not often
Not at all

I feel as if I am slowed down:
Nearly all the time
Very often
Sometimes
Not at all

I get a sort of frightened feeling like 'butterflies' in the stomach:
[redacted] t all
Occasionally
Quite often
Very often

I have lost interest in my appearance:
Definitely
I don't take as much care as I should
I may not take quite as much care
I take just as much care as ever

I feel restless as if I have to be on the move:
Very much indeed
Quite a lot
Not very much
Not at all

I look forward with enjoyment to things:
As much as ever I did
Rather less than I used to
Definitely less than I used to
Hardly at all

I get sudden feelings of panic:
Very often indeed
Quite often
Not very often
Not at all

I can enjoy a good book or radio or TV programme:
Often
Sometimes
Not often
Very seldom

Dear Dr [redacted]

LORRAINE MOFFAT DOB: 02/04/68 (SG99796718)
54 LOCHLEA ROAD, RUTHERGLEN GLASGOW, G73 4QH

I reviewed this 42 year old para 2 lady on behalf of Dr Bjornsson in the Gynaecology clinic today. As you mentioned she has been struggling with small urine leaks over the past year, but on further questioning this would actually appear to be a more mixed bladder picture. She has a chronic smokers cough and experiences small urine leaks, but does not require to wear pads. Moreover, she experiences nocturia, urge and frequency with occasional urge incontinence. Her periods are not problematic and she has no bowel disturbance. She keeps otherwise generally quite active. She is allergic to Flucloxicillin.

On examination the abdomen was slim with a normal vulva, vagina and cervix. There was no demonstrable stress urinary incontinence today. There was satisfactory vaginal sensation and only slightly reduced tone.

I have explained to Lorraine that her symptoms are common, and she should employ the usual lifestyle measures such as avoidance of caffeine, adequate fluid intake etc. to optimise things. She is happy to commence a three month trial of Vesicare to see if this helps settle the overactive component. I shall refer her to our pelvic Physiotherapist regarding the stress leaks. I have offered her a return appointment in four months time to see how she is getting on.

Yours sincerely,

Dr V Flanagan
ST6 to Dr Bjornsson

Dear Dr [redacted]

LORRAINE MOFFAT DOB: 02/04/68 (SG99796718) CHI: 0204686547
54 LOCHLEA ROAD, RUTHERGLEN GLASGOW, G73 4QH
Consultant: Dr. [redacted]

This patient was seen for review at the dermatology department today.
Diagnosis: Alopecia areata, and vitiligo.
Treatment: Try stopping Protopic 0.1% but restart if vitiligo recurs, for UVB phototherapy.
Review: None arranged.
This lady's vitiligo remained the same despite Protopic and I have suggested she try stopping this to see whether there is any difference but she should restart if her vitiligo becomes worse. I have referr4ed her to the camouflage clinic for some make up advice. While here she asked me about UVB treatment and I have discussed this with Dr. Drummond. We have arranged some UVB for her and will write to her with regard to this. If she is still using the Protopic she should stop this prior to UVB treatment.

Kind regards.

Yours sincerely

Dr. Janika Borg

DIAGNOSIS : Alopecia areata
Vitiligo

I reviewed this woman at the Hair Clinic today. Since we last saw her she had lost all of her facial hair but happily this has now completely regrown. The hair on her scalp is also regrowing and she is delighted with this. On examination today there was extensive terminal white hair growth over the scalp. There were no obvious patches of active areata. I have emphasised to Ms Moffat that these signs are excellent and we can simply hope that the progress continues. I have explained that if the hair continues to grow then hopefully it should start to repigment.

I have given her an appointment for the clinic in 6 months if she is running into problems but if all goes well I have asked her simply to cancel this.

With kind regards

Yours sincerely

54 LOCHLEA ROAD, RUTHERGLEN GLASGOW, G73 4QH
Consultant: Dr A. Drummond

Diagnosis: Alopecia areata - now recovering
Vitiligo
Treatment: Protopic 0.1% once daily for 2 month
Follow up: January 2010

I was delighted to see that this lady was experiencing re-growth of the hair of her scalp, her eyelashes and her pubic area, albeit with altered colour. Interestingly when she began to notice re-growth of the hair, she simultaneously began to develop vitiligo affecting her chest, back, upper arms and face, with sparing of her hands. She has not yet received any treatment for this and as per Dr Drummond's letter I have given her a prescription for some Protopic to try although I have counselled her about the limited efficacy of treatment we have for this condition.

