01-May-2025 Dr Federated User Clinic

Intervention Advised to self care Mechanical shoulder pain with (P3) hypomobile TSp. Pathology discussed. Strategies to reduce aggravation discussed. Exercises to mobilize provided alongside pain rules to guide. Worsening scenarios discussed. Happy with the plan but will use FCP again if no improvement at 4-6 weeks.

Diagnosis Seen by health professional Dundee - FCP/MSK Service: (P3) Seen by Clinician: [unknown title] Duncan Rear at 15:53:22 on 01-May-2025.

Diagnosis Shoulder pain Left shoulder pain since October without (P3) obvious cause. First episode. Quite sudden. Has eased. No neuro signs and symptoms. No neck issues. Nil into the ULs. Otherwise well. No TATT. No other new or worsening aches and pains. No history of Ca. No unexplained weight-loss, no increased night-time pain. On exam the neck moves well enough. The thoracic spine is somewhat hypomobile. The left shoulder ROM is limited in a somewhat capsular pattern and there is no loss of strength in the cuff. History not typical of adhesive capsulitis. There maybe some OA changes.

01-May-2025 Ms Grace Horton Administration

Administration Administration NOS pt called @ 12.42 to arrange appt as (P3) per sms - none available. will call back next week

Symptom (P3) Vomiting ongoing for years recently worse, cannot think of anything that may be causing it no diarrhea, no abdo pain feel in well otherwise, just not doing great with sickness also getting chest pain for months and cramps. wakes up and the first thing is starts smoking and smokes weed, talked about how she was in hospital and was told that her sickness if due to cannabis. she does not think, has been smoking for years shouldnt be the problem explained that it can cause over time as well talked about need to start cutting it down with eventually stopping we cannot continue with ant sickness medications whilst the cause is ongoing understands that. Imp: Cannabis induced sickness Plan: Antisicknes just now, get her back in for ECG and bloods.

Intervention Medication requested trazadone 150mg tabs nefopam
(P3) 30mg tabs pt requested items in blister pack going forward
... struggles to remember to order in time
Administration SMS text message sent to patient Lisa I have issued your
(P3) trazodone and nefopam as requested. I have also issued your levothyroxine and lansoprazole as they look to be due. You do not currently have a blister pack so I can't "add" medicines to it. Blister packs are not for people who forget to order medication but for people who struggle with taking it daily and at the right times. You would need to speak to your pharmacist to see if they can accommodate that if it's something you feel you need. Meantime I have added trazodone and nefopam to your repeat prescription list. Dr O'Neil GP IT IS NOT POSSIBLE TO RESPOND TO THIS SMS

28-July-2023 Dr Angela Little Telephone call from a patient

Administration Telephone encounter looking to be excused from court -
(P3) due to be there at 10am - vomiting yesterday and this am
- not keeping much down - happens to her a lot - is a witness
as she was assaulted. advised we could try giving some
ondansetron tablets - not prepared to come for px - says
couldn't get down - advised how serious it is for us to
excuse a witness and certainly couldn't justify that if she
hasn't been seen

(P6) Exception report Thyroid January Recall. No response,
letter sent 22/12/2022. Recall January 2023.

05-Apr-2023 Dr Federated User Surgery consultation

Diagnosis (P3) Lumbar pain Verbal consent to FCP input. 1 week history of low back pain which started under the ribs - seen and assessed by GP for this issue so should not have been directed to FCP. This pain has eased but does have longstanding low back pain. Reports this worsens with prolonged standing or walking. No pain in the legs. No para/anaesthesia. No unexplained weight loss - does report some weight loss recently due to reduced appetite - now only managing 1 meal per day - advised patient discuss this with GP. No bladder/bowel changes. On examination - Mod loss all lumbar movements - pain limits. Impression - Chronic low back pain

