Ref: 100857

Subject: Data Subject Access Request – Hospital / NHS Trust Records

Client Name: Mr Wesley Michael Phillips

Client Reference: 100857

Client Address: 1/1 25 Carwood Street, Greenock, PA15 2TJ

Date of Birth: 05/02/1982

Also Known As:

Name in Care:

NHS Number (if known):

Previous Addresses (if applicable):

Dear Sir/Madam,

We act on behalf of the above-named individual and submit this request under Article 15 of the UK General Data Protection Regulation and the Data Protection Act 2018.

Scope of Request

We request disclosure of all personal data held in relation to our client across all departments within your organisation.

This includes, but is not limited to:

Accident & Emergency (A&E) records

Inpatient and outpatient records

Admission and discharge summaries

Clinical notes and observations

Safeguarding referrals and alerts

Mental health liaison or crisis team involvement

MMA Legal Limited, a company registered in England and Wales with registered number 13900519

Authorised and regulated by the Solicitors Regulation Authority number 8000579

Registered Office: MMA Legal Limited, Stok, 43-59 Princes Street,, Stockport, SK11RY

DEED OF AUTHORITY & CONSENT

THIS DEED is made on the date of signature below by (the "Client")	
Full Name:	Wesley Michael Phillips
Date of Birth:	05/02/1982
Previous Names (if any):	
Current Address:	1/1 25 Carwood Street Greenock PA15 2TJ
Previous Addresses (relevant to care placements):	
CHI / NHS Number (if known):	

IN FAVOUR OF (the "Representative")	
Firm Name:	MMA Legal Limited
Address	43-59 Princess Street, Stockport
Postcode	SK1 1RY
Email	evidence@mmalegal.co.uk
Telephone Number	0161 563 0816

1. STATUS AND CONSTRUCTION

- 1.1. This Deed is executed as a deed and constitutes valid written authority for the purposes of:
 - 1.1.1. UK GDPR
 - 1.1.2. Data Protection Act 2018
 - 1.1.3. Common law confidentiality
 - 1.1.4. Any related statutory, regulatory or supervisory framework
- 1.2. This Deed shall be interpreted purposively and broadly to give full effect to the Client's intention that all personal data and Records relating to them be disclosed to the Representative, subject only to lawful statutory restriction.
- 1.3. This Deed is intended to provide clear and comprehensive authority for disclosure of the Client's personal data.

2. APPOINTMENT

- 2.1. The Client appoints the Representative to act fully on their behalf in connection with:
- 2.1.1. An application to Redress Scotland;
 - 2.1.2. Any review, reconsideration or appeal;
 - 2.1.3. Evidence gathering and submission;
 - 2.1.4. Any associated advisory, compensatory or restorative process.
- 2.2. Requests made by the Representative shall be treated as made personally by the Client.

3. SCOPE OF AUTHORITY

- 3.1. This Authority applies to all public and private bodies including (without limitation):
- 3.1.1. Local Authorities and Councils
 - 3.1.2. NHS Boards and GP Practices
 - 3.1.3. Health & Social Care Partnerships
 - 3.1.4. Integration Joint Boards
 - 3.1.5. Religious bodies and orders
 - 3.1.6. Residential and foster care providers
 - 3.1.7. Education authorities and schools
 - 3.1.8. Government departments
 - 3.1.9. Archive services
 - 3.1.10. Insurers holding historical liability files
 - 3.1.11. Successor, merged or restructured public bodies

3.2. The Authority applies whether Records are:

- 3.2.1. Archived, microfiche, digitised or handwritten;
- 3.2.2. Stored off-site by contractors;
- 3.2.3. Held by dissolved or reconstituted institutions;
- 3.2.4. Transferred following statutory reorganisation.

3.3. The Client requests that records not be withheld solely on administrative grounds such as archival storage or institutional restructuring including, for example:

- 3.3.1. The institution has closed or restructured;
- 3.3.2. Records are archived or require manual retrieval;
- 3.3.3. Records are held by insurers or successor bodies;
- 3.3.4. Retrieval involves time or administrative burden.

4. SPECIAL CATEGORY DATA – EXPLICIT CONSENT

- 4.1. For the purposes of Article 9 UK GDPR and Schedule 1 Data Protection Act 2018, the Client gives explicit consent to disclosure of all special category data including:

- 4.1.1. Physical and mental health records
- 4.1.2. Psychiatric and psychological reports
- 4.1.3. Therapy and counselling notes
- 4.1.4. CAMHS records
- 4.1.5. Social work and safeguarding files
- 4.1.6. Ethnicity or religious data where recorded

This includes all NHS and private medical providers.

In the event of non-compliance, refusal, or unreasonable delay in responding to a lawful request made under this Deed, the Client and/or the Representative reserve the right to pursue any statutory or regulatory remedies available under applicable law.

This may include raising concerns with the relevant supervisory authority or regulator where appropriate.

Nothing in this Deed limits the Client's rights under the UK GDPR, the Data Protection Act 2018, or any other applicable statutory framework.

Withdrawal shall not invalidate disclosures already made in reliance upon this Deed.

EXECUTION AS A DEED

Consultations	
29/06/2026 14:19	<u>Dr Iain Savage at Ardgowan Medical Practice</u>
History	Since reducing mirtazapine to 30mg od has felt lower in mood/motivation and struggling with sleep. Wishes to go back up to previous dose. Note on sertraline and mirtazapine long term. No thoughts of dsh/suicidal ideation. Agree to request, aware any issues re-contact but if no issues rv annually. Discussed weight - refer to live active as weight mx referral in place but can take up to a year.
17/04/2026	<u>Mrs Emma Whittaker at Ardgowan Medical Practice</u>
Examination	Bloods - sample obtained from L arm no issues - sent to labs. Patient asked to contact practice in 7 days for results of tests.
Test Request	Liver Function Tests - <i>Completed</i>
02/03/2026	<u>Dr John McPherson at Ardgowan Medical Practice</u>
Additional	Serum HDL cholesterol level 0.9 Plasma total cholesterol level 5.7 mmol/l ASSIGN Score 9.78 mmol/l ASSIGN
27/02/2026 10:21	<u>Dr John McPherson at Ardgowan Medical Practice</u>
History	Wanting weight loss help. Scales suggest ??180kgs but not sure if too heavy for them, electronic ones not registering. BMI mid to high 40s. Goes gym but not losing weight. On mirtaz 45mg at night but keen to reduce ?Stop,
Comment	Plan bloods as listed initially, Patient asked to contact practice in 7 days for results of tests. , can reduce Mirtaz to 30mgs initially then review ??Refer GWMS when we know results blood

08/08/2022 09:53	<u>Mrs Heather Nesbitt at Ardgowan Medical Practice</u>
Problem	Skin lesions
History	Patient looking for review of skin lesions. Note this was reviewed by OG in June.
Examination	Lesion on L shoulder. Round and 1cm in diameter. Raised. No border. No recent colour change. symmetrical. Appears to be seb keratosis. Also has similar lesion at R scapula. Smaller in size around 7mm. Again no recent colour changes, is symmetrical and not raised. No bleeding.
Comment	Discussed care of skin, especially in the sun. Asking about removal of skin tag at gluteal area. Advised that waiting lists are very long and would only be done if causing problems. Is going to investigate if this can be done privately. Discussion of red flags with patient and worsening statement given. Will further review in there are any changes in skin.
06/07/2022 12:35	<u>Dr James Owen Gallagher at Telephone Consultation</u>
History	Failed encounter - no answer when rang back I called Criminal Justice Team again--> . Await contact.

08/06/2022 09:26	<u>Dr James Owen Gallagher at Telephone Consultation</u>
History	Pt called re changing skin lesions and sent pictures to patient mailbox. 1. Left shoulder lesion looks like seb keratosis. 2. Right shoulder lesion looks seb keratosis. 3. Left post chest aslo seb Left gluteal skin tag/ keratosis. 4. Skin tag left gluteal area.
Comment	Discussed red flag changes-- call SOS. Otherwise consider cryo when Liquid N2 available.

Dear Dr McPherson,

Re: Wesley Phillips DOB: 05/02/1982 CHI: 0502823496
Address: Flat 1/2 25 Carwood Street, Greenock, Inverclyde, PA15 2TJ

The above named person was referred to the Mental Health Assessment Unit (MHAU), Leverndale by Police Scotland, and was assessed by telephone on 22/04/2025.

Situation

Referral from Police Scotland following contact from Wesley's brother due to concerning text messages.

Assessment

Wesley engaged well in short telephone assessment, there was no requirement for a face to face assessment in the absence of acute risk and Wesley not believing there were any issues.

Writer asked Wesley what had been going on today, he stated 'nothing'. He appeared jovial and in good spirits stating he had been feeling a bit down due to an old friend from rehab dying and him not finding out about this until much later. He stated he was feeling a bit 'fed up' and saying he was 'sick of life' and wanted to take 'some time to himself' and turned off his phone. J his text messaged and was worried about him due to previous issues with his mental health. Wesley states he has been abstinent from drugs for 3 years following rehab in Liverpool and Germany.

He states he rarely drinks alcohol and was not intoxicated at time of assessment. Wesley reports being 'fed up' due to waiting for his provisional driving licence to come through and

states he has been back and forward to his GP for a supporting letter _____ for a while now and feels he is getting nowhere. He stated he was surprised the Police had shown up today and this was not his intentions. Writer asked Wesley what his plans were for today and he stated he wanted to just turn his phone off and take some time to himself watching TV. He denied any thoughts of suicide or self harm. He states he sleeps well with aid of Mirtazapine. Denies any issues with appetite. He reports being prescribed Haloperidol aged 8 for tics but denies any recent tics and feels he has 'grown out of this'. He reported no issues with his mental state stating 'everything's alright' and reported just feeling a bit fed up due to no-one telling him for ages about his friend passing away. Plans to spend the day with his friend and reports might go for a walk. Pleasant and engaging during assessment, no evidence of psychosis and no risks identified.

