Please call the surgery to arrange this appointment. Please note, this will be the only reminder you get for this appointment this year. We will now not recall you until next year. Many thanks Crescent Medical Practice

11-Jun-2025 Dr Victoria Thompson (VIC) Walmer Crescent - The Crescent Medical Practice Main Surgery

Problem	Itch
History	History attending re: skin. Reports incident of someone out to get him and put skeleton of chicken in his flat in Feb. Court date upcoming this mth regarding this. Lots of flies in flat as consequence. Feels scalp itchy and has changed colour of hairs and now jet black - pulling hairs from head to demonstrate. Spots on back of neck and concerned about spots on arms. Self conscious regarding skin and not been out in mths. Has run out of inhalers. Also had to spread out AMT - but found 6 today and taken all of them this morning and self admittedly spaced out now. ***** Worried has lost weight - no longer on buvidal substitute Rx or ensure.
Examination	O/E - weight steady. Nil obv on scalp. Has grey hair with 48.2 Kg some dark hairs more at edges of hairline. Some spots at back of neck with excoriation. Spots on arms are extensive freckles.
Comment	Comment More calm towards end of consult. Tx with betnovate scalp app and betnovate cream for top of neck shoulders - I suspect element of scratch/itch cycle ***** For rv in 2-3wks times.
Read Code	Medication review with patient
Medication	Medication Easyhaler Salbutamol Dry Powder Inhaler 100 micrograms/actuation 200 DOSE TWO PUFFS TO BE INHALED WHEN REQUIRED UP TO FOUR TIMES A DAY

---------	---

29-Nov-2024 Dr Esfandiyar Khan (EK1) Face to Face Consultation

Problem	Drug addiction therapy
History	History Same day F2F appt 'metal health'. Odd presentation, came in proceeded to take off his clothing to his boxer shorts, states wants me to have a look at state of things, evidence of previous stabbing injuries to right lower leg, surgery for fusion to right 1st MTP joint. attending the ADRS, has been offered Buvidol treatment but states it does not work for him and does not want, to stay on same treatment and no 'end game'. states made appt to get Diazepam detox for 2 weeks or Temazepam to help sleep for 2 weeks. states asked the same from ADRS but they declined, he had decided not to see them again, states has a appt with STV reported this afternoon where he will be telling them about how the ADRS is wasting public money on methadone programme and not interested in helping people.
Examination	Examination Thin gentleman, well groomed, wearing weather appropriate clean clothing, 2x base layers, long johns, jacket and overcoat, no sweating or tremulous, *****, drug seeking behaviour and lashing out when I explained why Diazepam/Temazepam type detox is not routinely carried out by GPs while attending ADRS. The ADRS has access to inpatient/residential detox as well as Addictions psychiatry for advice and support. states a friend is currently admitted to Bellahouston Hospice and staff are still giving him Methadone which he thinks is odd, made aware Methadone is opiate substitution therapy and I would imagine staff do not want his friend to suffer withdrawal features.
Comment	Comment Has been prescribed Amitrip 10 and running out of stores, discussed Amitrip can help sleep, sedating effect and mildly anxiolytic at low doses. states was on 50 mg nocte at one stage with out any side effects willing to try again.
Medication	Medication Amitriptyline Hydrochloride Tablets 10 mg 56 TABLET ONE TO BE TAKEN IN THE EVENING

07-Nov-2024 Ms Shona Patterson (SHO) Special Request

-------------	-----------------	------------

11-July-2024 Dr Esme Beer (ESME) The Crescent Medical Practice (18955)General Practice Surgery

Problem	Foot pain
History	History D/w Dr HR - option to switch to low dose gabapentin eg 100mg TDS as alternative to AMT given requiring spilt doses of analgesia throughout the day

11-July-2024 Dr Esme Beer (ESME) Face to Face Consultation

Problem	Emphysema	
Problem	Foot pain	
History	History Discussed results of CXR. Tells me chest was cracked open following stabbing likely cause of identified #. Worsening SOB. Cough slightly better. using salbutamol 1-2 x per day. "black" spit. No haemoptysis. No fevers. Becomes panicked when feeling breathless especially if wakes at night. Often woken by nightmares and ++ SOB on rising leading to panic. SOB worse on exertion. Poor appetite. Not eating much and stopped taking ensures as too expensive purchasing the milk required & blender broke meaning texture unpleasant. Ongoing issues with council about pigeons at the property. No hx of asthma or eczema. Denies any resp issues prior to pigeon exposure starting 18 month ago.	
Examination	O/E - weight (1kg loss) appears cachetic	48.2 Kg
Social	Ex smoker 6 months ago	
Comment	Comment Plan: CT chest to exclude malignancy given increasing sx and smoking hx, consider sputum cx at next contact, pending CT results titration of inhaler therapy vs resp referral ? pigeons fanciers lung, refer dieticians ? rv supplements, link worker referral for bus pass, offered to do bloods today previously requested but declined as doesn't like needles so needs time to prepare so will arrange through hub, began to discuss ? conselling given past trauma but appeared not keen	
History	History Long term history of "nerve pain" following stabbing in 2010. Largely Rt leg & sole of foot. Requesting amytriptline on repeat but was refused as too soon. using between 10-30mg per day. Usually using x1 tab 09:30am, 2pm & bedtime. Denies daytime sedation. Prescribed buvidal through addictions team Gorbals. Tells me had last dose end of June and planning for Detox in August. Feels has been on it too long and recently turned 60 so wanting to stop. Tells me wishes to see podiatry.	
Comment	Comment Plan: issued short supply however requires further discussion to consider ? suitable alternative given not taking as prescribed and addiction hx, encouraged to take AMT at night, advised can self refer to podiatry	
Medication	Medication Easyhaler Salbutamol Dry Powder Inhaler 100 micrograms/actuation 200 DOSE TWO PUFFS TO BE INHALED WHEN REQUIRED UP TO FOUR TIMES A DAY	
Medication	Medication Amitriptyline Hydrochloride Tablets 10 mg 28 Tablet(s) ONE TO BE TAKEN IN THE EVENING	

03-Apr-2024 Dr Judith McLaughlin (DR JUDITH 18955) Data Entry

Problem Emphysema
 History History CXR in keeping with smoking and emphysema.
 Note old heaked posterior rib fractures- I note hx of stab wound to chest March 2010. For r/v as planned

22-Feb-2024 Dr Judith McLaughlin (DR JUDITH 18955) Walmer Crescent - The Crescent Medical PracticeMain Surgery

Problem [D]Shortness of breath
 History O/E - pulse rate SOB longstanding. SI cough with occ spit. Occ sweat. No haemoptysis. No ankle swelling. Ex smoker. now vapes. Previous exposure to pigeons. Finds SABA helpful o/e v slim, wt ^ PO2 93-95%
 Examination Systolic blood pressure chest deformed by previous surgery 2ndy to stabbing chest clear ankles slim IMP likely COPD. For CXR and bloods and r/v 103 mm Hg
 Examination Diastolic blood pressure 64 mm Hg
 Examination O/E - weight 49 Kg
 Examination O/E - pulse rhythm regular
 Examination O/E - pulse rate NOS 102
 Comment Comment lives alone. poor diet.no alcohol Takes ensure and has ongoing need
 Medication Medication Easyhaler Salbutamol Dry Powder Inhaler 100 micrograms/actuation 200 DOSE TWO PUFFS TO BE INHALED WHEN REQUIRED UP TO FOUR TIMES A DAY
 History History use AMT for pain 2ndry to nerve damage in leg when stabbed in 2010

20-Feb-2024 Ms Shona Patterson (SHO) Walmer Crescent - The Crescent Medical PracticeMain Surgery

Comment Comment Sr salbutamol
note was prescribed due to ongoing cough -- last had May 23
did not attend for CXR
has not had salbutamol since
please arrange GP review of this patient to see if salbutamol still approp - if pt acutely unwell same day appt -
GP please also note pt has ensure on repeat - was discharged by dietician as pt declined intervention - please review if ongoing ensure approp

10-May-2023 Dr Esfandiyar Khan (EK1) GP telephone encounter

Problem Cough
 Examination Ex-Cigarette Smoker
 Comment Triage call. 'pt was upset on phone, crying, needs to speak to GP today'. Called and spoke to pt. Please see F2F reviews 5/1/23 and 16/1/23. states still coughing and worried he may have 'TB', no haemoptysis or night sweats, unclear if the pt may have lost weight, noted Ensure supplements in repeats and being prescribed every month. still attending ADRS for Buvridla injection. states recently some issues with ?leaky roof in the loft and has been stressed out, has been liaising with Housing Dept. Did not attend drop in X Ray service Jan 23 (refererd twice). Plan Offered F2F appt in view of duration of cough and PMH with me at WC. asking for an appt at Hillington road branch, appt made in available same day slot. Thank you

10-May-2023 Dr Judith McLaughlin (DR JUDITH 18955) Walmer Crescent - The Crescent Medical PracticeMain Surgery

Problem Weight decreasing
 History History Ongoing weight loss-further 3kg in 4/12.Describes chronic cough and SOB- no haemoptysis or marked sweats .Has not attended for CXR to date and apologises.Not eating well as not sleeping due to pigeons in attic.Takes ensure.Bowels move when eats - denies PR bleeding.o/e cachectic.PO2 92% ,no LN no clubbing,deformed chest due to stabbings ,poor AE throat -likely emphysema abdo soft no masses .Plan for CXR tells me will attend and make appt for bloods.Declined today as attending Gorbals HC today for Buvidal inj and needle phobic
 Examination O/E - weight 43 Kg
 Comment Comment attended late
 Medication Medication Salbutamol Cfc-free inhaler 100 micrograms/puff 1 INHALER ONE OR TWO PUFFS TO BE INHALED WHEN REQUIRED UP TO FOUR TIMES A DAY
 History History worried has lesion L lower gum line o/e no LN no ulcers seen/masses.Small area of leukoplakia at posterior L gumline.Asked to attend dentist for fuller examn
 Examination Examination weight loss
 History History looking for hypnotic as sleep disturbed by pigeons.D/c would not help in longer term or be appropriate.Encouraged to engage further with housing.Became a little unpleasant when I declined request for hypnotic

21-Apr-2023 Dr Katie Fullerton (KF) Data Entry

History History Further CXR failed to attend letter. For further phone appt to discuss if wishing any further attempt at ix.

05-Apr-2023 Mr Anonymous User (ANON) MJog

Read Code Outgoing mail NOS Summary of text message sent to patient / «Title» «First Name» «Last Name» The Surgery will be closed on Friday 7th of April and Monday 10th April 2023. In the event of an emergency please call 111 / MJog sent - holiday

14-Mar-2023 Dr Katie Fullerton (KF) Walmer Crescent - The Crescent Medical PracticeMain Surgery

History History Phoned to discuss ix as below. brian says he has tried to go for chest x-ray but wait was too long. Sympathised with this but explained why we feel it is important - exclude TB/cancer. Suggested attending first thing in morning if possible as less likely to be busy then. Also not handed in sputum samples - has containers. Says struggles to get out much as feels unsteady on feet - offered appt to review but didn;t seem keen on this. Advised someone else could drop these off for him - agreeable to same.

