History History Returned from holiday in Spain 1 week ago and since then has felt like sinuses are totally congested. Tenderness across bridge of nose/above eyes. No purulent nasal discharge. No PND symptoms. Experiencing intermittent headaches - worse when bending down. Earache and like there is a pressure from ear to nose. No exudate from ears. No changes in hearing, but aware of 'crackling' if she presses on ear. Can be 'off balance/dizzy' at times too - not persistent - quickly resolves. No changes in vision - wears glasses. No photophobia/nausea/vomiting. Sleeping okay. Covid negative. No fever. Had troubles with sinuses on/off for years and symptoms feel the same. Try nasal spray and advised to contact surgery should symptoms not improve/change/become worse.

Medication Medication Mometasone Furoate Nasal spray 50 micrograms/dose 1 BOTTLE TWO SPRAYS TO BE USED IN EACH NOSTRIL ONCE DAILY. REDUCE TO ONE SPRAY ONCE DAILY ONCE SYMPTOMS UNDER CONTROL.

29-Nov-2021 Mr Anonymous User (ANON)

22-Nov-2021 Ms Elizabeth McAteer (EMC) The Whins Medical PracticeMain Surgery

Comment Comment MHN telephone call-see previous note. Has been trying to avoid using propranolol as felt anger was increased after taking the. Initially discussed anxiety and mood issues but during call admitted she wanted to be honest. Drinking a bottle of wine most nights-usually at least 6 bottles a week. Discussed impact on mental health and vicious cycle which she identifies with. Feels hse can reduce without support. Also disclosed CSA and wonders if trying some counselling again may be helpful-given Wellbeing Scotland info. Also encouraged to utilise DAYLIGHT app and given self help info. Will contact practice if further appointment required

02-Nov-2021 Anp Susan Millar (MILL) Telephone Triage

History	History Calls with multiple issues -
1 - Anxiety - feels that symptoms are starting to take over her life. Has had a few 'panic attacks' recently. Unsure what potential cause/trigger may be. Describes feeling her heart racing as soon as she gets up in the morning to go to work - 'dreads it'. Worried she will be unable to keep attending work and fearful of losing job. Has reduced her hours, but does not seem to be helping. Feels she is exhausted and wants to sleep all the time. Also feels she is mixing things up and experiencing brain fog. No patience with her children and feeling more irritable. Describes feeling like she is in a black hole. No 'up and go'. Had increased her alcohol intake to try and ease symptoms, but she has stopped this currently. Aware that this could have caused more issues, had she continued this. Taking OTC kalms, with no effect. Been on citalopram for a long time and believes these are no longer effective. Not voicing any thoughts of self harm/taking her life.
2 - Removed skelf from finger yesterday and now believes finger is infected. Appears red/swollen and hot/tender to touch. Has also noticed some infective looking exudate. Systematically well.
Comment	Comment 1 - Has MHN appointment arranged - try propranolol - ?? peri-menopause. Still having fairly regular periods. No flushing, but has experienced night sweats for the past few years
2 - Treatment provided and advised to contact surgery should there be no improvement/any worsening symptoms.
Medication	Medication Propranolol Hydrochloride Tablets 40 mg 84 tablet 1 Tab Daily
Medication	Medication Flucloxacillin Capsules 500 mg 28 CAPSULE ONE CAPSULE TO BE TAKEN FOUR TIMES DAILY

10-Mar-2021 Anp Susan Millar (MILL) The Whins Medical PracticeMain Surgery

History *History* Struggling with low mood/anxiety. Multiple family stressors. Spoke with Dr Riddle a few weeks ago and has tried to amend diet/exercise/alcohol intake. None of which seem to have helped. Not working - furloughed for almost a year. Not sleeping very well - 'head burst' and having 'horrible thoughts'. Some of which include burying her children. Fleeting thoughts of suicide - 'throwing herself off Kincardine Bridge'. No history of self harm or previous attempts on her life. Clearly denies any thoughts/plans of this at present time. Children are her protective factor. Has sent her youngest ***** off to stay with her ***** so she can 'sort herself out'. Does not want her seeing her like she is. ***** and older children still at home with her as they understand why she is struggling. Wonders if she can try increasing citalopram back to 30mg - prescription provided for same. Also requesting sleepers - request declined. Suggest she look at sleep hygiene and given another appointment with MHN next week. Any further concerns/issues - to contact surgery for review/advice.

Medication *Medication* Citalopram Hydrobromide Tablets 10 mg 56 tablet 1 DAILY TOTAL 30MG DAILY

17-Feb-2020 Anp Elaine Blackwood (ELAI) The Whins Medical PracticeMain Surgery

History *History* Sore throat for 2 weeks. Followed soon after bout of cold and blocked nose and ears. These have settled but cough persists and now has sore throat.
also co reflux +++ for the last few weeks. worse when bending over a work.
denies any abdo pain.
no nausea or vomiting.
no change in bowels.

Examination *Examination* Looks very well.
no fever temp 36.2c HR=62 SPO2=98% RR=14
Ears NAD
Throat NAD
chest is clear.
nil to see,
cough sounds dry and harsh and constantly trying to clear throat.
does say she feels as if she swallows a lot of mucus.
minimal CLN +

Family History *Family History*

Comment *Comment* ?? viral/? PND/congested sinuses/? reflux.
try throat spray for comfort.
will try PPI to see if this helps over the next 2-3 weeks.
already has steroid nasal spray.
review if not settling with plan to do bloods and consider referral if persists

Medication *Medication* Benzydamine Hydrochloride Spray Sugar Free 0.15 % 30 ML TO BE USED EVERY 1.5 - 3 HOURS AS DIRECTED

Medication *Medication* Omeprazole Capsules (Gastro-Resistant) 20 mg 56 CAPSULE ONE CAPSULE TO BE TAKEN ONCE DAILY

17-Feb-2020 Anp Elaine Blackwood (ELAI) Telephone Triage

History *History* 2 week hx of sore throat and cold symptoms. Sounds congested +++.

Comment *Comment* SDA ANP

10-Jan-2020 Anp Elaine Blackwood (ELAI) The Whins Medical PracticeMain Surgery

History *History* Had cold symptoms beginning of December. Resolved but then returned on boxing day. Since then has had irritating non productive cough. Harsh and worse at night. feels wheezy at times. fever intermittently.
Constant stream of mucous from nose into back of throat . taking sudafed but each time she stops this gets worse again.

Examination *Examination* Looks well. no fever temp 36.9c HR=87 SPo2=98% RR=14
Ears NAD
throat NAD
no obvious PND at this time.
sounds congested ++
Chest is clear with no wheeze or creps with good bilateral chest wall expansion and good air entry throughout.
No red flag symptoms.

Comment *Comment* Likely chronic rhinitis/sinusitis. no acute infection noted.
treat with nasal steroid and review if not settling.
cough will likely settle in next few weeks. if persists will arrange cxr
worsening advice discussed

Medication *Medication* Salbutamol Cfc-free inhaler 100 micrograms/puff 1 INHALER ONE OR TWO PUFFS UP TO FOUR TIMES DAILY WHEN REQUIRED FOR WHEEZE

Medication *Medication* Beclometasone Aqueous nasal spray 50 micrograms/actuation 200 DOSE TWO SPRAYS TO BE USED IN EACH NOSTRIL TWICE A DAY. REDUCE TO ONE SPRAY TWICE DAILY WHEN SYMPTOMS UNDER CONTROL.