Recommendation

Encouraged to contact NHS24 if required.- No requirement for onwards referrals as doesn't feel there are any issues with his mental health.

Risk

22/04/2025 - No new or acute risk identified during assessment.

Yours sincerely

Niamh Jenkins
Unscheduled Care Nurse

Section 1: Incident Details

Details of Incident:

Around 1100 hours on Thursday 7th July 2022 Wesley made contact _____ telling him he had ordered pills on the internet and was going to take them. The call disconnected which he mistook at the time as being Wesley hanging up on him and made several attempts to re-contact him. Wesley would normally ignore the first few calls but eventually pick up. This did not happen.

_____, This prompted him to go to his father's address to get a spare key for Wesley's flat to give it a search. He searched his flat finding no signs of substance misuse or no clues as to where he would be.

Around 2148 hours on the above date _____ police were contacted who attended at what they believed to be Wesley's home. The call wasn't clear whether it was 1/1 or 1/2. Upon getting no reply to the wrong door police attended at the cousins address where they spoke with him he stated that Wesley had just tried to phone _____.

Police re-attended at the correct address and found Wesley safe within. Wesley told police that he was having trouble sleeping and had ordered some over the counter sleeping tablets to help him try to sleep. He went on to say that when he was on the phone to his cousin his battery died and had only plugged it in a short while ago. When asked he stated he was not suicidal and was managing with his mental health issues, and was apologetic for the hassle he had caused _____. He never got a chance due to his phone cutting off to tell them it was sleeping tablets he had ordered.

Police had no concerns with Wesley as he was able to keep himself safe and knew how to get help should he require it.

Multi-agency Discussion at a time of Incident:

Dear Dr Barr

Re: Wesley Phillips DOB 05/02/1982 – Flat 1/2 - 25 Carwood Street Greenock PA15 2TJ

The above named was seen via our Court Liaison Service at the request of the Procurator Fiscal at Greenock Sheriff Court on 19 April 2021 following his arrest for Carry a knife CONTRARY to the Criminal Law (Consolidation) (Scotland) Act 1995, Section 49(1) as amended and Threatening or Abusive Behaviour CONTRARY to Section 38(1) of the Criminal Justice and Licensing (Scotland) Act 2010.

Wesley presented as well kempt and interacted well throughout interview. He offered good eye contact and his speech was of normal rate, tone and rhythm.

Wesley's mood appeared euthymic and he engaged well in conversation, offering good humour. He reports his mood currently to be "4/10" however, stated that his mood was "good" prior to arrest. He reports experiencing some anxiety at present however, states that this is due to being worried about a custodial sentence (last sentence in 2015). Wesley denies experiencing any psychotic symptoms at time of interview and did not appear to be responding to unseen stimuli. He did not express any paranoid or delusional ideation. Wesley reports that he can experience voices when he has been drinking alcohol.

Wesley reports that he has previously self-harmed and has scars on his forearms. He stated that he has not self-harmed for approximately 3 years. At time of interview, Wesley denied any thoughts or plans to harm himself.

Wesley reports previous alcohol and drug use. He spent time in a German Rehab facility in June 2020 and has been abstinent from drugs since. He reports occasional alcohol use. He displayed good insight into how alcohol affects his mood and reports that he plans to remain abstinent from both following release.

At time of interview, Wesley did not present as acutely psychotic or suicidal and did not require diversion to hospital.

Should you require any further information regarding this assessment, please do not hesitate to contact me on the number noted above.

Yours sincerely

Procedure - Flexible Cystoscopy

This gentleman attended for a flexible cystoscopy today to investigate some haematuria. Since I last saw him, he has not had any further visible haematuria and no evidence of any urine infections.

The flexible cystoscopy was completely unremarkable with no cause for bleeding identified.

His ultrasound scan was also unremarkable and we therefore have to discharge him from further follow-up.

Should he have any visible haematuria in the future, let us know and we shall arrange for a CT IV urogram as the next step in the investigations. I am otherwise happy to discharge him from further follow-up.

Yours sincerely,

MR NAFEES AHMAD

Dear Dr McPherson,

Wesley Phillips; D.O.B: 05/02/1982; CHI: 0502823496
FLAT 2B, 20 PROSPECTHILL ST, Greenock, Renfrewshire, PA15 4DL

Despite our radiology department informing us that this gentleman did not attend for his ultrasound scan, we now have a report. This would suggest that he did indeed attend. I am happy to report that his kidneys look normal. I believe he awaits a cystoscopy to complete his investigations for microscopic haematuria following blunt trauma to the suprapubic area.

Yours sincerely

Mr John Graham

Dear Dr McPherson,

Wesley Phillips; D.O.B: 05/02/1982; CHI: 0502823496
FLAT 2B, 20 PROSPECTHILL ST, Greenock, Renfrewshire, PA15 4DL

I reviewed this gentleman in the Surgical Assessment Unit today. He was referred over some concerns regarding a potential bladder injury.

He had been playing football a couple of days ago in goals and did not ever recall being hit with the ball or any trauma to his abdominal region. Yesterday he had a couple of episodes of frank haematuria, this has since cleared up. He has had some dysuria over the last few days.

On examination he was systemically well. Observations were unremarkable. The abdomen was soft and non tender with no evidence of bruising anywhere on his abdomen or groin. Urinalysis demonstrated traces of trace blood that was positive but showed nitrites +++. Post-void residual <100mls.

He was discharged home with oral antibiotics and advised to drink plenty of fluids. Given his bleeding I shall arrange for an outpatient ultrasound scan of his renal tract as well as a flexible cystoscopy for completion. If these are both unremarkable he can be discharged from further follow up.

Should he experience recurrent urine infections following this then he can be referred again.

PLAN:

4. HOW WE USE YOUR INFORMATION

The information you have provided will be used by the GP Practice to carry out its various functions and services including scheduling appointments, ordering tests, hospital referrals and sending correspondence.

Your information, including your name, gender, date of birth and address, will be passed to NHS National Services Scotland where it will be held on the Community Health Index (CHI). This information is used to register you with the GP Practice, transfer your medical records between GP practices in the UK, make payments to GP Practices for medical services provided, and to process and issue medical cards, medical exemption certificates and entitlement cards.

NHS National Services Scotland shares information about you within NHS Scotland to assist in the provision and improvement of NHS services and the health of the public. When we do this, we make sure that the information which identifies you as a person and your health information are separated or anonymised. Health condition and treatment information which could identify you will not be used for research purposes by the NHS unless you have consented to this.

For more information on how NHS National Services Scotland uses your personal information visit www.nhs.uk. If you have any queries or concerns about how your personal information is used by the NHS please ask for the leaflet 'Confidentiality - it's your right', visit the NHS Inform website at www.nhs.uk/infom or ask your GP surgery.

NHS National Services Scotland is the common name of the Common Services Agency for the Scottish Health Service.

5. PATIENT DECLARATION

I declare that the information I have given on this form is correct and complete. I understand that, if it is not, appropriate action may be taken.

To enable NHS National Services Scotland to confirm my eligibility to lawfully register with a GP and for the purposes of prevention, detection, and investigation of crime, relevant information from this form will be disclosed to the NHS Business Services Authority, NHS National Services Scotland, the Home Office, Identity and Passport Service, HM Revenue and Customs, the General Register Office and Local Authorities.

4. HOW WE USE YOUR INFORMATION

The information you have provided will be used by the GP Practice to carry out its various functions and services including scheduling appointments, ordering tests, hospital referrals and sending correspondence.

Your information, including your name, gender, date of birth and address, will be passed to NHS National Services Scotland where it will be held on the Community Health Index (CHI). This information is used to register you with the GP Practice, transfer your medical records between GP practices in the UK, make payments to GP Practices for medical services provided, and to process and issue medical cards, medical exemption certificates and entitlement cards.

NHS National Services Scotland shares information about you within NHSScotland to assist in the provision and improvement of NHS services and the health of the public. When we do this, we make sure that the information which identifies you as a person and your health information are separated or anonymised. Health condition and treatment information which could identify you will not be used for research purposes by the NHS unless you have consented to this.

For more information on how NHS National Services Scotland uses your personal information visit www.nhs.uk. If you have any queries or concerns about how your personal information is used by the NHS please ask for the leaflet 'Confidentiality - It's your right', visit the NHS Inform website at www.nhs.uk/your-nhs or ask your GP surgery.

NHS National Services Scotland is the common name of the Common Services Agency for the Scottish Health Service.

5. PATIENT DECLARATION

I declare that the information I have given on this form is correct and complete. I understand that, if it is not, appropriate action may be taken.

To enable NHS National Services Scotland to confirm my eligibility to lawfully register with a GP and for the purposes of prevention, detection, and investigation of crime, relevant information from this form will be disclosed to the NHS Business Services Authority, NHS National Services Scotland, the Home Office, Identity and Passport Service, HM Revenue and Customs, the General Register Office and Local Authorities.

Patient/Patient's representative signature W. Phillips Date 27-05-2018

PATIENT HEALTH QUESTIONNAIRE (PHQ-9)

Name: Wesley PHILLIPS

Date: 15/9/08

Over the last 2 weeks, how often have you been bothered by any of the following problems? (Use "✓" to indicate your answer)

	Not at all	Several days	More than half the days	Nearly every day
1 Little interest or pleasure in doing things		✓		
2 Feeling down, depressed, or hopeless		✓		
3 Trouble falling or staying asleep, or sleeping too much		✓		
4 Feeling tired or having little energy		✓		
5 Poor appetite or having little energy		✓		
6 Feeling bad about yourself - or that you are a failure or have let yourself or your family down		✓		
7 Trouble concentrating on things, such as reading the newspaper or watching television		✓		
8 Moving or speaking so slowly that other people could have noticed. Or the opposite - being so fidgety or restless that you have been moving around a lot more than usual		✓		
9 Thoughts that you would be better off dead, or of hurting yourself in some way				

add columns: ☐ + ☐ + ☐

(Healthcare professional: For interpretation of TOTAL, please refer to accompanying score list)

TOTAL: ☐

If you have checked off ANY problems, how DIFFICULT have these problems made it for you to do your work, take care of things at home or get along with other people

Not difficult at all ☐
 Somewhat difficult ☒
 Very Difficult ☐
 Extremely difficult ☐

ANXIETY QUESTIONS

	Yes	No
1A In the last 4 weeks, have you had an anxiety attack - suddenly feeling fear and panic?	☒	☐

IF YOU CHECKED "NO" GO TO QUESTION 3.

