

Comment	has been going to collect this from surgery)
13/07/2020 14:16	<u>Dr Christine M Crawford at Phone Encounter</u>
Comment	Dr. Lenaghan - duty doctor Stobhill - to discuss dose meth. apparently a couple of days after he received 10 day supply of methadone he arrived at the pharmacy under the impression he had supply to collect there. Transferring to GRH today - discussed titration of meth back up to 60-80ml - probably 40ml tomorrow then increase every 3-4 days if clinically appropriate
13/07/2020 13:01	<u>Ms Iona Devitt at Data Entry</u>
Comment	Dr Lenaghan from stobhill mental health campus called looking to discuss methadone if possible. Please call her back on 07783475231.
13/07/2020 11:43	<u>Dr Christine M Crawford at Phone Encounter</u>
Comment	report from LB. now in Portree on STDC but being transferred to IPCU at GRH. Hospital did not have info re methadone dosage so has been on 30ml. phoned pharmacy 334 2524 to cancel balance of script and will be on daily dispense on discharge

Comment	Brother Daniel just wanted to pass on that Edward was transferred from the Royal to Eriskay House.
13/07/2020 09:32	<u>Dr Christine M Crawford at Phone Encounter</u>
Comment	d/w Lorraine 07880176555 - in Eriskay House on EDC (chaotic presentation, bizarre behaviour)
10/07/2020 11:07	<u>Dr Roderick MacNeill at Telephone Consultation</u>
History	Brother Daniel. Was in Dundee. Ended up at ED having had a seizure then discharged and had another one. Cousin Rosco up there took him home and plan was to get him on the bus back home today - adn brother Daniel would meet him at the bus station. but Ed "not right" smoking a straw this morning. So Rosco is going to accompany him. I suggest if still nto right then to speak/go to Riverside CMHT
10/07/2020 10:50	<u>Ms Lynne Kinnear at Data Entry</u>
Comment	Brother (Daniel McGuigan) called looking for some advice. Edward was down Dundee and his mental health not been good he took a fit and ended up in hospital. Pt left hospital and left all his belongings there and went missing. Police found edward but since then he has not been in a good place very confused and didn't know he was in dundee. I advised Daniel due to confidentiality unsure how much Dr can do. Daniels number 248 7532

Comment	Edward attended shared care clinic. Methadone: 60mls x 14days, 240mls on Thursday, 180mls on Monday SODOC. Self reports smoking cannabis a couple of joint every 2/3 night. No alcohol use. Reports he has a good time in Dundee, planning to go back a week on Thursday and come back for his next clinic appointment, will make an appointment with dr Crawford for next week to look at take home. He has his injection tomorrow at Riverside resource centre. Reports no issues with his physical health. Reports his moods is up and down, writer discussed his past illicit diazepam use, reports he is not taking them, he is frightened of them. Lorraine Barton, SCW, NW ADRS

17/04/2019 10:46	<u>Ms Lorraine Barton at Sandyford Surgery</u>
Comment	Edward attended shared care clinic. Methadone: 60mls x 14days, 240mls on Thursday, 180mls on Monday SODOC. Self reports no illicit diazepam for a week. Has smoked a couple of cannabis joints now and again. No alcohol use. Reports he is going to Dundee on 26th April until 30th April. He is planning to visit his cousin in Ghia next month. Reports no issues with his physical health. He is eating better. His moods are up and down. He has an appointment tomorrow at riverside resource centre for his injection. Lorraine Barton, SCW, NW ADRS

16/04/2019 12:23	<u>Dr Christine M Crawford at Phone Encounter</u>
Comment	basically not wanting "his" diazepam reduced further at present shaky in the mornings. pointed out: 1. on this to cover change of meds which is now historical 2. it's a drop in the ocean compared to illicit use (which he claims is occasional only as he's too scared)
Medication	I will leave this time and reduce next. says saw CPN yesterday and psych appt around 5th May. also plans to visit (son of person who moved to Gigha) in Dundee soon - needs to give us prior notice if he wants script arrangements changed. Diazepam Tablets 2 mg 28 TABLET 1 TAB BD IF NEEDED

16/04/2019 09:04	<u>Mrs Helena Cameron at Data Entry</u>
Comment	Pt has requested a call from CC - He would like to discuss his medication, he is concerned Dr reduces his diazepam as he feels he is shaking a lot. Best contact 07762948126

Comment	Edward attended shared care clinic. Methadone:75mls x 14days, 300mls on Thursday, 225mls on Monday SODOC. Self reports smoking a couple of cannabis joints at night. Reports he has been visiting his mum more. Visit his cousin. States he has been having a lot of headache. Reports he has forgotten to get his injection and to see his psychiatrist, planning to go a along today. Edward provided urine sample for screening. His right arm was shaking more, reports he is taking medication. No issues with his physical health. His moods are up and down. Lorraine Barton, SCW, NWCAT
<u>11/07/2018 11:44</u>	<u>Dr Christine M Crawford at Sandyford Surgery</u>
Comment	unscheduled appt as urine pos cocaine and counsellor off. Came in telling me about all the bad new he has had recently. Mum (live in Baillieston) has Alzheimer's (sister supports her, Eddy visits at times) also had ?cystocopy and muscles of bladder not working right and nothing to be done - feeling low re this. stopped tamsulosin as not working. c/o freq and nocturia which interferes with daily life. no info re this available yet. says last day unit week and half ago and urines there says cocaine (snorted) a one off about 3 weeks ago T Riverside - depo due 19/7 (psych review 24/7) told very clearly we need to revert to daily dispensing if still using and no point continuing diazepam (occ uses street benzos too) phoned Kershaw later - dx at date of letter, not seen since, will have OP appt Dr. Smith fairly soon.

Comment	wanting something for tremor (disturbs sleep) - R arm worst. CPN can't arrange psych appt till next week. Says tongue stuck out with procyclidine so had to stop. Try Benhexol (start with 1mg half tab BD then increase to 2mg BD after 3 days if needed)
Medication	wants meth up to 75 (psych advised increase and consultant mentioned 80ml) going up to cousin's for a week tomorrow Trihexyphenidyl Tablets 2 mg 56 tablet HALF TABLET TWICE DAILY Methadone 1 Mg/ML Oral solution 525 ml 75ML DAILY SUPPLY 75ML DAILY AND 150ML SATURDAYS
10/08/2017 07:38	<u>Dr Christine M Crawford at Data Entry</u>
Comment	this script amended to 15 days due error last time req diaz again - 5/week as needs to tail off and stop
10/08/2017	<u>Ms Lorraine Barton at Sandyford Surgery</u>
Comment	Edward attended shared care clinic. Methadone: 70mls x 14days, 140mls on Saturday SODOC. Self reports smoking cannabis a couple of joints a day. No alcohol use. Reports he is feeling sick every day. Reports he needs diazepam, prescription has been given for 5 days and then stop, reports he will see his psychiatrist about it. Due to see CPN today for injection. He has been visiting his family had a good time at his cousins. No issues with his physical health. Ongoing issues with his mental health, attends Riverside resource centre. Lorraine Barton, SCW, NWCAT

28/07/2017 14:16	<u>Dr Fiona Clarey at Telephone Consultation</u>
Comment	Script was for 13 days instead of 14. They will advise Edward to attend a day earlier for next script.
28/07/2017 14:07	<u>Mrs Joanne Millar at Data Entry</u>
Comment	please call - pharmacist from Boots Norby Road asking to speak to Dr about meth px please. Quantities don't appear to be right 0141 334 2524
27/07/2017 11:29	<u>Dr Christine M Crawford at Sandyford Surgery</u>
Comment	note psych letter suggesting ideal dose meth would be 80ml. d/w Eddie - not that keen to go up but we agreed to 70ml and review (I would be inclined to keep him at this in the absence of a strong indication). going camping with cousin from weekend so req 1 week as takeaway. denies any illicit use apart from occasional cannabis. wanting to have small dose diazepam a little longer - aware not long term and I think more of a psychological crutch at this level. awaiting Uro appt for urodynamics.
Medication	Diazepam Tablets 2 mg 14 TABLET ONE TABLET DAILY IF NEEDED Methadone 1 Mg/ML Oral solution 910 ML 70 ML DAILY SUPPLY 70ML DAILY AND 140ML SATURDAY
13/07/2017 10:49	<u>Mrs Kathy Gordon at Data Entry</u>