22-Feb-2023 Dr Judith McLaughlin (DR JUDITH 18955) Data Entry

History History failed to attend for CXR-I see recent microbiology to suggest TB.For tel appt

23-Jan-2023 Dr Amy Kerr (3) Telephone Consultation

Problem Cough
 History History Msg to phone Addictions nurse Stacey. Pt had advised her that he has been diagnosed with TB. Shared info that being treated for LRTI and TB is inclded in differential.

22-Jan-2023 Mrs Mary Freel (MARY_18955) General Practice Surgery

Comment No response to bowel cancer screening programme invitation Non-Responder

16-Jan-2023 Dr Judith McLaughlin (DR JUDITH 18955) Walmer Crescent - The Crescent Medical PracticeMain Surgery

Problem Cough
History O/E - BP reading 3/52 not well. Cough with dirty spit. No marked fever. Occ small of blood in spit. Also c/o central CP and across back. SOBOE. No ankle swelling. Smoke 15-20 cpd. no cannabis. *****Pt not known to me o/e cachectic, sl pale, Po2 97% .p 83 T 36.5, chesty cough heard, deformed ant chest wall (rpted stabbing and urgency to chest) chest clear. Plan rx as chest infection but for sputum for MCs and AAFB also for CXR. Discussed possible dx incl TB and "something worse". He tells me he will attend mane for CXR. Needle phobic > not for bloods at this point .

Examination Systolic blood pressure 112 mm Hg
Examination Diastolic blood pressure 55 mm Hg
Examination O/E - weight 45.8 Kg
Medication Medication Oxytetracycline Tablets 250 mg 40 TABLET TWO TO BE TAKEN FOUR TIMES A DAY
Medication Medication Salbutamol Cfc-free inhaler 100 micrograms/puff 1 INHALER ONE OR TWO PUFFS TO BE INHALED WHEN REQUIRED UP TO FOUR TIMES A DAY
History History On buvidal -attends for injections every 4 wks. Off all illicit drugs. Only very rare alcohol.
Problem [D]Haemoptysis

05-Jan-2023 Dr Ruth Keir (RK) Walmer Crescent - The Crescent Medical PracticeMain Surgery

History History 6/7 hx of cough, lethargy, runny nose, cough, watery eyes. Note seen at OOH on 3rd Jan but despite ambulance phoned, left the department. O2 sats 92%, drowsy and Bp 93/51 and oxygen started. Stated had to get back for *****. Overall no improvement. Feeling lightheaded, eating and drinking well, passing urine. SOB on exertion, achy all over, myalgia. No IOC.

Examination Examination Temp 37.3, HR 85, O2 98% on air. RR 14. pale, pupils small but reactive. red watery eyes, reactive and GCS 15/15. Orientated to person, place and time.

Examination O/E - blood pressure reading
Examination Examination Chest: left lower zone creps and poor air entry. Right base reduced air entry. No wheeze.

Social Social Smoker 20/day
Comment Comment Pneumonia on bg of possible viral illness: CURB65: 0. Obs stable at the moment, Abx, PCM, fluids, strong worsening advice, has NHS 24 11 number and aware to contac tif deterioration. Hasn't been taking mirtazapine/pregabalin recently and advised not time to re-start, for review appt when welll. Will need repeat examination/CXR in few weeks regardless but re-contact if no improvement 48hrs or any deterioration.

Problem Cough
Examination Examination No cervical lymphadenopathy. Ears nil acute, throat nil acute.

Examination Systolic blood pressure 113 mm Hg
Examination Diastolic blood pressure 69 mm Hg
Medication Medication Amoxicillin Capsules 500 mg 15 CAPSULE ONE TO BE TAKEN THREE TIMES A DAY FOR 5 DAYS
Medication Medication Paracetamol Tablets 500 mg 56 TABLET TWO TO BE TAKEN EVERY FOUR TO SIX HOURS WHEN REQUIRED (MAXIMUM OF 8 IN 24 HOURS)

05-Jan-2023 Dr Amy Kerr (3) Telephone Consultation

History History PC to pt: Appt made initially for discussion of mirtazapine but reports that chest still not improved from when seen at OOH. Will come for F2F assessment this afternoon

Examination Examination Spekaing well no the phone, sounds like walking and managing conversation

04-Jan-2023 Dr Amy Kerr (3) Data Entry

Problem Acute lower respiratory tract infection
History History OOH paperwork in docman. Pt thought to have signif chest sepsis but left department without treatment. Low sats at 92%. No ans on mobile today. Number for NOK ***** not in service. Removed from emis. Alt mobile on OOH slip not in service. . Msg left on mob asking pt to contact surgery. Wasn't confused when seen at OOH.

23-Dec-2022 Mr Steven Balsillie (SB1) Data Entry

Comment **Comment** SR Mirtazapine - not had since July. ? gap in ordering.
 Read Code **Drugs not issued**

20-Dec-2022 Mr Steven Balsillie (SB1) Data Entry

Comment **Comment** SR Gabapentin rather than Pregabalin - not issued. For review before change made - entry from last month dated 04/11/22 suggests had been getting good benefit from Pregabalin. Review required to assess change in pain management.
 Read Code **Advised to contact general practitioner**
 Read Code **Drugs not issued**

17-Nov-2022 Ms Shona Patterson (SHO) Special Request

Problem **Foot pain**
 Comment **Comment** SR pregabalin
note entry GP 4/11/22
however managed by pharmacy and slightly early to be ordering - admin please check with pharmacy if still has Rx for pregabalin running

04-Nov-2022 Dr Hannah Rush (HR) Telephone Consultation

Problem **Foot pain**
 History **History** Routine - pain in R sole foot persists - shooting and cramping as result of old stabbing injury plus earlier this summer - car ran over foot. I note didn't go for foot xray as requested by Dr VY earlier in year. Pregabalin is v helpful for pain - usually only takes OD in am if gogin to be more active and only occ at night. Not overusing or overordering - is helpful for likely chronic pain. Tells me never heard back from podiatry for apt - however I see her prev reported had apt for insole back in July.
 Comment **Comment** Suggest pregabalin remain on acutes to monitor ordering but seems helpful and being used approp - review in 6/12 or sooner if needed. Encouraged patient to recontact podiatry and seek furtehr review in order to aid symps/ recovery etc. To contact if worsening symps.

04-Nov-2022 Dr Hannah Rush (HR) Telephone Consultation

Problem **Failed encounter - message left on answer machine**
 History **History** Routine - to discuss gabapentin - stright to VM - left message askign to call back in next 30mins if possible.

26-Oct-2022 Ms Shona Patterson (SHO) Special Request

27-July-2022 Dr Vicky Young (VY) The Crescent Medical Practice (18955) General Practice Surgery

Problem	Foot pain
History	History Hx as below. Chronic pain sole R foot following stabbing injury years ago, also had ortho ops to big toe. R foot run over by car 3/52 ago - pt reports swollen and bruised at the time/. thinks acute pain settled but chronic pain worse than usual. Has appt with podiatry re insole this week. Note d/w CAT worker re pregabalin - pt on buvidal monthly, doing well, stable, clean urines. Happy for pregabalin to be px
Examination	Examination Little to see on foot. no obvious injury/bruising. Tender ++ sole of foot around first MTPJ and arch of foot.
Comment	Comment Suspect more chronic pain issue - pt aware of risks of addiction with pregabalin, keen not to be on LT, happy for weekly dispense. Start as below -low BMI and phone rv 2-3/52.
Medication	Medication Pregabalin Capsules 50 mg 56 CAPSULE ONE TO BE TAKEN TWICE DAILY

26-July-2022 Dr Liz Muir (LM1) Walmer Crescent - The Crescent Medical Practice Main Surgery

History	History tel consult - call form ***** Drugs worker -been calling addiction team daily asking for update on analgesia. Says patient told her toes had been run over by a car start july - I thought pain was related to old stab injuries- will invite tel rev to clarify hx/arrange analgesia. ***** says know patient for yrs- good compliance with same opiate dose yet c/o pain in foot for last 3-4 weeks is a change - hasn't had foot examined. didn't report car accident to police - she had advised him to go to AE at the time but didn't go. ***** finds he is a poor historian.
---------	--

26-July-2022 Dr Liz Muir (LM1) Walmer Crescent - The Crescent Medical Practice Main Surgery

History	History tel - no answer patient - voice mail left to call me back
---------	--

26-July-2022 Dr Liz Muir (LM1) Walmer Crescent - The Crescent Medical Practice Main Surgery

History	History tel - spoke with Brian - ongoing pain in foot - says foot was 'run over by a car 3 weeks ago - very bruised and swollen at the time - bruising has resolved but pain persists and says struggling to wt br. Has podiatry in few weeks- best see to assess foot given poor historian and unexplained worseing pain on top of hx longstanding pain- ?poss fracture ?? need for XR (gabapentin already tried- didn't help - Addictinn team have no issue with him trying pregabalin if felt this is next best step once assessed)
---------	---

20-July-2022 Dr Liz Muir (LM1) Walmer Crescent - The Crescent Medical Practice Main Surgery

History	History tel consult - drug worker ***** on annual leave but duty worker will return my call. Updated Brian re this. No changing symptoms. Today saying he feels he is pleased re short wait time for podiatry appointment
---------	--

19-July-2022 Dr Liz Muir (LM1) Walmer Crescent - The Crescent Medical Practice Main Surgery

History	History Tel triage - Asking for pregabalin - ongoing right foot pain. Says has tried Gabapentin and no better. Has received Podiatry appointments for 4th aug. Advised if foot red/swollen/chanign then needs seen f2f. says same as usual. Started shouting when I tried to explore addictive nature medn - agreed I will liase with his drug worker and knows if foot changing to call bawk
---------	--

15-July-2022 Dr Claire Cunningham (CC1) Phone Encounter

Problem	Foot pain
History	History d/w CO, as long as patient understands risks re. addiction and feels nothing else has worked for his pain then we can try.
Comment	Comment phoned brian - understands can be drug of abuse and addictive nature, brian understanding - he is happy for me to let his CAT team know too. Only wants to take meds short term until can see podiatry.
Medication	Medication Gabapentin Capsules 300 mg 50 capsule ONE TABLET ON DAY 1 - ONE TABLET TWICE A DAY ON DAY 2 - THEREAFTER TAKE ONE TABLET THREE TIMES DAILY

15-July-2022 Dr Claire Cunningham (CC1) Phone Encounter

Problem Foot pain
 History History TRIAGE - re. foot pain, phoned podiatry - appt could be weeks away. Needs something to help with nerve pain until then. Looking for gabapentin again. Doesn't like AMT. Stopped paracetamol + ibuprofen as don;t work. Pt says he would rather take gabapentin than his mirtazepine.
 Comment Comment note on buvidal. Will discuss with colleague.

15-July-2022 Dr Hannah Rush (HR) The Crescent Medical Practice (18955)General Practice Surgery

History History Triage: Chronic R foot pain following multiple stab wounds surgery - sounds like has orthotic supplied shoes but wore on trainers this weekend - flare of pain intstep R foot - has seen podiatry in past - given contact number to self refer first instance. Sound like was hoping for gabapentin - suggests contact podiatry first instance - happy with plan.