	Yes	No
1B Has this ever happened before?	☒	☐
1C Do some of these attacks come suddenly out of the blue - that is, in situations where you don't expect to be nervous or uncomfortable?	☒	☐
1D Do these attacks bother you a lot or are you worried about having another attack?	☒	☐

2 THINK ABOUT YOUR LAST ANXIETY ATTACK

	Yes	No
2A Were you short of breath?	☒	☐
2B Did your heart race, pound or skip?	☒	☐
2C Did you have chest pain and pressure?	☒	☐
2D Did you sweat?	☒	☐
2E Did you feel as if you were choking?	☒	☐
2F Did you have hot flashes or chills?	☒	☐
2G Did you have nausea or an upset stomach, or the feeling that you were going to have diarrhoea?	☒	☐
2H Did you feel dizzy, unsteady or faint?	☒	☐
2I Did you have tingling or numbness in parts of your body?	☒	☐
2J Did you tremble or shake?	☒	☐
2K Were you afraid you were dying?	☒	☐

3 OVER THE LAST 4 WEEKS, HOW OFTEN HAVE YOU BEEN BOTHERED BY ANY OF THE FOLLOWING PROBLEMS?

	Most days	Some days	Hardly any days
3A Feeling nervous, anxious, on edge or worrying a lot about different things	☒	☐	☐
3B Feeling restless so that it is hard to sit still	☒	☐	☐
3C Getting tired very easily	☒	☐	☐
3D Muscle tensions, aches or soreness	☒	☐	☐
3E Trouble falling asleep or staying asleep	☒	☐	☐
3F Trouble concentrating on things such as reading a book, watching TV	☒	☐	☐
3G Becoming easily annoyed or irritable	☒	☐	☐

Clinical warnings**Additional relevant information****Administrative information**

Is your patient thinking about, and motivated to become more active? Only refer if 'Yes':Yes

I have discussed and made the patient/carer aware referrals are managed by Local Authority Live Active Referral Staff:Yes

The Patient/Carer has given their consent for their medical information to be passed to Live Active Referral Staff:Yes

Is your patient monitored/treated for high BP?:No

Does your patient have any physical limitations that would make physical activity difficult?:No

OK to send correspondence to home address?:Yes

Patient will accept any site:Yes

Patient will accept cancellation or short notice appointment (within 1-6 days):Yes

Referred By:Referring GP

Electronic Attachment Present:No

Signature of referring doctor (or other professional) Date

Dear Wesley

Further to our conversation by telephone earlier today I am pleased to send you a copy of your DNA genetic test result for Huntington's Disease.

As you know, this result is negative for the HD gene which means that you do not have the gene and therefore you do not have Huntington's Disease.

Please do not hesitate to contact me if you wish any further details at all.

Yours sincerely

NHS TRUST
EDINBURGH

Report No: 7059

Patient name: WESLEY PHILLIPS
Date of birth: 05/02/82
DNA NUMBER: 15733
Hospital No:

Tested by: Lilius Barron
Lilius Barron
Checked by: Jon Warner
Jon Warner

Reason for referral

Confirmation/exclusion of Huntington's disease (HD).

Analyses performed

Genetic testing for HD by direct analysis of the CAG repeat in exon 1 of the IT15 gene.
PCR test described by Warner et.al. 1993.

Results of test(s):

CAG repeat alleles of 16 and 17 repeats were identified.

Interpretation

WESLEY PHILLIPS has two CAG repeats in the normal size range which excludes a diagnosis of HD.

Comments

Normal individuals in our population have alleles in the 8 to 35 CAG repeat range.
A repeat size of 36 repeats or greater is diagnostic of HD.
Alleles between 36 and 39 repeats are frequently associated with later onset of symptoms.
Alleles between 27 and 35 repeats are potentially unstable and rare expansions into the affected range have been seen.

Dear Dr Dubbs

WESLEY PHILLIPS DOB 05 02 82
40 BRIGHTSIDE AVENUE PORT GLASGOW PA14 6DN

I reviewed Wes in the Hand Clinic today. He recently had a traumatic experience in Ireland and suffered an injury to his right index finger where it was caught on the edge of a fence spike. He suffered lacerated de-gloved skin flap of the finger with a avulsion of the ulna digital nerve. The wound was repaired and he was subsequently returned to his home in Scotland. On review today the wound is healing satisfactorily and I have removed the sutures. I plan to keep him splinted for another week to protect the nerve repair and then to commence mobilisation. I will see him in one months' time.

Many thanks.

Yours sincerely

Dear Dr Mutch

WESLEY PHILLIPS, DOB 05 02 82
40 BRIGHTSIDE AVENUE, PORT GLASGOW

I reviewed this chap who had a nasty laceration to his index finger recently. I am happy to say this has settled nicely. He still has some altered sensation on the ulnar aspect of the finger but this will settle in due course.

I will see him again in four months time for further follow up.

Yours sincerely

Dear Dr Mutch

Wesley Phillips, 40 Brightside Avenue, Port Glasgow (05.02.82)

Further to your referral of Wesley, I saw him in the company of his parents on 19 November, 1996. Unfortunately, the gradual improvement in his behaviour achieved over the Spring of this year when he attended the Day Unit has waned and he is currently suspended from school. The interview was marked by hostile interactions from everybody within the family and criticisms of past involvement with our services. Unfortunately, Wesley terminated the interview by walking out but the parents required prompting to find him some minutes later.

I understand that Wesley has been referred to the Panel following a police charge recently and I will make contact with the Social Worker and advise her of the current situation.

I have advised the parents that Haloperidol should not be used for behavioural control of Wesley and as his tic is currently not in evidence, I would recommend that this is stopped. Whether or not Wesley does have an intrinsic Attention Deficit Disorder, which is highly unlikely, his future management will require Social Work input.

Yours sincerely

Dear Dr Mutch

Wesley Phillips, 40 Brightside Avenue, Port Glasgow (05.02.82)

I have recently been asked to provide a psychiatric report on Wesley to Mr K Ritchie, Area Reporter. For your information I have shown below my opinion and recommendation provided to the Reporter.

Opinion

Wesley has a long history of disruptive behaviour both at home and at school. The onset in the pre-school years coincided with instability within the family and the roots of his difficulties are now very difficult to tease out. Whilst attending the Day Unit it was our clinical impression that Wesley's emotional disturbance resolved and during that period of time his attention was well within normal limits, such that his academic performance improved. He has the capacity to accept personal responsibility for his contribution to difficult situations when this is addressed calmly within a professional relationship. There have been several attempts to work with Wesley and his parents by providing them with behavioural advice during family counselling sessions which have produced some gains, however, the situation has been de-stabilised once again both at school and now in the community, and I think it is important that the future management is considered afresh.

Recommendation

1. I recommend a Home Supervision Order for Wesley Phillips. This would provide him with the individual counselling support that we know he can use, in order to address his need to manage himself responsibly as a young person. I would also suggest that he would benefit from attendance at IT Groups in order to give him the experience of developing peer relations and maintaining his self-esteem.

2./

CONFIDENTIAL

Dr Mutch

-2-

6 December 1996

Wesley Phillips (05.02.82)

2. I would hope this would also provide support for Mr & Mrs Phillips who do feel overwhelmed by Wesley's demands on them. Mrs Phillips in particular is vulnerable to emotional distress and finds difficulty coping with Wesley when, at times, her own past unhappy experience is troublesome. It may be that in the future she would wish to pursue counselling again and this is something that could be discussed with her.
3. Wesley does not require further psychiatric treatment from the Child and Family Centre, Larkfield.

PORT GLASGOW

Dear Dr Mutch

Wesley Phillips, 40 Brightside Avenue, Port Glasgow (05.02.82)

I reviewed Wesley at my clinic on 11 January, 1996, when he attended with his father. Mr Phillips reported that Wesley's behaviour has improved over the holiday period and he has settled back into school. Mr Phillips, however, remains concerned about the possibility that Wesley may show features of Attention Deficit Hyperactivity Disorder and spoke with me about these concerns and the possibility of second opinion being requested. I advised him to discuss this further with yourself but in the meantime I have agreed to continue with my assessment of Wesley.

In view of ongoing concerns I will arrange for Wesley to attend the Day Centre at Larkfield Child & Family Centre for further assessment.

Wesley continues to have a right sided facial twitch. I have made a referral to Dr Coutts, Consultant Paediatrician at Inverclyde Royal Hospital, for further assessment of this.

I will keep you informed of Wesley's progress at our Centre.

Dear Dr Mutch

Wesley Phillips, 40 Brightside Avenue, Port Glasgow (05.02.82)

I reviewed Wesley at my clinic on 26 January, 1996, when he attended with both parents. His behaviour difficulties continue. There have been no further suspensions at school but I understand that the school are very concerned about his ability to be maintained at Port Glasgow High. Mrs Phillips is at the end of her tether in coping with Wesley's difficult behaviour at home.

I have arranged for Wesley to attend the Day Centre at Larkfield Child & Family Centre for assessment. He will commence attendance two days per week as of next week. I will keep you informed of developments.

Dear Dr Mutch *Mike*

Wesley Phillips, 40 Brightside Avenue, Port Glasgow (05.02.82)

Since my last letter Wesley has attended the Day Centre at Larkfield for assessment. He has been fairly settled within the group but is lacking in social skills. He appears to be easily manipulated by other individuals within the group and seems to be easily led into poor behaviour.

I met with Mrs Phillips to review Wesley's progress at my clinic on 12 February, 1996. I have advised her that the Social Work team from the Larkfield Child & Family Centre will visit to offer support and have arranged for Wesley to continue his attendance at the Day Centre. I would not advise any medication at present.

