Dear Dr Kennedy

RE: Lisa Park dob 07.08.74 (0049)
82F Balgarnie Road, Dundee

The above patient did not attend my appointment today as she has flu. Her Community Mental Health Nurse told me that when he visited last week she [redacted] had black eyes -- inflicted by [redacted] whom she had put out. [redacted] was lurking about outside asking the Community Mental Health Nurse to mediate between them which he refused to do. [redacted]

She told me on the telephone today that she had been unable to tolerate Trazodone -- even the 100 mg nocte dose was making her over-tired and over-sedated.

Care Plan -- I have asked her not to take it anymore and would be grateful if you could please prescribe Venlafaxine i.e. 37.5 mgs nocte for two nights then 75 mgs nocte. I have asked her to see you after she has been on it for a fortnight or so as it can be put up to 150 mgs nocte and I will send her another appointment for January.

Yours sincerely

Dr Irena Thomson
 Clinical Assistant

Dear Dr Smeaton

RE: Lisa Park dob 07.08.74 (0049)
82F Balgarnie Road, Dundee

I saw the above patient today (21.11.03) at the Alloway Centre. She missed her last appointment and I have not seen her for a while. Her Community Mental Health Nurse has continued to see her regularly however, and told me that her mood is just not picking up at present.

She told me that she wakes frequently at night and is unable to relax properly. She is still irritable during the day and feels low, but did not appear as depressed as I have seen her previously, at interview.

[REDACTED]

I think that Sertraline can make some people irritable so have suggested that Lisa cut it over the next 12 days i.e. to 100 mgs for a week then 50 mgs daily for 5 days, then stop.

Care Plan - Please prescribe Sulpitride 100 mgs bd for 2 weeks during the changeover period and when she stops the Sertraline please prescribe Trazodone 100 mgs nocte for 2 nights, then 150 mgs nocte for 5 days, then 300 mgs nocte. I will see her again on the 9th of December 2003. She talked today about issues of sexual abuse that still come up for her as [REDACTED] but has been unable to speak about these to her male nurse. He is leaving in January so I will hopefully get her a female Community Mental Health Nurse then.

Yours sincerely

Dear Dr Smeaton

RE: Lisa Park dob 07.08.74
82F Balfourhino Road, Dundee

Thank you for offering to prescribe extra Sertraline for the above patient. I spoke to Dr Kennedy about Lisa a few weeks ago as I had suggested Citalopram and she told Dr Kennedy that she recognised the packet, had had it before and it had not worked. We therefore agreed to increase her Sertraline but in the meantime [REDACTED]

Unfortunately the hospital staff did not put up her Sertraline or contact the General Practice for confirmation that the dose had been increased.

Care Plan - Thank you for arranging to prescribe 50 mg tablets of Sertraline, so that Lisa can now take 150 mgs daily. She tried breastfeeding for a few days but was unable to continue, so this will not be a problem. I will discuss her at our meeting on Thursday and hopefully get her a Community Mental Health Nurse. Thank you for also speaking to the Health Visitor and asking her to visit in the near future.

Yours sincerely

Dr Irena Thomson

EDINBURGH POSTNATAL DEPRESSION SCALE (EPDS)

NAME: Lisa Park
 ADDRESS: 82F BALGARTHO RD, DUNDEE, DD2 6RA
 BABY'S NAME: KADY HELEN SCOTT
 BABY'S DATE OF BIRTH: 11 JULY 2003

Since: 17 07/08/03

As you have recently had a baby, we would like to know how you are feeling. Please underline the answer which comes closest to how you have felt **IN THE PAST 7 DAYS**, not just how you are feeling today.

Here is an example already completed:
 I have felt very happy:

YES, ALL THE TIME
 YES, MOST OF THE TIME
 NO, NOT VERY OFTEN
 NO, NOT AT ALL

This would mean: "I have felt happy most of the time" during the past week.
 Please complete the other questions in the same way

IN THE PAST 7 DAYS:

1. I have been able to laugh and see the funny side of things: As much as I always could <u>2</u> Not quite so much now Definitely not so much now Not at all	6. Things have been getting on top of me: Yes, most of the time I haven't been able to cope. <u>3</u> Well at all Yes, sometimes I haven't been coping as well as usual No, most of the time I have coped quite well No, I have been coping as well as ever
2. I have looked forward with enjoyment to things: As much as I ever did <u>2</u> Rather less than I used to Definitely less than I used to Hardly at all	7. I have been so unhappy I have had difficulty sleeping: Yes, most of the time <u>2</u> Yes, sometimes Not very often No, not at all
3. I have blamed myself unnecessarily when things went wrong: Yes, most of the time Yes, some of the time <u>1</u> Not very often No, never	8. I have felt sad or miserable: Yes, most of the time <u>2</u> Yes, quite often Not very often No, not at all
4. I have been anxious or worried for no good reason: No, not at all <u>2</u> Hardly ever Yes, sometimes Yes, very often	9. I have been so unhappy that I have been crying: Yes, most of the time <u>1</u> Yes, quite often Only occasionally No, never
5. I have felt scared or panicky for no very good reason: Yes, quite a lot <u>2</u> Yes, sometimes No, not much No, not at all	10. The thought of harming myself has occurred to me: Yes, quite often <u>0</u> Sometimes Hardly ever Never

Admission Ward: AMU-WEST
Admission Speciality: Acute Medicine
Discharge Type: Patient discharged himself/herself against medical advice
Date Of Discharge: 16/03/2015
Discharge Destination: Private Residence - lives with relatives or friends

Operations, Procedures, Investigations and Complications Comments

CT: showed abscess in the left groin, not for surgical intervention.