Intervention (P3) Advised to self care Initial HEP of knee rolls, Pelvic tilts in supine and 4 point kneeling. Advised to slowly increase activity levels as pain allows. Reassured that pain is not damage. To trial this for 4 weeks and if no better arrange further FCP input through GP practice. Patient happy with plan

Administration Attended extended hours clinic - ESA Dundee - FCP/MSK Service: Seen by Clinician: TAYLOR, Chris at 15:29:58 on 05-Apr-2023

04-Apr-2023 Miss Denise Maxfield Administration

Examination O/E - blood pressure reading 127 / 103 mm Hg
 Symptom Vomiting LONG hx - note blood 2 days ago but nil since
 (P3) and good response metoclopramide note OGD 2020 and ?
 cannabis driven recent flu/viral illnesses likely cause for
 reduced appetite/weight loss sluggish bowels but NOT
 TAKING LEVOTHYROXINE NOT TAKING PPI
 either.....smokes cannabis, no alcohol, looking to reduce
 Buvidal O/E/ syst well, relaxed, chatty, no nausea or pain,
 HR 100, abdo epigastric tenderness, no mass, no
 guarding emphasised importance taking PPI and LEVO as
 effect on multiple body functions check other bloods today
 (not TSH) to ensure no new anaemia has plenty meds at
 home - start levo 50 then 100 then 125mcg
 Examination O/E - weight 68 Kg
 Examination Body Mass Index 23.8

23-Jan-2023 Dr Claire Moir Telephone call from a patient

Symptom Vomiting for 1 week and large volume blood in vomit on
 (P3) Saturday now stopped being sick. has now started
 metoclopramide and no further vomiting. heartburn ++
 says intermittent vomiting for some time. ***** worried ++.
 managed to drink since took metoclopramide and ate a bit
 last night but throat sore ++ weight loss ++ appt given

23-Jan-2023 Miss Lois Barden Administration

Administration Administration NOS TEL 07849 530301 - Pt has been
 (P3) sick for past 3 wks. Vomiting lots. ***** called to make appt.
 Says it is an emergency and wants a face to face
 appointment. Advised I cannot book those appointments,
 however, advised if feels like this is urgent I can arrange
 callback for pt. ***** not happy with this and feels as
 though pt's are being treated badly and is going to take
 this to newspapers. ***** advised was thinking of taking to
 hospital it is that bad. I apologised and advised most I can
 do is book the callback from the clinical team but if feels
 like sister's symptoms worsen then to take to hospital if
 feels like this is appropriate. - LB

Administration Telephone encounter On methadone and prev hep C.
(P3) Didn't know about covid - explained. No sx. 10 days ago woke up to go to the toilet in the night (nocturia every 2 hours). Lightheaded and almost fainted. Hit head off door frame. No LOC. Since then intermittent lightheadedness on and off all day and left arm tingling down whole arm. Headaches since ***** last may - worsened recently but PCM helps. Mood low. Nocturia 2 hourly overnight. Doesn't leave house much. 4 stone weight loss in the last few months. Vomiting every morning. No appetite. No alcohol. Did have investigations - see discharge. they thought was cannabinoid hyperemesis syndrome (NB didn't ask re this over the phone). had oesophagitis on OGD. Would need to examine abdo/neuro/shoulder and ask re cannabis. Bloods and ECG were ok last month. Will attend later today. Vomiting and headaches chronic. New dizziness and left arm tingling after minor head injury

16-Mar-2020 Dr Georgina Castro Administration**16-Mar-2020 Miss Barbara Briggs Administration****16-Mar-2020 Dr Terry Johnston Surgery consultation**

Symptom Vomiting daily, 3 stone weight loss past 5 months. drinks a lot of tea hence urinary frequency. headache may be dehydration. OE/ syst well, HR 64, abdo SNT, no mass, BM 4.9 recent bloods normal. STOP tea, try decaf, for metoclopramide, given weight loss and sx for OGD