12-Dec-2018 Ms Kirstie Lawlor (KIRSTIE_18740) The Whins Medical PracticeMain Surgery

Comment Did not attend - no reason (on the day gp app)

26-Sept-2018 Dr Graham Riddle (RIDDLEG_18740) The Whins Medical PracticeMain Surgery

History *History* long term anxiety and recent sleep deprivation-possibly triggered by ***** recently leaving home-discussed/offered counselling-long chat about sleeping tablets but short course helped yrs ago-agreed to issue but knows no more to be given

27-Aug-2018 Anp Elaine Blackwood (ELAI) Telephone Triage

History History Woke with pain between shoulders/base of neck 5/7 ago. worse in am when starts to move around. pain on movement only.
No pleuritic pain. no productive cough/chest pain or haemoptysis.
No wheeze.
No acute SOB.
has been taking some analgesia which helps for a short while. pharmacy gave ibuprofen/codeine combination but finds this wears off quickly and cannot take anything else./

Comment Comment Sounds very much MSK.
advised will prescribe separate drug preparations, review if not settling or any worse over the next few days.
px left a reception for collection.

31-Mar-2017 Dr John Scales (JSC18740) Hallpark Medical PracticeMain Surgery

History History Pain eased a little by pregabalin but still significant. Feels cocodamol is best painkiller she has tried. On 75mg bd of pregabalin, so suggest increase as below.

History History Thinks the citalopram is causing a blocked nose and post nasal drip, and sinus headaches. Data sheet says it can be a side effect. Suggest one possibility might be gradual withdrawal from this med and try fluoxetine. Mgt will think about it for now. Going for counselling soon,.

Medication Medication Pregabalin Capsules 150 mg 56 capsule 1 CAPSULE AS DIRECTED UP TO MAX 150MG BD

Medication Medication Pregabalin Capsules 75 mg 7 capsule 1 CAPSULE DAILY FOR 1 WEEK (DOSE 150MG MANE 75MG NOCTE)

Medication Medication Co-Codamol 30/500 Tablets 100 TABLET ONE OR TWO UP TO QDS PRN FOR PAIN

06-Mar-2017 Dr Shirley Proctor (PROCTOR_1618740) Hallpark Medical PracticeMain Surgery

History **History** X: Spot on bridge of nose, like a boil, 3/3/2107. Upper R eyelid all swollen yesterday, much reduced today but eye bi t'gritty'. Sight unaffected. Still pink hue to R upper eyelid, eye quiet and prominent red spot bridge nose. for ABcs (Clinically not shingles).

Medication **Medication** Flucloxacillin Capsules 500 mg 20 capsule ONE CAPSULE TO BE TAKEN FOUR TIMES DAILY

Medication **Medication** Chloramphenicol Eye drops 0.5 % 10 ML ONE DROP TO BE USED FOUR TIMES A DAY IN THE AFFECTED EYE(S)

24-Feb-2017 Dr Kenneth Stirling (STIRLING_118740) Hallpark Medical PracticeMain Surgery

Comment **Comment** 1) Anxiety. Not working. Discussed daily routine. On Citalopram 20mg daily - try increase to 30mg daily. Refer CMHT re Anxiety Mx. Has used Moodjuice. 2) ***** 26/03/1977, diagnosed with Spinal Muscular Atrophy (type not known). His ***** also has this diagnosis. Miss Bullen has 2 children with Mr ***** and seeks testing of children - ***** (21/10/2000) and ***** 05/02/2004). I have asked Miss Bullen to find out more detail re Dx of SMA - Mr ***** is registered with Alva GP. Refer Genetics Clinic. KWS

Medication **Medication** Citalopram Hydrobromide Tablets 10 mg 56 tablet 1 DAILY TOTAL 30MG DAILY

31-Jan-2017 Dr John Scales (JSC18740) Hallpark Medical PracticeMain Surgery

History **History** Arrived 10 mins late. Ongoing pain. Mainly in lower back, in between shoulder blades, and down the R arm. Still sleeping during the day. Sometimes her knees swell up, and both hands, particularly R hand. Was advised may have fibromyalgia. Major probs with movements of R arm causing pain in R elbow but also R wrist and up in to deltoid area. Asking for specialist opinion. Gabapentin did not help. Worries about what might be wrong with her. Went to physio who felt it was nerve related pain rather than muscular pain. ***** had a brain tumour so worries about this.

Comment **Comment** Refer Rheumatology. Try Pregabalin.

History **History** Blister like lesion on L lower lip for the past week.

Comment **Comment** Try difflam spray and see if not settling. Smoker.

Medication **Medication** Pregabalin Capsules 75 mg 56 capsule ONE CAPSULE BD

Medication **Medication** Citalopram Hydrobromide Tablets 20 mg 112 tablet TAKE ONE TWICE DAILY

Medication **Medication** Benzydamine Hydrochloride Spray Sugar Free 0.15 % 1*1 spray 1 SPRAY AS REQ

Test Results

25-July-2025 Mr Anonymous User (ANON)

Result: Haemoglobin A1c level

HbA1c level - IFCC standardised

31 mmol/mol

(No range available)

25-July-2025 Mr Anonymous User (ANON)

Result: Full blood count - FBC

Nucleated red blood cell count, 0

0 10⁹/L

(No range available)

Basophil count

0.1 10⁹/L

(Range: 0.02 - 0.1)

Eosinophil count

0.1 10⁹/L

(Range: 0.02 - 0.5)

Monocyte count

0.5 10⁹/L

(Range: 0.2 - 1)

Lymphocyte count

1.9 10⁹/L

(Range: 1 - 3)

Neutrophil count

3.6 10⁹/L

(Range: 2 - 7)

Mean corpusc. Hb. conc. (MCHC)

331 g/L

(Range: 315 - 345)

Mean corpusc. haemoglobin(MCH)

32.8 pg

(Range: 27 - 32)

Packed cell volume

0.378

(Range: 0.36 - 0.46)

Mean corpuscular volume (MCV)

99.2 fl

(Range: 83 - 101)

Red blood cell (RBC) count

3.81 10¹²/L

(Range: 3.8 - 4.8)

Platelet count

338 10⁹/L

(Range: 150 - 410)

Total white cell count

6.1 10⁹/L

(Range: 4 - 10)

Haemoglobin estimation

125 g/L

(Range: 120 - 150)

25-July-2025 Mr Anonymous User (ANON)

Result: (Non Coded Event - Serum vitamin D)

Serum vitamin D

100 nmol/l

(No range available)

25-July-2025 Mr Anonymous User (ANON)

Result: Blood haematinic levels

Serum vitamin B12

195 ng/L

(Range: 187 - 883)

Serum folate

2.8 ug/L

(Range: 3 - 20)

25-July-2025 Mr Anonymous User (ANON)

Result: Thyroid function test

Serum TSH level

0.8 mU/L

(Range: 0.35 - 5)

25-July-2025 Mr Anonymous User (ANON)**Result:** (Non Coded Event -)

Serum C reactive protein level &lt; 5

(No range available)

25-July-2025 Mr Anonymous User (ANON)**Result:** Urea and electrolytes

Glomerular filtration rate &gt; 59

(No range available)

Serum creatinine

70 umol/L

(Range: 40 - 130)

Serum urea level

6.3 mmol/L

(Range: 2.5 - 7.8)

Serum chloride

108 mmol/L

(Range: 95 - 108)

Serum potassium

4 mmol/L

(Range: 3.5 - 5.3)

Serum sodium

137 mmol/L

(Range: 133 - 146)

25-July-2025 Mr Anonymous User (ANON)**Result:** Calcium profile

Serum inorganic phosphate

0.96 mmol/L

(Range: 0.8 - 1.5)

Corrected serum calcium level

2.16 mmol/L**(Range: 2.2 - 2.6)**

Serum calcium

2.17 mmol/L**(Range: 2.2 - 2.6)****25-July-2025 Mr Anonymous User (ANON)****Result:** Liver function test

Serum alkaline phosphatase

54 U/L

(Range: 30 - 130)

Serum albumin

43 g/L

(Range: 35 - 50)

Serum total protein

67 g/L

(Range: 60 - 80)

Serum total bilirubin level

5 umol/L

(No range available)

Serum ALT level

20 IU/L

(No range available)

AST serum level

17 U/L

(No range available)

25-July-2025 Mr Anonymous User (ANON)**Result:** Autoimmune profile

Anti-tissue transglutnase lev

1.3 U/ml

(No range available)

25-July-2025 Mr Anonymous User (ANON)**Result:** Autoimmune profile

Haematology test

(No range available)

Dear Dr Fisher,

Re. MARGARET BULLEM, 75 BERRYHILL, COWIE, STIRLING, FK7 7AH. Date of Birth 13.12.75 Hospital
Number: E127049

Your patient attended the Stirling Royal Infirmary on the 27 OCT 2007 00:27.