Yours sincerely

Kathy

Dear Michael

Wesley Phillips, 40 Brightside Avenue, Port Glasgow, d.o.b. 05.02.82

I enclose a copy of a letter I have sent to Kathy Leighton who referred Wesley on to me. Haloperidol is useful in motor tics and I think Wesley's tic is bad enough to justify treatment with it. We should start with a small dose and build up. I would suggest starting him with 1 mg. per day which could be given as Serenace capsules. These come as 500 mgs. and his starting dose would be 1 capsule b.d., increasing after 2 weeks to 2 capsules b.d. If he can't cope with capsules we could give him Haldol liquid which is 2 mgs. per ml. but obviously that would have to be well diluted by the Pharmacist.

I have written to his parents asking them to see you for a prescription and I have sent him an return patient appointment so that I can see his response and discuss his asthma.

Yours sincerely,

N.A. Coutts,
Consultant Paediatrician

Dear Dr. Leighton,

Wesley Phillips, -40 Brightside Avenue, Port Glasgow, d.o.b. -05.02.82.

Thanks for asking me to see Wesley who is 14 years' old. He has various problems in particular the ? of ADHD has been raised but you are discussing that in the near future with the Educational Psychologists.

You asked me if I would see him regarding his tic which really is quite marked. This affects his eyes and face only, but all during the interview it was obvious. His parents also said that he had a nervous cough which probably is another manifestation of his tic.

I am glad to say that I found no abnormality neurologically. He does have a problem with asthma but the clinic was so busy I didn't have time to discuss that but I am intending to do that when I see him for review.

You and I have discussed treatment for his tic and agreed that he should go on Haloperidol. I will start him on a small dose and get him back in a few weeks to assess his response to it and also to discuss his asthma.

I will keep in touch.

Yours sincerely,

N.A. Coutts,
Consultant Paediatrician

Dear Dr Mutch

Wesley Phillips, 40 Brightside Avenue, Port Glasgow, d.o.b. 05.02.82

I reviewed Wesley with his Mum at Dr. Coutts' clinic and he is still having frequent right sided facial tics. He is on Haloperidol 1 capsule b.d. He also has another problem of becoming short of breath sometimes associated with wheeze whenever he is participating in any sort of exercise. Systemic examination including neurological assessment was normal.

I spoke to Dr. Coutts and he advised to increase the Haloperidol to 2 capsules i.e. 1 mg. b.d. and could you please start him on a bronchodilator which he will use before exercise.

I am going to review him in 1 month's time.

Yours sincerely,

M.S. Shebani,

Dear Dr Mutch

Wesley Phillips, 40 Brightside Avenue, Port Glasgow (05.02.82)

Since my last letter Wesley has continued to attend the Day Centre two days per week. His behaviour has become more settled within the unit, at home and at school. I met with school staff, Educational Psychology and Social Work to review his progress on 9 May, 1996. It appears that a range of supports are being offered to Wesley and his family and that it would be appropriate at this stage to decrease Wesley's attendance at the Larkfield Day Centre with a view to resuming full time attendance at school following the summer break. Social Work Community Groups will be offered over the summer period and on-going Social Work support will be offered to Mrs Phillips. The Educational Psychologist, Mrs Erica Rigg, will continue to monitor Wesley's progress in school.

I will keep you informed of Wesley's attendance here.

Dear Dr Mutch

Wesley Phillips, 40 Brightside Avenue, Port Glasgow. dob 05.02.82

I saw Wesley with his Mum at Dr. Coutts Clinic. He is being followed-up because of tics and behavioural problems. He is on Haloperidol 2 capsules twice a day. The tics are much better now and happen less often than before. mentioned that his behaviour has improved at school and at home. I arranged for him to be seen in one months time and I kept him on the same medication.

Yours sincerely,

M.S. SHEBANI
Staff Grade Paediatrician.

Dear Dr Mutch

Wesley Phillips, 40 Brightside Avenue, Port Glasgow (05.02.82)

Since my last letter Wesley has refused to attend the Day Centre and again refused to attend outpatient review. I did, however, meet with Mrs Phillips on 26 July, 1996; when Mrs Phillips reported that Wesley's behaviour is currently fairly settled, although he continues to swear frequently and be rather derogatory in remarks towards herself. Wesley has been attending the local play scheme which he is reported to have enjoyed and his behaviour there has been satisfactory.

Mrs Phillips has agreed to a referral for the consideration of IT Groups for Wesley and I will ask the Social Workers at Larkfield Child & Family Centre to be in touch with the family.

Mrs Phillips is now more positive about the school's handling of Wesley's behavioural difficulties and I would agree that the school have a range of appropriate strategies which they have developed in liaison with the Educational Psychologist, which would suit Wesley's needs.

In view of Wesley's improvement and his refusal to attend the clinic he has now been discharged. I would be happy to accept re-referral in the future should the situation change.

Yours sincerely

KATHERINE M. LEIGHTON
Consultant in Child & Adolescent Psychiatry

I would be grateful for your opinion and advice on the above named patient. A brief outline of history, symptoms and signs is given below:

Dear Dr Leighton

I wonder if you would be kind enough to see Wesley again. He is now almost 14 and you last saw him in July 1993. His behaviour has deteriorated even further and his language is a constant stream of expletives. He appears to be in constant trouble both at home and at school and has been suspended from school on frequent occasions. His concentration span is zero and he is verbally abusive to his mother and anybody else who falls within hearing range.

I wonder if he is suffering from La Tourettes Syndrome and would welcome your expert opinion.

Kind regards,

Yours sincerely

Dear Dr. Mutch,

Lesley Phillips, 40 Brightside Avenue, Port Glasgow

Your patient attended my Fracture Clinic on 4 December, 1995. He said his plaster fell off while he was in the shower. There was no swelling, bruising or tenderness over the P.I.P. or M.C.P. joints of his middle finger. He has full movements and no instability and has got a good grip. He has been allowed active use and has been discharged.

Yours sincerely,

T.K.GHOSH
Assoc.Specialist in Orthopaedics

27.11.95

This boy attended Casualty on 25.11.95 after he fell sustaining injury to his right middle finger. X-ray of hand and fingers was thought to have revealed a fracture of the head of the 3rd metacarpal for which a volar slab was applied.

Today there is discomfort, mostly over the PIP joint of the middle finger where there is superficial grazing and tenderness but finger movements were full and there is no instability. Review of x-ray does not suggest any fracture.

Advised to have neighbour strapping and see in one week.

Dear Dr Mutch,

WESLEY PHILLIPS: 5-2-82
40 Brightside Avenue, Port Glasgow

I enclose a copy referral letter to Dr Leighton at Larkfield Child & Family Centre on the above named child who was referred to me by his father for behavioural difficulties at home, and who is a patient of yours.

After several sessions with both parents and Wesley, I felt it would be most appropriate to refer him on to Dr Leighton for some psychiatric input.

Yours sincerely,

Gillian Docherty

Dear Dr Leighton

WESLEY PHILLIPS {5.2.81}
40 BRIGHTSIDE AVENUE
PORT GLASGOW

The above named boy who is a pupil at Clune Park Primary School was referred to me because of his behavioural difficulties at home.

In school Wesley presents few problems and was recently described by his class teacher as "a polite and helpful boy, who is a member of the football team and badminton club".

Wesley's behaviour at home is characterised by shouting and swearing and demanding money and material things. He is faddy with regard food and plays one parent off against the other which results in marital disagreements. The parents admit to inconsistencies in handling and to the fact that Wesley usually gets what he wants.

There have been marital separations due to father serving a prison sentence and also as he left the marital home for some time. Currently he is at home.

The issues of concern to the parents would appear to be Wesley's behaviour and feelings towards his parents and his faddiness with food.

I would be grateful for a psychiatric opinion and the family are very keen for help from yourselves in order to resolve these difficulties.

Yours sincerely

Gillian Docherty
Educational Psychologist

PORT GLASGOW.

Dear Dr. Mutch, *Mutch*

Wesley Phillips, 40 Brightside Avenue, Port Glasgow (05.02.82)

I reviewed Wesley at my clinic on 2 June, 1993. Since the last appointment Wesley's behaviour has improved and Mr. & Mrs. Phillips have become more positive in their comments about their son. At individual interview Wesley appeared contrite and spoke of his motivation to improve his behaviour.

I have again counselled on behavioural management and will review Wesley with his parents in a few weeks time.

Yours sincerely

Kathryn

Diagnosis		Site	Side
Date	Procedures/Interventions/Operations		

Clinical Comments: Dear Doctor,
Wesley Phillips was admitted to IRH on the 10th of January following a paracetamol overdose.
30 tablets were taken with intent to end life.
Background: Depression, Hep C +ve.
LFTs were not deranged. Paracetamol levels taken were under the treatment line - hence not given NAC. Overnight, he became quite agitated and believed God wanted him to commit suicide. He was then given a one-off dose of Lorazepam.
He was also seen by our psychiatry team who commenced Mr Phillips on Quetiapine 25mg BD.
He has been quite cooperative during the day and we believe he is fit for discharge with appropriate support from Inverclyde Centre.
Medication Change: Started on quetiapine 25mg bd. Given 3 days dose from hospital. Was instructed to obtain more from GP if effective.

Phillips Westley

Consultation details:

History - VISIT AT INVERCLYDE ROYAL ARRANGED FOR 10>30

Examination - Myself and colleague attended A&E dept to assess Wesley this venue was decided because of past forensic history.

Wesley informs ourselves he has been in a Christian rehab Centre for last 9 months (Victory House) the rehab centre was based in London. He describes making great progress coming off all drugs including Methadone and alcohol. He left Rehab November by his own accord as he attempted suicide and wanted to be with family majority of which stay in Inverclyde. Describes rehab as been great benefit to him gave him purpose and direction, he is firm believer in

God and Bible where they learned more about scriptures out in the streets spreading good word.