Medications

Drug	Dose	Amount To Be Taken	Frequency	Duration	Quantity	Supply	Additional Information
Paracetamol 1g tablets	1 gram	1 tablet	4 x a day				
Mirtazapine 30mg tablets	30mg	1 tablet	At night				
Omeprazole 20mg gastro-resistant tablets	20mg	1 tablet	In the morning				
Methadone 60mls							

Medicines not checked by pharmacist before discharge. For any clinical information contact prescriber.

CHI: 0708740049, Name: LISA JANE PARK, Discharge Date: 16/03/2015

NHS Confidential: Personal data about a patient

Medication Comments / Other Information

Patient left before a discharge could be done or medications brought up.
Was on IV metronidazole and flucloxacillin.

*** PLEASE DELETE FROM SUMMARY IF DVT EXCLUDED OR NOT C/O RIVAROXABAN ***

GUIDANCE FOR RIVAROXABAN:

eGFR >50ml/min: 15mg twice daily for 3 weeks then 20mg daily for duration of treatment
eGFR 30-50ml/min: 15mg twice daily for 3 weeks then 15mg daily for duration of treatment
eGFR <30ml/min: Patient should not be taking Rivaroxaban

If eGFR changes during treatment please consult your pharmacist

Communication To Primary Care

Dear Doctor,

This lady was admitted to Ninewells with suspected DVT related to IVDU.
During admission she was unwell and was on IV antibiotics.
A USS doppler was requested but was not done before the patient discharged herself.
A CT groin showed a left groin abscess, she had surgical review but it was decided that it was not for surgical intervention.
Lisa Told us that she had been injecting whilst in the hospital and was having withdrawal. We gave her the option of staying with us and having methadone or discharging herself against medical advice. She chose to discharge herself.
No follow up required.

If you have any questions please do not hesitate to contact the ward.

best wishes,

Ms Jane Rutherford (Position: Doctor. Pager: _____)

Dear Dr William Proctor

Re: LISA PARK**CHI: 9705740049**

Lisa presented at Constitution House along with [REDACTED]. Her KW was not available but she was seen. Clearly in discomfort coming in and leaving today, limping. Left hospital without taking her crutches with her.

Left hospital the previous morning as she felt she was in withdrawals and wanted to "sort herself out". States she injected heroin 0.2g yesterday and also consumed methadone 25mg. Looked at how this may compare to what amount of methadone she would have been dispensed if she remained in hospital.

States she has been groin injecting heroin 0.2g daily about 5 times daily for months. Initially stated it was less than brother demanded that she be honest with staff. Has been involved in dealing so heroin availability has not been a problem.

OWS carried out today scoring 12. BP 115/77 P122

Oral swab drug screen

[REDACTED] will get extra methadone for her until increased in methadone and will stay with her so she does not use heroin.

Gael Murphy was asked to inspect injection sites. No concerns at this time

NHS Confidential: Personal data about a patient

Will review drug screen result

Further appointment arranged where drug diaries will be brought in completed.

Discussed with her GP who has stated that Lisa should arrange an appointment with a GP or practice nurse. Was not given rivaroxaban as discharged herself before being prescribed.

Yours sincerely,

Name: Chris Henderson
Designation: Charge Nurse
Service: TSMS

Operations, Procedures, Investigations and Complications Comments

CT Angiogram pulmonary : There is good contrast opacification of the pulmonary arteries.

No convincing filling defect within the pulmonary arteries. However, there are marked abnormalities in both lungs.

Multiple bilateral lung nodules, with many of these cavitating containing air-fluid levels and thick-walled (~5mm) worst in the right lower lobe - largest lesion approximately 4 cm. The other irregular nodules in right and left upper lobes demonstrate less cavitation. These are most likely abscesses secondary to septic emboli.

There is consolidation in the right lower lobe. In the left lung, there is a loculated pleural effusion (~12 cm in craniocaudal dimension, 5.5 cm depth) with underlying passive collapse of left lower lobe. No enhancement nor thickened margins of the loculated collection - fluid density is ~ 10-20 HU's. Further smaller loculated fluid along the left oblique fissure.

There are bilateral hilar lymphadenopathy, right more than left, and enlarged mediastinal lymph nodes - largest subcarinal node 15 mm, which are most likely reactive.

No significant bony abnormality. There is a right internal jugular venous catheter in situ, the tip is in lower SVC.

IMPRESSION: Multiple bilateral lung nodules, many cavitating, with right basal consolidation, left loculated effusion, chest lymphadenopathy. Findings most likely represent septic embolism in this clinical context. No major filling defect/large emboli within the pulmonary arteries.

TTE: CONCLUSIONS

No obvious vegetations nor signs of endocarditis though image quality is suboptimal.