The presenting complaint was: POLICE REF - EYE INJ

The following investigations were carried out:

The A&E diagnosis was: EYE - CORNEAL ABRASION
ABRASION - FACE - FRONT

The following treatment was given:

At the conclusion of treatment the patient was: 1 LEFT BY OWN MEANS. Departure Ready Date/Time: 27 OCT
2007 03:10, Actual Departure Date/Time: 27 OCT 2007 03:14

Follow-up: OPHTHALMOLOGY

Additional Information:

Yours sincerely,
NAOMI HENDERSON

Dear Dr Fisher

Margaret Bullen, DOB 13/12/1975
06 Alexander Mcleod Pl, Fallin, FK7 7HP

Your patient attended our Early Pregnancy Assessment Unit this morning because of vaginal bleeding/abdominal pains. Her last menstrual period was 6-8 weeks ago. A scan unfortunately showed an empty uterus. A pregnancy test carried out today was negative. She has had no further bleeding or pain this morning and has been discharged back to your care. She has been advised to call ward 18 or yourself if she has any increased pain or bleeding.

Yours sincerely

N. Murton

Dear Miss Bullen

I am writing to let you know that it is now time for you to have your next cervical smear test.

Because your last test result showed some inflammation, it is particularly important that you should have a check at this stage to see whether or not this has settled.

Could you please contact the surgery to arrange a cervical smear test appointment. If you have had a recent test elsewhere, could you please let us know, so that we can update your records.

Yours sincerely

Dear Miss Bullen

This is the third time I have written to remind you that you are due to have your next cervical smear. This is an important test for cancer, which is recommended for all women at regular intervals and it is **PARTICULARLY IMPORTANT** that you have this test carried out.

Could you please make an appointment as soon as possible.

If you have had a smear taken elsewhere could you please inform us and we will update our records.

If you do not wish to have this test carried out please sign the enclosed disclaimer, return it to the surgery and we will remove you from this years recall list. However you will be recalled again in 3 years time.

Yours sincerely

Drs R.A. Rodger, W.G. Fisher, H.J. MacLarty & J.K. Macdonald

FK7 9AZ

Dear Margaret

The result of your cervical smear is now available. This is completely negative as regards cancer but shows some early changes and evidence of viral infection the result of which it is recommended that we repeat it in three months time.

I would be grateful if you would make the necessary arrangements to have this done at that time.

Yours sincerely

Dr Iain R Cathcart

Dear Dr. MacLarty,

Margaret Bullen (13.12.75)
35 Baxter Street, Fallin.

This lady underwent suction termination of pregnancy with insertion of Mirena on 11th October.

The procedure itself was carried out without any complications and a Mirena was inserted at the end of the procedure. Her Chlamydia swab was reported as negative with her blood group as A Rh. Positive.

She was well enough to go home the same day. We have not arranged further review.

Yours sincerely,

G.K. GREWAL
Locum Consultant Obstetrician & Gynaecologist.

Dear Dr MacLarty

MARGARET BULLEN (13/12/75)
35 BAXTER STREET, FALLIN

Your patient a twenty five year old girl attended the clinic today with a request for termination of pregnancy. In her circumstances this appears justified and arrangements have been made for her to attend for suction evacuation of the uterus. She has requested that an IUCD be inserted at the same time.

Yours sincerely

JD Steven
Consultant Obstetrician and Gynaecologist

Dear Doctor

Margaret Bullen (13/12/75) 35 Baxter Street, FALLIN

This para 1 lady now finds herself pregnant again. Her child is 11 months. She is around 8 weeks pregnant. She has been over in Ireland, near Dublin with her partner. They are not getting on, constant arguments are occurring. She has come home to Stirling permanently. She has been having difficulty coping with their 11 month old child and has been on medication, namely Seroxat for depression. She had been seeing a counsellor in Dublin.

Could she be seen urgently regarding termination of pregnancy? I have enclosed a certificate A.

Thank you for seeing her.

Yours sincerely

Dear Ms Bullen

We notice from your records that you have not yet made an appointment with your Doctor to have a new patient registration check carried out.

We would be grateful if you could make an appointment with Dr Rodger at your earliest convenience to have this carried out.

This is our normal practice procedure and is a chance for your Doctor to get to know you and some of your medical history.

Please contact the receptionist to make an appointment.

We look forward to hearing from you.

Yours sincerely

Christine Sorley
Deputy Manager

Dear Ms Bullen

One of your blood tests is a little elevated. This does not suggest any serious health problem and should simply require to be repeated. I know that I will be seeing you in approximately 4 weeks time and will discuss this further with you then. Let me reassure you however that there is no concern regarding this test and I do not envisage any further action will be required.

Yours sincerely

Dr W G Fisher

Dear Dr. Bijral

MARGARET BULLEN, SEA VIEW, FURNACE, INVERARAY
DOB 13 12 1975

Your patient was seen for review again at my clinic on the 5th February. She had secondary amenorrhoea, but this has now settled and she has had two normal periods recently at 5 week intervals. She was on Clomid in the past for one month only and I would like her to use Clomid again, 100 mgs. to be taken from day 3 to 5 of her cycle for up to 3 months in the first instance.

Her partner's first sample showed a motility of only 20% and I have arranged that this be repeated in the near future.

Yours sincerely

Dear Dr. Bijral

**MARGARET BULLEN, SEA VIEW, FURNACE, INVERARAY
D.O.B. 13.12.75**

Your patient was seen in my Infertility clinic on 11th December with her now 18 month history of primary infertility. She has very irregular periods and her LMP was in May this year. There is nil else of note in her past history and examination was normal. A full background hormonal assessment has been made. Her partner, Archie is of unproven paternity and we have arranged for semen assessment to be carried out. She will be seen again for review when these results are available.

Yours sincerely,

MJH

I would be grateful for your opinion and advice on the above named patient. A brief outline of history, symptoms and signs is given below:

Our twenty year old has been living with her boy friend for almost two years. They have not used any contraception yet - has failed to conceive so far. On enquiry, she has irregular & infrequent menstrual periods, L.T.P in May/June 96.

She was initially seen by Dr. Kenyon in Sept 95 for infertility, but defaulted from the clinic attendance. However she is requesting investigation & treatment & promises to be more steadfast this time! I would be grateful if you could kindly see her & advise.

Diagnosis/provisional diagnosis: _____

Present drug treatment and potential special hazards: _____

X-ray (women of childbearing age). Date of first day of L.M.P. _____

Relevant X-rays available from: _____ No. (if known) _____

Dear Dr. Bijral

Margaret Bullen - Dob 13/12/75
Sea View, Furnace, Argyll

This patient returned to the Gynaecology Clinic on 27 October, 1995. Her hormonal profile did in fact fit with the picture of PCOS and if she wants to conceive, and she tells me she very much does, then she will need some assistance. I asked her to give this some thought as current recommendation is that people should not receive Clomiphene for more than about 9 months, so we have to be fairly sure that this is what they want to do.

We will try her with an initial regime of Clomiphene 100 mg daily to be taken from day 2 to day 6 of her cycle. However as she is not menstruating we should proceed a course of Clomiphene with a pregnancy test and if this is negative then she can commence it at any stage. I would be grateful if with each cycle the serum progesterone could be checked on day 21. I will review her with the results of her initial treatment in three months time.