Yours sincerely

Thank you for your letter on this patient. She has actually been discharged from the [redacted] Dermatology Clinic and as this is a new problem I have vetted her referral into a new patient clinic. As the vitiligo is affecting her face as well as her body I would be grateful if you could prescribe 0.1% Protopic ointment to be used at night to all affected areas. Unfortunately, as you are probably aware response to treatment is variable and often disappointing. However, response can be assessed when she attends Dr [redacted] clinic in November or at the [redacted] depending on which appointment is first.

Kind regards.

Many thanks for referring this 41 year old woman to see me at the Hair Clinic. She first developed alopecia areata in 1995 when she had a limited area of loss which spontaneously regrew. A year ago however she developed initially patchy loss which has extended to involve all of her scalp, eyelashes, eyebrows and body hair. She is however seeing some areas of white regrowth at present. Various topical treatments including topical steroids and Protopic have been of no benefit. She has a recent history of asthma but this is not atopic. She is otherwise well. Currently she is receiving low dose Naltrexone for her hair loss. Her mother also suffered from mild alopecia areata.

On examination today she had widespread hair loss consistent with alopecia areata. There was evidence of patchy white terminal hair growth on limited areas of the scalp.

As you mentioned in the referral letter this woman is a [redacted] who [redacted] the kitchens where there are naked flames and very hot ovens. Unfortunately the heat is severely damaging her acrylic wigs. I think this would be an occasion in which it would be appropriate to prescribe real hair wigs. I have explained to the patient however that this needs to be approved by the Clinical Director and Service Manager and will copy them in on this letter.

We did discuss treatment today. Unfortunately she is unable to take the time from work for DCP treatment but we have discussed Dithranol treatment today and she would be keen to try this. I have issued her with a script for this today for her GP and have also given her our written information leaflet on this. We plan to review her again in 6 months.

With kind regards

Yours sincerely

Monday, 16 March 2009

Dear Dr [redacted]

Re: Lorraine Moffat, DOB 02/04/1968.

Your patient attended our nutritional medicine clinic today for advice on her alopecia aerata. Lorraine describes the sudden onset of this while on holiday in Turkey in July 2008. There were no obvious precipitating factors and she has no personal or family history of autoimmune disease.

Lorraine is interested in trying low dose naltrexone (LDN) for her alopecia which has been useful in a number of autoimmune conditions and has a very favourable side effect profile. Lorraine infact works as a dispenser in Dickson's pharmacy which is the major supplier of LDN in the UK. We have started her on 1mg which will be reviewed in one month. I have warned Lorraine she may have some mild side effects to LDN which are commonly fatigue, headache and sleep disturbance.

If you require more information please do not hesitate to contact us at the above address.

Yours sincerely,

Dr [redacted] Gilhooly

LORRAINE MOFFAT DOB: 02/04/68 (SG99796718) CHI: 0204686547
53 LOCHLEA ROAD, RUTHERGLEN GLASGOW, G43 2YE
Consultant: Dr A Drummond

Diagnosis: Extensive alopecia areata - scalp, eyebrows, eyelashes and pubic area
Asthma

Treatment: Modacrylic wigs prescribed
No benefit from topical steroids and Protopic

Follow up: Referral to Hair clinic at Southern General Hospital

I would be grateful if you could review this lady to assess her suitability for DCP and for consideration of real human hair wigs. She has extensive alopecia areata with no improvements on Protopic and topical steroids. She had problems with 2 of her acrylic wigs melting at work as she works as a chef. I have tried to dissuade her from using wigs at work due to safety issues but she feels unable to work without the wig. I wonder if she is a candidate for human hair wigs in such a case.

Yours sincerely

NHS Greater Glasgow and Clyde

Dear Dr Reid

VARENICLINE (CHAMPIX®) PRESCRIPTION REQUEST

One of your patients,

NAME Lorraine MOFFAT DATE OF BIRTH: 21/4/66 is attending an intensive stop smoking group run by Smokefree Community Services. The groups are based on a model developed in the Maudsley Hospital in London and combine NRT, bupropion (Zyban®) or varenicline (Champix®) with group support followed by Smokefree pharmacy support. Following discussion, your patient has requested to use varenicline (Champix®).