Examination O/E - weight 70 Kg

Examination Body Mass Index 24.5

Administration Consultation In for more sertraline. Things have been ok.
(P3) no real improvement. has money worries but stays in most of the time so no real anxiety. been getting some fleeting intermittent chest pains. Sometimes over right upper chest or left. Lasts a few minutes. Dull. No assoc sx except some finger tingling but gets this from carpal tunnel anyway. no palpitations, no SOB, no wheeze, no cough, no dizziness, no clamminess. Some nausea but on going chronic issue. No collapse. No HTN. *****. No young MIs. Comes on at rest and randomly. Not overly anxious at the time. OE - Well. T 36. Sats 98% OA. HR 87. HR reg. HS NAD. Chest clear. right pectoral a bit tender. Imp ? Cause doesn't really fit with cardiac/resp/MSK/anxiety. Check bloods and ECG. Is going to do diary of sx and rv. Will find out reasons for all the pacemakers

31-Jan-2020 Miss Hayley Morrison Administration**31-Dec-2019 Dr Terry Johnston Surgery consultation**

Symptom (P3) Productive cough -green sputum few days, URTI
sx worried given h/o septic PE OE/ chest clear, sats 97%,
T36.5, HR 80 Viral - supportive advice, rv if worsening
Symptom (P3) Mood observations started sertraline september but
never came for rv - start again and rv 4 wks
Administration eMED3 (2010) new statement issued, not fit for work Fit
Note (Diagnosis: Low mood; Duration 31-Dec-2019 - 31-

Dear Dr Gemmell

**RE: LISA PARK DOB 07.08.74/0049
82F BALGARTHNO RD, DUNDEE, DD2 4RA**

You will be aware that Lisa's detox in late March proceeded straight-forwardly. However she did not transfer as planned to Glasgow. [REDACTED] for the Naltrexone challenge and lapsed into heroin use before that could be introduced.

Unfortunately the back problems that predate the detoxification became problematic. [REDACTED]

[REDACTED] Unfortunately had been drinking heavy on top of his Methadone prescription of 80mgs and 30mgs of Diazepam and although he seems to be addressing this he has now resorted to illicit heroin use and both are using 0.3gms of heroin smoked each over the last 2 weeks. Lisa's heroin use is increasing very rapidly.

We discussed today Lisa's options, which would be a further detox or stabilisation on Methadone with a possible speedy reduction and agreed the following plan:

1. Lisa is keen to reinstate prescribed Methadone on 16 May 2007 at 15mgs. Hopefully she can stabilise quickly so she can reduce fairly early. I have agreed to review her on the 15 June 2007 to insure stability before considering reduction.

We will keep you informed of her progress.

Headquarters
King's Cross, Clepington Road, Dundee DD3 8EA

Chairperson, Mr Peter Bates
Chief Executive, Professor Tony Wells

Dear Dr Gemmel

RE: LISA PARK, 82 F BALGARTHNO ROAD, DUNDEE DD2 4RA
DOB: 07.08.74/0049

Lisa was seen for Medical Review at Tayside Drug Problems Service on the 16th June 2007.

Current Prescription

Methadone mixture 30mg, supervised daily dispensed.

Issues

Lisa has struggled to stabilise on the 30mg, but does appear to have done so over the last 10 days.

[REDACTED] The Social Work Department appear to have been making significant pressure for her to completely stabilise and not associate with any other drug users.

Lisa is now living alone, [REDACTED] and is feeling rather isolated. She is however determined to stabilise [REDACTED]

Plan

We will continue to offer her regular support and help her consolidate her stability over the next few weeks. I have organised further review on the 26th July 2007.

We will keep you informed of her progress.

Kind regards

Yours sincerely,

Maura MacVicar

Personal Capability Assessment

Dear Doctor

Patient's name

Lisa Park

Date of birth

07 / 08 / 1974

This patient has been claiming

☒ Incapacity Benefit

☐ Severe Disablement Allowance

☐ National Insurance credits

because they have been incapable of work. We recently assessed their ability to work using the Personal Capability Assessment.