Normal LV size and systolic function.

Normal RV size and systolic function

No significant valvular pathologies.

No significant pericardial effusion.

Communication To Primary Care

Dear Doctor,

Lisa Park was admitted on 30th April, after having self-discharged herself the 16th April. She had been previously diagnosed with groin abscess and DVT. When she came in she had worsening pain in groin and SOB with a productive cough. Following investigation she was found to have bilateral empyemas and septic emboli. She has had IV antibiotics for 3weeks and had 2 chest drains put in to drain the empyemas. The fluid grew: unidentified gram positive coccus and a gram negative anaerobic bacilli. Still awaiting more formal reports from microbiology. She has been on oral antibiotics for some days and has continued to improve, and so is fit for discharge to continue with oral antibiotics for 2weeks.

During admission she has had some other ongoing issues:

- 1) hypokalaemia- asymptomatic
- 2) anaemia requiring transfusions on 2 occasions. Her folate was low, so she has been started on folic acid.
- 3) oral thrush- responded to anti-fungals and mouth washes
- 4) thirst- drinking upto 5litres fluid/day, passing large volumes of urine. Blood glucose slightly high (~7.0), strong family history of diabetes.

Her diet and oral intake were not very good, but she confirms that even at home she doesn't eat well. Eventually after continuous infusions her potassium returned to normal.

The plan upon discharge therefore is to continue with antibiotics for 2 weeks, to have a repeat CT scan in 3weeks to confirm resolution, and will be seen in clinic after.

Do not hesitate to contact the ward with any questions

Kind regards

Dr Christina Lees (Position: Doctor, Pager: _____)

Dear Dr Ward,

Re: Lisa Park, 7A Adamson Court, Dundee, DD2 3EE, (0708740049).

Weight: 76.1Kg Height: 1.68m BMI: 27Kg/m² (health range 20-25Kg/m²)

Diagnosis: Groin abscesses

Reason for Referral: Poor oral intake

Whilst in hospital, this patient required a supplemental diet to support an increased calorie and protein intake.

In order to continue this treatment following discharge, I would be grateful if you could provide the following supplement:

Supplement	Manufacturer	Daily Requirements
Ensure 2Cal	Abbott Nutrition	1

Please do not prescribe Ensure Plus Commence packs.

I would be grateful if you could provide this for an initial period of one month, following which time this should be reviewed by yourself and referred to the Community Dietitians if appropriate.

Please contact the above number if you have any queries.

Yours sincerely

**Caitlin Gilfillan BSc (Hons) PGDip RD

Dear Dr Ward

Lisa Park, 7A Adamson Court, Dundee, DD2 3EE DOB: 07/08/1974

Problems:

1. Recent empyema from septic emboli
2. Previous intravenous drug use, on Methadone
3. Previous Hepatitis C

I was pleased to see this 40 year old lady in clinic for review following her recent admission to ward 42. She completed two weeks of co-amoxiclav on discharge but following that she tells me she'd developed a productive cough with purulent sputum for which you prescribed a further one month of Co-amoxiclav. Lisa feels she is continuing to improve but she still has ongoing pain in her left leg due to her DVT and can be short of breath on exertion. She is taking Ensure supplements and is trying to eat but her taste is very disrupted on antibiotics. She has managed not to use Heroin since her discharge from hospital but admits to buying Valium a couple of times.

On examination she looked well compared to how she'd looked in the ward but was still pale. She also had some cold sores on her lips but I could not see any oral thrush. On examination of her chest she had improvement in her breath sounds but still reduced from normal and a few crepitations at the bases. Her left leg was still swollen compared to the right but has greatly reduced in size from previous.

Lisa said she'd complete the course of Co-amoxiclav she has and I've taken her routine bloods today. I've also requested a repeat chest x-ray today. I've also requested a repeat CT to be taken around mid/late June as recommended by the respiratory physicians while she was an inpatient. We will see her for review in one month's time when we can hopefully discharge her from further follow-up.

I have just noticed after she left the clinic that we did not update her Bloodborne virus serology whilst she was an inpatient so we should do this for completeness next time she attends clinic. As she has been previously Hepatitis C positive (antibody positive) then the Hepatitis c screening test should be a PCR test.

Yours sincerely

Dear Dr Ward

Lisa Park, 7A Adamson Court, Dundee, DD2 3EE DOB: 07/08/1974

Problems:

1. Recent empyema
2. Recent DVT, nearly completed Rivaroxaban therapy
3. Previous Hepatitis C

Lisa attended for review in the clinic again today. I was pleased to see she has made a continued improvement since her discharge from the ward. She does still complain of some shortness of breath on exertion but her leg is much less swollen and she is coughing up a lot less sputum than the last time I saw her.

She complains of some loose stools which she attributes to her Folic acid which I believe was recently restarted. We had planned to repeat her CT chest to evaluate resolution of the empyema as recommended by the respiratory consultants whilst she was an inpatient. She has an appointment for this to be done next week.

I have taken repeat routine bloods today and have included a folate level among these. I have also taken the opportunity to update her Bloodborne virus screen. I have not planned to see her back in clinic but will look out for her CT report and make arrangements for any follow-up required based on that.