15/06/2017 11:20	<u>Ms Lorraine Barton at Sandyford Surgery</u>
Comment	Edward attended shared care clinic. Methadone: 65mls x 14days, 130mls on Saturday SODOC. Self reports no illicit drug or alcohol use. Reports he is going away to his cousin on Tuesday 20th June for 10 days to his cousins. Edward got his DEPO injection last thursday, he is due back in a month. He has been visiting his family and spending time with his brother. he had an appointment with his psychiatrist on 20th June but he has an appointment at Urology and has cancelled his psychiatry appointment, he is waiting on an appointment. Lorraine Barton, SCW, NWCAT
01/06/2017 11:00	<u>Ms Lorraine Barton at Sandyford Surgery</u>
Comment	Edward attended shared care clinic. Methadone: 65mls x 14days, 130mls on Saturday SODOC. Writer discussed last urine results as positive for opiates, reports he used co-codamol when he was at his cousin's for a sore head. No heroin use or cocaine. He does report to smoking cannabis a couple of joints, every couple of days. He is unsure when he is due to attend Riverside Resource Centre for DEPO Injection, writer contacted riverside but they were unable to say as it is drop in, writer suggested edward goes along today and check with them. he still has a bit of a cough. Ongoing issues with his mental

	health, asked about getting into the Kershaw unit, writer advised he is not open them and to discuss with his CPN and Psychiatrist, writer contacted Michael Cribbon - CPN, left message asking to call writer back. Lorraine Barton, SCW, NWCAT
30/05/2017 12:50	<u>Dr Christine M Crawford at Phone Encounter</u>
Comment	wondering if we can hold diazepam at 2mg QID meantime as feeling a bit anxious. I am not surprised at this request and emphasised that we will not continue long term. However, agreed to 8mg daily further 2 weeks then reduce by 2mg daily every fortnight.
Medication	Diazepam Tablets 2 mg 56 TABLET ONE TABLET UP TO QID IF NEEDED

Comment	Edward attended shared care clinic. Methadone: 70mls x 14days, 140mls on Saturday SODOC. He is wishing 5mls reduction for next appointment. Self reports No crack cocaine use in 7-8 weeks. He smokes cannabis, couple of joints a day. No alcohol use. Edward spends time with his family and likes to listen to music. Ongoing mental health issues, he attends appointment at Riverside and receives DEPO injection. He has been coughing a lot and bringing blak flem up, he thinks it is the cocaine that's coming out of his system. He is trying to get into the Kershaw unit, writer will speak to Angela about this. He enjoyed his time at his cousins in Fife and is thinking about going back next week, he will contact GP when he know. Lorraine Barton, SCW, NWCAT

Comment	
24/03/2017 11:11	<u>Dr Roderick MacNeill at Sandyford Surgery</u> In with Audrey Wilson (the cousin). She is keen to support him with his diazepam detox (Edward reckons a 10 week detox). She would plan to stay with him for the first part? Happy to return to speak to CC re all this, given appt next week.
History	
23/03/2017 12:04	<u>Ms Angela Docherty at Sandyford Surgery</u> Edward attended clinic, reports reduction in crack cocaine use, using every few days now and not every day as was previously. edward advised writer this is due to him visiting his cousin and spending his time with her as she keeps an eye on him. Writer advised him of letter from kershaw to be assessed at CAT, edward fine with this. writer will arrange this.
Comment	
09/03/2017 11:02	<u>Ms Angela Docherty at Sandyford Surgery</u>

Comment	Edward attended clinic, reports no use of cocaine over the weekend as he was at his cousins and was using valium. Used cocaine last night, harm reduction advice given. Awaiting on decision of diazepam detox. GP to speak to CPN regarding this.
09/03/2017 Result	<u>Dr Christine M Crawford at General Practice Surgery</u> Urine opiates screening test Negative (CC) Urine methadone Positive (CC) (Non Coded Event - Ur Creatinine (DOA)) Urine cocaine Positive (CC) Urine benzodiazepine Positive (not prescribed) (CC) Urine amphetamine screening test Negative (CC)
09/03/2017 10:14 Test Request	<u>Mrs Kathy Gordon at Sandyford Surgery</u> Urine Drugs of abuse screen routine - Completed
09/03/2017 10:13 Comment	<u>Dr Christine M Crawford at Sandyford Surgery</u> saw Eddie and situation unchanged - not seen CPN, did not use cocaine at weekend as at cousin Audrey's in Govanhill and bought street valium to get him through (though recognises risk of this), quite fixated on diazepam detox and actually quite coherent today in what he had to say, agreed I would contact CPN, if he were to turn up with cousin and she agreed to him staying for a couple of weeks there would be an argument for reducing diazepam on daily pick up for that period. spoke to CPN Michael Gribben who is under impression that Eddie is on w/for Kershaw; explained we have nothing to confirm this (he understands this from Angela) so he will contact Kershaw directly to check and will forward letter from Dr. Menon if not. I also asked him to be in touch with Eddie to let him know and he will do so.
09/03/2017 16:48 Comment	<u>Dr Christine M Crawford at Phone Encounter</u> (12 minutes 50) feels he had been left high and dry by psychiatrist who said he would phone us (but is now away on 5 weeks leave). Asking for Valium detox which I do not consider appropriate, owes >£1000 and has been threatened, feels like lanning his wrists or jumping off balcony, says family supportive however, had depot today but did not see CPN as he was not there --> adv to contact him, was adv to increase depot due voices but so far has not agreed - suggested should consider
02/03/2017 15:28 Comment	<u>Mrs Helena Cameron at Data Entry</u> Pt has requested a call back from CC, he is requested short term detox until he goes into rehab. Best contact 07592975340
24/02/2017 09:26 Comment	<u>Mrs Joanne Millar at Data Entry</u> Norby pharmacy called to say that start was wrong on meth px. Dated for yesterday but should be today. Was just calling to clarify. They are happy to change and don't need new px.
23/02/2017 Comment	<u>Ms Angela Docherty at Sandyford Surgery</u> Edward attended clinic, reports continual use of crack cocaine, using £40 daily. Has attended appointment with psychiatrist at riverside dr menon. Writer also spoke to dr menon who advised that he does not feel an inpatient detox wouldnot be suitable for Edward as Edward has a degree of control over his use of cocaine. Edward has advised Dr menon that he does not use this substance if he has any appointments with psychiatry gp or myself therefore showing a degree of motivation to further reduce his drug use. Edward has advised Dr that he has reduced his use in the community as the friend whom he uses with is in prison. dr stated Edward became agitated when this was discussed however dr felt this was behavioural issues rather than mental health issues. Edward not happy about this as he said this was the first time he has seen this D. Edward still feels like he requires a detox to get him on the right road. He has an appointment with his CPN Michael McGribbon on 2/3/2017 and he will discuss this further with him at this appointment
09/02/2017 17:06 Comment	<u>Dr Christine M Crawford at Data Entry</u> referred as requested
09/02/2017 11:47 Comment	<u>Ms Angela Docherty at Sandyford Surgery</u> attended clinic, reports continual use of crack cocaine using pipe, continues to borrow from money lenders, aware of the dangers of this, writer discussed with GP and referral will be made for assessment of inpatient detox. Encouraged