Yours sincerely

Furnace

Dear Dr. Bijral

Margaret Bullen - Dob 13/12/75

Sea View, Furnace, Argyll

Thank you for referring this patient who was seen in the Mid Argyll Hospital on 22 September, 1995. She is a 19 year old girl with a two year history of oligomenorrhoea. She had her menarche at the age of 14 and initially her menstrual cycle was regular but subsequently became a little bit erratic.

She says she is hoping to conceive.

On examination today the pelvic organs felt grossly normal.

I have taken bloods for full hormonal profile. I have a suspicion that this patient might have polycystic ovarian syndrome. If this is the case and she still wishes to pursue the idea of a pregnancy then we could try giving her some Clomiphene to induce ovulation. I will also ask the Dietitian to see her with a view to giving her advice about weight loss. She is currently weighing just under 11 stones at a height of 5'4".

Yours sincerely

I would be grateful for your opinion and advice on the above named patient. A brief outline of history, symptoms and signs is given below:

This young girl gives Hx of nearly eight months of menorrhoea. She states that her menstrual cycles have been very irregular & frequent ever since menarche at 15 yrs. age. She states that she had some investigation done whilst at Dunoon, but I have no records of that & also that this girl has been quite mobile rarely staying at any one place for more than a few months.

I got some investigations done, the photocopies of the reports are enclosed for your ~~perusal~~ ^{information}. I would be grateful if you could kindly see her & advise.

Dear Mike

MARGARET BULLEN - DOB 13.12.75
MILE END, CAMPBELTOWN

This lady again defaulted from the clinic. The results of her biochemistry would certainly suggest that she has polycystic ovarian syndrome, and assuming that she does not wish to become pregnant, this should probably be best treated using the combined oral contraceptive pill if you felt this was appropriate.

Kind regards.

Yours sincerely

Dear Dr Hall

MARGARET BULLEN - DATE OF BIRTH 13 12 75
MILE END CARAVAN, BY CAMPBELTOWN, ARGYLL

Thank you for referring this patient who in fact did not come to see me at your Health Centre on the 18th of November 1994.

I understand that she is a 19 year old woman who has an infrequent menstrual cycle and whose blood hormone studies suggest a mild degree of polycystic ovarian disease.

I have not seen her but in this situation, excessive weight gain is something to be avoided and if she is overweight then you could advise her accordingly.

The other factor is that it is certainly generally possible to stimulate ovulation with Clomiphene therapy but this is only necessary should she wish to conceive.

With kindest regards.

Yours sincerely

G.P. DR. HALL

REFER: DR. NAISMITH

12 OCTOBER 1994

Dear Dr. Naismith,

Thank you for seeing this girl who has a history of irregular periods often going 4-5 months between each bleed. She has only recently moved to this area but her previous G.P. did some investigations which show the following:-

LH 17.1U/L, FSH 2.5U/L Testosterone 3.8 SHBG 70NMOL/L. Her Free Antrogen Index was 5 with a moderately elevated testosterone.

The comment from the laboratory was possible polycystic ovarian syndrome. She has never been investigated further and she herself is somewhat concerned as to the cause of her problem.

I would thus be grateful for your opinion as to further investigations.

Kind regards,

Yours sincerely

Dr. M.D. Hall

Dear Dr Lendrum,

Margaret Bullen 7 Torlochan Caraven Site Sandbank (13.12.75)

Thank you for your enquiry about this young lady who came to us in October complaining of primary infertility with irregular periods. At that time in October 1993 she was found to have LH 17.1U/L. FSH 2.5U/L Testosterone 3.8 SHBG 70NMOL/L. Her Free Androgen Index was 5 with a moderately elevated testosterone. The comment from the laboratory at that time was "In view of the increased LH and testosterone ? polycystic ovarian syndrome" they suggested a repeat and possibly a scan. Despite trying to get in touch with Margaret at that time we did not see her again until January this year when she was referred to Gynaecology department here in Dunoon. The Registrar who saw her there repeated all these tests and arranged to review her after two months. She has obviously moved to Kirriemuir again since then so I leave it to you to follow this up as you think necessary.

Yours sincerely,

DR A W THOMSON.

7 February 1994

Dear Dr. Campbell,

Margaret Bullen, 7 Tor Lochan Caravan Site, Sandbank DOB 13.12.75

Thank you for your letter about this eighteen year old girl who lives with her boyfriend who is sixteen years old, both unemployed and smoke 15-20 cigarettes a day. She has been trying to become pregnant. Her periods are every 2-6 months. She also complained of an itchy white vaginal discharge.

On examination she was fit and well, abdomen n.a.d., pelvic examination revealed some frothy white discharge, cervix n.a.d, uterus and adnexae unremarkable.

I took vaginal and cervical swabs for chlamydia, monilia and trichomonas. I also took off blood for FSH/LH, prolactin, SHBG, testosterone and full blood count.

She will see you in about two weeks time for her swab report etc and she will be reviewed here in eight weeks' time.

Yours sincerely,

Thank you for seeing this 18 year old girl in your out-patient clinic.

She has been trying for over a year to get pregnant with no success. She had menarche about the age of 13 years and regular periods for two years, but since the age of 15 her periods have been very irregular occurring every two to three months. Her boyfriend, she believes, has already fathered a child in England.

Dr. Thomson took blood for a hormone profile in October 1993 and the results came back showing an increased LH and Testosterone level. Dr McConnell who looked at the results was querying a possibility of a polycystic ovarian syndrome. However the girl did not come back for repeat blood test and I would be grateful for your opinion regarding scan of her ovaries etc.

Yours sincerely,

DR P T CAMPBELL

Dr. Fairlie,
Brightons.

Dear Fairlie,

Margaret Bullen : d.o.b. 13.12.75, c/o Youth Care Centre, Polmont.

This patient attended Casualty on 24.3.90 after fighting with another girl and being bitten on the left hand and hurting the left wrist. She was complaining of pain in the left wrist and 1st metacarpal.

On examination she was very tender over the left distal radius and the first metacarpal. There was no scaphoid tenderness and a full range of movement at the wrist. Thumb movements were present but decreased secondary to pain. X-ray revealed no bony injury. Hence she was given a crepe bandage, a collar and cuff the bite was cleaned and she was given a tetanus for this and Flucloxacillin 250 mg q.i.d. for 5 days and discharged.

Yours sincerely,

Dear Dr. Jackson,

Re: Margaret Townsley - d.o.b. 13.12.74 - 273205
17 Princes Street, Campbeltown. PA28.

Margaret was seen in my clinic today. She has been in the hospital recently with abdominal trauma, and an I.V.P. and abdominal ultrasound showed injury to her left kidney. Today she is well, she has had no further abdominal pain and no haematuria. Examination revealed no abnormality.

I have arranged for her to have a repeat ultrasound for a follow up, and she will be reviewed with the results.

Yours sincerely,

Mr. A. Azmy
Consultant Surgeon.

ROYAL HOSPITAL FOR SICK CHILDREN

Our Ref.: AA/EM

Your Ref.:

YORKHILL, GLASGOW G3 8SJ

TELEPHONE:
041-339 8888

6th July, 1982.

Dr. Jackson,
The Cottage Hospital,
CAMPBELTOWN. PA28 6PB.

Dear Dr. Jackson,

S.
Margaret Townley - D.O.B. 13.12.74.
17 Princes Street, Campbeltown.
H.N. 273205.

This girl was admitted on 4th June, 1982 having been transferred from Campbeltown Cottage Hospital following a road traffic accident and suspected intra-abdominal trauma. She complained of dysuria and was found to have haematuria. Abdominal ultrasound confirmed right renal haematoma which has gradually absorbed. She was kept under observation and repeat ultrasound showed complete resolution and she was allowed home on 15th June, 1982.

Yours sincerely,

A. Azmy.Consultant Surgeon.

The Hospital Anxiety and Depression Scale

Name Mary Bullen Date 1.3/12/75

Clinicians are aware that emotions play an important part in most illnesses. If your clinician knows about these feelings she or he will be able to help you more.