Yours sincerely

Authorised on 06/07/2015 18:27:44 by I.D. Charis Marwick.

Dr Charis Marwick
Consultant Physician

PS – following the bloods I took in clinic I note she has slightly high creatinine and corrected calcium and low platelets. I wonder whether any of this is due to her Rivaroxaban treatment but she is due to finish this shortly anyway. I do not have her other medication history to hand. Please could this be followed up in primary care. Thank you.

Her Hepatitis C PCR was negative so she does not have active infection.

Dear Dr Ward

LISA PARK, 7A ADAMSON COURT, DUNDEE DD2 3EE DOB 070874 0049

Miss Park was referred to our Service following her discharge from Ninewells Hospital.

We wrote to Miss Park inviting her to contact our Service to arrange a suitable out-patient appointment. Miss Park made contact and an appointment was arranged for Tuesday 30th June 2015 at 11.00am.

Unfortunately Miss Park failed to attend her appointment but did contact us to say she had slept in. We have therefore been unable to review Miss Park and assess as to whether the prescription for **Ensure Two Cal** is necessary.

We agreed to re-appoint Miss Park to our next available clinic on Tuesday 21st July 2015.

Yours sincerely

Dear Dr Ward

LISA PARK, 7 A ADAMSON COURT, DUNDEE DD2 3EE DOB 070874 0049

Miss Park was due at our dietetic clinic this morning. One hour before her scheduled appointment she called our department to advise that she would not be attending the appointment. She reported to be eating well and had gained weight. We have therefore been unable to review her use of the oral nutritional supplement, **Ensure Two Cal**, which our colleagues at Ninewells asked you to prescribe for this lady.

Miss Park did not request a further appointment with our Service and has now been discharged.

Miss Park can be re-referred to our Service should you have any dietary concerns in the future.

Yours sincerely

Dear Dr Morag Ward

Re: LISA PARK

CHI: 0708740049

Medication

-60mls methadone supervised Scots Lochee

Situation

-poor attendance

-ongoing IV heroin use

NHS Confidential: Personal data about a patient

Assessment

- Lisa attended on time
- challenged Lisa as to why she did not attend for OWS
- no excuse given
- pointed out to Lisa that she is continuing to use and asking for increase in methadone but does not attend for assessment
- reports IV heroin use daily 0.4g
- also reports occasional diazepam use
- took 6x10mg few days ago to get and "extra buzz"
- frank conversation had about whether Lisa actually wants to stop using drugs
- Lisa is reporting she does, however at present there is no evidence of this
- advised Lisa that she will be offered one more appt for OWS, if she does not attend this her methadone will start to be reduced
- if Lisa does attend for OWS and increase is given a 4 week plan will be put in place
- Lisa understanding of this
- urine sample obtained

Recommendations

- attend for OWS tomorrow at 9am
- no IV use
- no diazepam use

Yours sincerely,

Jo Donaldson

Dear Dr Morag Ward

Re: LISA PARK**CHI: 0708740049****Medication**

-80mls methadone supervised TSMS dispensary

Situation

-moving back to dispensary

-ongoing IV use

NHS Confidential: Personal data about a patient**Assessment**

- Lisa attended for appt after prescription being suspended
- informed of discussion at clinical meeting and the outcome
- Lisa annoyed at having to return to dispensary
- explained the risks of continuing to use IV on top of prescription
- IV sites checked.
- Only one site in left groin, sinus, no signs of infection
- informed of increase to 80mls
- opening times of dispensary given
- advised to attend Boots City centre at weekend

Recommendations

- attend dispensary Mon-Fri
- try to stop IV use
- attend appts
- regular checks of IV sites

Yours sincerely,

Jo Donaldson

Dear Doctor Proctor

Work Capability Assessment Outcome Notification

Patients Name	Ms L J Park
Patients Address	7A Adamson Ct Lochee Dundee DD2 3EE

Patients D.O.B : 7 August 1974

This patient has been claiming Employment and Support Allowance. We recently assessed their ability to work using the Work Capability Assessment.

WCA Effective Date 9 June 2015

Customers with potential capability for work enter the Work-Related Activity group, whilst those who have limited or no capability for work related activity enter the support group

This patient meets, or is treated as meeting the eligibility criteria for Employment and Support Allowance [Work related activity group/Support group].

You no longer need to issue an NHS medical certificates for this person's claim to benefit. However we may need to contact you for further information about this person's illness or disability in the future.

Proof of illness or disability may still be required for other interest groups or organisations such as employers or insurance companies. The provision of this information is not usually a NHS requirement.

If your patient makes another claim for benefit in the future, we will require medical certificates from the date of illness or disability.

Dear Dr Malik

Re: LISA PARK**CHI: 0708740049**

Please see below an update regarding Lisa Park.

Situation

Prison liberation on Methadone 60mg od. I have signed kardex to be dispensed 60mg at Constitution House today as prescription at community pharmacy was not in place. Grant Stewart Keyworker is contacting seven day dispensing pharmacies to agree dispensing and will make arrangements for pink sheet to be signed by medical staff to continue prescribing.