	edward to cut his use down. Continues to link in with mental health service riverside.
05/02/2017	<u>Miss Moretta Morrison at Data Entry</u>
Comment	Gems slip - see out of hours folder
26/01/2017 11:17	<u>Ms Angela Docherty at Sandyford Surgery</u>
Comment	edward attended clinic, reports using up to 3 rocks of cocaine daily, spending about £70 a day, borrowing from money lenders. (borrow £50 pay back £75) Edward is also using cannabis, reports no diazepam use. Has started hearing voices. Has appointment at riverside today to see his psychiatrist. Writer discussed with Dr Crawford, advised to speak to edwards CPN Michael McGibbon at the riverside. writer called Michael however he was busy, requested he call me back.
12/01/2017	<u>Ms Angela Docherty at Sandyford Surgery</u>
Comment	Edward attended clinic, reports using crack cocaine by pipe daily since christmas, discussed this at length and highlighted risks involved with this use with regards physical and mental health and also finances. Encouraged edward to reduce his use.
15/12/2016 13:25	<u>Dr Salma Ahmad at Sandyford Surgery</u>
History	Seen in urology clinic - Discontinue Tollerodine - trial of alpha blocker.
Comment	Trial of Tamsulosin - review in a months time- review earlier if any concerns.
Medication	Tamsulosin Hydrochloride M/R capsules 400 micrograms 30 capsule ONE TO BE TAKEN EACH DAY
15/12/2016	<u>Ms Angela Docherty at Sandyford Surgery</u>
Problem	Edward attended clinic, stated he felt anxious and jumpy as he has not used illicit valium for 2 days, reported that he planned to get some today. Edward advised writer he will take 10 10mg tablets street valium stating that this is a reduction as he would usually take 20. Writer spoke to Edward about an inpatient detox however edward declined this support at this time stating he will think about it. Writer discussed risks associated with this use, Edward aware of this. Is going to dundee for christmas, prescription issued to accommodate this. Angela Docherty, north west cat

<u>25/08/2016</u>	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Brought letter of Outcome for Scottish Welfare Fund Community Care Grant, explained about new worker so asked if letter can go in file for new worker to see and help with this. In pink clinic folder. Report still injecting cocaine, doesn't feel able to stop it without detox from diazepam, will ask GP today and happy to get daily dispensed from chemist. doesn't feel able to go to caravan with support from other client who he is friends with as head too busy and cravings too strong. Admitted to using heroin 1 bag every couple of days to help come down from cocaine use. Spoke about that and reflected on how well he had been doing. Encouraged to be fully honest with all workers and psychiatrist in future. To see GP for review. Not given script in case decides to increase methadone in discussion with GP.

<u>11/08/2016</u>	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Discussion with Dr MacNeil about Eddie's request for diazepam detox, not protocol and sets up unhelpful precedent for Eddie and potentially other patients. Phone call to Psychiatrist Dr David Kenicer at Riverside, only met Eddie twice, no concerns about Eddie's presentation in terms of psychosis or drug use on 1st August when last seen, Eddie did not disclose cocaine use. Again, not protocol to look at diazepam script for Eddie, writer to discuss with Kershaw though Riverside happy to keep Eddie on at present. Eddie can utilise crisis team etc if requires. Writer took Eddie back in to discuss above, still fixated on getting detox as only thing that will help him. Had been arguing with other client in waiting room about swapping flats back, when asked Eddie about this said other client angry with him for taking cocaine and was trying to get him to go with him to caravan to help him stay off it but Eddie not interested. Eddie still determined to make appt to see Dr Crawford next week.

<u>11/08/2016</u>	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Reports has continued using cocaine and crack for the past 2 weeks, approx £50 per day, borrowing money from people, sold bike, pawned ipad. Requesting diazepam detox from GP as had this last time and was the only thing that helped. States did see someone at Riverside a month ago when was dabbling but they said needs to be dealt with by GP and Addictions. Says they stated they will try and get him out and about more in the community to help deal with his anxiety. doesn't feel able to reduce cocaine use himself, doesn't feel acupuncture would help, hasn't been taking street valium as aware of dangers at present. Reports no other illicit use. States complying with methadone dose daily. Feels if doesn't stop will sell everything in his flat again and brain will be 'fried'. Writer to discuss with GP. Given script for methadone 40ml x 14 days.

09/08/2016 17:53	<u>Dr Allison Lawson at Data Entry</u>
History	Ginny, see letter from Riverside 3/8/16
28/07/2016	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	States has been taking crack for the last 4 days with a girl he met. Spent over £100, still needs a washing machine and cooker. Reports only cannabis use other than crack. Getting to chemist daily. Had no crack yesterday, aware of detrimental effect on mental health and finances and intends to stay away. To contact writer if needs additional support. Given script for 14 days.
14/07/2016	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Seen new psychiatrist when last got jag, next appt 1st August. Reports no drug use, not yet had letter from Welfare fund but phoned them and they told him he had not been awarded any money for goods. given writer new mobile number and will contact once letter through to see if we can apply to Lord Provost Fund. Happy on current dose. Some anxiety, due to see CPN for depo so will discuss with them. Given script for 40ml methadone x 14 days.
30/06/2016 07:34	<u>Dr Christine M Crawford at Data Entry</u>
Comment	was due Riverside to see new psychiatrist 28th June. Did he go??
30/06/2016	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Reports didn't go to psychiatrist as was visiting brother in Golden Jubilee as was in for heart bypass. Has arranged further appt with psychiatrist and still got depo which is monthly. Has been having a bit of panic recently, feels this is because he is doing too much and going out to see people too often. Manages to use self talk to cope but also some diazepam at times. Spoke about trying to balance things a bit better, having rest days in between visits. Will try this. Not spoke to CPN about this yet as still new, will try at next appt. doesn't drink alcohol. Waiting to hear from Welfare fund in next 2 weeks. Will contact writer if required, writer offered to call welfare fund for update at next apt if still not heard. Given script for 40ml methadone x 14 days.
16/06/2016	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Doing well, seeing CPN Kevin at Riverside today for depo. Psychiatrist Dr McKenzie has met and has apt in a week. No drug use, apart from cannabis use every couple of days £20 pollen, says its not that strong and does not affect his mental health. Getting to chemist daily for methadone, feels ok on 40ml current dose. Had to put in a new claim for welfare fund as it went amiss. Will keep writer updated on this. Hopes to go to caravan with other client at end of month - advised to give advance notice of this so script can be sorted in time. Given script, See in 2 weeks.
02/06/2016 11:31	<u>Mrs Kathy Gordon at Sandyford Surgery</u>
Test Request	Urine Drugs of abuse screen routine - Completed
02/06/2016	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Doing well, reports has not used any further illicit diazepam and presentation would support this. Fine on current dose of 40ml methadone, has applied a week ago to Welfare fund, will hear back in 15 days, encouraged to bring decision letter to next appt and will see if writer needs to apply to Lord Provost for new mattress etc. No other issues, given script for 14 days.
27/05/2016 14:30	<u>Dr Roderick MacNeill at Telephone Consultation</u>
History	fine to take away
27/05/2016 14:09	<u>Mrs Joanne Miller at Data Entry</u>
Comment	please call - pharmacy are sking to speak to Dr about meth script - due to dispensing on px he should be collecting today and monday but they are closed monday. wondering if Dr happy for him to take full weeks supply away - pharmacist Paul 0141 334 2524
19/05/2016	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Doing ok - had been up to NW CAT and saw writer 1st week but had no recollection of this - stated he had been offered some 'real' diazepam and bought 50 for £20 with a 'friend' and they used them all over 2-3 days - he cannot remember anything. Re-iterated concerns and warnings about fake diazepam, does not intend to do this again and blames 'friend' for encouraging him. Fine on current dose of methadone and at new chemist, happy in new flat, waiting to hear back from appeal to Welfare Fund and will update worker if he does not get awarded this and she will look at applying to Lord Provost Fund.