Wesley is currently living in homeless accomadation in Inverclyde

Describes xmas period as a good time spent with family and happy at New Year as well attended a church cellidli.

states today he has been unsettled had thoughts of suicide says they have been filing his mind , no concrete plans to end life and engaged in self helping behaviours. Also future focussed talking about his commitment to church and God.

Exploring thoughts further feels confused by these and agreed he does not know how to process them , agrees this is longest been off drugs and in past when experiencing difficult feelings he would take drugs now it appears he is in transifion period and adjusting. Agrees it has been confusing time for him. We spoke at length about his thoughts and feeling and discussed referral to crisis team to support him , Wesley was agreeable to this then within minutes he abruptly stormed out assessment saying he was going home that was end of assessment and we were no use, asked him to return saying we were very surprised but would now not engage , extremely hostile, angry and unpredictable and could be heard having a outburst to his

then stormed into assessment room angry red faced saying we were disgusting he had brought his brother here for help and we were not helping him., he would not let us explain Wesley had stormed out assessment and that we had offered to help, agitated over talking us continually saying we were disgusting and what would happen to his brother , he jumped up and by now he was quite unpredictable like Wesley previously hostile and angry, there was no reasoning and would not give us opportunity to engage him in conversation, myself and colleague tried several approaches with him but he was too angry and decided for our safety to back off trying to explain and reason.

Overall: Assessment not complete because of ~~Wesley's dominating~~ assessment ,hostile angry and unpredictable , _____ came in and he was very similar in behaviour calling us disgusting and shouting at ourselves , final words were he knows our game we have been speaking to Dr Reddle??? this is his fault he keeps miffing it down to drugs and convinced us its the same ,Unfortunately _____ was past caring and threatening in his manner and approach mainly due to his level of hostility and anger staff felt unsafe and felt intimidated.

Treatment - As before assessment not many completed but during this there had been recognition of Wesley's difficulties and offer to provide additional

support and interventions from crisis team.

We found Wesley to be future focussed also his religion was very important to him he did want to get better and Wesley engages in self helping behaviours.

Wesley terminated assessment, angry hostile and unpredictable.

Dear Mr Phillips

Following your referral from Dr Malloch, General Practitioner, you have been offered an appointment at the Assessment Clinic, Crown House, 30 King Street, Greenock on Tuesday 29th November 2016 at 2.00 p.m. for the purpose of carrying out an initial mental health assessment.

Following your assessment, your case will be discussed within the multi-disciplinary team and, if it is felt we are the most appropriate service to be helping, you will be offered further input from the service.

In the meantime should your condition deteriorate you should contact your General Practitioner.

If the above appointment time is unsuitable please contact the above number to reschedule.

Please bring this letter with you to your appointment.

Yours sincerely

Wesley Phillips, c/o Inverclyde Centre, 98 Dalrymple Street, GREENOCK, PA15 1BZ,
(CHI: 0502823496)

Thank you for your referral of the above gentleman to the Community Mental Health Team. Mr Phillips attended for assessment at Crown House on 29th December 2016 and his case was discussed at our Multi Disciplinary Team Meeting on 30th November 2016. It was felt that the above patient's needs were more social based in view of the fact that his environment is a predominant factor. It does not appear that there are any significant mental health issues at this time and he is currently not receiving any medication. We have provided Wesley with details of community resources, namely Your Voice and Moving On for him to utilise should he wish.

Once again, I would like to thank you for your referral and hope this is to your satisfaction.

Yours sincerely

c/o "Dr. McNeill" Orangetree Practice

Dear Dr. Iqbal,

Wesley Phillips, d.o.b. 05.02.82
Inverclyde Centre, 98 Dalrymple Street, Greenock.

Diagnosis: 1. Overdose - X60
2. Emotionally Unstable Personality Disorder - F60.31

Thank you for referring the above gentleman to the Psychiatric Liaison Service. I met with him in J. North on 11.1.17 following his admission the previous day with a suspected overdose of Paracetamol. When admitted, despite saying he had only recently taken 28 x 500mg tablets, his Paracetamol levels were below the treatment line. Wesley told me that he had got out of rehab three months ago having spent six months there in total. He is currently living in the Inverclyde Centre and receives support from staff there. It was recently the 10th anniversary

At this time of year, he often feels very guilty about this. He said that over the past ten days he has been troubled with intrusive thoughts that God wants him to commit suicide and that it is God's will that he should die. He described himself as a Christian and said he was finding these thoughts increasingly difficult to deal with.

I discussed my assessment with Dr. Loudon, Consultant Psychiatrist who recommended that Wesley be commenced on Quetiapine at a dose of 25mg twice daily. He has had this in the past and Wesley said that this has helped when he has had these thoughts previously. Wesley was actually assessed by my colleagues in the CRS Team on 9.1.17 who had carried out a full assessment and had also recommended that Wesley get in touch with some local organisations including Moving On and Your Voice. I reiterated the value of this to Wesley in that it would provide further support and distraction while he is adjusting to being out of rehab and still sorting out his housing situation. He said that he may go along to these organisations in a week or so when he feels better. He is aware that he should contact his GP in the first instance if the medication does not provide any relief.

Wesley was happy with this plan and was no longer describing any plans for overdosing. He can therefore be discharged when deemed medically fit.

Yours sincerely,

Ann Weir

Wesley Phillips, DoB: 05.02.1982, 0/2, 51 Thrushcraig Crescent, Paisley, PA2 6PP

Psychiatric Diagnosis: Opiate Dependence, Disorder of Adult Personality

Current Psychotropic Medication: Methadone 80mls daily, Quetiapine 200mgs daily

I saw Wesley for further review at the Drug Clinic on the 15th December 2015. He appears to be settling down. He said that he hasn't been using heroin or valium for the last month. The relationship he is attending various church groups and fellowship meetings. He looked clear and was much more coherent today.

He is confident that he can get himself safely through the festive period. He did mention however that he is thinking about doing one of the voluntary sector rehabilitation units again, given his history and coexistent psychological difficulties, a rapid detox in a non statutory rehabilitation centre is unlikely to be helpful but we will talk to Wesley about this in the new year.

I will let you know how things progress.

Yours sincerely

Wesley Phillips; D.O.B: 05/02/1982; CHI: 0502823496
14F Thrushcraigs Crescent, Paisley, Renfrewshire, PA2 6PP

DIAGNOSIS : Hepatitis C;

Your patient, Wesley Phillips, has been referred to Renfrewshire Drug Service Outreach Clinic for assessment of his chronic hepatitis C infection. The initial appointment was with the Clinical Nurse Specialist today, Tuesday 26 January 2016.

At that time Wesley was given the opportunity to discuss his immediate anxieties and was given information regarding the natural history of HCV, modes of transmission, investigation and treatment of the virus.

Full assessment bloods were taken including full blood count, coagulation, ferritin, liver function tests, thyroid function, immunoglobulins, alpha-fetoprotein, alpha-1-antitrypsin, caeruloplasmin, HBV and HCV serology including HCV-RNA by polymerase chain reaction (PCR), antinuclear factor, mitochondrial antibody, smooth muscle antibody and Anti LKM.

An ultrasound and Fibroscan of the liver have also been requested.

If HBV serology is negative then patients are recommended to attend their GP for HBV and HAV vaccinations.

Phillips Wesley

CHI: 0502823496

GCL 27/01/2016 v1

The patient will next be seen at the consultant Hep C clinic when the results of the above tests should be available. During this consultation Wesley's suitability for treatment will be discussed and if necessary a psychiatric and/or addiction assessment may be requested.

Yours sincerely

Elaine McLellan

It would appear from our records that:

☒ Your patient has not responded to our ~~two~~ recent letters inviting them to arrange an appointment.

☐ Your patient has indicated that they no longer require an appointment.

We therefore assume that your patient no longer needs this appointment. We have removed their name from the waiting list. This is in line with NHS Greater Glasgow and Clyde's Did Not Attend Policy.

If you still wish your patient to be seen, we will require a new referral.

Yours sincerely

Gillian Robertson Referral Management Centre Clyde.

Dear Dr Johnstone

Wesley Phillips, dob 06.02.82 - 0/2, 51 Thrushcraig Crescent, Paisley, PA2 6PP

Psychiatric Diagnosis: Opiate Dependence, Disorder of Adult Personality

Current Psychotropic Medication: Methadone increased to 80mls daily, Quetiapine 200mgs daily

I saw Wesley for further review at Renfrewshire Drug Clinic on 10.11.15. Wesley unfortunately has continued to use heroin including by injection. He has had several problems including a needle stuck in his groin which has come out spontaneously and also possibly an abscess although he now has attended A & E about these.

He said that he has reduced but not stopped his heroin use and I have increased his Methadone today.

Despite this he actually looked relatively well today. He looked reasonably well kempt and well-nourished. He said he is looking after himself. He is quite isolated but perhaps being away from other drug users is a good thing. Wesley as he always has done is using the supports in the local churches and I have encouraged him to also try and get involved with the recovery activities.

He reports continuing to be troubled by voices but in a pretty half hearted way acknowledging that they are not frequent or intrusive or particularly troubling at the moment. He requested a further increase in his Quetiapine and I have increased that to 200mgs daily. We will check an ECG.

Yours sincerely

Dr. Charles McMahon

Dear Dr. Hislop,

You referred the above client to Renfrewshire Drug Service on 03/02/15.

He failed to attend an assessment appointment offered on Monday 23rd February at 1.30pm.

Mr. Phillips has been sent a letter requesting that he make contact with us by 10/03/15 if he wishes to engage with this service.

If we do not hear from him by this date his case will be closed and a re-referral will be required.

If you require further information please do not hesitate to get in touch.