This questionnaire is designed to help your clinician to know how you feel. Ignore the numbers printed on the left of the questionnaire. Read each item and underline the reply which comes closest to how you have been feeling in the past week.

Don't take too long over your replies; your immediate reaction to each item will probably be more accurate than a long thought-out response.

I feel tense or 'wound up':

- Most of the time
 A lot of the time ☒
 From time to time, occasionally
 Not at all

I still enjoy the things I used to enjoy:

- Definitely as much
 Not quite so much ☒
 Only a little
 Hardly at all

I get a sort of frightened feeling as if something awful is about to happen:

- Very definitely and quite badly
 Yes, but not too badly
 A little, but it doesn't worry me ☒
 Not at all

(continued overleaf)

NHS Confidential: Personal data about a patient

I can laugh and see the funny side of things:

As much as I always could

Not quite so much now

Definitely not so much now

Not at all

Worrying thoughts go through my mind:

A great deal of the time

A lot of the time

From time to time but not too often

Only occasionally

I feel cheerful:

Not at all

Not often

Sometimes

Most of the time

I can sit at ease and feel relaxed:

Definitely

Usually

Not often

Not at all

I feel as if I am slowed down:

Nearly all the time

Very often

Sometimes

Not at all

I get a sort of frightened feeling like 'butterflies' in the stomach:

Not at all

Occasionally

Quite often

Very often

(continued overleaf)

I have lost interest in my appearance:

- Definitely
 I don't take as much care as I should —
 I may not take quite as much care
 I take just as much care as ever

I feel restless as if I have to be on the move:

- Very much indeed
 Quite a lot —
 Not very much
 Not at all

I look forward with enjoyment to things:

- As much as ever I did
 Rather less than I used to
 Definitely less than I used to —
 Hardly at all

I get sudden feelings of panic:

- Very often indeed
 Quite often
 Not very often
 Not at all —

I can enjoy a good book or radio or TV programme:

- Often
 Sometimes
 Not often
 Very seldom —

Now check that you have answered all the questions

Pre-Birth Planning Meeting –
Re Margaret Bullen dob 13/12/75 31 Mansefield Avenue, Sauchie FK10 3LG

Date: 13th August 2008

Venue: Room 4, Conference Centre, Stirling Royal Infirmary.

Time: 10.30 am

We would like to invite you to attend a pre birth-planning meeting to discuss concerns about this family prior to the birth of their baby. The meeting will look at ways of supporting this family prior to and following the birth.

The following concerns have been raised: **Domestic abuse, history of alcohol abuse, accommodation**

Can you please bring with you a brief summary of background knowledge and any existing information about this family that your service may have.

Please let us know if you are unable to attend by contacting Chris Egerton, secretary on 01786 434000 ext 4297, or alternatively, email c.egerton@nhs.net.

Also, to ensure all information is considered, can you please submit a report in your absence or ask a colleague to attend in your place.

Yours sincerely

C. W. Egerton

RELEVANT BACKGROUND INFORMATION LEADING TO REFERRAL

Margaret is currently living in a Women's Refuge with her two children. The father of her current pregnancy, James Blackburn, is different to the father of her existing children. James lives at 22 Hall Gardens, East Bolden, Newcastle, mob: 07849 168414. Margaret disclosed a history of alcohol.

Margaret disclosed a history of alcohol misuse by both herself and her partner; however, she says she has not been drinking alcohol since finding out s is pregnant.

She says James has never been physically violent although she related a historical incident where she was drunk and slapped James thereby provoking him into pushing her where she stumbled into an open door and banged her head. This incident was witnessed by a friend who reported the incident and thereafter Margaret says she had intensive Social Work intervention which she feels was inappropriate. She says James has only psychologically abused her by way of complaining and making verbal threats which she does not believe he would carry out as he only says this when he is intoxicated with alcohol. Margaret had previously had Social Work involvement when she lived in Stirling. She does not have an assigned Social Worker at present.

Margaret is aware of this CP9 being generated and did not express or exhibit any concerns about it. Her son was at school at the time of the visit and her daughter, who is 4 years old, was at home and was a very chatty, friendly and polite child who made good eye contact and interacted freely with both myself and her mother.

Margaret has a history of depression as does her mother who has been on medication for many years. Margaret also had severe (her term) postnatal depression following the birth of her son Sean. Margaret has been feeling quite low today and was a bit weepy. She feels very lonely as family and friends are not allowed to visit her in the refuge and she cannot afford the travel expenses backwards and forwards as her mother lives in Fallin. She did not feel she needed any specific intervention, however, is aware that her GP and HV will be informed of her history and her current low mood and she had no concerns about this.

Margaret is not sure she has made the right decision to leave James as he phones her every day to find out how she and the baby are and has asked her to return. She is very undecided about what to do and may return to Newcastle, however, expressed doubt about this as she says she would not want to make the move only to regret it again.

HEALTH PROFESSIONALS' CONCERNS

1. Overall health and wellbeing of Mother, children and unborn child.

PATIENT HEALTH QUESTIONNAIRE (PHQ-9)

NAME: MARGARET BROWN

DATE: 19/11/08

Over the last 2 weeks, how often have you been bothered by any of the following problems? (use "✓" to indicate your answer)

	Not at all	Several days	More than half the days	Nearly every day
1. Little interest or pleasure in doing things	0	1		
2. Feeling down, depressed, or hopeless	0	1		
3. Trouble falling or staying asleep, or sleeping too much	0	1		
4. Feeling tired or having little energy	0	1		
5. Poor appetite or overeating	0	1		
6. Feeling bad about yourself—or that you are a failure or have let yourself or your family down	0	1		
7. Trouble concentrating on things, such as reading the newspaper or watching television	0	☒		
8. Moving or speaking so slowly that other people could have noticed. Or the opposite—being so fidgety or restless that you have been moving around a lot more than usual	0	1		
9. Thoughts that you would be better off dead, or of hurting yourself in some way	0			

add columns: 0 + 1 + 0 + 0

(Healthcare professional: For interpretation of TOTAL, please refer to accompanying scoring card).

TOTAL: 7

10. If you checked off any problems, how difficult have these problems made it for you to do your work, take care of things at home, or get along with other people?

Not difficult at all _____
Somewhat difficult _____
Very difficult _____
Extremely difficult _____

RELEVANT BACKGROUND INFORMATION LEADING TO REFERRAL

Margaret is currently living in a Women's Refuge with her two children. The father of her current pregnancy, James Blackburn, is different to the father of her existing children. James lives at 22 Hall Gardens, East Bolden, Newcastle, mob: 07849 168414. Margaret disclosed a history of alcohol.

Margaret disclosed a history of alcohol misuse by both herself and her partner; however, she says she has not been drinking alcohol since finding out s is pregnant.

She says James has never been physically violent although she related a historical incident where she was drunk and slapped James thereby provoking him into pushing her where she stumbled into an open door and banged her head. This incident was witnessed by a friend who reported the incident and thereafter Margaret says she had intensive Social Work intervention which she feels was inappropriate. She says James has only psychologically abused her by way of complaining and making verbal threats which she does not believe he would carry out as he only says this when he is intoxicated with alcohol. Margaret had previously had Social Work involvement when she lived in Stirling. She does not have an assigned Social Worker at present.

Margaret is aware of this CP9 being generated and did not express or exhibit any concerns about it. Her son was at school at the time of the visit and her daughter, who is 4 years old, was at home and was a very chatty, friendly and polite child who made good eye contact and interacted freely with both myself and her mother.

Margaret has a history of depression as does her mother who has been on medication for many years. Margaret also had severe (her term) postnatal depression following the birth of her son Sean. Margaret has been feeling quite low today and was a bit weepy. She feels very lonely as family and friends are not allowed to visit her in the refuge and she cannot afford the travel expenses backwards and forwards as her mother lives in Fallin. She did not feel she needed any specific intervention, however, is aware that her GP and HV will be informed of her history and her current low mood and she had no concerns about this.