Please escalate case to prescriber for Methadone dose optimisation if relapses to opioid use, injecting substance use, intoxication or non fatal overdose.

Re: LISA PARK

CHI: 0708740849

Situation

Case discussed with TSMS nurse keyworker

Substance Use

Self reports cannabis use, and in June 2017 illicit gabapentin use.
 Requesting methadone collected dose to facilitate attendance at sewing project, Seamless Transitions
 in Daigety Bay to continue project commenced in NMP Edinburgh and to support her recovery.
 Locked box observed 01.08.17 and email confirmation from course organiser received.

NHS Confidential: Personal data about a patient

TSMS Prescribing

Methadone 60mg od, dispensed supervised six days per week.

Primary Care Prescribing

Daily dispensed

Levothyroxine

Mirtazapine

Lansoprazole

Medical History

2017 Carpal Tunnel Syndrome

2015 Hypothyroidism

2014 Hep C PCR negative

Drug Screens

29.08.17 +methadone only

04.05.17 +meth, +cannabinoids, -opiates, -benzo, -amph, -cocaine, -barb

16.10.15 +meth, +opiates, -benzo, -amph

Assessment - Unsupervised OST dispensing

1. Good compliance with recovery plans, OST, TSMS appointments.
2. Self reports recent abstinence from illicit substance use, except cannabinoids.
3. No history of diversion, recent drug screens methadone positive.
4. Safe storage box observed.
5. No mental disorder noted.
6. No cognitive impairment reported.
7. Risks of disengagement with recovery plan due to daily collection, can be ameliorated with a collected dose.

Recommendation

1. Transfer to unsupervised dispensing, with Wednesdays and Sundays doses collected on the preceding day.
2. Continue to monitor with regular appointments, drug screens, liaison with pharmacy and if relapse or non compliance occurs discuss with medical staff.

Yours sincerely,

Dear Dr Robson

Lisa Park, 7D Bonneathill Court, Dundee, Angus, DD3 7AZ DOB: 07/08/1974

Description – (R) Carpal Tunnel Syndrome
Outcome – For Nerve Conduction Studies & Consultant Review

This lady was seen at the Hand Screening Clinic this morning; she actually gives a fourteen year history of pins and needles affecting the radial digits since the birth of her youngest child. Over the last year this has gradually worsened and she is now getting numbness, especially first thing in the morning, which takes a while to settle and over night. She has been wearing splints but this has is not helpful any longer. She has noticed that her hand is slightly weaker and occasionally she drops things. She denies any neck involvement; there are no VBI symptoms and no red flags.

On examination today her neck is clear. She has full range of movement of the fingers, wrist and thumb. There is no deficit to power or sensation. Tinel's is negative but Phalen's is strongly positive.

I have today requested nerve conduction studies, results of which will go to Mr Wigderowitz who will review her when he has sight of them. Thank you for your referral.

Yours sincerely

Dear Dr Malik

Lisa Park, 7D Bonneathill Court, Dundee, Angus, DD3 7AZ DOB: 07/08/1974

Presenting Complaint: ? haematemesis

Diagnosis: Cannabinoid induced hyperemesis syndrome

Previous Diagnoses: Previous IV/DU – methadone programme
 HCV antibody positive/PCR Negative (consistent with previous clearance)
 Hypothyroidism
 Depression/anxiety

Current Medication: Levothyroxine
 Lansoprazole
 Ondansetron
 Mirtazapine

This lady presented to the acute admissions unit with a 1 day history of vomiting with the presence of blood. On reviewing her history it appears she has been vomiting for possibly the last 2 years but was concerned regarding the blood she witnessed which she estimates to be around 3 teaspoonfuls. She denied any melaena. She claims to not have lost any weight and has an elevated BMI despite not eating. She tells me that her nausea is principally in the morning and follows her usual nightly ingestion of 4 – 5 joints of cannabis. She denies any other illicit drug use.

Her bloods were relatively unremarkable and there was no suggestion of ongoing bleeding therefore negating a Blatchford score.

She went on to have an OGD which showed evidence of oesophagitis for which she should have high PPI for 6 – 8 weeks. She does not need follow up endoscopic examination.

Contd. /...

NHS Confidential: Personal data about a patient

We had a long discussion about cannabis induced gastroparesis and hyperemetic syndromes. I have advised abstinence but warned her of the possible long standing sequelae of her habitual cannabinoid usage.

Otherwise, we could pragmatically treat any evolving symptoms with regular antiemetic, given I suspect abstinence will be somewhat removed from this lady's capabilities.