01-Apr-2022 Dr Caroline Oates (2) Telephone Consultation

History History tells me that 'mood 100 x better' _ few great nights at church, and also ***** with cancer diagnosis - given the all clear following Rx. mood better. issues remain with sleep. broken and awake at 3am. requesting temazepam. I note that not had benzos for couple yrs and only v occas. advised not appropriate to use due to sfx profile etc.
 History History mood good. continues to attend ADRS for buvidal. added mirtaz as shrt term rpt and r/w 4/12 or sos

26-Jan-2021 Dr Nick Robson (NR) The Crescent Medical Practice (18955)General Practice Surgery

History History Note previous appts re foot pain. Px has been isolating due to contact with Covid positive contact for last 14 days. States foot pain been progressively getting worse for years - not acutely worse today. Reports being 'hot and cold and shivery' for last 2 days with slight worsening of his dyspnoea (suffered with intermittent dyspnoea ever since stabbing). I have asked patient to go home, isolate and get Covid test immediately (given number to arrange test - no access to internet).
 Examination Examination Looks well. O2 sats on room air 99%. RR16 - not in resp distress. Chest clear.
 Comment To go home, isolate, get test. When negative book back in regarding foot pain. Worsening Statement given
 Examination O/E - regular pulse
 Examination O/E - pulse rate NOS 68

24-Jun-2020 Dr Arlene Williamson (AW) Data Entry

History	History triage - feels appetite improved with increase in mirtazepine. Asking for more ensure. Looks like issued few days ago so should be at recently. Struggling with sleeping. Discussed sleep hygiene etc. Discussed longer term risks with sleeping tablets. I see has had small supplies in the past. Note addiction hx. Last addiction letter in Jan - doing well. No street benzos since oct. Agreed to small once off script for zopiclone but not for repeat. Really pushing for benzos - I explained that I do not think this appropriate and reasons why. He states that unfair that previous hx would prevent me issuing when has been clean for some time and that being judged on his past (although this quite recent). Explained that this all the more reason I think we should remain off off benzos and that these are not a longer term solution for sleep problems. conversation felt manipulative.

History **History** Worried about upcoming foot surgery and upset about death of dog recently.
 Not sleeping.
 Prev had temazepam in 2017.
Comment **Comment** Short term use only - understands.
Medication **Medication** Zopiclone Tablets 3.75 mg 7 tablet ONE TO BE TAKEN AT NIGHT

23-Sept-2019 Dr Rahul Tyagi (RT) Docman

Problem Drug addiction therapy
History **History** on buprenorphine 16 mg od. outside script.
Medication **Medication** Buprenorphine Sublingual tablets Sugar Free 8 mg 14 tablet TWO TO BE TAKEN A DAY

20-Aug-2019 Dr Lee Janson (LJ) Hillington Road Branch Surgery

Problem	Problem LRTI/Viral Gastritis
History	History About 6 days of headache, some SOB, F/C, NV, one night of D. Not really able to eat until yesterday. Also, mass at right nipple for several months/years but now getting smaller.
Examination	O/E - weight T 35.9, O2 Sats 94% RA, HR 104, normal 48 Kg heart, marked dullness of left lower lobe, abdomen S/ND/+BS/discomfort at MEG and LUQ areas. Right nipple slightly enlarged compared to left although chest surgery, etc makes anatomy somewhat changed.
Comment	Comment Fluids, rest, gradual advancement of diet for viral gastritis. Amox, fluids, rest for chest infection. Will monitor right nipple size, etc. Dietary referral has been placed and he is waiting for their letter.
Medication	Medication Amoxicillin Capsules 500 mg 21 capsule ONE TO BE TAKEN THREE TIMES DAILY

08-Aug-2019 Dr Lee Janson (LJ) Hillington Road Branch Surgery

Problem	Problem Met patient on the street on 8 August. He notes that he spoke to the manager of his building and a first floor flat was opened revealing several abandoned letters. This confirmed the patients report that he was not receiving mail appropriately. He reports that he has spoken to the local post office and they have agreed to hold his mail at the local depot for his collection if he can not personally receive. mail.
Comment	Comment Given the above, Dietician referral made again explaining the situation.

07-Aug-2019 Dr Lee Janson (LJ) Hillington Road Branch Surgery

Problem	Foot pain
History	History Patient has not received appts from Ortho or Dietician. Reviewed DocMan and note that Ortho still has him on a waiting list. Recent (end of July) letter from Dieticians saying they have not had response to letters for an appt to be made. Patient notes that post usually goes to a different part of his building. Advised that we need to have a postal address where he can receive these letters in order to help him (would note this same topic was discussed a few months ago). Also, patient has now been on Amitryp 20 mg QHS for about a month. Not feeling much effect. Does not want to try Gabapentin or Pregablin due to the street reputation (feels if people know he has them, they may try to get them).
Comment	Comment Patient to increase to 30 mg Amitrip at night (revised for next Px). Review in 2-4 weeks. Patient to contact clinic with new address and then will redo Ortho and Dietician referrals.

05-Aug-2019 Ms Shona Patterson (SHO) Special Request

Problem	Foot pain
Comment	Prescription by supplementary prescriber SR amitrip -- note entry 2/8/19 -
Medication	Amitriptyline Hydrochloride Tablets 10 mg 56 TABLET TWO TO BE TAKEN IN THE EVENING

05-Aug-2019 Dr Rahul Tyagi (RT) Docman

History	History has not responded invitation to see dietician-discharged from WL> missed appointments discussed on 31/05 and address checked at that time.
---------	---

02-Aug-2019 Dr Amy Kerr (3) Em Appointment

History	History Pt presented to desk 1745. Chronic problems w foot pain, AMT not helping, no change today. Has appt to be seen next week-will keep this.

Medication	Medication Amitriptyline Hydrochloride Tablets 10 mg 56 TABLET TWO TO BE TAKEN IN THE EVENING

05-Jun-2019 Dr Rahul Tyagi (RT) Docman

Problem Foot pain
 History **History** back to ref letter from Ortho: is on waiting list and has not missed any appointments. *****.

31-May-2019 Dr Lee Janson (LJ) Hillington Road Branch Surgery

Problem **Problem** Review of Missed Appts (Neurology, Dietician, Orthopaedics)
 History **History** Notes "*****" at house. Was staying at a friend's house so didn't get letters. Problematic ***** was recently kicked out and he recently moved back and believes he will be there to receive letters. Also, reviewed pain meds. Past abuse of meds, has been using 20 mg Amitryp with some success. Offered Naproxen or Ibuprofen plus paracetamol but he feels these don't help. Not interested in Gabapentin.
 Examination O/E - weight 55 Kg
 Comment **Comment** Will redo referrals. Advised patient he must have access to above address to get these appts. Actually increased weight by 5kg. Px for Amitriptyline provided.

21-Mar-2019 Dr Amy Kerr (3) Data Entry

History **History** DNA to neurology. For phone appt to discuss

31-Jan-2019 Dr Rupert Whitehead (RW) Special Request

Medication **Medication** Amitriptyline Hydrochloride Tablets 10 mg 56
 TABLET TWO TO BE TAKEN IN THE EVENING

17-Dec-2018 Dr Atiya Abedin (AA) The Crescent Medical Practice (18955) General Practice Surgery

History **History** Attended ortho last week - been offered surgery to R foot but advised needs to gain weight BMI - only 16.4 Asking if could be referred to dietician Not great eater - missed breakfast - had some cheese today and then will have snawich at night Not hungry - mainly due to pain in foot No alcohol or drug misuse Now uses ecigs
 Examination O/E - weight 49.6 Kg
 Comment **Comment** Long chat about eating small amounts freq/boosting diet Refer dietician Try increasing amitytilline to 20mg at night to help with pain/sleep
 Medication **Medication** Amitriptyline Hydrochloride Tablets 10 mg 56
 tablet TWO AT NIGHT

13-Nov-2018 Dr Patrick Manson (PM) Walmer Crescent - The Crescent Medical Practice Main Surgery

History **History** 1. episode possible seizure last week. collapsed in street and doesn't remember anything from around that time. was told that was shaking on floor. taken by ambulance to QEUH from where left before being seen ... similar episode last year... admits to smoking heroin earlier this year in february hence why now on higher methadone dose 50mL however adamant that no alcohol or substances or eg street diazepam... fully recovered and nil further since.... nil in docman or portal... refer seizure clinic

2. foot pain a chronic issue... awaiting ortho in 1/12... naproxen/pcm unhelpful. previously on gabapentin but doesn't like it particularly as other people take interest when find out he is prescribed them and fearful that would try and take them off him... also aware that addictive and not ideal given previous addiction problems... for trial AMT, could be referred to pain clinic either by ortho at rv if not proposing treatment or by us if they don't, suggested rv 1-2 months re AMT, could re-order via reception, advised re possible s/e, may have beneficial effect on poor sleep with is also an issue
 Medication **Medication** Amitriptyline Hydrochloride Tablets 10 mg 28
 tablet ONE TO BE TAKEN IN THE EVENING

17-Oct-2018 Dr Arlene Williamson (AW) Walmer Crescent - The Crescent Medical Practice Main Surgery

10-Oct-2018 Dr Peter Horne (PH) The Crescent Medical Practice (18955)General Practice Surgery

History **History** in re multiple issues, asking for sleeping tablets as was given these before and found they were helpful, main issue seems to be pain in big toe for which he sees podiatry, also still gets flashbacks and feels down re a previous assault

Examination **Examination** hammering of big toe on right side

Comment **Comment** discussed sleeping tablets not a good idea I don't think currently and patient accepting of this, I will refer ortho re toe and wellbeing re anxiety, Worsening Statement given

08-Oct-2018 Dr Amy Kerr (3) Data Entry

Problem **Forms** - miscellaneous

History **Employment** and support allowance

Problem **Drug** addiction therapy

History **History** Contacted dCAT to clarify whether pt still attending there or being given treatment. Confirmed that still attending. CAT will send summary of input.

05-Oct-2018 Dr Victoria Thompson (VIC) Phone Encounter

History **History** Triage: Multiple issues - persisting foot pain that has been ongoing for yrs. Had been attending podiatry but not helping. Feels pain grad worsening. Has run out of analgesia but reports limited effect. Not misuses of tramadol in past. Trial naproxen and PCM combo and TMA. Ongoing sleep probs and feel low, states has lost 1 1/2 stone over past 5-6mths. TMA.

Medication **Medication** Naproxen Tablets 500 mg 28 TABLET ONE TO BE TAKEN TWICE A DAY

Medication **Medication** Paracetamol Tablets 500 mg 100 tablet 2 QID

01-Aug-2018 Dr Amy Kerr (3) Data Entry

History **History** Request for info from SW. letter typed.

29-Jun-2018 Mrs Mary Freel (MARY_18955) General Practice Surgery

Comment **No** response to bowel cancer screening programme invitation Non-Responder

16-Apr-2018 Dr Victoria Thompson (VIC) Walmer Crescent - The Crescent Medical PracticeMain Surgery

Problem **Foot** pain

History **History** Limping. Pt reports longerstand lump on underneath of R big toe pad but more sore in past few days, no analgesia taken. Prev stabbing that pt states has left chronic nerve damage in R foot.

Examination **Examination** Thickened ?callus/verruca on underneath of R big toe, fungal nail infection. No erythema. Nails are clawed slightly.

Comment **Comment** Tx with naproxen for pain relief (can titrate to 500mg bd if necessary but advised not to exceed more than this). Self r/f podiatry.