Yours sincerely

Dear Dr Johnstone

Wesley Phillips, dob - 05.02.82, 14/5 Thrushcraig Crescent, PA2 6PW

Psychiatric Diagnosis: F11.22 - Opiate Dependency

Previous Diagnosis: Borderline Personality Disorder

Current Psychotropic Medication: Methadone 30mls (daily supervised- commenced today)

I met with Wesley at the Renfrewshire Drug Service on 08.10.15. As you will be aware he had been previously admitted to Dykebar following an episode of auditory hallucinations however he had been asked to leave Dykebar prior to the assessment period ending as he had been found to be injecting Heroin while on the ward. Unfortunately things were made slightly more complicated when a needle snapped and remained in situ. He attended Accident & Emergency for an x-ray to confirm the presence of the broken needle and was reviewed by the consultant there. I understand they feel that no action is required at present.

Wesley was able to give me a detailed account of the last few months. He spent some time in custody and following his release attended a Christian Rehab Centre. This was to be an 18 month rehab but he left after 4 months. While there he ceased all anti psychotic therapy and on returning home recommenced illicit opiate use. He has been injecting since July. I understand you have encouraged him to attend RDS and that he is also being reviewed at Dykebar.

He is currently injecting up to three bags daily and is not on any other medication. He resides in a homeless flat and is also consuming up to 20 street valiums on a daily basis. He is not drinking any alcohol and I understand he had been treated with Dihydrocodeine whilst in Dykebar. He has previously done well on Methadone.

Today he was dressed in rather dirty clothes and was slightly unkempt although he did appear to have washed. His test was clear and although he was slightly overweight his abdominal examination was unremarkable. I took the opportunity to inspect for any infected injection sites and there were none. Indeed the site in his groin where he had the accident with the needle was healing well with lower limbs and good peripheral pulses and no adima.

Cont/.....

Back Sneddon Centre, 20 Back Sneddon Street, PAISLEY, PA3 2DJ

Wesley Phillips, dob - 05.02.82, 14/5 Thrushcraig Crescent, PA2 6PW

- 2 -

Today Wesley stated that the voices were very clearly inside his head however he was not sleeping well. Today he spoke quietly but did not appear to be unduly distressed or anxious nor responding to any hallucinations. I understand there had been an episode where he had lain in the road. It would appear that he had certainly reached a point where he requires some treatment for his current mental state. Today he seemed amenable to opiate replacement therapy. We discussed the risk of overdose and encouraged him to move from injecting to smoking. We also highlighted the risks of illicit valium and he assures us that if this may be causing a decline in his mental state that he will reduce the valium and stop them.

In the first instance we have agreed a plan to stabilise him on Methadone and have commenced him on 30mls on a daily supervised dose and suggest that he meets with his worker next week. He is reluctant to recommence Aripiprazole but would be amenable to Quetiapine. I advised that as he stabilises on Methadone we will consider this. I will keep you updated of any further developments.

Yours sincerely

Dear Dr Johnstone,

WESLEY PHILLIPS, CHI: 0502823496
Flat 0/1, 51 Thrushcraig Crescent, Paisley, PA2 6PP

DATE OF ADMISSION: 24/12/13

DATE OF DISCHARGE: 27/12/13

DIAGNOSIS: Borderline Personality Disorder with Dissocial Traits

LEGAL STATUS: Informal

MEDICATION ON DISCHARGE: Methadone 50ml od, Sertraline 150mg od

Wesley was admitted to Ward 3, Parkhead Hospital, Glasgow on 24th December, 2013 after presenting to A & E at Glasgow Royal Infirmary complaining of suicidal ideation. He has a history of Borderline personality Disorder, ex-intravenous drug use and low mood. He stated that his mood had dipped over the previous few weeks.

On admission, he did not appear overtly depressed and had a reactive affect at interview. He stated that he was hearing voices, but that this had been "going on for years". He claimed these voices were saying "you've let your family down" and "you've nothing to live for". He stated that in response to this he had tried to throw himself in front of a taxi and that the driver of the taxi had driven him to A & E. He was adamant that if he was not admitted to hospital he would find a way to kill himself that night. He lives alone and was socially isolated due to falling out with his family.

There was no evidence of any psychotic symptoms on the ward and it was thought the voices that he complained of were not true auditory hallucinations. He denied any ongoing suicidal thoughts and was therefore discharged on 27th December, 2013 with follow-up from the Intensive Home Therapy Team in Paisley. No follow-up at Parkhead Hospital has been arranged.

Please do not hesitate to contact me if you have any questions.

Yours sincerely

Dear Dr Johnstone

RE: Wesley Phillips, 8 Thomson Brae, Paisley, PA1 1TP
Date of Birth: 05.02.82 (3496)

The above named gentleman was referred to the Intensive Home Treatment Team on 4th May 2014 following an assessment at the RAH by the Out of Hours CPN Service in the early hours of the previous morning. At this point he appeared well kempt and neat but was slightly malodorous. He had good eye contact throughout assessment but pupils were pinpoint. His speech was normal in rate, rhythm and tone with content relevant to the subject being discussed. There was no evidence of any pressure or poverty of speech. He was calm and relaxed throughout the assessment and rapport was easily established. Wesley stated that he had been experiencing problems for approximately 2 weeks where he has been more unsettled on the background of using heroin and street Diazepam and has been experiencing suicidal thoughts but denied having any active plan or intent to kill himself at time of assessment. He was clear that he did not want to die but sometimes felt life was not working out the way he intended it to. He was neither distracted nor preoccupied throughout assessment and there was no evidence of any thought disorder. His mood brightened towards the end of the interview and he was smiling and laughing appropriately. He stated his sleep had been poor and did appear tired due to his use of street Diazepam. It was agreed at this point that Wesley would be referred to IHTT for follow up and further assessment.

Unfortunately since the initial referral on 4th May 2014, we have been unable to make contact with Wesley. We have offered him, via letter, an appointment at Dykebar Hospital for further review however he has failed to attend this. IHTT did manage to link in with his RDS Worker on 6th May 2014 at which time she reported meeting with Wesley earlier in the day and found him to be well kempt, brighter in mood and did not appear to be depressed. He was engaging and talkative, voicing no concerns or worries at this time and did not allude to being seen by the OOH CPN Service at the weekend. He had no concerns or worries regarding Wesley and he was allowed to return home after the visit. Following discussion with IHTT SPR, it was agreed that Wesley could be discharged from our caseload and pass his care back to RDS as of 6th May 2014. We are aware that Wesley is in receipt of crisis numbers as he was unable to utilise these at the weekend and will send out a further appointment for him in 2 weeks time.

RE: Wesley Phillips, 8 Thomson Brae, Paisley, PA1 1TP
Date of Birth: 05.02.82 (3496)

Should you require any further information with regards to this matter please do not hesitate to contact the IHTT on the above telephone number.

Dear Dr Johnstone

Wesley Phillips (0502823496)
1-4 17 Abercorn Street, Paisley PA3 4AA

Psychiatric Diagnosis: F11.2 – Opiate Dependence, Adult Personality Disorder

Current Psychotropic Medication: Methadone 50 mls daily supervised, Sertraline 150 mgs, Aripiprazole 5 mgs

I saw Wesley for further review at Renfrewshire Drug Service on 08 April 2014. Wesley looked relatively well today. He had been very unsettled over the Christmas period and had a brief admission to Parkhead hospital and contact with the Intensive Home Treatment Team (IHTT) following suicidal thoughts. He says that the thoughts have continued and that God is telling him to commit suicide. He continues to complain of feeling tense and agitated and unhappy, unmotivated and unsettled. It does seem that he has significantly moderated his drug use. There have been no signs he has been using cocaine and he seems to have been using relatively little Valium and heroin.

His social circumstances remain difficult. He hasn't been speaking to his father for some time. His own flat is in a state of disrepair but it looks like he will have to remain there. He has trouble furnishing it basically because he spent all his money on gambling.

He is constantly asking for tablets to settle his nerves. He has QTC interval problems if Methadone is increased beyond 50 mls. I have decided to try a small dose of Aripiprazole, which does not have any effect on cardiac conduction, at least on a trial basis. I will let you know how things progress.

Yours sincerely

Dear Dr. CJ Johnstone,

Wesley Phillips; D.O.B: 05/02/1982; CHI: 0502823496
0/2 51 Thrushcraig Crescent, Paisley, Renfrewshire, PA2 6PP

Admission: Specialty - General Medicine; Ward - RAH10 - General Medicine
Consultant - Dr Graham Naismith; Date of Admission - 24/10/2014
Date of Discharge - 25/10/2014; Discharged to - Private Residence - living alone

Diagnosis:

Deliberate self poisoning by nonopioid analgesics, antipyretics and antirheumatics (ICD10: X60.9)

Follow Up: None

Clinical Comments:

Date of Admission: 23/10/2014

Absconded from hospital: 25/10/2014

Diagnoses:

1. Significant paracetamol overdose
2. Intravenous drug user
3. Depression/personality disorder

This gentleman was admitted with an overdose of approximately 25mg of paracetamol. His levels were above the treatment line at 1, 3 and 5 hours after his overdose. He continues to inject heroin and had injected £30 worth (his usual dose) prior to his admission but there were no signs of overdose.

He was commenced on N-acetylcysteine as per protocol and it was felt that he was fit for discharge on the day following admission. He was seen however with bradycardia of 42bpm but this later recovered to over 50bpm. He was also commenced on Flucloxacillin orally for a small red area related to his cannula which may have represented cellulitis. He did complete his intravenous treatment and was seen for review by psychiatry who felt he was fit for discharge. Following their review however he absconded from hospital. I see that he has since been re-admitted to hospital and has blood tests today showing some mild LFT disruption.

No medical follow-up is arranged from our own previous admission.

Phillips Wesley

Dear Dr. Johnstone

Wesley Phillips (0502823496)
1/4, 17 Abercorn Street, Paisley PA3 4AA (Previous address)

Psychiatric Diagnosis: F11.2 - Opiate Dependence

Current Psychotropic Medication: Methadone 50 mls. daily, Sertraline 150 mgs.

I saw Wesley for further review at the Drug Clinic on 07.05.2013. Wesley looked very well today. He reports very little drug use in recent months. He has established a relationship with a young woman and this seems to have cheered him up considerably.

I have suggested to him that perhaps it is a bit early for a relationship to be thinking of starting a family and to pay attention to contraception.