	Given script for 14 days.
<u>05/05/2016 11:35</u>	<u>Dr Christine M Crawford at Sandyford Surgery</u>
Comment	doing well and says he has not used cocaine "in years" - (although I note last 2 urines still pos benzos) happy re move (though still stuff to move... bed... using Chic's bed) and seeing brother, nephew at Blythswood court, also Mum in Baillieston computer course at Charlie Reid. bike punctured but plans to get it fixed. due Brownlee for further post Rx check re hep C I presume psych will transfer to Riverside in time but not discussed today some benefit from tolterodine

<u>10/03/2016</u>	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Has paid arrears for electricity, waiting to sign missives on Monday to swap flat with other client. Has been trying to cut down smoking since last problem with breathing, finding it hard, encouraged to approach local chemist for support and look for smoking cessation groups. Reports no illicit use, aware of looking after liver since successful hep c treatment. Will use a 'man and a van' to help move, feels he will be able to cope with this. Spoke about changing chemists also - will approach Boots chemist near new flat. Given script for 40ml x 14 days methadone. Encouraged to contact writer or duty team if writer unavailable if requires additional support.

28/01/2016	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	States nephew came through at weekend with lots of different drugs for a party - wasn't able to refuse so used temazepam, swallowed, cocaine, snorted, valium, upjohns (states an old woman passed away and he got the temazepam and upjohns from her house.) Saw Dr McTaggart at Shawpark yesterday and told him about drug use. CPN still coming out and giving injection monthly. Flat transfer going ahead, aware of what he needs to do and feels on top of this, to phone writer if needs more support. Feels ready to reduce at next apt from 43ml to 40ml methadone. Given script for 43ml x 14 days.
14/01/2016	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	States slept in so didn't get to housing and late for this apt. Doing ok, missed apt with Brownless to check status - waiting for further apt to be sent. Fine on current dose. Made apt with housing for monday re: swap - asked not to make other apts when has clinic! Given script for 43 ml methadone x 2 weeks.
17/12/2015 11:16	<u>Dr Christine M Crawford at Sandyford Surgery</u>
Comment	completed hep C Rx and awaiting confirmation that it has been successful commented on positive benzos "a couple of valium" - discussed troublesome nocturia, attended uro about 6y ago and tabs helpful but stopped them (reason unclear) --> restart has psych appt Jan now, also starting computer class then hopeful of flat swap with Charles Murdoch - plan is for Eddie to go down to his flat to see how he likes it
Medication	Tamsulosin Hydrochloride M/R capsules 400 micrograms 14 capsule ONE TO BE TAKEN EACH DAY
17/12/2015	<u>Ms Ginny Alwood at Sandyford Surgery</u>
	Completed hep c treatment, has apt today at 2.30 to see if it has cleared

Comment	system - should get results in a couple of weeks. Last urine positive for benzos and methadone - used them a couple of weeks ago to aid sleep but didn't help. reports no other use since. Remains on 43ml methadone and happy on this at present. Has contact numbers in case needs additional support over festive period. Given 2 x 14 day scripts for 43ml methadone.
03/12/2015 Result	<u>Dr Alison Lawson at General Practice Surgery</u> Urine opiates screening test normal/ Negative (AL) Urine methadone positive (AL) (Non Coded Event - Ur Creatinine (DOA)) normal/ Negative (AL) Urine cocaine normal/ Negative (AL) Urine benzodiazepine positive (AL) Urine amphetamine screening test normal/ Negative (AL)

03/12/2015 09:47 Comment Medication	<u>Dr Christine M Crawford at Data Entry</u> info via Ginny - struggling to sleep on Rx and req short term hypnotic. Zopiclone Tablets 7.5 mg 15 TABLET ONE TO BE TAKEN AT NIGHT
03/12/2015 Comment	<u>Ms Ginny Alwood at Sandyford Surgery</u> Doing ok, had been in contact with writer to say he was struggling with interferon treatment and hasn't been getting a sleep. Agreed with gp for short course of sleeping tablets - 15 days, 1 at night if required. To be dispensed at same time as methadone. Advised to take for a couple of nights to catch up on sleep and get back in to pattern but then only if he felt he needed them, advised would only be a short course. Due 1 more injection to complete course of interferon so hopefully will settle down soon after this. not looking for additional support. Plans to go to housing with other client to arrange transfer of flats today - got there 2 minutes after closing yesterday. No other issues, saw CPN recently and they are putting him forward for computing course in Jan which he is looking forward to. Given script for methadone and zopiclone, see in 2 weeks. To contact writer if requires further support before then. Not asked about Naloxone this time.
19/11/2015 10:57 Comment	<u>Mrs Kathy Gordon at Sandyford Surgery</u> meth script given 43mls x 602mls 20/11/15 - 03/12/15
05/11/2015 Comment	<u>Ms Ginny Alwood at Sandyford Surgery</u> Doing well with Hep C treatment, now in week 7, still no side effects. reports no drug or alcohol use. Spending time with other patient, says this is positive friendship. Seeing hospital fortnightly, they have offered additional support also but not needing this at present. Happy on current dose of methadone continue on 43 mg, given script for 2 weeks.
22/10/2015 Comment	<u>Ms Ginny Alwood at Sandyford Surgery</u> Reports no illicit use other than cannabis - he is not concerned about this. Hep C treatment still fine - a bit lethargic in am and struggles to sleep at night- spoke to Brownlee about this but they cannot give meds - needs to discuss with GP. Encouraged to keep making the effort to get up in am and keep busy during the day so it is easier to fall asleep at night. Happy on current dose of methadone, not seen other clients flat yet, going to accompany him to opticians and bus station today, keeping flat move on hold until completed treatment. Encouraged to contact writer if needs support. Given script for 43mg methadone x 14 days.
08/10/2015 Comment	<u>Ms Ginny Alwood at Sandyford Surgery</u> Edward has opticians this morning - was unhappy with wait but reports all ok, Hep c treatment going well. Still ok on 43mg methadone. Will contact writer if needs additional support. See in 2 weeks.
24/09/2015 Comment	<u>Ms Ginny Alwood at Sandyford Surgery</u> Doing well, looking well, no crutch. Doing ok with first week of Hep C treatment. Still needs to go and see other clients flat for possible swap. Happy on current dose of 43mg methadone, not looking for additional support at present. Will phone writer if requires anything. See in 2 weeks.
22/09/2015 15:13 Comment	<u>Dr Christine M Crawford at Data Entry</u> commenced 12 week hep C treatment 17/9

10/09/2015	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Came to Hep C Event with writer last Thursday as agreed, was quite a long evening but participated well, found it interesting. Doing well today, CPN will see fortnightly while undergoing treatment for Hep C and psychiatrist will see more regularly also. Writer reiterated additional support available from Irene Hunter and herself if required and not to hesitate to pick up the phone. Considering swapping tenancy with another client that attends the clinic as Edward not happy in current area and swap is in Partick area which he would prefer - plans to go and see other tenancy first. See in 2 weeks.
27/08/2015	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Doing ok on increase of methadone. Has reduced co-codamol useage dramatically. Only a couple per day at present. happy to stay on current dose of 43mg methadone for time being. Due to start Hep C treatment in 3 weeks now, really looking forward to it. Cousin had hoped to take him on holiday again before this but cant due to leg, she will support him through treatment and then plan to go away after this is completed. no other issues. Edward agreed to come to hep C event next Thursday - writer gave blackberry number and will pick him up approx 4.45. His new mob is 07847689583.