Medication **Medication** Naproxen Tablets 250 mg 56 tablet ONE TO BE TAKEN TWICE A DAY

16-Apr-2018 Dr Victoria Thompson (VIC) Phone Encounter

History **History** Triage: Pt reports ?reulceration at R big toe - flared last few days and having dif walking. Note h/o chronic pain but not currently on any analgesia. Has missed some appt ?with podiatry. Given OTD appt. On review of notes subsequently has h/o foot rolling and verruca prev excised.

05-Dec-2017 Dr Hannah Rush (HR) The Crescent Medical Practice (18955)General Practice Surgery

Comment **Did** not attend - no reason

24-Nov-2017 Dr Rupert Whitehead (RW) Special Request

Comment **Comment** sp req gabapentin - far overdue r/v, not for issue without appt.

15-Sept-2017 Dr Amy Kerr (3) Walmer Crescent - The Crescent Medical PracticeMain Surgery

History **History** Requesting certification to excuse from court appearance next week. Tells me that young ***** died and pt has been distressed since. Supportive discussion re difficult situation but no grounds for excusal from court on medical grounds. Encouraged to inform solicitor of what has happened.

29-Aug-2017 Dr Patrick Manson (PM) Walmer Crescent - The Crescent Medical PracticeMain Surgery

History	History leg pain problematic ever since significant stabbing. describes pain like a toothache down leg. previously on gabapentin for this with small benefit. had stopped it himself but keen to re-start. re-start at 100mg bd initially	
Examination	O/E - BP reading	
Examination	Systolic blood pressure	110 mm Hg
Examination	Diastolic blood pressure	70 mm Hg
Medication	Medication Gabapentin Capsules 100 mg 112 capsule ONE TO BE TAKEN TWICE DAILY	
History	History keen to build up muscle mass in body and legs which are very thin... frien told him re exercise referral and keen for this.. will do	

22-Aug-2017 Dr Amy Kerr (3) Special Request

Dear Sirs

BRIAN WHYTE (D.O.B. 31.3.64) [REDACTED]

Further to my partner, Dr. Sharp's letter of 20 June 2003, Mr. Whyte attended the surgery this evening. He is currently £40.00 per day on heroin and is desperately trying to hold on to a full time job. He is very unhappy about the wait to be seen at the Glasgow Drug Problem Service although I pointed out to him that he previously stopped Methadone of his own accord and if he had not done so he would not find himself in this position. However would it be possible to see him fairly soon.

Thanks for your help.

Yours sincerely

DR ROBERT J FERGUSON

I would be grateful for your opinion and advice on the above named patient. A brief outline of history, symptoms and signs is given below.

Dear Doctor

I would be grateful if you would see this 39-year-old patient who has recently moved to our practice. He tells me has been smoking heroin and wishes to be seen by yourself for consideration of a Methadone programme. He has previously been on a Methadone programme under the supervision of yourselves on the north side of the city.

Thank you for seeing him

Yours sincerely

Dear Dr Cosmo

BRIAN WHYTE - DOB 31 03 64

Just an up date on Brian.

When he was last seen at the Milton clinic he was complaining of chest pain and that he has lost 2 stones in weight, when he was released from custody in Doncaster, last September 2001. I was asked by one of our nurses to review his chest pains. I noted there is a family history of myocardial infarction, [REDACTED]

On examination he was not distressed. He has epigastric tenderness and on further enquiry, he told me he has been working lately as a Security Guard and eating irregularly and on top of which he smokes 20 to 30 cigarettes daily. I made a diagnosis of gastritis.

The plan today was to:

1. Stress the importance of eating regularly.
2. To monitor the hours of work he is doing, he is currently working in excess of 80 hours per week.
3. I have added Omeprazole 20mg, 1 tablet MANE, and I will review this at the end of the month.
4. We continue to titrate his methadone. He is currently on a dose of 40mls of methadone daily.

We will of course inform you of his progress, as it develops.

Yours sincerely

Dreena Kelly

Dear Dr Cosmo

BRIAN WHYTE - DOB 31 03 64

Many thanks for referring this man to the GDPS, where he was seen at the Milton clinic on 17 and 22 July 2002.

Assessment would indicate that he is suitable for a substitute prescribing programme with methadone and I have commenced him today at a dose of 20mls of methadone daily, with supervised dispensing.

I will keep you informed of his progress.

With kind regards.

Dear Jim

BRIAN WHYTE - DOB 31 03 64

This patient failed to attend his initial appointment with the GDPS on 13 February 1997 and we have heard nothing further from him. The DNA rate in such cases for a second appointment is so high that we ordinarily do not send one out. I note that you refer in your letter to giving this man Tylex and chlorpromazine. This is an interesting "cocktail" and I would be interested to hear of your experiences with this in people who claim to be addicted to heroin.

Kind regards.

This 29 year old young man joined our list 9.6.92. On 6 May this year he stated that he has been inhaling Heroin for seven years. He denies any history of injecting.

His stated reason for coming was that he was afraid of Aids but on repeated questioning he continued to deny any injections therefore no showing of needles or relationships with prostitutes. He states that he wishes help to "kick the habit".

Currently he smokes ten tobacco cigarettes per day and drinks one to two units of alcohol per day.

For a pain in his left ankle he was given Co-proxamol.

I would appreciate your help.

Yours sincerely,

Dr. R. Lindsay Elder.

4 May 2005

Dear Dr ADAMS-STRUMP

About Mr BRIAN WHYTE - Date of Birth 31 March 1964

I am writing to you about your patient Mr BRIAN WHYTE. He has been claiming Incapacity Benefit and National Insurance credits because he has been incapable of work. We recently assessed Mr WHYTE's ability to work using the Personal Capability Assessment.

We have decided that your patient has not met the threshold of incapacity from and including 4 May 2005. This is based on the medical examination we arranged that Mr WHYTE went to on 18 April 2005 and medical information you provided. We also used information that Mr WHYTE gave us.

This means that you do not have to give Mr WHYTE any more medical certificates for incapacity benefit purposes. But you may need to again if his condition worsens significantly or he has a new medical condition.

We have sent a summary of the Personal Capability Assessment to Mr WHYTE.

12/8/05	lengthy discussion with Brian he is requesting a detox, this was discussed. Brian was rude & argumentative with Jackie on reception, then continued with his attitude totally inappropriate. Dr Trump also came in to speak to Brian. Brian has given sample if it is clear he will start to reduce fortnightly. Methadone @ 30ml (840) 5 days. Supplied.	
07/10/05	Brian reports illicit use (2 x £10 bags heroin, smoked) last night, states want to get it for someone else & ended up using it himself. Brian felt he should stay on 30mls at present and aim for a period of several months stability & non-use before considering any reduction. Methadone @ 30ml (840) 5 DBS. JAV SW CAT. Due back 10am 04/11/05.	
04/11/05	U/A given - reports illicit use once (heroin, smoked) on Wednesday. Brian wishes to stay at 30mls for present. Meth @ 30mls @ (840)

ANKLE, LEFT

VERIFIED

Report by: ALAN RAMSAY
 Typed by: ROSEMARY CLAYTON

10/08/2004
 16/08/2004

Clinical History : Old injury - OA?

ANKLE, LEFT : Degenerative changes are present in both the ankle and the subtalar joints, which both show a little irregularity at the joint margin. Possible old healed fracture of the distal left fibula. Corticated bony opacity projected anterior to the ankle joint on the lateral view is probably an old avulsed osteophyte.

Small depression when flexed - see film

About your patient

Sur name	WHYTE	Address	45 CORNWALL ST
Other names	BRIAN		GLASGOW
Ni number	NB 27 83 44 C		
Date of birth	31-3-64	Postcode	G41

Dear Doctor,

Your patient has claimed benefit due to incapacity and we now have to assess their capacity to perform any work, not just their own job, using the Personal Capability Assessment procedures. People with certain severe medical conditions can be accepted as meeting the threshold of incapacity for benefit purposes without undergoing the Personal Capability Assessment or, if the assessment has to be applied, without undergoing a medical examination.

From the information you have provided on a medical statement (for example form Med 3), or information otherwise available to the medical officer, it appears that this may be such a case. In order to advise the decision maker in accordance with the law, the medical officer requires further factual information. We would be obliged if you would answer the medical officer's questions overleaf clearly indicating on a separate sheet, any medical evidence that you think would be harmful to the patient's health. An example of what may be harmful information is a diagnosis that is not known to your patient such as malignancy, progressive neurological conditions or major mental illness.

Your patient has given written consent on their claim form to allow us to approach you for this information.

If you have agreed to treat this patient under the NHS (General Medical Services) Regulations 1992 as amended March 1998 and equivalent regulations in Scotland, and have issued, or refused to issue, a medical certificate to them, you are obliged by your terms of service to supply clinical information to a medical officer. A similar obligation applies to most hospital and community doctors working within the NHS. You are not obliged to do this if you have not agreed to treat the patient under the NHS but any information you are willing to provide will be much appreciated. Unfortunately, we will be unable to pay you for it.

A reply within 7 days will be appreciated and a business reply envelope is enclosed for your use. If you have any queries about this form please contact the medical officer at your local Medical Services Centre, see leaflet IB204 *Guide for Registered Medical Practitioners* available at www.dwp.gov.uk/medical.

Thank you for your help.

Yours sincerely

E. TRAYNOR

On behalf of the Manager
 For the Medical Officer

About your patient – continued**Your reply**

Please answer the following questions from the information which is currently available to you.

- 1 Date patient was last seen or examined for the condition(s) causing incapacity.

18/10/01

- 2 Diagnosis of all relevant conditions and date(s) of onset.

Heroin dependence

- 3 Factual details of patient's condition.

Where possible, please include brief factual details of:

- present medical condition
- medication and other treatments (eg attendance at day care centre, hospital outpatient)
- outlook for your patient and any proposals for future management.

Currently on 30mg methadone daily

NHS Confidential: Personal data about a patient

About your patient – continued

- 4 Where available to you, please give brief details of what the patient has been told about the likely clinical course of their condition(s), and any future treatment.

known all about problems of heroin dependence

- 5 Any other information.

- If you have evidence which indicates that, as a result of their medical condition, your patient would not be able to attend an examination by using public transport or by taxi please include this here.
- Any additional information about the effects of the medical conditions on daily living (self care, indoor mobility, judgement and compliance with medication) would be very helpful.

Only complete the section below if you have diagnosed a psychiatric condition at question 2.

- 6 Where available to you, please give brief details of any history of recent or serious attempts at suicide or other self injury, or any history of threatening or violent behaviour towards others.

Declaration

I understand that if this person appeals, or asks for an explanation or reconsideration of the decision, a copy of the information I have given here may be sent to the person, their legal representative and the Appeals Service

I also understand that the only information that can be withheld is medical evidence that would be harmful to the person's health. I have stated any medical evidence that I think may be harmful to the person's health on a separate sheet of paper.

Dear Dr Fawcett

Re: Brain Whyte, D.O.B. 31.03.64
Flat 0/2, 45 Cornwall Street, Glasgow, G41 1BA

Thank you for your letter of the 18th September referring Mr Whyte with his painful right nipple. He has failed to keep the appointments that have been sent to him and it may well be that his symptoms have settled. No further action will be taken.