Having previously made an unsuccessful supported quit attempt for four weeks with NRT more than 6 months ago, your patient meets the criteria set out in NHS Greater Glasgow & Clyde guidelines for the use of varenicline. I should be grateful if you would assess her/his suitability for this medication based on their past medical history. Some of the potential side effects of the drug have been discussed.

Should your patient be suitable, we would ask that a prescription be issued as follows:

First prescription: (start one to two weeks before quit date)
1. Issue a prescription for "Varenicline Starter Pack" (Prescribe as '1 pack')
2. Advise patient starter pack lasts for two weeks and to contact surgery after one week to organize next prescription.

2nd and 3rd Prescription:
1. Issue a prescription for "Varenicline 1mg, (56 tablets), take one twice daily - dispense weekly"
2. Advise patient prescription lasts for four weeks and to contact surgery after three weeks to organize next prescription.
3. Advise patient that if they fail to attend for motivational support that they may have their prescription terminated.

4th Prescription:
1. Issue a prescription for "Varenicline 1mg, (28 tablets), take one twice daily - dispense weekly".
3. Advise patient this is the end of their course of treatment.

Patients can receive further supplies up to a maximum of an additional twelve weeks if they have remained abstinent and you feel this is necessary. Continue to advise that support is necessary

Many thanks for your assistance.

Yours sincerely

K Stewart

I saw this patient in the dermatology department today.

Diagnosis / Problem:

Atopic eczema — well controlled

I would be grateful if you could prescribe the following treatment:

1) 0.1% protopic oint (tacrolimus).

Other action required:

RF 23/5/08

A further appointment has/ has not been made.
A further letter will/ will not follow.

Yours sincerely,

53 LOCHLEA ROAD, RUTHERGLEN GLASGOW, G43 2YB
Consultant Dr. Angela Drummond

Many thanks for referring this patient who was seen for review at the dermatology department today.

Diagnosis: Alopecia areata.
Asthma
Treatment: 4 x Mod Acrylic prescribed, 0.1% Protopic ointment daily to bald areas, information leaflet on alopecia areata provided.
Review: 4 Months.

This young woman has fairly extensive alopecia areata on the scalp which is still active. She had one patch of this approximately 10 year ago which resolved spontaneously. There was no obvious trigger for this event. As you have already tried topical steroids I have asked her to use Protopic ointment. I have also prescribed her acrylic wigs as the disease is so extensive.

Kind regards

Yours sincerely

Dr. Angela Drummond

Dear Ms Moffat

You had an appointment to see me at the Surgery today but were obviously unable to attend.

I [redacted] from your records that you have failed to attend the last three booked appointments at the Surgery.

The Practice would be grateful if in future, you are unable to attend an appointment, if you could telephone to cancel that appointment. This makes appointments available for other patients who then would otherwise have to wait.

I hope all is well with your health and if there are any ongoing concerns you will make an appointment to discuss these.

Kind regards

Yours sincerely

Dr Janis [redacted]

I would be grateful if you could see this woman who presented today with an interesting patchy rash affecting the necklace area and two areas of her upper arms. The rash has heliotrope discoloration and when pressure is applied blanches freely revealing an underlying area of depigmentation. The rash has a vasculited appearance to it and I have sent her for full blood count and auto immune serology. She is otherwise well with no significant past medical history. I would value your opinion with regard to diagnosis here.

Thank you in anticipation.

RUTHERGLEN G73 2PQ

Dear Dr Reid

Lorraine Moffat, 3/2 4 Kirkonnell Drive, Rutherglen G73 4QW
D.O.B. 02/04/68

Thank you for your note about Lorraine who I saw this morning at the breast clinic. She tells me that her breast pain has never really settled since she first attended here in 1996, but recently it has become much worse again affecting the left breast more than the right. It has a clear-cut cyclical pattern and lasts for seven days before each period. Her periods are regular, she has been sterilised and is not taking any medication which could be incriminated in the development of this problem.