Comment	Still in constant pain with broken foot. Took Dihydrocodeine and diazepam over last week though did not help, has been taking a box of dispersible cocodamol every 2 days but again not relieving pain adequately. Spoken about dangers of paracetamol od partic with damaged liver. Agreed to 5ml increase in methadone as this may be beneficial. Request for GP to do this or suggest alternative. Is due to start Hep C treatment in 5 weeks, will be 12 week course of injections and tablets. Pleased about this.
30/07/2015 11:29	<u>Dr Christine M Crawford at Sandyford Surgery</u>
Comment	note injury. taking dissolving co-codamol he says. has prev tolerated ibuprofen so given this as preferred option. due to start hep C Rx in 7 weeks but does not know re ortho FU yet for foot. planning to go to nephew's in Dundee for a week to recuperate so meth away for 1 week from tomorrow.
Medication	Ibuprofen Tablets 600 mg 42 tablet ONE TO BE TAKEN THREE TIMES A DAY WHEN REQUIRED WITH OR AFTER FOOD
30/07/2015	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Came in with brace on right foot and crutches, states lift not working in flats yesterday so he had to walk down 8 flights, lost footing at bottom due to fatigue, went to hospital and told he has a broken bone in right foot. Asked writer to help with letter to housing to request compensation for injury which writer did - signed by Edward. States he had a couple of co-codamol this morning to help with pain when writer noted his speech seemed more slurred than usual - plans to ask GP for pain med. Reminded of dangers of over medication and to be aware of impact on mobility also. Not ready to meet with Momentum as has plans to get additional support in next 7 weeks before Hep C treatment starts (Waverley Care?) to discuss others experience of the treatment. Reminded to phone writer if requires additional support. To see GP today for script.
16/07/2015	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Doing well, happy on current dose of methadone 38mg until dealt with Hep C treatment. Has appt with Dr Fox on 27th July. Will discuss again if requires support from Irene Hunter at this point. Saw Dougie Vemyss from Momentum and given leaflet and encouraged to make contact as he would benefit from programmes and support on offer as unable to return to Phoenix Day Programme at present as he is aware that the person who he had problems

	with still attends there and is still using drugs. Writer will discuss Momentum again at next appt, to see GP next time but writer will see briefly before this for update. Given script for 2 weeks.
02/07/2015	<u>Ms Ginny Alwood at Sandyford Surgery</u> Has appt with Professor Fox at Brownlee on 27th July. Explained that panel decision is a formality when looking at medication that is not usually prescribed for Hep C and hopefully it will be approved for him. Reports no drug use, not looking for additional support at present. Attending all other appts. Spoke to CPN about stopping mirtazepine and they said it was ok as long as he felt ok. No other issues. Happy on 38ml methadone, given script, see in 2 weeks.
18/06/2015	<u>Ms Ginny Alwood at Sandyford Surgery</u> Doing well, reports no diazepam use for about a month, keen to stay off them to get Hep C treatment. Spoke about Waverley Care and agreed writer could discuss with Hep C nurse at Cat to see if any additional support can be offered. Happy on current dose of 38ml methadone. No other issues. Given script. See in 2 weeks.
08/06/2015 10:54	<u>Dr Christine M Crawford at Sandyford Surgery</u> on a high following his holiday in Palma Nova with his cousin. still at computer course at Wayside X3/wk. due to see CPN and will tell her stopped mirtaz a month ago. urinalysis discussed, takes co-codamol for leg. did not receive Brownlee appt and keen to attend. needs bloods/wt/BP etc at some point but will have bloods at hosp I expect Methadone 1 Mg/MI Oral solution 418 ML 38ML DAILY SUPPLY 152 ML MONDAY 114 ML FRI Medication review done
27/05/2015 15:20	<u>Dr Alison Lawson at Sandyford Surgery</u> Going to Magaluf on 30th may- June 6th inclusive. Review at clinic Thursday 11th
	Methadone 1 Mg/MI Oral solution 114 ml 38MLS DAILY Will come on Mon 8th to collect pending clinic review on 11th
	Note, he says he has stopped taking mirtazepine a few weeks ago, also not taking tamsulosin
21/05/2015	<u>Ms Ginny Alwood at Sandyford Surgery</u> Doing well, last benzo use was 4 weeks ago, explained the importance of ceasing this completely and staying on stable dose of methadone during hep c treatment. Understood this and keen to comply to get benefit from treatment. Booked holiday to magalooft from 30th may - to arrange appt with GP and bring in proof next week to get script changed. Not going to party part of Island and no intentions of drinking or taking drugs. Struggled with sleep and restless legs on first week of previous reduction but finding current dose of 38ml methadone fine now. Given 2 week script but to make appt with GP to arrange holiday script.
15/05/2015 11:22	<u>Dr Christine M Crawford at Data Entry</u> note psych letter suggesting meth remain stable pending proposed hep C treatment. needs to be benzo free for treatment - needs emphasised. due physical review (re MH meds) at next GP review
07/05/2015 12:28	<u>Mrs Joanne Millar at Data Entry</u> patient handed in hospital letter. script given 38mls x 532 mls 08/05/15 - 21/05/15
06/05/2015	<u>Mrs Cecilia Douglas at Sandyford Surgery</u> Can't attend clinic as he has hospital appt at Stobhill at 8.30 am. Will come in later with hospital letter.

28/04/2015 14:14 Comment	<u>Dr Christine M Crawford at Data Entry</u> urine positive opiates and benzos
23/04/2015 Comment	<u>Ms Ginny Alwood at Sandyford Surgery</u> Wake for uncle is tonight. Still tearful and upset when discussing. Has family support, encouraged to contact writer or come to see after 11am next week at clinic if needs to talk. Explained Christine is covering clinic in 2 weeks as writer off. Reports use of 1 diazepam to help sleep the other day, not abusing them, no other illicit use. Still happy to continue planned reduction of 2mg from today. Also worried about possible change to Hep C treatment medication as the decision to change to a daily tablet is to go in front of a board and he thinks due to his history of drug abuse he may not be accepted. Due to see CPN in next 2 weeks. Given script for 2 weeks.
09/04/2015 Comment	<u>Ms Ginny Alwood at Sandyford Surgery</u> Reports bereavement of uncle who he was close to. Funeral in next week. Has support from cousins. Took diazepam to help sleep and states wasn't sleeping properly for a couple of weeks despite still taking mirtazepine at night. No opiate use. CPN and OT looking at cooking group and other activities - due to come out to see him in a couple of weeks. Holiday to Portugal on hold at present. Encouraged to phone writer at CAT if requires additional support. Feels he will be ready to reduce methadone by 2mg at next script. From 40mg to 38mg. See in 2 weeks.
01/04/2015 10:44 History Medication	<u>Dr Roderick MacNeill at Sandyford Surgery</u> Chesty. O/E Well looking RR normal. Chest widespread wheeze. Imp URTI/asthma. 26/03/2015 Comment	<u>Ms Ginny Alwood at Sandyford Surgery</u> Seen at clinic appt, presented very well, reports no illicit drug use, evident on presentation. Trying to keep busy and active. Has put on some weight. He will discuss other options (Phoenix) with Ginny at next appt. Ok on current dose, no other issues. Christine Carmichael NW CAT.
12/03/2015 Comment	<u>Ms Ginny Alwood at Sandyford Surgery</u> Doing well, says CPN is arranging for OT to come and assess how he copes at home - with cooking etc. Has found out about course at Mission - starts end April - will think about doing this. No illicit use, feels fine on current dose of 40ml methadone - no plans regarding this at present. No additional support required at present. Has received letter re: Hep C clinic. Explained Christine Carmichael will see him at next appt as writer on AL. Given script for 2 weeks.
11/03/2015 13:49 Comment	<u>Dr Christine M Crawford at Data Entry</u> new hep c clinic appt 16/4/15
26/02/2015 11:54 Comment	<u>Dr Christine M Crawford at Sandyford Surgery</u> in for review, couldn't make hep C appt 19/2 and says another being sent. sees CPN and due psych review March. still helping out cousin and hopeful of trip to Portugal with them. says he is "always busy" and not using, even alcohol. check urine next time will also be due BP and bloods (re MH)
26/02/2015 Comment	<u>Ms Ginny Alwood at Sandyford Surgery</u> Doing ok - stopped attending Phoenix as said there were people there he fought with in the past. hasn't discussed it with staff - encouraged him to phone to explain that he won't be going back. He is looking at computing courses at the Mission and CPN has suggested a cookery course. Writer spoke about Flourish House briefly - encouraged to discuss it with CPN at next appt to see if this is a possibility. Happy on current dose of 40mg methadone. Given script for

2 weeks. To see Gp after and writer in 2 weeks.