Yours sincerely

A handwritten signature in black ink, appearing to be "J.C. Ferguson".

ADMISSION TYPE: ELECTIVE
ADMISSION DATE: 28/10/09
DISCHARGE DATE: 28/10/09
CONSULTANT: MR ALAN HAIR
PROCEDURE: COLONOSCOPY WHICH WAS CANCELLED

Mr Whyte was referred and vetted to get an urgent colonoscopy but for some reason this was not carried out.

It is not entirely clear of the reasons why this was not carried out but he has been given another date and we will forward the result once this is available.

Yours sincerely

Mr Simon Denley

Just a quick letter to let you know that Mr Whyte was given 2 appointments for colonoscopy on 28/10/09 and 23/11/09 but he refused to have the procedure done.

His initial referral was quite worrying with dark red bleeding and apparently a palpable rectal mass but as the patient has refused the procedure we cannot take things further.

If you manage to persuade Mr Whyte to be investigated we would be grateful if you could re-refer him.

Yours sincerely

Mr Simon Denley

Further to my previous letter of November 2009, Mr Whyte was given a further appointment to attend for colonoscopy on 30/12/09. Unfortunately he failed to attend for this also.

He has now failed to attend on 3 occasions, but given the worrying nature of his symptoms I would be obliged if you could try and persuade him to attend for this investigation and re-refer him.

Yours sincerely

Dear Dr Fawcett

BRIAN WHITE DOB: 31/03/64 (SG00731681) CHI: 3103646054
45 CORNWALL ST., GLASGOW, G41 1BA

Admitted: 20/02/10

Discharged: 12/03/10

Diagnosis: Multiple Stab Wounds

1. Anterolateral chest (2 wounds)
2. Posterior Knee/Lateral Thigh on the Right Side
3. Left Popliteal Fossa

Procedure:

1. Clam shell thoracotomy performed in A & E
2. Exploration of right lower thigh and popliteal fossa, with reconstruction of neurovascular structures
3. Exploration of left popliteal fossa
4. Fasciotomy of right lower leg with opening of anterior and lateral compartments

Complications: Respiratory failure requiring a prolonged period of ventilation in intensive care

Follow-up: Routine vascular out-patient clinic

Mr White is 45 years old and is a reformed intravenous drug user, who now uses Methadone. He was admitted as an emergency to the resuscitation room of the Accident & Emergency Department, with multiple stab wounds. On arrival to hospital he was undergoing CPR, having had a cardiac arrest en route. In Accident & Emergency he had an immediate clam shell thoracotomy, as he had two anterior chest wounds but there was no evidence of a cardiac injury. During this time he went on to receive aggressive volume resuscitation, and with this his output was restored.

Thereafter he was taken to the operating theatre and he became apparent that the principle problem related to wounds in his right leg. He had arterial and venous injuries from which he had been exsanguinating. In conjunction with this his sciatic nerve had been divided. His vasculature was repaired as were his

neurological structures. Following this his clam shell thoracotomy was closed.

As one would expect he spent a prolonged period of time in intensive care with respiratory failure, although he went on to make what has ultimately been a good recovery. There are clearly issues with regard to his neurological function, and presently he has a foot drop for which he has been provided with a splint. From a vascular point of view the limb is warm and well perfused, although remains swollen. The lateral fasciotomy wound is granulating and we will review this in the fullness of time.

We plan to see him in the out-patient clinic in the next few weeks, to re-assess his progress. Clearly should there be any problems prior to this we would be happy to see him sooner.

Yours sincerely

Keith Hussey

*Re: Brian Whyte D.O.B. 31/03/1964
Flat 0/2, 45 Cornwall St G41 1BA*

This man was seriously assaulted and suffered multiple stab wounds. He had to have a thoracotomy and was desperately ill, very nearly exsanguinating.

I think he would be very much better with a move away from his current address.

Dear Doctor Fawcett

Work Capability Assessment Outcome Notification

Patients Name Mr B Whyte
Patients Address 0/2 45 Cornwall St
Kinning
Park
Glasgow
G41 1BA

Patients D.O.B : 31 March 1964

This patient has been claiming Employment and Support Allowance. We recently assessed their ability to work using the Work Capability Assessment.

WCA Effective Date 4 February 2010

Customers with potential capability for work enter the Work-Related Activity group, whilst those who have limited or no capability for work related activity enter the support group

This patient meets, or is treated as meeting the eligibility criteria for Employment and Support Allowance [Work related activity group/Support group].

You no longer need to issue an NHS medical certificates for this person's claim to benefit. However we may need to contact you for further information about this person's illness or disability in the future.

Proof of illness or disability may still be required for other interest groups or organisations such as employers or insurance companies. The provision of this information is not usually a NHS requirement.

If your patient makes another claim for benefit in the future, we will require medical certificates from the date of illness or disability.

This gentleman had been admitted with multiple stab wounds including an injury to his popliteal fossa. He was due for review in the clinic today but failed to attend. A further appointment will be sent out. He should probably be enrolled upon scanning of his vein graft and I would certainly be interested in seeing how the nerve repair is doing for him.

Kind Regards,

Yours sincerely,

Brian's casenotes have been returned to me as he has yet again failed to attend for assessment of his colon on numerous occasions.

I had written to you in January 2010 after he had been referred to me but I was certainly not the originator of the referral on this occasion but as it is not readily identifiable from the notes I thought I would write. Obviously he does not wish his colon investigated and I see that he has also failed to attend Mr Stuart's vascular clinic recently.

I will not make any further arrangements for him to be seen.

Yours sincerely

Mr Alan Hair

BRIAN WHITE DOB: 31/03/64 (SG00731681) CHI: 3103646054
 45 CORNWALL ST, FLAT 0/2, GLASGOW, G41 1BA

I saw Mr Whyte today in the clinic. As you will be aware he was admitted with a stab injury to both the chest and his right leg back in March. He was shocked and unconscious on admission and with the presumption that the injury to the chest was the most life threatening a clam shell thoracotomy was performed, although there proved to be no significant intrathoracic injury. His popliteal fossa was then explored and a divided vein artery and nerve were repaired. The artery was repaired with an interposition vein graft.

In the clinic today this gentleman has made a very good recovery. He is still walking on two crutches and says that he has not received any offer of physiotherapy so I have arranged that today. He is slowly getting power and sensation back in his foot, but this is far from complete. The leg is still very wasted, but the pulse is good in the popliteal fossa and the foot is well perfused.

I will arrange for him to have physiotherapy and I will arrange for him to have a vein graft surveillance of his short interposition segment. I will see him back at the clinic in four months time.

It is worth noting that the chest has healed up without complication save for a little tenderness at the level of the sternum. This gives him minimum symptoms.

Yours sincerely

W P STUART MD FRCS
 Consultant Vascular Surgeon

This man was stabbed in the chest in February 2010; he was at death's door for some considerable time & had a very stormy convalescence. He, not surprisingly, is very agitated as the stabbing occurred very near his home & he has to pass that point whenever he leaves the house. This is affecting him both during the day & affecting his sleep pattern too. He would greatly benefit from rehousing.

I reviewed this patient at the clinic today. As you will be aware he had an interposition graft for popliteal artery trauma done as an emergency over a year ago now. He now has slowly improving function in his right leg and some of the neurological function has returned. He is clearly ambulant with a stick. His vein graft scan has suggested that the vein is really quite small but functioning reasonably well. I will see him again in six months time.

Yours sincerely

Referral received on 12/8/10 from:

Self Referral ☐ Hospital Referral ☒ GP Referral ☐ Other ☐

The reason for referral was multiple stab wounds @ leg

He/She

- ☐ was triaged and given advice / exercises / other (see below)
- ☒ received full assessment/treatment
- ☒ was given advice / exercises / other (see below)
- ☐ was to contact us if further help was required and has not
- ☐ failed to attend first / review appointment on 14/9/10, 19/10/10, 5/11/10, 29/12/10
(18/11/10, 20/11/10)
- ☐ was put on the waiting list but failed to contact us for an appointment
- ☐ was given an appliance

Physiotherapy comments

Mr. White has been treated with @ leg Rest & Strengthening exercises and gait rehabilitation. His leg function has improved however he remains reluctant to progress from a knee catches to walking stick. More recently Mr. White's attendance at physiotherapy has been poor and he has missed several appointments. He has now been discharged from Physiotherapy.

This patient has now been discharged from our care.

Yours sincerely,

Marion O'Toole (Superintendent Physiotherapist)

Thank you for referring this patient for dietary
 assessment

☐ The patient attended for the appointment
 on: 6/3/12

Height: 1.73m Weight: 48.3kg

BMI: 16kg/m² Healthy Range 20 - 25 kg/m²

Comments

The above patient has a very poor dietary intake. He reports he skips most meals and often goes for 3 or 4 days without eating anything at all. He reports he has occasional soup, bread and chocolate. He reports he has tried to eat more but says he can't and reports psychological problems following an assault in 2010.

Due to his low weight and very poor dietary intake I would be grateful if you would prescribe 'Ensure Plus' x 3 daily - for a period of 4 weeks initially - which will provide 990kcal in addition to his dietary intake. I have also encouraged him to try to establish a regular meal pattern and he has been given written information regarding increasing his kcal intake.

He will be reviewed at clinic on 10/4/12 but should you have any queries please do not hesitate to contact me.

Yours sincerely,

Dear Mr Whyte,

I am writing to advise that you have been referred to the Glasgow Addiction Community Occupational Therapy service by Mr Stevenson of South West Community Addiction Team. I have arranged an initial appointment for you, which will usually last approximately an hour. This will give us the opportunity to discuss what difficulties you feel currently affect your lifestyle. Please find enclosed an information leaflet explaining the role of occupational therapy and how we may be able to assist you.

I have arranged an appointment with you at:-

Venue: South West Community Addiction Team, Pavillion 1,
Rowan Business Park, 5 Ardlaw Street, Glasgow G52 3RX

Date: Thursday 27th June 2013

Time: 9.30 am

If this time or date is inconvenient or you do not feel that occupational therapy will be of benefit to you at this time, then please telephone [REDACTED] to arrange an alternative date/time.

I look forward to meeting you.

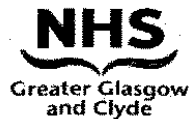

Yours sincerely,

Iain Laidlaw
Occupational Therapist

Whyte Brian

CHI: 3103646054

FDL 30/07/2013 v1

DIAGNOSIS – non displaced fracture of left parietal bone – extension to petrous portion of the left temple bone, left mastoid air cells and posterior aspect of left temporomandibular fossa; small right parietal lobe traumatic subarachnoid haemorrhage; pneumonia]

FOLLOW UP – nil

This gentleman re-presented having absconded following a significant head injury. He had evidence of pneumonia and was treated accordingly. Repeat CT scan showed a tiny volume of sub arachnoid blood present in the right parietal lobe. In addition the previously noted fracture through the left parietal bone extension to the petrous portion of the left temple lobe, left mastoid air cells and posterior aspect of the left temporomandibular fossa were seen. There was some evidence of haemorrhage within the sphenoid sinus, left mastoid air cells and left inner ear.

The patient was discussed with the neurosurgeons who reviewed the scan and felt no surgical intervention was necessary and advised observation. Unfortunately Mr Whyte absconded shortly thereafter.