Margaret is not sure she has made the right decision to leave James as he phones her every day to find out how she and the baby are and has asked her to return. She is very undecided about what to do and may return to Newcastle, however, expressed doubt about this as she says she would not want to make the move only to regret it again.

HEALTH PROFESSIONALS' CONCERNS

1. Overall health and wellbeing of Mother, children and unborn child.

RECORD OF MEETING			
Attendees / Present	Designation	Base	Report
Margaret Bullen	✓ Patient		
Robbie Duffy	✓ Chair	SRI	
Kathleen Sharp	✓ Midwife - Buttercup	SRI	
Ruth Kirtan	✓ Health Visitor	Tullibody	
Ruth Findlay	✓ Social Worker	Alloa	
Chris Egerton	✓ Minutes	SRI	
Kirsty Purdie	✓ Friend		
Apologies			
Sara Lovelock	Team leader	Alloa	
Mrs Duffy welcomed everyone and explained the reason for the meeting. The CP9 was read out.			
Robbie Duffy			
- Advised Ms Bullen to de register with Newcastle. - Concerned why Social Services were involved when living in Newcastle. - Advised Ms Bullen to tell midwives or health visitor if she felt her mood going down so help could be given. - Explained may have been asked to take toxicology test due to raised awareness regarding the long term effects of alcohol on children. - There are no concerns regarding the children at present. - Asked Ms Bullen if she understood the reason for holding the meeting -- only limited information available on the CP9 -- Social Services did not know 'the bigger picture' especially regarding the safety of the children.			
Margaret Bullen			
- Booked in Newcastle at 13 weeks. -- had first scan - Also booked with Alloa but had second scan in Newcastle (wanted to know the sex of the baby), scans were fine. - Currently living in 3 bedroomed flat with 2 children. - Relationship with baby's father has ended. - Denies having a drinking problem. Admits went through a period when she drank too much but has not had a drink since the beginning of the year. - Felt Social Services in Newcastle overreacted to situation. Partner never physically abused her but did psychologically -- made threats which she was sure he would never carry out. - Objected to Social Services turning up on doorstep at 10 pm at night (Newcastle) - Does not want any input from Social Services. - Father of the two older children will have moved over from Ireland and will take care of the children when she is in hospital. Will return to own home after the birth. - Had first baby normal delivery but suffered post natal depression afterwards -- on medication for 6 months and the second one was a caesarean section due to baby being breech. - Friend Kirsty will be birthing partner. - Mother has recently had an operation but will probably support once recovered. - Has benefits organised. - Stated she was not feeling depressed, but emotional. - Stated she had been asked by services in Newcastle to take a toxicology test. - Has taken advice regarding the baby. The father's name will not be going on the birth certificate. - Initially the father had said he wanted to take the baby to Newcastle every 2nd weekend so his mother could see it. - Ms Bullen stated that the father could see the baby if he wanted to but it had to be locally. - Aware that there is at least a 6 month wait for housing. - Has registered the children at local schools and bought the uniforms. - Has registered with a Tullibody GP. - Has bought all the baby equipment.			

CP9

Amended 14/01/08 CWE

NHS Confidential: Personal data about a patient

CONFIDENTIAL**Ruth Findlay**

- Had met Ms Bullen when she was seeking advice regarding the father's rights.
- Concerns had been expressed regarding the background of domestic abuse.
- No grounds to hold a case conference at present.
- Not currently allocated to a social worker – but any involvement would be in a supportive role.
- Ms Bullen appeared to have had an alcohol problem. Had been cautioned for being drunk and disorderly (in Newcastle).
- Social Services had been concerned re the potential problems regarding abuse and alcohol.
- Suggested a referral to Hillfoots Family Centre for a placement either a morning or afternoon for the baby may be an option.
- Will speak to manager regarding if there is a need to follow case up.

Ruth Kirton

- Also recommended the Hillfoots centre as an option.
- Has met the father of the 2 older children – seemed very caring towards them.
- Wondered if Ms Bullen was feeling a little depressed at present, as she has been very tearful whenever she had visited her.

Kathleen Sharp

- Midwife had visited 17/6 but Ms Bullen not in. Was seen 29/7 when 24 weeks.
- Had moved to Sauchie and was feeling quite isolated.
- No concerns regarding the pregnancy.

Action points	Key Person
1. Social worker to speak to manager regarding necessity to follow up	Ruth Findlay – Social Services
2. Advised to check de-registered with Newcastle midwives	Ms Bullen
3. Will be in hospital 6 – 24 hours if normal delivery	Ms Bullen / Buttercup Team
4. Midwives will visit up to day 10	Buttercup team
5. Health Visitor will visit from day 11	Health visitor

Dear Dr Haut

Margaret Bullen DOB: 13-12-1975
116 Ashley Terrace Alloa FK10 2ND

Thank you for referring Margaret via the Rapid Access Pathway. She is a 48 year old lady with a one week concern of a new lump in her left breast. She has no history of previous breast disease. She is otherwise fit and well. She has no family history of breast or ovarian cancer. She is premenopausal, Para 3 and breast fed. She takes Citalopram for anxiety. She has no drug allergies. She stopped smoking in May of this year.

On clinical examination I could not palpate any abnormalities in either breast, axillae or supraclavicular area and reassuringly Margaret could no longer feel the lump in her breast.

I requested a bilateral mammogram which reassuringly was normal in both breasts (Both breasts M1).

Margaret was reassured and discharged directly from radiology with breast awareness advice. She knows to contact you if she has any new concerns.

Yours sincerely

Date 2 February 2016

Dear Doctor Buckley

Work Capability Assessment Outcome Notification

Patients Name	Miss M Bullen
Patients Address	116 Ashley Ter Alloa Clackmannanshire FK10 2ND

Patients D.O.B : 13 December 1975

This patient has been claiming Employment and Support Allowance. We recently assessed their ability to work using the Work Capability Assessment.

WCA Effective Date 2 February 2016

We have decided that your patient is capable of work from and including 2 February 2016.

This means that you do not have to give your patient any more medical certificates for Employment and Support Allowance purposes unless they appeal against this decision. But you may need to again if their condition worsens significantly, or they have a new medical condition.

We have sent a summary of the Work Capability Assessment to your patient.

If you want to ask us anything about this letter please get in touch with us. Our phone number and address are at the top of the letter.

Yours sincerely

Mrs Karen Kumor
Manager

| ☐ | Much better / Problem resolved |
| ☐ | Improved |
| ☐ | No change |
| ☐ | Worse |
| ☒ | Patient did not complete course of treatment |
| ☐ | Patient did not attend initial appointment |
| ☐ | Patient failed to respond to offer of appointment letter |
| ☐ | Patient declined initial appointment |

Additional Comments: This patient self referred to physiotherapy with a 7 week history of neck and right arm pain. I gave her gentle exercises and advice at her initial appointment but unfortunately she failed to attend her review appointment and has been discharged as per our access policy.

Yours sincerely,

Rosie Campbell
HCPC Registered Physiotherapist

Employment and Support Allowance

Our phone number is: 0121 335 0702

If you have a textphone, you can call on: 18001 0121 335 0702

If you get in touch with us, tell us this reference number: PW318086C

Date: 28th December 2015

About your patient

Full Name: Miss Margaret Bullen

Address: 116 Ashley Ter, Alloa, Clackmannanshire, FK10 2ND

NINO: PW318086C

Date of birth: 13th December 1975

Dear Doctor,

Your patient is being assessed for Employment and Support Allowance and we need to find out whether they are able to do any work. By completing this form you will help our medical staff decide whether your patient needs a face-to-face medical assessment.