If there are any outstanding issues please do not hesitate to contact us via our e-mail service (Tay-UHB.gastroenterology@nhs.net)

Yours sincerely

Dear Dr Robson

02182313DEC17

Lisa Park, 7D Bonneathill Court, Dundee, Angus, DD3 7AZ DOB: 07/08/1974

Description: Right carpal tunnel syndrome
Outcome: Arranged admission for right carpal tunnel decompression

Lisa was again reviewed at the Hand Screening Clinic this morning. As you know she has a fourteen year history of pins and needles affecting the radial digits of the right hand since [REDACTED]. Over the last year this has worsened with nocturnal symptoms and first thing in the morning symptoms. She is also complaining of dropping things. I requested nerve conduction studies which have come back with support for moderate right carpal tunnel syndrome. When she was reviewed today she says things have gradually worsened even further and she is keen to have something definitive done. I have therefore added her to Mr Jariwala's list at Stracathro to have a right carpal tunnel decompression under local anaesthetic when there is space on the list. Lisa has been warned about scar sensitivity, recurrence, infection, neurovascular damage, tendon damage, loss of range of movement and chronic pain. She is aware that the stitches will be in for about 10-14 days and these can be taken out locally at the GP surgery. She is currently doing a training programme involving sewing and she realises that she will be off this for about three to four weeks post-op. Thank you for your referral.

Yours sincerely

Drug screens:

26/2/18 - awaiting result

04/12/2017 +meth, +cannabinoids, -opiates, -benzo, -amph, -cocaine, -barb

29.06.17 +methadone only

04.05.17 +meth, +cannabinoids, -opiates, -benzo, -amph, -cocaine, -barb

16.10.15 +meth, +opiates, -benzo, -amph

NHS Confidential: Personal data about a patient

Medication

TSMS - Methadone 60ml - Supervised - Superdrug Wellgate Centre (6 days).

GP - Mirtazapine 45mg, Lansoprazole 60mg, Levothyroxine 125 micrograms, mucogel oral suspension, Naloxone

Naloxone trained (Declined a kit 25/04/17).

BBV

last tested 06/15 - HIV and HBV Neg.

HCV Known Hep C - treated successfully in 2016 and no current infection. 28/2/18 - would not wish further test

Situation:

Attended for suspended appt - suspension lifted

Claims illicit use is 2 cannabis joints at night which has no impact on her mental health apparently

Gabapentin 3 tablets were taken recently due to a bad back. Had no had these prior to Christmas

Care plan reviewed and agreed

Not having thoughts or urges about substance use

Discussed relapse prevention today

Stays in her home mostly

Attends sewing work once weekly but would like to go more

Recent operation on right hand due to carpal tunnel syndrome

Has pain in her back at time. Little in the way of exercise

Mood is generally at an acceptable level but relationship with [REDACTED] whose house she lives in is difficult and causes distress

Was tearful when discussing difficulties at home

[REDACTED]

Confidence can be seen as being quite low

Plan

Attend GP and discuss back pain with view to possible physio referral

Complete relapse prevention plan or bring in to appt to complete

Relapse prevention

Consider engaging in other activities

Employment & Support Allowance – Mandatory Reconsideration

Date of decision: March 2018

I suffer depression/anxiety and I am on a methadone programme. I have limited mobility in my lower right back.

I can't walk more than 50 yards without pain. Most days I can't stand for long.

I have very low mood.

I visit the chemist daily and spend most my time at home. I do the basics but my bother helps.

I am not good at meeting people even family. I don't cope with unexpected change. I need to be accompanied out with my locality due to anxiety. I can get angry and agitated.

Dear Dr Malik

RE: LISA PARK CHI: 0708740049
7D BONNETHILL COURT, DUNDEE, DD3 7AZ

The above patient was discussed in the Integrated Substance Misuse Service Multidisciplinary Team Meeting on 6th August 2018 and the following plan was agreed:

SITUATION

Admits to recent Amphetamine use.
Been stable in treatment for some time.
Current gets Wednesday dose unsupervised to attend a group.

PLAN

1. Update care plan.
2. Risks associated with Cannabis, alcohol and amphetamine use.
3. Transfer back to supervised dispensing.

Yours sincerely

Date: 6th December 2018

About your patient**Address**

Full Name Mrs Lisa Park

7d, Bonnethill Court, Dundee, DD3 7AZ

NINo JC436084A

Date of birth 7th August 1974

Dear Doctor,

Your patient is being assessed for Universal Credit and we need to find out whether they are able to do any work. By completing this form and providing factual information you will help our Healthcare Professional staff decide whether your patient needs a face-to-face work capability assessment and if so support that assessment.

Please note

- NHS doctors have a **contractual obligation** to provide the information requested without charge.
- The form should be completed from your medical records. A separate examination is not necessary.
- It is **acceptable** for you to delegate completion of the form to your practice nurse but you must confirm your authorisation by signing at the end.
- Your patient has given consent to allow us to approach you for this information, in accordance with GMC guidelines.
- An online version of this report which can be completed electronically and printed is available at <https://www.gov.uk/government/publications/esa113-interactive-for-use-by-healthcare-practitioners>
- A fully completed form may help inform the face to face work capability assessment or may mean that your patient will not need a further assessment. It will also help us to make a more informed decision on benefit entitlement.

COMPUTER PRINTOUTS

You can send us a computer printout of the appropriate part of the patient record if you wish, but you will still have to complete any sections of the form where the answer is not clear from the printout. We are only able to accept information directly relevant to our enquiries. If a printout is available, please make sure it includes the following:

- Active problems;
- Current medication with last prescribed date;
- Details of the last three consultations. Please remove any third party data.