On examination there is a generalised increase in nodularity in the upper half of the left breast but no focal abnormality that worried me. I was seeing her at the immediate postmenstrual phase of her cycle when her breasts will be at their quietest.

As she had not responded in the past to Efmast, Danazol, Bromocriptine or Tamoxifen I thought we should go straight on to the preparation that seemed to be most helpful, namely Provera, taken in a dose of 2.5mgs daily for the last [redacted] days of each cycle. I have given her a breast pain diary chart and asked her to see you to get this prescription some time next week. She is going to monitor her symptoms prospectively and I would like her to go through two full cycles before I reassess the situation. She has a review appointment for May.

Yours sincerely

I would be grateful if you could see this woman who has suffered from benign breast pain for many years. She has previously attended your Clinic (1998) and is known to have fairly nodular breast tissue. She presented today with her old problem of benign breast pain, in association with a new lump she had found in the left breast. Examination revealed a 2cm firm, cystic feeling lump in the upper outer quadrant of the left breast. No lymph nodes were palpable in the left axilla or supraclavicular region. I would be grateful for your assessment of this lump, and suggestions as to further management of her benign breast pain.

Yours sincerely

Re: **Lorraine Moffat – DoB 2.4.68**
223 Galloway Drive, Glasgow G73 4DD

Your patient returned to the clinic and biopsy found: [redacted]1.

This has been treated with: Cold coagulation 12-09-01

There were no complications and an appointment has been made for her to return to the clinic for colposcopic and cytological review in 6 months.

In the meantime if there is any unexpected bleeding, she has been advised to contact this clinic, and should she develop a foul smelling or coloured discharge, she has been advised to see you.

Yours sincerely,

Hassan Ali

Dear Dr [redacted]

Lorraine Moffat DOB 02 04 68
223 Galloway Drive Glasgow

As previously arranged we took this lady to theatre in the Day Surgery Unit on 12 January 2001 for a cystoscopy and to investigate her recurrent urinary tract infections.

There was no underlying cause of these found within the bladder and we took the opportunity to hydrodistend the bladder and gently dilate the urethra in an effort to improve her symptomatology.

We will see her back in the clinic a couple of months time to assess her response to this.

Yours sincerely

Ian N Ramsay

Dear DR [redacted]

LORRAINE MOFFAT DOB 2 8 68 HN 482762
223 GALLOWAY DRIVE GLASGOW

I saw Mrs Moffat at the clinic today following your referral. She gives a history of possible recurrent cystitis having had approximately 10 episodes over the last year. She describes a burning sensation while micturating but also interestingly while having intercourse. This latter finding could certainly suggest a diagnosis of the urethral syndrome rather than recurrent urine infections but obviously we will have to proceed on the basis of the [redacted] diagnosis. She also eluded one other interesting symptom that being a possible peri-urethral fistula as she has noticed her urine escaping from an orifice other than the external meatus.

Unfortunately she was menstruating today and was not keen on examination and I have therefore deferred this till next week when we will also perform a dye test as well as a clinical examination. Should this be normal then I think a cystoscopy would be our initial investigation and we will keep you posted as to her progress.

Yours sincerely

Dear Dr Bremner

Lorraine Moffat – DoB 2.4.68
223 Galloway Drive, Glasgow G73 4DD

Thank you for referring your patient to the colposcopy clinic, whose smear test showed: mild dyskaryosis with viral changes.

Following cervical biopsy it was found that she had CIN1 and HPV. This will be kept under colposcopic review and if it persists or progress then it can be treated.

A further appointment in 6 months time has been arranged.

Yours sincerely

DR RAMSAY

Dear Dr Ramsay,

Re: Lorraine Moffat, D.o.B 2.4.68. 233 Galloway Drive,
Rutherglen, Glasgow, G73

Thank you for seeing this 32 year old woman who gives a one year history of recurrent "cystitis".

Lorraine has a constant feeling of dysuria of varying severities and frequency up to 10 times daily, nocturia x2 and a sensation of urgency. She also describes stress incontinence over this time.