Please note

- NHS doctors have a **contractual obligation** to provide the information requested without charge.
- The form should be completed from your medical records. A separate examination is not necessary.
- It is acceptable for you to delegate completion of the form to your practice nurse but you must confirm your authorisation by signing at the end.
- Your patient has given consent to allow us to approach you for this information, in accordance with GMC guidelines.
- An online version of this report which can be completed electronically and printed is available at www.dwp.gov.uk/healthcare-professional/guidance
- A well completed form may mean that your patient will not need a further medical assessment and will help in making a fair decision on benefit entitlement.

COMPUTER PRINTOUTS

You can send us a computer printout of the appropriate part of the patient record if you wish, but you will still have to complete any sections of the form where the answer is not clear from the printout. We are only able to accept information directly relevant to our enquiries. If a printout is available, please make sure it includes the following:

- Active problems;
- Current medication with last prescribed date;
- Details of the last three consultations. Please remove any third party data.

If you have any queries about this form please phone the number above. If you would like to discuss anything with our medical staff, please phone the number above and ask for a member of the medical staff on the customer service desk. If there is any medical evidence that you think would be harmful to your patient's health, please give us this information on a separate sheet of paper so that this can be withheld.

Please reply within 5 working days. A business reply envelope is enclosed for your use.

Thank you for your help.

Yours sincerely,

Ms Anne Banham

Date 11 April 2017

Dear Doctor Stirling

Work Capability Assessment Outcome Notification

Patients Name Miss M Bullen
Patients Address 116 Ashley Ter
Alloa
Clackmannanshire
FK10 2ND

Patients D.O.B : 13 December 1975

This patient has been claiming Employment and Support Allowance. We recently assessed their ability to work using the Work Capability Assessment.

WCA Effective Date 11 April 2017

We have decided that your patient is capable of work from and including 11 April 2017.

This means that you do not have to give your patient any more medical certificates for Employment and Support Allowance purposes unless they appeal against this decision. But you may need to again if their condition worsens significantly, or they have a new medical condition.

We have sent a summary of the Work Capability Assessment to your patient.

If you want to ask us anything about this letter please get in touch with us. Our phone number and address are at the top of the letter.

Yours sincerely

Mrs Karen Kumor
Manager

Dear Mrs Bullen

You had a new patient appointment with the rheumatology department today. As you did not attend (DNA) this appointment, in keeping with NHS Forth Valley Access Policy you have been removed from the waiting list.

If you wish to be seen by a rheumatologist you can contact the centralised booking service on 01324 566249 up to 21 days after your original appointment and we will add you back on to the outpatient waiting list. Please be aware that your waiting time clock will be reset from the date you contact us i.e. you will be put on the bottom of the list. This is NHS Forth Valley standard policy.

Yours sincerely

(Dictated and electronically checked by Dr Sara Else)

RADIOLOGY REPORT- Stirling Community Hospital

CHI NUMBER: 1312753560 **Examination Number:** 31038407

Name: Bullen, Margaret **DOB:** 13/12/1975

Address: 116 ASHLEY TERRACE, ALLOA, FK10 2ND, -- **CC:** -

Examination: US Pelvis (Transabdominal)

Examination Date: 24/04/2012 **Examination Time:** 13:30

Dictating Radiologist: GILLIAN BROWN

Typed by: None

Referring Consultant: GP REQUESTOR

Referring Department / Location: MACINNES PAULINE ALLOA HEALTH CENTRE

Clinical details: Previous ovarian cysts. Now pelvic pain. ? cause.

Ultrasound report:

The patient's bladder was empty at the time of the examination.

Transvaginal imaging was performed the patient's consent.

The uterus was anteverted and appeared normal measuring 76 mm in length. The myometrium was poorly visualised, within the posterior myometrium there were at least two areas of reduced echogenicity ? ? small fibroids.

Both ovaries appeared bulky and had a volume > 19 cm3. Multiple small follicles were seen bilaterally. Whilst ultrasound appearances are suspicious of underlying polycystic ovaries, positive diagnosis of PCOS would require correlation with biochemical and physical factors. No free fluid was seen within the pelvis.

Chaperone: A.Barclay.

Examination Date: 24/04/2012

Examination: US Pelvis (Transabdominal)

Mrs Margaret Bullen
116 Ashley Terrace
Alloa
Clackmannanshire
FK10 2ND

Dear Mrs Bullen

It was very nice to see you with your children, Sean and Shannon, in clinic. As you know, they had been referred to me by their General Practitioner to discuss their father's condition.

Your General Practitioner was under the impression that the children's father, Andrew Doyle, has a condition called spinal muscular atrophy. However, taking his medical and the family history, it sounded more like Andrew has a diagnosis of Hereditary Spastic Paraparesis (HSP). Sean seemed to think that this term sounded familiar. However, to take matters further, I will initially need Andrew's permission to review his medical notes and confirm his diagnosis.

It appears that whatever condition Andrew has, it also affects his mother and one of his sisters. This suggests a possible autosomal dominant inheritance pattern. Autosomal means that both men and women can be affected. Dominant means that only one of the two copies of a particular gene needs to be altered to cause the condition. However, the problems can be variable. If Andrew has an autosomal dominant condition, then there will be a 50% chance of him having passed on the responsible genetic alteration to his children.

Sean is 16 years old. He attends Year 6 at school and has no educational problems. His health has been satisfactory. However, he has concerns about spasms in his legs, which started to occur about a year ago.

Shannon is 13 years old and attends Year 3 in school. She also has no educational problems and her health is satisfactory.

As I said above, to take matters further, I need to be able to confirm Andrew's diagnosis. It would also be interesting to know whether he has had any genetic testing to try and identify the cause for his condition.

NHS Confidential: Personal data about a patient

Sean Doyle
Shannon Doyle

CHI: 2110000597
CHI: 0502048506

provided you with a consent form, which Andrew can sign and send back to me. Once I have further information I will arrange to see Sean and Shannon again in clinic.

Yours sincerely

CLINICAL INFORMATION**History of presenting complaint / examination findings / investigation results****Presenting Complaint**

Description: Pains all over body

Date Started: 01-Feb-2016

Comment: Thank you for seeing this 41 year old lady who tells me she has had pain all over her body for over a year. She feels exhausted and falls asleep at the end of the day. She has been dropping things with her right hand. Her bloods were checked and are all normal. When I saw her in December, 2016, she had pain on gripping with the right hand, but it was not typical of tennis elbow. I gave her a trial of Gabapentin and I reviewed her again today. She describes ongoing pain, mainly now in the lower back, between her shoulders and down the right arm. She is still sleeping during the day. Sometimes her knees swell up as do both her hands, particularly the right hand. She has been advised in the past that she may have fibromyalgia. She has major problems with movements of the right arm causing pain in the right elbow, but also the right wrist and up into the right deltoid area. She tells me Gabapentin did not help and she is worrying about what might be wrong with her. Her mum had a brain tumour and so she is worrying about this as well. She went to see the Physio who felt it was nerve related pain rather than muscular pain. She has asked for a Specialist opinion. I have tried her on Pregabalin 75mg bd, but would be grateful for your opinion. She is also on Citalopram. Many thanks.

19th March 2014

Dear Dr Stirling,

I am writing to you with regard to Margaret Bullen (D.O.B 13/12/1975) who you referred to our counselling service via the single referral pathway.

Margaret has missed 4 counselling appointments, therefore we have discharged her from the service.

Yours Sincerely,

Ruthanne Murphy
Service Administrator

CLINICAL INFORMATION**History of presenting complaint / examination findings / investigation results****Presenting Complaint**

Description: Anxiety Disorder

Comment: Moderate

Examinations and Investigations

Specify referral type: Psychiatric Referral

Acceptance?: Yes, information sharing accepted.

What specifically do you want for your patient from this referral?: I am looking for her to get some CBT.

Outline of current difficulties: This 37 year old lady has been coming to see after having quite a difficult year due to custody issues with her children. She is experiencing symptoms of daily anxiety and she now has custody of her daughter but has been finding it quite tricky as she has been playing up a little bit. She also has a personal history of abuse and is struggling with everything. She recently has been to Majorca where she found her symptoms started to improve but since being home she is beginning to struggle again. I have had her on Propranolol and some Diazepam and today have started her on some Fluoxetine to try and help with her anxiety symptoms.