If you have any queries about this form please phone the number above. If you would like to discuss anything with our Healthcare Professional staff, please phone the number above and ask for a member of the Healthcare Professional staff on the customer service desk. If there is any medical evidence that you think would be harmful to your patient's health, please give us this information on a separate sheet of paper so that it can be withheld.

Please reply within 5 working days. A business reply envelope is enclosed for your use.

Thank you for your help.

Yours sincerely,

Mr Neale Dixon

Your reply

Please answer the following questions from the information which is currently available to you.

If you need more space for any of your answers, please
continue at Part 7.

1 When did your patient last see a GP?

09/10/18

2 Current conditions affecting ability to work:

Current conditions affecting ability to work:
Please give us details of those conditions which may have significant effect on the person's capacity to work. Include:

- Relevant symptoms and signs, including side effects of medication, with dates. For mental health conditions, please provide brief mental state examination findings, if available.
- Past, present and planned investigations and management, including medication, where relevant.

If you are sending a computerised printout of current medication you do not need to list this here.

Please complete **both sides** of this form,
and return the completed form in the supplied envelope - with the above address showing in the window

Dear Dr Malik

Lisa Park, 7D Bonneathill Court, Dundee, Angus, DD3 7AZ DOB: 07/08/1974

Please see below details of most recent appointment with our service

Drug screens:

11/1/19 - awaiting result
 01/11/18 - pos meth and cann, neg op, benzo, coc and amph
 31/7/18 - pos meth and cann, neg op, benzo, coc and amph
 26/2/18 - +meth, +cannabinoids, -opiates, -benzo, -amph, -cocaine, -barb
 04/12/2017 +meth, +cannabinoids, -opiates, -benzo, -amph, -cocaine, -barb
 29.08.17 +methadone only
 04.05.17 +meth, +cannabinoids, -opiates, -benzo, -amph, -cocaine, -barb

Medication

TSMS - Methadone 60ml - Supervised - Superdrug Wellgate Centre (6 days).

GP - Mirtazapine 45mg, Lansoprazole 60mg, Levothyroxine 125 micrograms, mucogel oral suspension.
 Naloxone

Naloxone: 11/1/19 trained and has naloxone
 BBV - neg in 2015 - agreed further test 1/11/18

Situation: Attended for suspended appt with student nurse Louise Dunn sitting in -suspension lifted

Assessment:

Claims to have smoked heroin 0.2g at Christmas when staying with a family member who takes heroin regularly.
 Unable to give a clear understanding as to why she used heroin as first time in a very long time that she has used this substance. Feels it was partly linked with Christmas, being with brother and experiencing depression.

NHS Confidential: Personal data about a patient

States she had suicidal thoughts over Christmas but no suicide plans. Still has some level of suicidal ideation at times but not as it was and does not believe she would go through with suicide although cannot guarantee this.

Feels she needs to talk to her GP re current medication. Discussed other ways in which she can support herself and reduce her level of depression.

[REDACTED]

Has been given telephone numbers which offer crisis support.

Lisa has just been given her own tenancy which is furnished adequately but has problem with electricity meter. She understands who to contact regarding this and plans to do this today.

Lisa wishes to join a gym and plans on speaking to Keep Well Health Nurse.

Reports having pain in lower back which affects her mobility. Was previously encouraged to contact physio which was reiterated again today as she has not contacted them up to now.

Smoking cannabis 2 joints in the evening and smoking cigarettes daily.

Stomach feels better now and rarely experiencing nausea or vomiting, something which she was experiencing regularly for a period of time.

Plan:

Relapse prevention

Monitor and support with depression and suicidal ideation

Develop motivation to become more active

Review drug screen

Yours sincerely

Dear Dr Malik

RE: LISA PARK CHI: 0708740049
7D BONNETHILL COURT, DUNDEE, ANGUS, DD3 7AZ

The above patient was discussed at the Integrated Substance Misuse Service
Multidisciplinary Team Meeting on 14 January 2019 and the following plan was agreed:

Situation

Patient is currently on Methadone 60mls 6 day daily dispensed
Patient had a lapse at Christmas; single use of heroin, continues to use cannabis
Patient is requesting move from Superdrug Wellgate to Boots Hilltown (146 Strathmartine
Road), both 6 day dispensing pharmacies.
No concerns re samples

Plan

Prescription move approved
If samples show opiate use keyworker to discuss increase in methadone dose

Yours sincerely,

Multidisciplinary Team

4. HOW WE USE YOUR INFORMATION

The information you have provided will be used by NHS Scotland to carry out its various functions and services including scheduling appointments, ordering tests, hospital referrals and sending correspondence.

Your information, including your name, gender, date of birth and address, will be passed to NHS National Services Scotland where it will be held on the Community Health Index (CHI). This information is used to register you with the GP Practice, transfer your medical records between GP practices in the UK, make payments to GP Practices for medical services provided, and to process and issue medical exemption certificates and entitlement cards.

NHS National Services Scotland shares information about you within NHS Scotland to assist in the provision and improvement of NHS services and the health of the public. When we do this, we do it as described by NHS Scotland in the NHS Inform website under the "How the NHS handles your personal health information" section.