Yours sincerely

Dr Andrew Kernohan

Consultant Physician

------	-------------------------------------

Clinical Comments: 49 year old gentleman admitted on 24/07/13 after being found lying on street by police. ? Assault. Patient unaware of what happened. GCS of 10/15 on admission. He was found to have a head injury, with abrasions to the right zygoma and blood from the left ear canal. This was discussed with neurosurgery and max fax who both felt no further action or review was required. Mr Whyte had a CT scan which showed no evidence of an intracranial bleed or c-spine fracture. Mr Whyte signed an irregular self discharge form on 25/07/13, however, his family brought him back to the ward the following day due to concern.

On 27/07/13 Mr Whyte was started on treatment for ?sepsis following episodes of vomiting with associated headache and neck stiffness. This was felt to be a right middle lobe pneumonia secondary to hypoventilation due to musculoskeletal pain. He was treated with amoxicillin and metronidazole and is now afebrile. Mr Whyte still has some sputum production on coughing but feels this is improving. Discharged on oral amoxicillin and metronidazole.

Brian Whyte	3103646054	31/03/1964	45 CORNWALL ST Glasgow G41 1BA

Admitted	Type	Discharged	Destination
25/10/2013 12:50	In Patient	26/10/2013	

Specialty	Consultant	Ward	Telephone
General Medicine	Dr David Murdoch	SGH Ward 22 - General Medicine	[REDACTED]

Reason for Admission and Presenting Complaints	Admission Category
Found by police with reduced GCS	Acute Admission no additional detail added

Diagnosis	Site	Side

Date	Procedures/interventions/Operations

Clinical Comments: This gentleman was found by police on 25/10/13 wandering in the undergrowth in Kinning Park. He was hypothermic and confused, likely secondary to drug misuse.

A CT did not demonstrate any acute abnormalities. His observations returned to normal and his GCS recovered.

We have been unable to confirm his regular medications and no further follow up is arranged - this gentleman is known to Govan CAT.

Treatments: None recorded.

Follow-up arranged: Nil

Dear Doctor,

Your patient **3103646054, BRIAN WHYTE, 0-2, 45 CORNWALL ST, GLASGOW, G41 1BA** was invited to participate in the Bowel Screening Programme on **31/03/2014**

It is 3 months since your patient was sent a bowel screening invitation and bowel screening test kit. As of today's date your patient has not participated. At 6 months your patient will return to re-call and be invited again in two years time.

Anything your GP Practice can offer to help your patient's awareness and understanding of the benefits and risks of the Bowel Screening Programme would be appreciated - this will help them to reach an informed decision regarding participation.

If your patient no longer has their screening kit, it is possible to request another by calling the Scottish Bowel Screening Helpline on [REDACTED]

Yours sincerely

Professor Steele

Dear Dr Fawcett

Re: Brian Whyte
CHI: 3103646054
Address: Flat 2/3, 133 Kinnell Avenue, Glasgow
Diagnosis: ICD10 F11.2
Management: Methadone 1mg/1ml 50mls daily – take home Saturday for Sunday
Care Manager: Gary Stevenson

Brian continues to attend the South West Community Addiction Team. He is currently illicit opiate-free on 50mls of Methadone. His most recent urinalysis showed positive for Methadone and Benzodiazepines only. He denies regular Benzodiazepine misuse although states he took a Lorazepam tablet recently for anxiety. Brian denies any health issues at present and states that he has settled well into his new accommodation. He does however have a Court case in the New Year regarding heroin possession which he is slightly concerned about. We will continue to monitor him closely and keep you informed of his progress.

Yours sincerely

Dr Lee Middleton

4. HOW WE USE YOUR INFORMATION

The information you have provided will be used by the GP Practice to carry out its various functions and services including scheduling appointments, ordering tests, hospital referrals and sending correspondence.

Your information, including your name, gender, date of birth and address, will be passed to NHS National Services Scotland where it will be held on the Community Health Index (CHI). This information is used to register you with the GP Practice, transfer your medical records between GP practices in the UK, make payments to GP Practices for medical services provided, and to process and issue medical cards, medical exemption certificates and entitlement cards.

NHS National Services Scotland shares information about you within NHS Scotland to assist in the provision and improvement of NHS services and the health of the public. When we do this, we make sure that the information which identifies you as a person and your health information are separated or anonymised. Health condition and treatment information which could identify you will not be used for research purposes by the NHS unless you have consented to this.

For more information on how NHS National Services Scotland uses your personal information visit www.nhs.uk. If you have any queries or concerns about how your personal information is used by the NHS please ask for the leaflet 'Confidentiality - it's your right', visit the Health Rights Information Scotland website at www.hris.org.uk or ask your GP surgery.

NHS National Services Scotland is the common name of the Common Services Agency for the Scottish Health Service.

5. PATIENT DECLARATION

I declare that the information I have given on this form is correct and complete. I understand that, if it is not, appropriate action may be taken.

To enable NHS National Services Scotland to confirm my eligibility to lawfully register with a GP and for the purposes of prevention, detection, and investigation of crime, relevant information from this form will be disclosed to the NHS Business Services Authority, NHS National Services Scotland, the Home Office, Identity and Passport Service, HM Revenue and Customs, the General Register Office and Local Authorities.

Glasgow
G52 3SS

Dear Dr O'Neill

Re: Brian White
CHI: 3103646054
Address: 133 Kinnell Avenue, Glasgow G52
Diagnosis: ICD10 F11.2
Management: Methadone 1mg/ml 40mls daily
Care Manager: Ian McDonald

Brian continues to attend the South West Community Addiction Team. He is currently illicit drug-free on 40mls of Methadone. His most recent urinalysis showed positive for Methadone only. There are no other outstanding issues and he is engaging well with his allocated worker. He is presenting well at the clinic and appears to be in good health. It appears that it is now appropriate to transfer Brian to your Shared Care Clinic. We will proceed with this in the coming weeks and keep you informed of his progress.

Yours sincerely

PP C Martin

Clinical Comments: Dear Doctor,
Mr Whyte was admitted to the QEUH by ambulance after being found by a passerby unresponsive in a hedge. His GCS was 7 on arrival although his resp rate was normal. He was given naloxone with no effect in A&E. He was hypothermic on arrival; his initial leucocytosis resolved on warming. When he came round he admitted to taking around 20 x 10mg diazepam tablets. He was fully alert and orientated by 6pm and allowed home.
Kind regards

Dear Mr Whyte,

I note that you failed to attend an appointment at the surgery today.

This is extremely frustrating for the Doctors and staff in the surgery as in essence this appointment has been wasted. We are extremely busy and if this appointment had been cancelled in advance we would have been able to allocate this slot to emergency patients.

If you are unable to attend your appointment we would be grateful if you could cancel the appointment so that we can use this for other patients.

Yours sincerely

Dr Patrick O'Neill

Dear Brian

You were recently invited to take a bowel screening test, which we have been notified you have as yet, failed to return.

These tests are very simple to use and very effective. Bowel cancer is the 3rd most common cancer in the UK and the UK's second biggest killer but it is one of the easier cancers to treat with a high success rate if caught early enough.

The kit comes with full instructions and it is free to post.

If you still have the kit please use it and send it away. If you no longer have the kit you can phone 0800 0121 833 for a replacement, if you have internet access you can get more information at www.bowelscreening.scot.nhs.uk.

We would urge you to take this test if you have not already done so.

If you require any further information on bowel cancer or how to use the screening kit, please make an appointment to see the Practice Nurse.

Yours sincerely

Dear Mr Whyte,

I note that you have failed to attend two appointments at the surgery in the last three months.

This is extremely frustrating for the Doctors and staff in the surgery as in essence this appointment has been wasted. We are extremely busy and if this appointment had been cancelled in advance we would have been able to allocate this slot to emergency patients.

Unfortunately, if you fail to attend another appointment we will be left with no option but to remove you from our practice list.

Yours sincerely

Dr Patrick O'Neill

Dear Dr McNaughton

I acknowledge receipt of your recent communication intimating that you wish the names of the undernoted patients removed from the practice.

The patients have been notified accordingly and their names will be removed from the practice list in accordance with the provisions of the National Health Service (General Medical Services Contracts) (Scotland) Regulations 2004, on **06 December 2016** unless they register with another practice before this date.

A formal request will then be made for the return of the medical records which should be retained until this time.

Yours sincerely

4. HOW WE USE YOUR INFORMATION

The information you have provided will be used by the GP Practice to carry out its various functions and services including scheduling appointments, ordering tests, hospital referrals and sending correspondence.

Your information, including your name, gender, date of birth and address, will be passed to NHS National Services Scotland where it will be held on the Community Health Index (CHI). This information is used to register you with the GP Practice, transfer your medical records between GP practices in the UK, make payments to GP Practices for medical services provided, and to process and issue medical cards, medical exemption certificates and entitlement cards.

NHS National Services Scotland shares information about you within NHS Scotland to assist in the provision and improvement of NHS services and the health of the public. When we do this, we make sure that the information which identifies you as a person and your health information are separated or anonymised. Health condition and treatment information which could identify you will not be used for research purposes by the NHS unless you have consented to this.

For more information on how NHS National Services Scotland uses your personal information visit www.nhs.uk. If you have any queries or concerns about how your personal information is used by the NHS please ask for the leaflet 'Confidentiality - it's your right', visit the Health Rights Information Scotland website at www.hris.org.uk or ask your GP surgery.

NHS National Services Scotland is the common name of the Common Services Agency for the Scottish Health Service.

5. PATIENT DECLARATION

I declare that the information I have given on this form is correct and complete. I understand that, if it is not, appropriate action may be taken.

To enable NHS National Services Scotland to confirm my eligibility to lawfully register with a GP and for the purposes of prevention, detection, and investigation of crime, relevant information from this form will be disclosed to the NHS Business Services Authority, NHS National Services Scotland, the Home Office, Identity and Passport Service, HM Revenue and Customs, the General Register Office and Local Authorities.

Patient/Patient's representative signature B. Wyte Date 13 12 16

Representative's name (if applicable)

Relationship to patient (if applicable)

Seal-Tight

Dear Doctor, the patient presenting this leaflet is currently receiving treatment for their condition which involves the application of regular dressings. These dressings need to be kept dry at all times. Would you please prescribe the appropriate model of Seal-Tight as indicated below? Seal-Tight allows the patient to maintain personal hygiene and bath or shower in safety with their dressings in place. Thank you.

Prescribe: Seal-Tight Wound Protector
CV27105 Adult Foot/Ankle

For patients where the dressing does not go far above the ankle. Will cover lower half of calf.

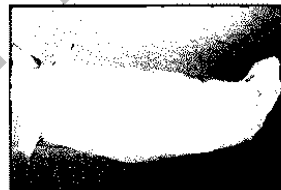

(tick) ☒

Prescribe: Seal-Tight Wound Protector
CV27103 Adult Short Leg

Typically for leg ulcer patients. Fits easily over multi layer dressings.

(tick) ☐

Prescribe: Seal-Tight Wound Protector
CV27106 Adult Wide Short Leg

For patients where the maximum circumference of the limb exceeds 16"

(tick) ☐

Regarding: Brian Whyte, D.O.B 31/03/1964 133 Kinnell Avenue Glasgow G5 9DA. Request for medical information regarding Mr Whyte.