Dr Laura Coventry
Locum GP for Dr Stirling & Partners

Past psychiatric history: She has not really got any in the way of past psychiatric history but I do think she would benefit from some form of CBT as I think there are lots of underlying psychological issues which are impinging upon her anxiety at present. She has been on Citalopram for low mood previously but didn't continue on it long term.

Psychotropic Medicine: true

Risk of self harm?: Low risk of self harm

History of self harm?: No

Any Current Suicide Ideation?: No

Current Risk to Others?: No

History of substance abuse?: None

Forensic History?: No

Have they been referred to other agencies?: No

Can the patient leave the house?: Yes

Reason for referral

Care type requested: Out Patient

Expected outcome: Investigate

Dear Dr Macintyre

MARGARET BULLEN 13/12/1975
116 ASHLEY TERRACE ALLOA CLACKMANNANSHIRE FK10 2ND

This 32 year old para 2 + 4 had an uneventful pregnancy apart from episodes of pelvic pain and dizziness. With her previous history of caesarean section for breech presentation methods of delivery were discussed and it was decided to book her for elective caesarean section. She also requested sterilisation and after cancelling it was agreed to proceed also with this.

She was admitted at 39 weeks for elective caesarean section and bilateral tubal ligation. This procedure was carried out uneventfully on 10 November under spinal anaesthetic. A live female infant was delivered with apgars 9 @ 1 minute. Both tubes were ligated with vicral.

Margaret made an uneventful post on the ward and was discharged home on her third day. However she was readmitted the following day with increasing shortness of breath on exertion. ECG and CT scan showed no indication of pulmonary embolism and she was discharged home again on 15 November. Postnatal haemoglobin was 99 and she was encouraged to continue on Ferrous Sulphate.

Yours sincerely

Dr. Alison Wilkinson
SpR - Gynaecology & Obstetrics

Dear Dr Stirling

RE: MARGARET BULLEN (DOB: 13/12/75)

I am writing to inform you that the above client was discharged from our service on 22/01/14 for the following reason:

- Client did not attend for individual/groupwork (please see note below) ☒
- Client only attended [] sessions. (please see note below). ☐
- Client completed course (please see note below) ☐
- Client referred to another agency (please see note below) ☐
- Other (please see note below) ☐

Margaret attended for assessment. It was agreed to review following her attendance at a Stress Control course. She has not responded to further contact and therefore discharged.

I trust the above information will be helpful. Please do not hesitate to contact me if you require further information.

Yours sincerely,

Gill Johnston
Community Mental Health Worker

Notes to Practice:			
Not an acute problem but one of vertigo that has been on going for last 7 weeks. Did have a cough when it started but no tinnitus/vomiting. Initially was put on stemetil and this helped a little - switched onto betahistine but this has not been as good. Slight headache recently and today vertigo is worse. No evidence of sepsis such as PV loss/bleeding or temp. No PMH of note. Not breast feeding. O/E - Apyrexial, normotensive, ENT - nad, chest clear, pulse 70 reg, no focal neurological signs. Vertigo - symptoms lasting longer than viral labyrinthitis. Restart stemetil as this was better and routine review by own GP given 1x buccastem out of stock and script for prochlorperazine 5mg tds (30)

NHS Confidential: Personal data about a patient

04 November 2013

Dear Dr Stirling,

Margaret Bullen D.O.B. (13/12/1975) has been referred to the counselling service run by Devon House.

We have made an initial decision based on the clients referral form to conduct an Assessment interview. We will contact the client and arrange an appropriate date for the assessment.

Following this interview we will inform you of our decision to offer the client counselling or refer them on to another agency.

Yours sincerely,

Gina Findlay
Team Leader

Counselling Service,
Devon House,
Carsebridge House,

**CLINICAL INFORMATION****History of presenting complaint / examination findings / investigation results****Presenting Complaint**

Description: Anxiety Disorder

Comment: Moderate

**Examinations and Investigations**

Acceptance?: Yes, information sharing accepted.

What specifically do you want for your patient from this referral?: Margaret Bullen has a history of anxiety and was previously seen by SAMH in 2013/14. Her anxiety has worsened and I think she would benefit from further counselling and advice regarding anxiety management.

Outline of current difficulties: Margaret Bullen has a history of anxiety. She was previously seen by the Scottish Association for Mental Health in 2013/14. Ms. Bullen's anxiety has recently worsened. Ms. Bullen has discovered that her ex-partner, Andrew Doyle (DOB 26.03.77), has been diagnosed with spinal muscular atrophy. Ms. Bullen has two children with Mr. Doyle and this diagnosis is causing her considerable anxiety as she is understandably worried about her children developing spinal muscular atrophy. I am in the process of referring Ms. Bullen's children to the Genetics Clinic for possible spinal muscular atrophy testing. Ms. Bullen is currently taking Citalopram 30mg daily. I suspect Ms. Bullen would benefit from further mental health counselling and advice regarding anxiety management. Many thanks.

Past mental health history: Previous anxiety and referral to SAMH 2013/14

Moodjuice: true

Other Counselling: true

Details: SAMH 2013/14

Psychotropic

Medicine: true

Details: Citalopram 30mg daily

Any other relevant background information? (e.g. social, or housing, or literacy): Separated from her partner, lives with her two children, Sean Doyle and Shannon Doyle

Risk of self harm?: Low risk of self harm

History of self harm?: No

Any Current Suicide Ideation?: No

Current Risk to Others?: No

History of substance abuse?: None

Forensic History?: No

Have they been referred to other agencies?: No

Can the patient leave the house?: Yes

**Reason for referral**

Care type requested: Out Patient

Expected outcome: Investigate

**Assign CVD Risk Score**

ASSIGN is the cardiovascular risk score chosen for use by SIGN (Scottish Intercollegiate Guidelines Network) and Scottish Government Health Directorates.

A score above 20 implies high risk of developing cardiovascular disease over the next 10 years.

\*Please note that the total cholesterol variable within the score has been taken from a random capillary sample and the HDL reading calculated using mean values.

Our ref: PC01 Assessment Appointment  
Date: 30th September 2013

Dear Margaret

Dr Stirling from Clackmannanshire Community Healthcare Centre has contacted us about the possibility of you accessing support from community mental health services.

I would like to invite you along for an informal assessment to chat about your support needs on:

**Friday 18th October at 9.30am at the Phoenix Centre, Carsebridge House.**  
There may be a student present at your appointment.

In order to reserve your appointment **you must confirm by contacting me by phone or text on 07896808508**. If I do not hear from you within 7 days, I will assume you no longer wish to be seen and you will be discharged from our service.

Please find enclosed an information sheet about the Phoenix Centre and the services we provide.

I look forward to seeing you.

Yours sincerely,

Gill Johnston  
Community Mental Health Worker

Dear Doctor Stirling

#### Work Capability Assessment Outcome Notification

|                  |                                                         |
|------------------|---------------------------------------------------------|
| Patients Name    | Miss M Bullen                                           |
| Patients Address | 116 Ashley Ter<br>Alloa<br>Clackmannanshire<br>FK10 2ND |

Patients D.O.B : 13 December 1975

This patient has been claiming Employment and Support Allowance. We recently assessed their ability to work using the Work Capability Assessment.

WCA Effective Date 27 September 2013

We have decided that your patient is capable of work from and including 27 September 2013.

This means that you do not have to give your patient any more medical certificates for Employment and Support Allowance purposes unless they appeal against this decision. But you may need to again if their condition worsens significantly, or they have a new medical condition.

We have sent a summary of the Work Capability Assessment to your patient.

If you want to ask us anything about this letter please get in touch with us. Our phone number and address are at the top of the letter.

Yours sincerely

Mr Alan Kane

Manager

4447/0024