12/02/2015	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Came in early for appt as CPN coming to home for appt at 11.30. Gave info on holiday arrangements - he said cousin would be booking last minute deal on line but GP could phone for confirmation - writer was unsure this would be acceptable - Edward has appt with GP in 2 weeks so needs to discuss this directly with her then. Feels fine on current dose. States has been going to Phoenix though missed a couple of days this week due to having a cold. Reminded him he needs to show commitment and consistency to keep his place. He is keen to continue going for the daily structure. Given script.
29/01/2015	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Doing well, attended appt at Phoenix Day programme and starts on Monday. Looking forward to it - they expect attendance 3 days per week. Given info on NW Recovery Communities also and encouraged to go tomorrow with cousin after he has viewed house with her to ARC to ensure he has broad range of support. Hoping to go to Portugal with cousin who has holiday flat there in next month or so - needs to confirm process with GP about taking methadone away. Writer will discuss with GP and phone his home number to let him know. Happy to continue on current dose of 40ml see in 2 weeks.
15/01/2015	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Had a good festive period, states not been home to check post for new appt at Phoenix - writer made a phone call - his appt was sent out for last week - they agreed to make an exception and will see him if he attends next Thursday at 12 for assessment, otherwise case will be closed. He is still very keen and assures writer he will attend. doesn't currently have mobile but intends to get a new one today. No illicit use and happy on current dose of 40mg methadone. Spoke about long term plan and will discuss this further in 2 weeks.
18/12/2014	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Edward feeling fine on current dose, reports no drug use and doesn't drink. States is staying with cousin Audrey in govanhill area over Christmas - from Christmas Eve - Weds 24th Dec - request take home of 5 days from here to allow him to stay. Aware of need to store safely and out of reach and to rinse empty bottles out before disposing of in bin. Feels ok about festive period and has enough support. Stated slept in for Phoenix appt but keen to get further appt in New Year - Phoenix will send out new appt. for Jan.
04/12/2014 11:04	<u>Dr Christine M Crawford at Sandyford Surgery</u>
Comment	Influenza vaccination
Additional	seems very positive today, adamant he has not used benzos for a while though has taken cocodamol for knee. saw psych recently, sees CPN monthly (for depot), appt Brownlee next week re hep C. Seasonal influenza vaccination Lot L8207-1 Exp 05/15 Sanofi Pasteur
04/12/2014	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Doing well, no illicit use feels stable on 40mg methadone - not looking to change this at present. Did not attend ARC as too far away from him. Encouraged to start referral to Phoenix now so he is ready to start in the New Year - agreed to phone referral - done. His previous key worker had concerns about his motivation when he was there 8 months ago and stated they would want to see more regular attendance this time which he agreed to. Assessment appt arranged for Tues 16th Dec at 12.30. Written this on a card for Edward with Phoenix phone number. Phoenix will liaise with writer in Christines absence. Mobile number no longer works - given new home phone: 5600557. To see GP today and writer again in 2 weeks.
20/11/2014 10:58	<u>Mrs Joanne Millar at Data Entry</u>
Comment	urine handed in for
20/11/2014	<u>Ms Ginny Alwood at Sandyford Surgery</u>
Comment	Reports no drug use and doesn't drink. Attending computer course at Wayside 3 days a week and spends time with family. Keen to start Phoenix Futures Day Programme again but wants to wait until after Christmas as he will be busy. Likely to spend festive period with family in Govanhill area. Also spoke about ARC at Whiteinch Centre on a Friday and given leaflet encouraged to go and try it out as they sometimes arrange a group to go fishing over the weekend and Edward said he enjoys the outdoor activities available at Phoenix. Happy on current dose of 40ml methadone - given script for 2 weeks with appt for GP.

14/11/2014 13:14	<u>Mrs Kathy Gordon at Sandyford Surgery</u>

Comment	Edward attended shared care clinic reports no illicit drug. Wishes to be referred to Phoenix Day Programme to add structure to his day. Wish to remain on current prescribed dose 40ml methadone.

23/10/2014 10:37	<u>Miss Moretta Morrison at Data Entry</u>
Comment	Meth script handed out at desk as counsellor off 40ml x 120ml (560ml) dates 24/10/14 to 6/11/14

09/10/2014 12:26	<u>Mrs Kathy Gordon at Sandyford Surgery</u>
Comment	pt called got letter from Dr Fox to say he had been removed from waiting list as he had DNA pt says he did not get appt letter asking if he can be rereferred please

09/10/2014	<u>Ms Christine Carmichael at Sandyford Surgery</u>
Comment	Attended clinic appt, presentation good, alert and bright. Still reporting no drug use, evident in presentation, has to go to housing office today, so quick chat only but doing well, no concerns, still enjoying IT course and investigating other options also. No change to current dose, 40ml x 14 days.

30/09/2014 18:35	<u>Dr Christine M Crawford at Data Entry</u>
Comment	seen GRI at specialist physio clinic 15/9 and rereferred physiotherapy (was walking with stick when attended; I have not seen him walking with a stick)

25/09/2014	<u>Mrs Lesley Hancock at Sandyford Surgery</u>
Comment	Eddie attended shared care clinic. Presented extremely well, bright and communicative throughout appointment. Reports no illicit drug use, stated stopped using cocaine a long while ago after relationship with girlfriend ended. Eddie attending computing at City Mission which he loves and is planning on going to over 40's group next week. He continues to see his family regularly and spoke of the positive changes he feels in no longer using drugs. Eddie stated he continues to receive depot injection. Writer hugely encouraged by how well and stable Eddie presented and encouraged him on the positive changes he has been making in his life. Methadone 40 x 14 days. Mirtazapine 30mg. Lesley Hancock, North West C.A.T.

15/09/2014	<u>Miss Moretta Morrison at Sandyford Surgery</u>
Comment	Checked clinical portal for appts for pt - no info logged. On phoning Glasgow Royal, informed pt has appt on 19/09/14 @ 11am for MRI at Gartnavel Hospital

11/09/2014 11:14	<u>Dr Christine M Crawford at Sandyford Surgery</u>
Comment	last urine clear and overall seems to be more on the ball. has ortho appt next week. had u/s and was due MRI 9/9 but cx - Dr. Fox 2/10 so try and rearrange prior to this if poss. will check at home re time of appt Dr. Fox. starting course Tues -Thurs - will still come here - but req meth away Mon and Fri - agreed TRIAL, only continued if keeps appts and urines clear. today's script hand amended to 15 days (will come to Thurs clinic but will have had meth that day) cut cigs, vape-ing
Medication	Methadone 1 Mg/ML Oral solution 560 ML 40ML DAILY SUPPLY 160ML
Additional	MONDAY 120 ML FRI

11/09/2014	<u>Ms Christine Carmichael at Sandyford Surgery</u>
Comment	Seen at clinic appt, presentation good, reports he starts IT course at Mission next Tuesday, he managed to have this set up via Phoenix. Reports no illicit use, Eddie has requested he stay on current dose of 40ml, happy to leave and discussed we will take at his own pace, would rather reduction was slow and gradual. Eddie has stopped attending Phoenix now but hes ok with this. Looking forward to doing new things and moving on. 40ml x 2weeks given

28/08/2014	<u>Ms Christine Carmichael at Sandyford Surgery</u>
Comment	Seen at clinic appt, again presented well, urinalysis results negative for all substances other than prescribed methadone, delighted with this. Eddie keen to stay on track with this and talking about college courses. Will arrange meeting with Audrey from Bridging Group at Drumchapel to discuss options. Eddie doing well, feels Phoenix has run its course with him now and ready to move

onto something more challenging. Will leave on current dose of 40ml this appt and discuss at next, will reduce 5ml when Eddie feels ready. 40ml x 14 days given, no change.