Dear Doctor

I have enclosed a mandate signed by the above. I have been asked to provide a report to Court. The Court may wish to impose a period of unpaid work which would involve carrying out different types of work including gardening and environmental improvements in the local area. Mr Whyte advised that he is willing to carry out this work but would be unable to perform more demanding physical tasks due to a long term injury to his foot. We do have a light duties team based in a workshop for individual that are unable to carry out more demanding physical tasks. I would appreciate if you would be able to comment on Mr Whyte's medical status and whether he would be able to carry out this type of work. Verbal confirmation of Mr Whyte's fitness to undertake this work would be fine.

CHI: 3103646054

OPCL 06/09/2018 v1

this side is a 4 universally. Patient left side has normal hallux range, 2:1 in/eversion range and good calf range for gait - no pain on movement and muscle strengths 5. Patient gait shows lateral trunk bend and positive trendelenberg due to hip weakness with lesser steps on this affected side. Patient objective: to make feet more comfortable and stop further ulceration. Orthotic objective: insoles to redistribute plantar pressures from the apex of hallux, shoes to accommodate insoles and rocker soles to reduce forefoot trauma and promote 3rd rocker therefore improving sagittal plane motion.

Management to Date and Outcome:

Measures and scans taken today - patient chose Potenza I back mesh and lace . Shoes fitted well and reported comfortable

Reason For Discharge:

treatment complete

Guidance on Re Referral:

please reffer again if new assessment required

RE: **Brian Whyte** CHI: 3103646054
ADDRESS: 133 Kinnell Avenue, Glasgow, G52 3RT

Thank you for your recent referral of the above named person.

On reviewing our patient information system it would appear that your patient currently has an open-referral-to-their-local-Community-Addiction-Team. Given that this team is multi-disciplinary your patient will have access to RMNs and psychological services who would be in a position to offer a mental health assessment and appropriate intervention thereafter.

Yours sincerely

Brian Whyte; D.O.B: 31 Mar 1964; CHI: 3103646054
FLAT 2-3, 133 KINNELL AVE, Glasgow, Lanarkshire, G52 3RT

Attendance: Specialty - Orthopaedics ; Clinic - WIPODOR4-ORTHO PODIATRY MORAG BERKELY
TUES PM

Date and Time of Appointment - 11/12/2018 14:30

Clinical Comments:

Thank you for referring Mr Whyte to the Orthopaedic Foot and Ankle clinic, he was seen today at the West Glasgow ACH.

Mr Whyte attended complaining of pain in his right 1st toe. Mr White unfortunately sustained significant sensory and motor nerve damage following stabbing injuries in 2010. This has resulted in significant muscle loss to his right leg and these have produced a fixed flexion deformity of the right 1st interphalangeal joint.

Today check x-rays confirm this. In addition the lesser toes also have retracted however these are not symptomatic at this time.

Today we have discussed both surgical and conservative management; Mr Whyte is keen to proceed to surgery. I have discussed his case with Mr Moir the Orthopaedic Foot and Ankle Consultant and he advises a simple fusion of the 1st interphalangeal joint. Mr Whyte is happy to proceed with this. We have discussed risks including scarring, and sensitivity from scarring, risk of infection, risk of slow or non union of the bony surgical site, risks associated with general anaesthetic and also risks associated with the use of a tourniquet. Mr Whyte is also aware that he will be unable to weight bear on his forefoot for around six weeks and it takes around three months to return to his normal walking activities and around six months for anything more high impact.

CHI Number: 3103646054

Speciality: Community Dietitians

It would appear from our records that:

- ☒ Your patient has not responded to our recent letters inviting them to arrange an appointment.
- ☐ Your patient has indicated that they no longer require an appointment.
- ☐ Your patient has refused two reasonable offers of appointment.

We therefore assume that your patient no longer needs this appointment. We have removed their name from the waiting list. This is in line with NHS Greater Glasgow and Clyde's Did Not Attend Policy.

If you still wish your patient to be seen, we will require a new referral.

Yours sincerely

2-2

Drug Use: RESTART Brian attended 1 week out of treatment- had sickness bug and could not attend. Used 4x£10 heroin smoked in past week and 30x60mg DHC. Last DHC 1/2 tab last night at 10pm, had 1 bottle of Sunday methadone at home which he took at the weekend- advised to take doses as prescribed. No other illicit drugs used. Urine +ve opiate and methadone. Long discussion about ORT options, only tried bup illicitly years ago and experienced withdrawal- discussed pros/cons/pharmacology of both treatments. Brian agreed to start buprenorphine, treatment consent discussed and signed, supervision process explained. Risk of precipitated withdrawal discussed in full, Brian currently feeling very mild withdrawals, advised to wait until after lunch to take first dose. Brian advised of importance of daily attendance at pharmacy and potential for sleep disturbance / "clear head effect" in first few days. Confirmed naloxone supply.

Alcohol Use: Nil reported.

Physical Health: Awaiting operation on right foot- longstanding issue- compliant with prescribed amitriptyline. Weight 53.2kg- attempting to put weight on at present. Non-smoker- uses vape.

BBV - Tested -ve April 19- no further risk reported today.

Mental Health: Mood good, no concerns raised, euthymic today

Contact with Children: NA.

Legal: Nil pending. DVLA- no licence.

Social: No tenancy or benefits issues- has large family. Aware of local recovery groups.

Risk, Harm Reduction and Recovery Interventions: PLAN:

1. Restart buprenorphine today 1x8mg 6x16mg- consent discussed and signed.
2. TC to pharmacy.
3. Review next week.
4. Brian goal is to be drug free

Follow-up outpatient appointment. Appointment Outcome: Next due 25.7.19
1x8mg 6x16mg

You may wish to consider adding the above prescription to EMIS as medication prescribed by specialist services.

Please consider the risks of co-prescribing other opiates, benzodiazepines, gabapentinoids and other medication for this patient.

Kind Regards

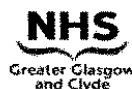

JJ CHARTIS

It would appear from our records that:

- ☒ Your patient has not responded to our recent letters inviting them to arrange an appointment.
- ☐ Your patient has indicated that they no longer require an appointment.
- ☐ Your patient has refused two reasonable offers of appointment.

We therefore assume that your patient no longer needs this appointment. We have removed their name from the waiting list. This is in line with NHS Greater Glasgow and Clyde's Did Not Attend Policy.

If you still wish your patient to be seen, we will require a new referral.

Yours sincerely

Dear Dr. AP Kerr,

Brian Whyte; D.O.B: 31 Mar 1964; CHI: 3103646054
FLAT 2-3, 133 KINNELL AVE, Glasgow, Lanarkshire, G52 3RT

Attendance: Specialty - Orthopaedics ; Clinic - WISMOR4-MR S MOIR ORTHO TUES PM
Date and Time of Appointment - 08/10/2019 14:00

Clinical Comments:

Mr Whyte has been left with a neurological deficit in his right lower limb following stabbing injuries some years ago. His principle complaint is of a clawed hallux and he is weight bearing on the plantar tip of the toe where he has a callosity. The toe is painful to move. There is only a jog of movement in the IP joint anyway.

He requires an IPJ arthrodesis and also extensor tendon lengthening at the MTP joint with capsular release if necessary. This will be secured with a couple of memory staples and possibly a percutaneous k-wire for a few weeks. The principle risks are infection and non-union, although he tells me he is no longer smoking cigarettes but instead uses a vape.

It should be done as a day case, he will probably be in a wool & crepe bandage and post op shoe for a week or two post-operatively but he will actually need probably minimal protection of the big toe over the next few weeks.

Yours Sincerely

Mr J S Moir

Dear ,

Brian Whyte; D.O.B: 31/03/1964; CHI: 3103646054
FLAT 2-3, 133 KINNELL AVE, Glasgow, Lanarkshire, G52 3RT

Thank you for referring the above patient for advice regarding nutritional support.

NUTRITION AND DIETETIC DIAGNOSIS :

PROBLEM Inadequate dietary intake

AETIOLOGY : previous assault, drug addiction therapy

SIGNS AND SYMPTOMS : very low weight/BMI

NUTRITIONAL AIM OF TREATMENT :

To advise regarding improving nutritional status and prevent further weight loss.

Height 1.74m Weight 50.7kg BMI 16.75kg/m2

Estimated Nutritional Requirements :

2324 kcals and 40 - 76 grams protein daily.

Estimated Nutritional intake :

Unable to assess.

Printed on 22/10/2019 11:20 by Catherine Hooke

Page 1 of 2

NHS Confidential: Personal data about a patient

Whyte Brian

CHI: 3103646054

GCL v1

Dietary assessment indicates that the above patient has an erratic eating pattern and reports he sometimes does not eat for 2-3 days. He was also very upset at the consultation as he reported that his dog died 3 weeks ago and this was his main life companion.

However, he seems keen to try to help himself and has agreed the following measures :

Establish a regular meal pattern

Breakfast 2 x weetabix + FF milk + banana + honey

Lunch soup and bread + butter

Evening meal - ready meal such as macc cheese.

Try to include kcal dense between meal snacks.

As he seems keen to try to help himself I would be grateful if you would prescribe the following :

ENSURE SHAKE X 2 DAILY, 60 per month, mixed flavours.

Has written information for reference. I would also suggest that he gets repeat prescriptions for the above until his next clinic appointment on 3.2.20 (first available review appointment).

Should you have any queries please do not hesitate to contact me.

Yours sincerely,

Electronically Signed: ,

Dear Dr. AP Kerr,

Brian Whyte; D.O.B: 31 Mar 1964; CHI: 3103646054
FLAT 2-3, 133 KINNELL AVE, Glasgow, Lanarkshire, G52 3RT

Attendance: Specialty - Neurology; Clinic - WLSNE6-LINDA STEPHEN SEIZURE WED PM **NO
OVERBOOKINGS UNLESS INSTRUCTED BY DR STEPHEN**
Date and Time of Appointment - 23/10/2019 14:00

Clinical Comments:

Many thanks for referring this 55 year old man whom I saw at my Seizure Clinic today. He tells me he has been having episodes of loss of consciousness for at least the last 5 years. The majority of these have been unwitnessed or witnessed by passers by who are not available to give a history. He gets no particular warning prior to passing out, but finds himself on the ground. He is incontinent of urine with the events but does not bite his tongue. His events have resulted in hospital admissions in the last few years. One involved a head injury. Another was thought to be the result of opiate abuse.

Mr Whyte was initially referred in November last year having been found, lying in the street, shaking. According to the referral letter he was taken by ambulance to the Queen Elizabeth University Hospital but did not wait to be seen. He thinks he has had some blackouts since then but cannot really give me any useful history.

He lives on his own. He has recently had surgery to fuse his right hallux IP joint and is currently walking with crutches.

He has had multiple stabbings and showed me his scars today.

He has a history of opiate abuse and takes 8 mg twice daily of Buprenorphine.

Printed on 24/10/2019 13:32 by Deirdre Nolan

Page 1 of 2

NHS Confidential: Personal data about a patient

Whyte Brian

CHI: 3103646054

OPCL 23/10/2019 v1

His other medication comprises Omeprazole, Amoxycillin, ibuprofen and Di-hydrocodeine.

He has no history of birth trauma, febrile convulsions or family history of epilepsy or seizures.