Yours sincerely

Dear Dr Johnstone

RE: Wesley Phillips, Flat 0/2, 51 Thrushcraigs Crescent, Paisley PA2
Date of Birth: 05.02.82 (3496)

As you are aware following my letter dated 30.12.13 Mr Phillips was referred to Intensive Home Treatment Team by staff at Parkhead Hospital for supported early discharge following a 3 day admission on a background of suicidal ideation with multiple social stressors. Staff at Parkhead Hospital did not feel that Mr Phillips required admission at this time due to his decreased levels of risk was referred to ourselves. Unfortunately since our initial referral on 29.12.13 we have only managed to meet with Wesley on one occasion where Dr McArea, Consultant Psychiatrist completed a full psychiatric assessment and it was felt appropriate to look into passing his care back to his Renfrewshire Drug Service worker Margaret Parkinson and Dr McMahon, Consultant Psychiatrist in the near future.

Mr Phillips engagement with I.H.T.T has been very poor. He has been offered in excess of 5 appointments and only attended one. After discussion via telephone today following another non attendance it was agreed between ourselves and Mr Phillips that transfer of his care back to RDS should take place today. We have encouraged Mr Phillips to utilise crisis numbers should he require and he will attend Margaret Parkinson at RDS on Monday 06.01.14. Should you require any further information please do not hesitate to contact the team on the above telephone number.

Yours sincerely

Desmond McPeake
Senior Intensive Home Treatment Practitioner

Northcroft Medical Centre,
Northcroft Street,
Paisley,
PA3.4AD.

Dear Dr. Johnstone,

**Wesley Phillips (0502823496),
1/ 4, 17 Abercorn Street, Paisley, PA3.4AA**

Psychiatric Diagnosis: F11.2 – Opiate Dependence.

Current Psychotropic Medication: Methadone 50mls daily, supervised, Sertraline 150mgs.

I reviewed Mr. Phillips at Renfrewshire Drug Service on the 3rd December 2013. He tells me today that he has been using heroin and vallum again on and off for the past 5 months. He is currently injecting heroin, about 1/2 grm per day and can be using between 10-15 tablets of street vallum per day also. He also notes that he has been gambling and on several occasions had no money for food. However I believe his family have intervened and are being more supportive of Wesley at this time.

Mr. Phillips was interested in having an increase in his Methadone. However I notice that previously ECGs from last year demonstrated a prolonged QT Interval. To this end we are arranging for Mr. Phillips to attend for an updated ECG and following this we will revisit his current medication regime.

-2-

Wesley Phillips - CHI: 0502823496

Of note, Mr. Phillips showed me a significant wound from a dog bite from earlier this morning. I have suggested that he attends hospital to have this treated.

Yours sincerely,

Dr. Claire Duncan,
ST3 in Addiction Psychiatry.

Dear Dr. Mitchell

Wesley Phillips (0502823496)
80 Balfour Road, Paisley PA1 3DH

I am writing to inform you of the latest progress with Mr Phillips. His Quetiapine medication was stopped altogether and so was his Fluoxetine anti-depressant. He received a repeat ECG on 08 May 2012 which revealed a sinus bradycardia of 51 bpm and a QTc level of 429 m.s - which is now within normal limits. His bloods were also checked on 08 May 2012 which revealed essentially normal findings including a normal calcium, magnesium and phosphate level. His current prescriptions are for Methadone 50 mls daily and Diazepam 10 mgs daily. He will be reviewed in due course by Dr Rajan and we will update you on his progress with the Drug Service.

Dear Dr. Mitchell

Wesley Phillips (0502823296)
Loretto Housing Association, 17 Abercorn Street, Paisley

Psychiatric Diagnosis: F11.2 Opiate Dependence

Current Psychotropic Medication: Methadone 50 mls. daily, Sertraline 150 mgs.

I saw this man for review at the Drug Clinic on 04.12.2012. Margaret Parkinson at Renfrewshire Drug Service and Linda Carroll from IHTT were also present. Wesley has again been presenting to mental health services complaining of vague suicidal ideation and in need of support. I think the current crisis has been precipitated by Wesley gambling to excess. He tells me today he spent over £1,000 and pawned some of his possessions. Nor surprisingly, his father was extremely unhappy about this and threatened to throw his dog out and to cut Wesley off. The worst of the crisis seems to have settled again. Wesley has and is full of resolutions regarding his gambling. He says he is in the process of barring himself from local bookies shops and is going to have some way of his father helping to control his money.

As ever, he looked somewhat blunted and flat. He continues to say that he wants to do things and at present is saying that he is going to join in activities at the Charleston Centre and is doing things organised by RCA. The truth of the matter is that Wesley's motivation to change is extremely limited and at my last appointment we went over concerns by Loretto staff that Wesley was not getting up in the day and was not using supports appropriately.

Cont'd/.....

Page 02
Wesley Phillips

Dr. Mitchell
Barrhead Health Centre

He presents much as he has over many years. He is rather dependent character who responds poorly to stress. He leads a life without structure or purposeful activity it would appear and really resists any attempts to get him to engage with that.

He says he has not been using drug recently apart from some extra illicit Diazepam, I am not sure if that is the case or not. His ECG shows a continuing prolongation of QTc of around 488 or 490. He is only Diazepam, Methadone and Sertraline. The Methadone is the most likely culprit, although the dose is moderate at 50 mls. I doubt that he would tolerate further reductions or a change to Suboxone at the moment. Wesley is aware of the QTc and is aware of the extreme risk of using other drugs, particularly Amphetamines, Cocaine or alcohol. I think we will simply monitor the situation and repeat the cardiograph again in a few months. If he has not had a recent U&E done I will also check that.

Yours sincerely

Dear Dr. Mitchell

Wesley Phillips (0502823496)
Loretto Housing Association, 17 Abercorn Street, Paisley

Psychiatric Diagnosis: F11.2 - Opiate Dependence, Personality Difficulties with reports of self-harm, Prolonged QTc Interval

Current Psychotropic Medication: Methadone 50 mls. daily, Sertraline 100 mgs. daily, Diazepam reduced to 5 mgs. nocte for two weeks only and then to stop.

My apologies for the delay in this letter.

I reviewed Mr. Phillips at Renfrewshire Drug Service on 26.06.2012 with Michael Finlay, a staff member, as his key worker Margaret Parkinson was on leave. Mr. Phillips briefly mentioned the difficulties he was having in the recent past and told us that he was on probation. He has also moved to Loretto Housing and we discussed ways of structuring his days more effectively while he is there. He reported his mood as a bit down. Considering the difficulties he was having recently I was not surprised. During that meeting he denied any ongoing suicidal ideation and appeared more positive and optimistic about his future. We discussed the diagnosis of personality disorder and ways of coping with his illness and managing things better, rather than presenting in crisis repeatedly. He appeared keen to join our fishing group to occupy his time better. We also discussed the implications of ongoing use of Diazepam and agreed that the dose would be reduced to 5 mgs. nocte for two weeks and to stop completely afterwards.

Page 02
Wesley Phillips

Dr. Mitchell
Levern Medical Group

I have not made any changes in his Methadone dose and it has continued at 50 mls. daily. However, considering the difficulties he was having with his mood, I have agreed to an increase in his dose of Sertraline to 100 mgs. daily.

He has had problems with his ECG in the past and there is a family history of cardiovascular illness. Considering all this, I agreed that his ECG would be repeated in about a month's time. He will be reviewed at Renfrewshire Drug Service in due course and I will make changes to his medication as agreed today.

Yours sincerely

Dear Dr. Mitchell

Wesley Phillips (0502823496)
80 Balfour Road, Paisley PA1 3HD

Psychiatric Diagnosis: F11.2 - Opiate Dependence

Current Psychotropic Medication: Methadone 50 mls. daily, Fluoxetine 40 mgs. daily,
Quetiapine 300 mgs. nocte.

I reviewed Mr. Phillips at Renfrewshire Drug Service on 27.03.2012 with his key worker as dealing with another emergency. He appeared reasonably well and had reported reducing his Quetiapine medication to once daily was helpful. He still complained of lack of motivation during the day and we spoke of the importance of structuring his day more effectively. We also discussed the urine drug screens as Benzodiazepine positive for the last few times and the implications this might have on his mood. He denied using any other illicit substances, including alcohol. He appeared relatively well at the interview and did not offer any other major concerns or complaints. We once again discussed the importance of sleep hygiene, regular exercise and healthy diet on his physical and mental well being. He will be monitored and supported by Margaret Parkinson and another medical appointment will be arranged in due course.

Yours sincerely

Dear Dr. Mitchell

Wesley Phillips (0502823496)
80 Balfour Road, Paisley PA1 3DH

Psychiatric Diagnosis: F11.2 – Opiate Dependence, Personality Difficulties with previous self-harm, Prolonged QTc Interval

Current Psychotropic Medication: Methadone 60 mls. daily supervised, Fluoxetine 20 mgs. daily, Diazepam 5 mgs. twice daily (commenced today) (Quetiapine discontinued)

I reviewed this patient's ECG at the Drug Service on 03.05.2012, which was performed at the RAH on 01.05.2012. It revealed a QTc Interval of 526 m.s. I note that an ECG performed on 09.02.2012 revealed a QTc Interval of 495 m.s. Shortly after the first ECG in February, his Quetiapine was halved to 150 mgs. daily. I discussed with his drug worker Michael Finlay to contact the patient, but he was unable to do so. We managed to stop his prescriptions at the chemist and he attended to see me the following day on 04.05.2012. He tells me that his grandmother suffered with angina and that his mother waited for ten years for a heart transplant before passing away in 2007. He stated that his mother suffered with a "viral infection of the heart". Regarding symptoms, he tells me that he has noticed his heart "skipping beats at times", but was otherwise asymptomatic. He is an obese patient. He has a history of deliberate self-harm and this is clearly evident by the number of old scars on both upper limbs.