14/08/2014 13:42	<u>Dr Christine M Crawford at Data Entry</u>
Comment	letter from Dr. McTaggart suggests propranolol but note h/o asthma, on salbutamol at times - letter dated 23/7 handed in today. in typed letter - "he denies asthma" - I will write.
14/08/2014	<u>Ms Christine Carmichael at Sandyford Surgery</u>
Comment	Seen at clinic appt, presented well, mood good and very alert, reports no valium use for a few weeks, evident in presentation, reports snorted cocaine last week, one off and hopes not to do again. No other illicit use. Eddie felt fine with small reduction but happy to remain on current dose for another few weeks, will review next appt. Still attending Phoenix and keeping himself occupied. Making good progress. No change to current dose 40ml x 14 days.
31/07/2014 16:52	<u>Mrs Kathy Gordon at Sandyford Surgery</u>
Comment	px for salbutamol 19/05/14 not collected so shredded
17/07/2014	<u>Ms Christine Carmichael at Sandyford Surgery</u>
Comment	Seen at clinic appt, reports no valium use or any other illicit, Advised Eddie that 5ml reduction had been generated, I was going to bring sample pot, but forgot. Advised Eddie that happy to go ahead with reduction but if he feels he is struggling he can come back to surgery and be reinstated back to 45ml. Due to games Eddie is receiving 28 dayspx, next due 14/8/14. Keeping occupied and busy, had chat re coping on reduction and that he cant use valium to compensate if feeling effects, this would delay HepC treatment further. No other issues. 40ml x 28days given.
03/07/2014	<u>Ms Christine Carmichael at Sandyford Surgery</u>
Comment	Seen at clinic, mood good, has been told HepC treatment will be able to start soon, keen to have this. Reports no valium use, discussed importance of not using if treatment to go ahead. Keeping busy at Phoenix and seems more positive about things. Discussed reduction in methadone, will reduce by 5ml for next appt, but have advised Eddie that I will bring instant sample pot to clinic, if valium use positive will resume to 45ml, also discussed importance of remaining valium free for Hep C treatment. 45ml x 14 days given, will reduce by 5ml for next.
19/06/2014 10:54	<u>Dr Christine M Crawford at Sandyford Surgery</u>
Comment	L knee - see ortho referral. also self ref physio

Comment	form completed re council tax exemption. feeling more settled in home and more optimistic re life in general
05/06/2014	<u>Ms Christine Carmichael at Sandyford Surgery</u>
Comment	Seen at clinic appt, reports no valium use since last seen. Has had new carpets fitted at house, looking nice. Is still keen to increase attendance at Phoenix, can just attend if he wants to get involved in activities scheduled. Presentation good. Will discuss at next appt possible reduction in methadone, advised Eddie that clean sample would be required before this would go ahead. No change to current dose 45ml x 14 days.
22/05/2014 11:51	<u>Mrs Lesley Hancock at Sandyford Surgery</u>
Comment	Eddie attended shared care clinic. Reports no illicit drug or alcohol use. Eddie stated attending Phoenix Futures day programme, really enjoying it and is considering increasing his days. Writer encouraged him in the positive changes he is making. Methadone 45 x 630. Review on 5 June at 10.45. Lesley Hancock, North West C.A.T.
08/05/2014	<u>Ms Christine Carmichael at Branch Surgery</u>
Comment	Seen at appt, discussed urinalysis, Eddie states that he has definitely not been using valium at all in past couple of weeks, but remembered that a cousin had given him a 2mg tab. didn't think this dose would show, advised to be careful re accepting other peoples medication or illicit tabs. Will hopefully produce clean urine next appt, keen to get onto suboxone, advised clean sample would be required and monitored reduction prior to this. 45ml x 14 days given

29/04/2014 14:17	<u>Dr Christine M Crawford at Data Entry</u>
Comment	note urine still positive benzos
24/04/2014	<u>Ms Christine Carmichael at Sandyford Surgery</u>
Comment	Seen at appt, presentation good, reports no valium use for approx 4wks now, good achievement and evident, no problems at funeral attendance. Keeping busy and still attending Phoenix, 45mlx14days given, no change to current dose. No other issues.
10/04/2014	<u>Ms Christine Carmichael at Branch Surgery</u>
Comment	Attended appt, presented well. Reports no use of illicit valium, attending Phoenix, spoke to worker there re relaxation techniques, will try and keep up. Has funeral tomorrow, spoke re stress and high emotion and to try and avoid situations where use may be an issue. No change to current dose, 45ml daily.
03/04/2014	<u>Miss Janice Muirhead at Sandyford Surgery</u>

01/08/2013	<u>Ms Christine Carmichael at Sandyford Surgery</u>
Comment	Seen at appt - reports no use of valium but questioned this due to presentation, Eddie says this is due to tiredness, his cousin has gone home again, reports still attending phoenix futures 3 times per week, reports no other illicit use and all well at home. requesting reduction by 5ml for next appt. 50ml x 2 wks given.
18/07/2013	<u>Ms Christine Carmichael at Data Entry</u>
Comment	Edward attended clinic reports his only illicit use cannabis on occasions continues to structure his day via Phoenix community rehab attending 3 x weekly current prescribed dose 50ml methadone. Saeed
04/07/2013	<u>Ms Christine Carmichael at Sandyford Surgery</u>
Comment	Seen at appt- has his cousin staying with him past week so he has been keeping occupied, reports he has not had any valium since last seen, big achievement. Edward currently smokes 20 cigarettes per day, will smoke as soon as he wakens. mood quite good today, no other issues. ok on current dose - 50mlx14 days given.
20/06/2013	<u>Dr Christine M Crawford at Sandyford Surgery</u>
Comment	below noted. not used cocaine for a while. hoping to move back to Blythswood court and paperwork now submitted. wants rereferred re hep c though scared what he will find out. invited to Keep Well and we should also do glucose (QOF) and LFTs (monitoring)
20/06/2013	<u>Ms Christine Carmichael at Sandyford Surgery</u>
Comment	Attended appt - Presented well today, reports he had used 20x5mg valium last week, said these were from a friend who gets them on prescription, advised it would still be considered illicit use, but he is trying to cut down still. Still attending Phoenix, group work mainly and trying to stay occupied and not get bored, this is when he falls back into more regular use of illicit. No other issues at this time - prescription will be issued by doctor.
06/06/2013	<u>Ms Christine Carmichael at Sandyford Surgery</u>
Comment	Seen at appt, presentation was good, reports has cut down on benzo use, has only used one day this week, approx 20x10mg street valium. has been getting out and about. Reports he has been attending Phoenix, enjoying this, didn't go yesterday, advised to try and keep attendance consistent this time. No other issues, ok on current dose of 50ml. Will discuss reduction plan again at next appt.
29/05/2013	<u>Dr Christine M Crawford at Data Entry</u>
Comment	urine pos benzos, consistent with history
23/05/2013	<u>Ms Christine Carmichael at Sandyford Surgery (18830)</u>
Comment	Seen at appt, reports valium use has decreased again, seemed much better than presentation from last appt. I had contacted Phoenix re getting Edward started up again but they had discharged him due to his sporadic attendance. Edward reports he has contacted them himself and he is attending again. Reports he had 50x10mg valium yesterday, states they were white in color and from Iraq, but felt no hit from them. no other illicit use. 50mlx14 days. Edward asked if methadone could be reduced, advised I would not agree to this at present due to amount of valium being taken, discussed getting this under control and reduced as there would be possibility of increasing use of illicit at this stage.
09/05/2013	<u>Ms Angela Docherty at Sandyford Surgery</u>
Comment	Seen at appt, seemed under influence, reports he had taken 10x10mg valium prev day, discussed this, reports hes back to being a bit bored as his cousin is back now and hes back to same routine. has not been to Phoenix in Bath St for approx 3wks, will contact them to see if Edward can start back, needs structure in his day to keep occupied, feels current dose is holding him ok. He will try and cut down valium use for next appt. CCarmichael NWCAT
05/05/2013	<u>Dr Alison Lawson at Data Entry</u>
Comment	Note on Methadone and other drug which may prolong qt. Consider discussing when seen at quarterly review
25/04/2013	<u>Ms Angela Docherty at Sandyford Surgery</u>
	Seen at appt, presented well, reports he is looking after his nephew just now,