On examination today there are no abdominal abnormalities and bimanual palpation was normal. Urinalysis and MSSU were performed and revealed a definite e-coli infection but on review of her casenotes there have been no previous samples submitted over the past year, although several courses of antibiotics have been administered. She tells me these have partially alleviated her symptoms but the dysuria and frequency have definitely been a consistent chronic problem.

In her past history, this lady has had 2 pregnancies, one SVD and one low cavity forceps delivery in 1985. She has been sterilised and is currently awaiting colposcopic examination to follow-up mild dyskariosis on her cervical smear of August 2000.

Many thanks.

Yours sincerely

DR J LYNCH

MRS LORRAINE MOFFAT
223 GALLOWAY DRIVE
RUTHERGLEN
GLASGOW
[redacted]73

Dear Lorraine,

You recently attended the surgery for a cervical smear test and we now have the result to hand. Your smear has revealed some mild abnormalities in the cells of the neck of the womb and as a routine in this situation, the laboratory have recommended that we refer you for a more detailed examination of the cervix. This is called colposcopy, and the examination is carried out at the [redacted] Infirmary hospital. It is similar to having a smear test taken.

Your smear does not show cancer, but very mild changes which, if left untreated over a period of many years, could lead to a more worrying problem developing. It is therefore important that you attend for the appointment as enclosed.

You will find an appointment card and an instruction booklet enclosed. If you have any questions regarding this or wish to discuss it in more detail, please do not hesitate to contact one of the Doctors or our Practice Nurse at the Health Centre.

Yours sincerely

DR J LYNCH

GLASGOW
G73 2PQ

Dear Dr Bremner,

LORRAINE MOFFAT, 223 GALLOWAY DRIVE, GLASGOW, G73 4DD
D.O.B. 2.4.68

Thank you for your note about this 30 year old lady who found several lumps in her left breast about six months ago. As you know she has had severe cyclical mastalgia for about six years which has been resistant to Bromocriptine, Danazol and Tamoxifen. There is no other past medical history of note apart from sterilisation. Her periods are regular and she is on no regular medication at present. She has two children who were not breast fed and there is no family history of breast cancer.

On examination there are two prominent slightly tender areas of breast tissue in the upper outer and lower outer quadrant of the left breast. There is a soft, mobile and well defined lump in the 7 or 8 o'clock position close to the areolar margin in the same breast. This feels like fatty tissue. For her reassurance I have taken an FNA of this which showed blood and adipose tissue only with no epithelial cells.

She is still complaining bitterly of her cyclical mastalgia and I think it might be worthwhile trying Provera 2.5mg for ten days beginning on the 16th day of her cycle. I have strongly reassured her as far as the lump in her breast is concerned and have arranged to see her again in three months time.

Yours sincerely,

F. BRINCKER

Incapacity for work

Patient's name: Mrs Lorraine Moffat

Date of birth: 2 / 4 / 65

This patient has been claiming benefit because they are incapable of work. Their ability to work was recently assessed using the *all work test*.

The adjudication officer has decided that your patient is capable of work from 19 / 2 / 97 .

Adjudication officer's are people who decide whether the law says someone is entitled to benefit or not.

The adjudication officer based their decision on
- information given by your patient, and
- a detailed medical assessment carried out by a doctor from the Benefits Agency Medical Service.

If the adjudication officer decided that there are any limitations or restrictions on your patient's ability to work, a summary of these will have been given to your patient.

What this decision means

You no longer need to give your patient any more medical certificates unless
- your patient's condition becomes significantly worse, or
- your patient wants to claim benefit because of a new medical condition.

Where to get more information

You can get more information about what to do now and in the future in the booklet *A Guide for Registered Medical Practitioners*. If you do not have a copy, you can get this booklet from the Health Authority you have a contract with.

Dear Dr Reid

LORRAINE MOFFAT DOB 2/4/68
223 GALLOWAY DRIVE GLASGOW G73 4DD

Lorraine has not achieved any benefit from Tamoxifen and it looks as though her breast pain is going to be refractory to all forms of treatment. I have asked her to stop her Tamoxifen, the only alternative now would be to give her a 10 day course of supplementary progesterone during the second half of the cycle on the assumption that the pain could be due to an imbalance between oestrogen and progesterone. I would like all the Tamoxifen to be washed out of her system before we do that. I am seeing her in a months time to discuss that further with her.