Delivering better health

www.nhsggc.org.uk

Page 02
Wesley Phillips

Dr. Mitchell
Barrhead Health Centre

He tells me that his Quetiapine helped with his self-harm, which he has not done for a while. He also described voices within his head that have a derogatory theme, that were being controlled with Quetiapine. He did not present with any obvious psychotic features at his appointment today and appeared to be euthymic and reactive in mood. I also contacted the medical receiving doctor at the RAH, Dr. Russell Allan regarding this patient's ECG. He advised me that admission to hospital was not necessary and that it would be best to stop the Quetiapine in the first instance. He also recommended to check his electrolytes, especially calcium, magnesium, phosphate and potassium. I have discussed this with the patient and with his approval I have stopped his Quetiapine medication today. Instead, I have commenced him on Diazepam 5 mgs. twice daily, for anxiety and agitation, and also due to its good side-effect profile on the heart. His bloods will be repeated in due course and we have arranged for a repeat ECG in approximately four days time. Should his QTc Interval remain elevated we will consider changing his Methadone to Suboxone maintenance treatment. We will also arrange for cardiology follow up if necessary. We will keep you updated on this patient's progress at the Drug Service.

Yours sincerely

Dear Dr. Mitchell

Wesley Phillips (0502823496)
Loretto Housing Association, 17 Abercorn Street, Paisley

I saw Wesley for further review at the Drug Clinic on November 6, 2012. Things appear to be reasonably settled at the moment. Wesley reports he is abstinent from drugs. He complains of some mild anxiety but appears to be managing. He looks relatively well. He had an ECG a few months back but results appear to have gone astray and I will get that repeated. His current medication is Methadone 50mg daily and Sertraline 10mg daily.

Yours sincerely

Dear Dr. Mitchell

Wesley Phillips (0502823296)
Loretto Housing Association, 17 Abercorn Street, Paisley

Psychiatric Diagnosis: F11.2 - Opiate Dependence, Personality Disorder

Current Psychotropic Medication: Methadone 50 mls. Sertraline 100 mgs.

I saw this man at Renfrewshire Drug Service on 21.08.2012. In terms of his drug use things are going particularly well. He reports injecting Heroin almost every day. He showed me a necrotic area on his finger, which he has attended the RAH with. I imagine staff were concerned with the current anthrax and about a significant area of dead tissue. I have encouraged him to make sure he continues to seek medical attention for that. He says that the person he is using Heroin with has broken the relationship in the last few days and he is confident he can remain away from it. He does not appear to be using Cocaine or Diazepam.

Wesley's main complaint today was of the need for more help and to see a CPN. He says he has no motivation. By this means he stays in bed until about 4.30 or 5.00 pm every day then gets up and spends the night using drugs and out with friends. He is missing the chemist occasionally because of this. He got a move to Loretto, I think organised by Criminal Justice Social Work, for extra support, but clearly he is not using it. In terms of psychological symptoms, he told me that he still hears voices from time to time. He says he feels bad about the past and occasionally feels like killing himself. On examination he had looked quite well. He was particularly initially chatty and quite reactive in mood. He did not appear distressed or distracted in any way. Later in the interview he did appear perhaps a little flat, but I see little sign that there is a psychotic illness or significant affective disorder.

Page 02
Wesley Phillips

Dr. Mitchell
The Levern Medical Group
Barrhead Health Centre

I have known Wesley a long time and the clinical picture continues to be one mainly of a personality disorder with poor coping skills, complicated of course by his lifestyle and ongoing use of drugs.

He had an abnormal cardiograph earlier this year with a very prolonged QTc interval. At that time he had been on Quetiapine, which was stopped and his Methadone was markedly reduced. The ECG changes appear to have rectified, but of course it leaves us the question of what to do as the Methadone dose really needs to be increased and he might benefit from some of anti-psychotic medication in terms of damping down his symptoms. I am going to repeat another ECG in the first instance, but I think I will have to consider switching him to Suboxone.

Wesley tells me that he has an appointment at the Charleston Centre in October to get a CPN, organised by Criminal Justice. I have no awareness of this referral.

Yours sincerely

PRESENTING PROBLEMS AND ASSESSMENT OF RISK
(as expressed by client/carer and assessor):

Referred by Out of Hours GP due to suicidal ideation and plan to throw himself off the bridge. Patient described having seen his CPN Margaret Parkinson – told her he was not coping and she referred him to Gambling Anonymous. Had an argument with his dad later this evening about his gambling and not wishing to look after his dog which made him upset and later had suicidal thoughts.

Reports to have constant suicidal ideation for the last 3 months but unclear of what is preventing him from completing it. He reports he walked to Govan to jump off the bridge. He went to the bridge but saw a family walking by hence he was stopped from doing it.

He reports to have been phoned by a friend who advised him to attend Dykebar for admission (his friend is KG currently inpatient in East Ward).

Patient became angry and walked out from assessment when he felt he would not be admitted to hospital. Staff followed him outside at which point he was observed to be head-banging against the wall and when staff attempted to stop him he tied his jacket around his neck stating and threatening to kill himself unless he was admitted. He became more hostile and aggressive to staff, threatening "legal action". Police were called and attended the scene. Patient agreed for assessment to continue. Much calmer and settled for the duration of assessment.

At this point patient denying ongoing suicidal thoughts plans or intent and requesting help.

Patient contracted to safety and crisis plan agreed with patient. Patient was on Fluoxetine and Quetiapine but these medications were stopped by RDS 16 weeks ago. Awaiting ECG. He is currently Prescribed and taking Sertraline 100mg daily.

Appetite – stable.

Sleep – no problems/ changes. Sleeping increased but this has been chronic in nature.

Concentration – okay.

Motivation – lacking motivation and daily structure.

Mood – low.

Enjoyment – spending time with his dog, gambling and friendships.

Energy – no recent change.

Denies any psychotic symptoms.

Dear Dr Johnstone

RE: Wesley Phillips, 1/4, 17 Abercorn Street, Paisley PA3 4AA
Date of Birth: 05.02.82 (3496)

Please be advised that the above named was referred by Out of Hours GP Service for emergency psychiatric assessment to the Intensive Home Treatment Team on the morning of 28.11.12, due to suicidal ideation. Following assessment it appeared that Mr Phillips was suffering from a number of social stressors related to query poly substance misuse and financial issues related to gambling addiction.

It was agreed following discussion with On Call Consultant Psychiatrist that Mr Phillips would benefit from a short period of support and monitoring by the Intensive Home Treatment Team.

We shall keep you updated of our contacts and should you require any further information please do not hesitate to contact the team on the above telephone number.

Yours sincerely

Dear Dr Fitzpatrick

Wesley Phillips Date of birth 05 02 82
80 Balfour Road-PAISLEY-PA1 3HD

Mr Phillips did not attend the appointment arranged at RDS on the 11th October 2011. His key worker Margaret Parkinson was trying to get hold of him and eventually found out that he had another appointment through East Renfrewshire Drug Service for next Thursday and his Methadone prescription will be continued for the meantime. Margaret will try to see him again in the near future and I will rearrange another appointment in due course.

Yours sincerely

Dr Fitzpatrick,

RE: WESLEY PHILLIPS, D.O.B: 05/09/1982
48 BRAESIDE DRIVE, BARRHEAD

I saw Wesley today 3rd November 2011 for review. Wesley is currently on 55ml of methadone dispensed daily under supervision from Boots Pharmacy in Pennilee Road. He is also prescribed Quetiapine 600mg per day and Fluoxetine 40mg per day.

He has now moved permanently to his fathers address in Paisley. As such we have transferred him to RDS and we gave him his last methadone prescription today.

As far as his illicit drug use is concerned Wesley unfortunately continues to inject heroin in to both feet. I went over harm reduction advice again with him. As far as his mental health is concerned he appeared to be quite well with no hallucinations.

I do not plan to see Wesley again but if he moves back to the area I would be more than happy to take back his prescription.

Yours sincerely

Grace Campbell

Dr Fitzpatrick

**RE: WESLEY PHILLIPS, D.O.B: 05/09/1982
48 BRAESIDE DRIVE, BARRHEAD**

I saw Wesley today (25 August 2011). As you know Wesley is a 29 year old man who was liberated from Kilmarnock prison yesterday, having served 21 months of a 42 month sentence. He is currently out on licence. His current medication is 35 mls of Methadone and he has been detoxing from 90 mls. He is also on Quetiapine 300 mgs BD and Fluoxetine 40 mgs daily.

Wesley denied any illicit drug use since liberation, however did admit to drinking vodka last night.

Wesley has unfortunately lost his tenancy in Barrhead

He denied any physical health problems. As far as his mental health is concerned he informed me that he has had 6 or 7 previous hospital admissions for depression, suicidal thoughts, self harm and psychosis. I do not think he has a formal diagnosis, however he denies that his mental health is related to his drug use. He did try to drown himself while in Kilmarnock prison on the first day, and informed me that he gets auditory hallucinations that make him self harm. He does however feel extremely well just now.

As far as forensic history is concerned Wesley has had several custodial sentences, this most recent one being the longest.

On examination he is 6'2" and weighs over 20 stone. He has multiple scars on his arms and neck from previous self harming. A mouth swab today was positive for Methadone and Benzodiazepines only. Wesley later admitted to taking a couple of Diazepam tablets last night to help him sleep. I have taken over his anti-psychotic, anti-depressant and Methadone prescription as he will be transferred to a GP in Paisley and then onto RDS.

Yours sincerely

Dear Dr Ahmed

NAME: WESLEY PHILLIPS DOB: 5.2.82

We have received an application from the above patient to attend our Drug Rehabilitation Centre. Teen Challenge offers a Christian based Rehabilitation programme which runs for 12 months.

All students on entering the programme must be willing and able to adhere to our GP's Detoxification regime.

I would be grateful if you could fill in the enclosed health information sheet, which would enable a speedy placement and also provide us with the name and address of the Psychiatrist he was referred to. We need this information so that an assessment can be made with regards to his place in our supported housing scheme.

Thank you for your help.

Yours sincerely

Chloe Bray