Comment	enjoying responsibility and change of scene. Reports he has not used illicit diazepam since last seen. looking well and feeling good just now. Feels ok on current dose of 50ml. No other issues. C Carmichael NWCat.
11/04/2013	<u>Ms Angela Docherty at Sandyford Surgery</u>
Comment	Seen at appt, presentation good, reports still using illicit diazepam, had good discussion re why he is using, feels anxious when going to phoenix futures or meeting people. can look at other ways of relaxation techniques etc, will discuss harm reduction further at next appt. Current dose of methadone ok, no further issues. CCarmichael NW CAT.
28/03/2013	<u>Ms Angela Docherty at Sandyford Surgery</u>

<u>27/09/2012</u>	<u>Ms Angela Docherty at Sandyford Surgery</u>
Problem	attended clinic, reports no illicit drug use. has refrained from cocaine use due to diazepam detox. has been assessed at phoenix futures day programme, starts next friday. no issues with physical health. attends shawpark centre to see psychiatrist. has CPN from there also. prescription issues for 50mls methadone x 14 days, 27-09-2012 - 10-10-2012. angela docherty, north west cat
<u>14/09/2012</u>	<u>Dr Christine M Crawford at Data Entry</u>
Comment	has assessment Phoenix Futures 25th Sept 2pm - will be sent out
<u>13/09/2012</u>	<u>Dr Christine M Crawford at Sandyford Surgery</u>
Comment	T Phoenix Futures 332 1900 used cocaine day after last visit, attributed to bad company. none since, just Valium and feels ready for detox - discussed. awaiting word from Phoenix though ambivalent I think as buddying friend's husband so over at Crosshill at least couple of times a week (?more). Boots Central Station is pharmacy paranoid at times - thinks people at bus stop going to blow him up. recognises need to stop cocaine
Medication	Diazepam Tablets 5 mg 133 tablet 10 TABS DAILY WEEK 1 THEN 9 TABLETS DAILY
<u>30/08/2012</u>	<u>Mr Craig Buchanan at Sandyford Surgery</u>
Comment	Attended appointment. no cocaine use for 1 week, but has used some street diazepam. Happy to remain on 50ml daily at present time. Keeping busy going to brothers house. Reports mental health is ok but still gets a bit paranoid leading to him isolating himself. States all else ok with no issues at present

	time.

16/08/2012	<u>Mr Craig Buchanan at Sandyford Surgery</u>
Comment	Attended appointment. Reports to have used cocaine twice this week IV, discussed risks with this behaviour, but he feels he knows what he is doing, usually using with others around. States no issues with mental health at present time. Wishes to remain on 50ml at present time. Writer to call Edward on monday to complete SSA for referral to Phoenix day programme.

09/08/2012	<u>Dr Christine M Crawford at Data Entry</u>
Comment	urine positive benzos and cocaine, consistent with his story

02/08/2012	<u>Mr Craig Buchanan at Sandyford Surgery</u>
Comment	Attended appointment. Reports to be using Cocaine IV twice weekly, but is vocalising his desire to cease this use. Reports to be using illicit diazepam daily also for past few months but is trying to reduce these. reports to be a bit paranoid but acknowledges that cocaine use will increase this. Wishes to remain on 50ml at present time. Has agreed to attend surgery next thursday to allow SSA to be completed regarding referral to Phoenix day programme. Reports no other issues

24/07/2012	<u>Dr Christine M Crawford at Data Entry</u>
Comment	note psych letter (as discussed with consultant on the day). Has he been to Phoenix??

19/07/2012	<u>Mrs Cecilia Douglas at Sandyford Surgery</u>
Comment	Methadone px given 700mlx50mls daily 19/07 - 01/08/12

11/07/2012	<u>Dr Roderick MacNeill at Telephone Consultation</u>
History	Pharmacy gave him away his script unaware it is now daily dispense.

05/07/2012	<u>Mr Craig Buchanan at Sandyford Surgery</u>
Comment	Attended appointment. Reports to have used 1/2 grm yesterday, which was 1st use in a week, states that this was because he got paid. happy to remain on 50ml daily at present time. Given 2 week prescription, 50ml daily. Been attending CA 2 days per week at whiteinch housing. Reports mental health been ok. aware that staying off of cocaine will help level his mental health. reports no other issues at this time.

21/06/2012	<u>Dr Christine M Crawford at Data Entry</u>
Comment	d/w Craig and agreed should be on daily dispense

21/06/2012	<u>Mr Craig Buchanan at Sandyford Surgery</u>
Comment	Attended appointment. Discussed accessing day programme and would like a referral made to Phoenix day programme at Bath st. Writer will organise this. Reports to have used cocaine (1Grm) IV, prior to this only used once last week. Also report to be using 15 blues daily. Discussed him committing to a structured programme may lead to a benzo dtow being offered. Wishes to remain on 50ml daily. Writer will discuss with Dr Crawford takeaway that is in place at moment. Next appt 2 weeks.

13/06/2012	<u>Dr Alison Lawson at Sandyford Surgery</u>
History	Urinalysis pos for cocaine and benzos

07/06/2012	<u>Dr Christine M Crawford at Sandyford Surgery</u>
Comment	using street Valium to try and keep off cocaine, last cocaine week yesterday allegedly, check urine today. asking for quick Valium detox which I feel is pointless but will liaise with psychiatrist - given printout re appt 18/6 awaiting hep C appt, discussed

24/05/2012	<u>Mr Craig Buchanan at Sandyford Surgery</u>
Comment	Attended appointment. Reports no illicit drug use over past 2 weeks, no plans to use. Wishes to remain on 50ml at present time. Given 2 week prescription, 50ml daily, 150 fr 200 monday, keeping busy visiting family and "buddying" his cousins husband who has brain damage. Reports no other issues at this time. Next appointment with Dr Crawford on 7th june.

<u>18/05/2012</u>	<u>Dr Christine M Crawford at Data Entry</u>
Comment	note urine 11/5 positive for cocaine and benzos
-	----
<u>26/04/2012</u>	<u>Mr Craig Buchanan at Sandyford Surgery</u>
Comment	Attended appointment. Reports no illicit cocaine use for past 2 weeks but is using 5-6 illicit blues daily but states that this is to get him off the cocaine. Reports mental health has been fine, and he got his depot injection last week. Given 2 week prescription, 50ml daily, 150ml on fri, 200 ml on monday. keeping busy visiting family in govannahill. Reports no other issues at this time.
-	----
<u>12/04/2012</u>	<u>Mr Craig Buchanan at Sandyford Surgery</u>
Comment	Attended appointment late. Reports to have used cocaine only on his payday (IV) but reports no illicit drug use outwith this. Wishes to remain on 50ml at present time. Given 2 week prescription, 50ml daily, 150 fri, 200ml on mon. reports no other issues.
-	----
<u>29/03/2012</u>	<u>Mr Craig Buchanan at Sandyford Surgery</u>
Comment	Attended appointment. Continues to use cocaine once per week (IV). He states that he is using 10 blue diazepam daily and this is allowing him to reduce his cocaine use. Edward will think about his commitment to ceasing his cocaine use and writer will discuss with GP options for supporting him to do this. discussed recent blood result regarding Hep c and Edward would like a referral made to brownlee for support regarding this. Happy to remain on 50ml daily, 150ml fri, 200ml on mon. Reports mental health is fine at present time. Aware that cocaine will impact on his mental health. Reports no other issues at present time.