Yours sincerely

Dear Dr Bremner,

LORRAINE MOFFAT, 223 GALLOWAY DRIVE, GLASGOW, G73 - D.O.B. 2.4.68

I reviewed this lady at Mr [redacted] Breast Clinic today. She tells me that she has gained no benefit from her Bromocriptine therapy and that her breast pain is just as severe. She now appears to be in [redacted] After a long chat Lorraine has reluctantly agreed to commence Tamoxifen tablets. I would therefore be very grateful if you could issue her with a prescription for Tamoxifen 20mg daily and we will review her again in the clinic in a further two months.

Yours sincerely,

Alan McGavin

Dear Dr Bremner,

LORRAINE MOFFAT, 223 GALLOWAY DRIVE, GLASGOW, G73
D.O.B. 2.4.68

Lorraine's symptoms have failed to improve with Bromocriptine. She is very nodular in the upper outer quadrant of the left breast. Before being certain that Bromocriptine will be of no benefit I thought she would worth treating for a further two months and if that fails perhaps a trial with Tamoxifen might be worthwhile.

I have asked her to continue with her therapy and to fill in her breast pain diary chart.

Yours sincerely,

Dear Dr Bremner,

LORRAINE MOFFAT, 223 GALLOWAY DRIVE, GLASGOW, G73
D.O.B. 2.4.68

Lorraine continues to have moderately severe breast pain more troublesome in the left breast than the right. It has a clear cyclical pattern. I think she should now start Bromocriptine. Because of nausea as a side effect it has to be introduced slowly and I have attached the dose schedule at the bottom of this letter.

I will see her again for review in eight weeks by which time I hope she will have had at least one full cycle and part of a second cycle on the Bromocriptine so that we can assess the response.

Yours sincerely,

[redacted] C. [redacted]
CONSULTANT SURGEON

Bromocriptine - 2.5mg on 1st day, or daily 2-3 days then 2.5mg twice daily for 14 days.

[redacted]

Dear Dr. Bremner,

LORRAINE MOFFAT, 223, GALLOWAY DRIVE, G.73. DOB 2.4.68.

Thank you for your letter about this young woman. I note that she has failed to respond to Efamast and Danazol for her cyclical breast pain and nodularity. Examination confirmed the generalised benign nature of the problem that you had outlined in your letter. There was certainly nothing of a sinister nature that concerned me.

Rather than embark on third line therapy using Bromocriptine I thought that it might be better to chart the extent and severity of her pain and I have given her a breast pain diary chart to do this. I have also suggested that she might obtain significant relief by reducing the amount of caffeine and fat in her diet. [redacted] She takes a fair amount of normal coffee supplemented by Coke and Irn bru both of which contain high levels of caffeine. I think this will make a significant difference and I will see her again in two months.

Yours sincerely,

[redacted] C. [redacted]

Dear Mr Smith

This girl has suffered from fairly extensive fibrocystic disease for several years now but at the present time her breasts are very tender indeed and there are some very firm, craggy lumps particularly on the left side.

Despite anti-inflammatories, antibiotics and Efamast the situation is not improving and I should be most grateful for your opinion re further management here.

Kind regards.

Yours sincerely

Dear Dr. Reid,

LORRAINE MOFFAT D.O.B. 2.4.68
223 GALLOWAY DRIVE, GLASGOW. G73 4DD

Thank you for referring this above patient to Dr. Munro's Dermatology Clinic where she was seen on 1st February 1994.

Diagnosis Alopecia areata

Treatment No action is required

Follow up Not intended

Lorraine's problem with alopecia seems to be self limiting as expected. She also complains of loss of eye lashes but it was explained this should also be self limiting and there is no further action required.

Yours sincerely,

S MCKEON,
SHO IN DERMATOLOGY

I would be grateful for your opinion and advice on the above named patient. A brief outline of history, symptoms and signs is given below:

Dear Doctor,

This young woman presented about a month ago with one patch of alopecia on her scalp. Over the intervening time several other patches have appeared. The skin of the scalp appears healthy but she is understandably concerned about the prognosis here.

I would be grateful for your opinion.

Thanks for seeing her.

Yours sincerely,

DR. D. MARK REID.