A CT of brain in 2014 was normal, although I note he had a fracture of his left temporal bone on a CT in 2013 when he was found by the police, wandering, hypothermic, in the street.

A 12 lead resting ECG from September shows normal sinus rhythm with a ventricular rate of 76 bpm.

It is difficult to be certain as to why Mr Whyte is having episodes of loss of consciousness. Should he have any more I have asked him to try and record as much detail of these as possible. Ideally a witness description would be most useful.

I have requested an MRI of brain for him and have arranged to see him back at my clinic with the result on 25 February.

Yours sincerely

Dear Dr Kerr

Re: Brian Whyte
CHI: 3103646054
Address: Flat 2/3, 133 Kinnell Avenue, Glasgow, G52 3RT

This patient continues to attend the South Alcohol and Drug Recovery Service at Greater Pollok, 130 Langton Road, Glasgow, G53 5DP. I reviewed them on 7 January 2020.

Drug Use: Brian attended on time for review today and looked well with no evidence of intoxication or withdrawal. He reports no illicit drug for over 1 month and last street benz use was in Oct following the death of his dog. He was unable to provide a urine screen today but will do so at next appt. He is happy to maintain on his current dose of 16mg bup today. Discussed potential to transfer to Buvival- bup depot - given patient info booklet and discussed in full, Brian does not like needles but will read and discuss at next appt.

Alcohol Use: Drank at Xmas but no regular alcohol use.

Physical Health: Generally keeps well, recovered well from recent operation on foot with pain now relieved. Dietician appt in Feb- remains underweight. Neurology appt in Feb for investigation following recent collapses. Has stopped smoking, currently using e-cig.
BBV - DBST completed today- states no risk since last test in April 19

Mental Health: Non-compliant with mirtazepine 15mg - mood improved recently, struggling with sleep, found mirtazepine helped. Encouraged to discuss with GP at appt next week. Bright and well engaged today. No dsh/ideation reported.

Glasgow - Proud Host City of the 2014 Commonwealth Games

Read our Privacy Statement at www.glasgow.gov.uk/privacy

2-2

Contact with Children: NA.

Legal: Nil. DVLA - no licence- awaiting bus pass.

Social: Has own tenancy and currently working on maximising benefits. Engages regularly with church groups and finds this a good support. Will attend tomorrow to see care manager to complete bus pass form and with benefits forms.

Risk, Harm Reduction and Recovery Interventions: PLAN:

1. Maintain current dose- consider transfer to Buvidal.
2. DBST results.
3. Continue to attend appts for physical health.
4. Encourage further recovery engagement.
5. Attend tomorrow to see care manager.

Follow-up outpatient appointment. Appointment Outcome: Next due 21.1.20 14x 16mg bup.

You may wish to consider adding the above prescription to EMIS as medication prescribed by specialist services.

Please consider the risks of co-prescribing other opiates, benzodiazepines, gabapentinoids and other medication for this patient.

Physiotherapy

12/02/2020

12/02/2020

12/02/2020

Dear Dr Kerr,

Brian Whyte; D.O.B: 31/03/1964; CHI: 3103646054
FLAT 2-3, 133 KINNELL AVE, Glasgow, Lanarkshire, G52 3RT

I assessed Brian today after he self referred for shoulder pain. He has a 4/12 history of insidious onset right shoulder pain. He presents with some capsular restriction but more in the posterior capsule of the shoulder which is less usual for a diagnosis of frozen shoulder and I would like him to have an X-Ray to rule out any GHJ OA changes.

Would it be possible to write Brian an X-Ray request card that he can pick up from the practice? I have asked him to phone the practice to check that this is ready before coming down.

I think he will also need some advice on regular analgesia to allow him to perform his physiotherapy stretches.

Thanks

Graeme Lusk

Physiotherapist

About your patient

Address

2/3 133 Kinnell Av, Glasgow, G52 3RT

Full Name Mr Brian Whyte

NINo NB278344C

Date of birth 31st March 1964

Dear Doctor,

Your patient is being assessed for Employment and Support Allowance and we need to find out whether they are able to do any work. By completing this form and providing factual information you will help our Healthcare Professional staff decide whether your patient needs a face-to-face work capability assessment and if so support that assessment.

Please note

- NHS doctors have a **contractual obligation** to provide the information requested without charge.
- The form should be completed from your medical records. A separate examination is not necessary.
- It is acceptable for you to delegate completion of the form to your practice nurse but you must confirm your authorisation by signing at the end.
- Your patient has given consent to allow us to approach you for this information, in accordance with GMC guidelines.
- An online version of this report which can be completed electronically and printed is available at www.gov.uk/government/publications/esa113-interactive-for-use-by-healthcare-practitioners
- A fully completed form may help inform the face to face work capability assessment or may mean that your patient will not need a further assessment. It will also help us to make a more informed decision on benefit entitlement

COMPUTER PRINTOUTS

You can send us a computer printout of the appropriate part of the patient record if you wish, but you will still have to complete any sections of the form where the answer is not clear from the printout. We are only able to accept information directly relevant to our enquiries. If a printout is available, please make sure it includes the following:

- Active problems;
- Current medication with last prescribed date;
- Details of the last three consultations. Please remove any third party data.

If you have any queries about this form please phone the number above. If you would like to discuss anything with our medical staff, please phone the number above and ask for a member of the medical staff on the customer service desk. If there is any medical evidence that you think would be harmful to your patient's health, please give us this information on a separate sheet of paper so that this can be withheld.

Please reply within 5 working days. A business reply envelope is enclosed for your use.

Thank you for your help.

Yours sincerely,

Centre for Health and Disability Assessments on behalf of the DWP

Glasgow

Dear Dr Kerr,

I attended the Royal Infirmary on 3 December to consult with Dr David Lockington in connection with my right eye. There is previous correspondence on your records in this connection.

When I last phoned the surgery, you had not yet received a letter following this consultation. Dr Lockington gave me 5ml of eye drops and will see me in 9 months or sooner if there is any deterioration.

I would be grateful to have a prescription for the attached eye drops – and am I to use these for the next 9 months? Dr Lockington did not say otherwise and I failed to ask specifically. Presumably his letter, when received by you, will indicate.

Kind regards

Brian Whyte

NO OVERBOOKINGS UNLESS INSTRUCTED BY DR STEPHEN
Date and Time of Appointment - 19/01/2021 12:00

Clinical Comments:

Mr Whyte had a telephone consultation with me at my Seizure Clinic today. He says he continues to have episodes of blacking out though as before there are still no useful witnesses to these. He says the last of these occurred on 2 January and one previous to that occurred at the end of last year.

He did not attend for his MRI of brain on 10 December 2019 and I have re-requested this.

I have sent Mr Whyte an appointment for my clinic when hopefully his MRI result will be available.

Yours sincerely

Dear Mr Whyte,

I was sorry to hear that you were too claustrophobic to have your MRI of brain earlier this month. I have therefore requested a CT brain scan for you which you should find easier. You have an appointment for my Seizure Clinic in June when the result of the scan should be available.

Best wishes.

Yours sincerely

Dear Dr AP Kerr

Re Patient:
Brian Whyte
FLAT 2-3
133 KINNELL AVE
Glasgow
G52 3RT

CHI Number: 3103646054

Speciality: Community Dietitians

It would appear from our records that one of the following applies:

- Your patient has not responded to our recent letters inviting them to arrange an appointment.
- Your patient has indicated that they no longer require an appointment.
- Your patient has refused two reasonable offers of appointment.

We therefore assume that your patient no longer needs this appointment. We have removed their name from the waiting list. This is in line with the NHS Greater Glasgow and Clyde's Did Not Attend Policy.

If you still wish your patient to be seen, we will require a new referral.

Yours sincerely

Statement of Fitness for Work For social security or Statutory Sick Pay	
Patient's name	Mr, Mrs, Miss, Ms Brian Whyte
I assessed your case on:	10 / 11 / 2025
and, because of the following condition(s):	Foot Pain and prveious surgery Emphysema Previous multiple stabbing injuries
I advise you that:	☒ you are not fit for work. ☐ you may be fit for work taking account of the following advice:-----
If available, and with your employer's agreement, you may benefit from: ☐ a phased return to work--- ☐ amended duties----- ☐ altered hours----- ☐ workplace adaptations-----	
Comments, including functional effects of your condition(s):	
This will be the case for 4 Week(s) or from / / to / /	
I will/will not need to assess your fitness for work again at the end of this period. (Please delete as applicable)	
Issuer's name	Dr Esfandiyar Khan
Issuer's profession	Doctor
Date of statement	10 / 11 / 2025
Issuer's address	The Crescent Medical Practice (18955) Walmer Crescent Glasgow, G51 1AT Telephone:
Unique ID: Med 3 04/22 E7A67481-4CC9-4C73-A71E-9E55478D7B89	

What your advice means
'You are not fit for work'
Your health condition means that you may not be able to work for the period shown. You can go back to work as soon as you feel able to and, with your employer's agreement, this may be before your fit note runs out.
'You may be fit for work'
You could go back to work with the support of your employer. Sometimes your employer cannot give you the support you need and if this happens your employer will treat this form as though you are 'not fit for work'. You do not need to get another of these forms.
For more information please visit www.gov.uk and type 'fit note guidance for patients and employees' into the search field. Fit note guidance for employers is also available.
Data from **page 1** of this form may be collected to learn about national patterns of sickness absence. Individuals will not be identified. Find out more at www.gov.uk/dwp/fit-note-data
Fill in the **Your details** section. You can ask someone to do this for you if you cannot fill in your details yourself.
Your details - Please use BLOCK CAPITALS
Surname Mr, Mrs, Miss, Ms WHYTE
Other names BRIAN
Address 2-3, 133 KINNELL AVENUE
GLASGOW Postcode G52 3RT
Date of birth 31 / 03 / 1964 Mobile
NI number
What you need to do now
• **If you are employed:** Please show this form to your employer. You could get Statutory Sick Pay (SSP) which is paid by your employer. If your employer cannot pay you SSP they will give you form **SSP1** to claim benefits.
• **If you are self-employed:** You could claim benefits.
• **If you are already claiming benefits:** Please send this form to the office dealing with your claim.
• **If you need to make a claim to benefits:** Visit www.gov.uk/browse/benefits or phone (8am to 6pm Monday to Friday). Textphone users call

Dear Mr Whyte,

Missed Appointment

It has been highlighted that you appear to have not recently attended an appointment with us. We understand that mistakes happen, so please aim for this not to occur again, as it does stop us offering that appointment to another patient.

If you cannot attend, then please always try to cancel the appointment. We suggest that you ensure you have noted it on your diary / calendar etc.

I hope you will now pre-cancel any appointments that you cannot attend. You can text back "cancel" if you have received a text reminder, or contact us by telephone

If we have misunderstood the circumstances of your missed appointment please accept our apologies.

Thank you for your anticipated help.

Yours sincerely,

Lisa Johnston

Thank you for the fax requesting information regarding Mr Brian Whyte's health. I acknowledge receipt of Mr. Whyte's signed consent to release information.

Having reviewed Mr Whyte's notes, I can see no reason why he would not be unable to perform light physical duties.

I hope this information is of help. I have been unable to contact you by phone to discuss directly.

Yours sincerely,

Dr Amy Kerr