NHS Scotland is made up of various organisations such as NHS Health Boards, GP practices, the Scottish Ambulance Service or NHS National Services Scotland (the common name of the Common Services Agency for the Scottish Health Service). These organisations are individually responsible for your personal health information. In terms of data protection and privacy laws, they are known as 'data controllers'.

Find out more about NHS Scotland in the link provided above.

5. PATIENT DECLARATION

I declare that the information I have given on this form is correct and complete. I understand that, if it is not, appropriate action may be taken. To enable NHS National Services Scotland to confirm my eligibility to lawfully register with a GP and for the purposes of prevention, detection, and investigation of crime, the minimum necessary information from this form could be disclosed to relevant authorities.

I understand that more comprehensive information about how NHS Scotland handles my data is available from NHS Inform.

This information can be provided in other languages and formats on request. The NHS Inform helpline provides an interpreting service.

Consulting Doctor:	Lesley Willett	Own doctor:	Maira Kennedy

Reported Condition:
VOMITING 3 DAYS

Consultation details:

History - **3 day hx of vomiting. Now some blood coming at the end of vomits. Fresh red. No PR bleeding or malena. Last moved bowels before vomiting- normal then. No diarrhoea. Epigastric pain since vomiting started. Similar episode 10w ago- told by own GP gastroenteritis. Helped by stemetil injection. Also last 24hrs pain in left chest. No breathing problems. Slightly worse with deep inspiration. No worse with exertion. Not keeping down medications. On levothyroxine, lansoprazole, sertraline and methadone (took yesterdays dose but vomited, has todays dose to take). No alcohol. No illicit drug use. Urine dark but no dysuria/increased freq. Currently staying at friends.**

Examination - **HR 55 reg, BP 120/86, Temp 37.4
Lips dry
HS 1+11+0, chest pain can be reproduced by palpation- likely muscular secondary to vomiting
Chest clear
Abdo- generalised tenderness but most in epigastrium. No peritonism
PR exam (chaperone offered, declined)- Few external haemorrhoids, nil irregularities PR, no evidence of malena, brown stool on glove.**

Diagnosis - **Likely malory weiss tear secondary to gastroenteritis.**

NHS Confidential: Please do not share this information

Treatment - **IM stemetil given**
Prochlorperazine tabs given away
Worsening advice re vomiting and haematemesis given.
Pt will double lansoprazole for next few days.

Prescriptions:
Prochlorperazine 12.5mg/1ml solution for injection ampoules AS DIRECTED 1.00
Prochlorperazine 3mg buccal tablets as directed 10.00

Followups:
No Follow Up

CLINICAL INFORMATION

History of presenting complaint / examination findings / investigation results

Presenting complaint

Description: recurrent vomiting and 3stone weight loss

Comment: dear Endoscopy team

This 45 yr old lady has h/o oesophagitis dating back to 2005 and is on long term BD PPI.

She has however been having daily vomiting now for several months and has documented weight loss of 3 stone in weight. She is not anaemic and has normal bowels.
On examination he has no abdo mass.

I have added metoclopramide but feel given marked weight loss and symptoms she warrants urgent OGD

yours sincerely
Dr Terry Johnston

Name	PARK, Lisa Jane (Ms) 07-Aug-1974 (45y) (Female)	Address	2H MCGILL STREET, DUNDEE, """, """, Dundee, ANGUS, DD4 6PH	Hospital No.	0708740049
				CHI No.	0708740049
				Procedure Date	05-May-2020 08:00

Referral Details

Patient Category	NHS/Outpatient/USC
Referral Date	04-May-2020
Referral Source	Trakcare vetting
Registered GP	Moira Kennedy

Referral Reasons

Nausea/Vomiting
None
None

ASA Status

Not assessed

Procedure Summary

Dr Elaine Henry
Throat Spray
Duodenum - Second part

Extent of Exam

Abnormalities & Procedures

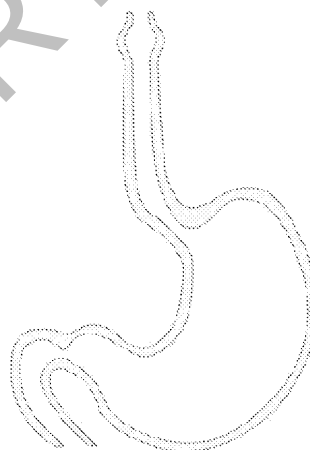

Diagnosis

Oesophagus - Normal, Stomach - Normal, Duodenum - Normal

Procedure Comments

No food residue or other pathology.

We know that cannabis can slow the stomach from emptying and would really suggest stopping this. It will really help.

Referral Management & Follow-up

Return to GP

Dr Elaine Henry
CONSULTANT GASTROENTEROLOGIST

To Whom It May Concern,

I have been asked by HMCTS to get a copy of my medical records for a Tribunal for myself to get P.I.P. to help with my daily living expenses. The Tribunal would like for these to be back-dated from 01/11/17 to present day. These have to include secondary care correspondence and the reports from the date I asked for.

I would also like to mention that they want these within 28 days. I know that this takes some time but please can you do this as soon as possible so they have them before the next hearing which I don't have a date yet but I know it will probably be in next 4-6 weeks.

Thank you for taking time to help me with this important matter.

Yours Sincerely

Lisa Park