We have decided that your patient is capable of work from and including
22 / 07 / 2007.

This is based on

☒ the medical examination we arranged that your patient went to
on 30 / 05 / 2007.

☐ medical information you provided.

☒ information that your patient gave us.

This means that you do not have to give your patient any more medical certificates for Incapacity Benefit purposes. But you may need to again if their condition worsens significantly, or they have a new medical condition.

We have sent a summary of the Personal Capability Assessment to your patient.

Yours sincerely

E.FERLA

Dear Dr Gemmell

**RE: LISA PARK DOB 07.08.74/0049
82F BALGARTHNO ROAD DUNDEE DD2 4RA**

Lisa was seen for a medical review at Tayside Drug Problem Service on the 2 August 2007.

Prescription

Methadone Mixture 30mg supervised daily dispense.

Issues

Lisa is still struggling to stabilise on her Methadone. Her daughter has been away for the last two weeks I believe that the boredom and loneliness have contributed to occasional use of opiates. Lisa is rather vague to the frequency of this although I gather she is very disappointed that use within five days of her last test provided a positive sample which is suggestive that she is trying to provide negative samples I am aware however that over the last week she bought 15-20mg per day presumably to help manage.

Her ex partner is causing her distress trying to approach her daughter and making life even more difficult.

Lisa is still confident she can provide a negative sample Monday next week for her key worker Lorraine if not I then will increase her dose of Methadone further. However I have informed her for by review on the 23 August 2007 if there are no opiate negative samples I will be unable to continue to prescribe Methadone for her.

Dear Dr Gemmell

RE: LISA PARK DOB 07.08.74/0049
82F BALGARTHNO ROAD DUNDEE DD2 4RA

Unfortunately Lisa continues to use illicit Heroin every day to manage her complex personal situation, this is very disappointing considering Lisa's previous commitment to her treatment.

It is now three months since we re-instated her Methadone with no improvement in the situation. Unfortunately I have no choice but to discontinue her prescription and hope that she will rejuvenate her commitment and focus to her Methadone program and value it more.

The plan is to discontinue her prescription on 6 September 2007.

Kind regards,

Yours sincerely,

Maurice MacVicar

Dear Dr Kennedy

RE: LISA PARK DOB: 070874 0049
82F BALGARTHNO ROAD DUNDEE DD2 4RA

I saw Lisa for a pre tolerance appointment a couple of days ago. She reported that she was smoking .2 to .3 grams of heroin daily. She had been prescribed Mirtazapine by you but hadn't been back for review. She admitted very occasional Benzodiazepine use but not on a regular basis.

[REDACTED]
Lisa has previously been on Methadone, twice. The first time she was stopped because she was using illicitly on top. The second time she has been detoxed in March this year with Lofexidine but unfortunately relapsed back onto Dihydrocodeine after a few weeks due to back pain.

She has got no criminal charges at present and has been borrowing from friends to fund her habit.

Lisa's keyworker is Lorraine Kennedy and unfortunately Lorraine has been off sick. The paperwork therefore wasn't totally completed prior to the tolerance testing and we needed to see Lisa to carry out an opiate withdrawal score before she underwent tolerance.

I therefore arranged for her to come in on the following day to see one of the other keyworkers in order to get this carried out. Unfortunately she did not turn up on that day and said she slept in. She was therefore given an opportunity to turn up this morning and has not reappeared.

Plan

Will therefore need to withhold her tolerance testing just now. Hopefully Lorraine will be back to work shortly and will pick up with Lisa again.

Yours sincerely

CLINICAL INFORMATION*History of presenting complaint / examination findings / investigation results***Presenting complaint**

Description: Drug Misuse

Comment: I am sure you have had contact with Lisa in the past. She has had problems with drug misuse from an early age. She herself had a lot of problems, she was brought up in Carolina House as a child and care from the ages of 7 to 15. She disclosed child abuse that occurred before she was age 6. [REDACTED]

[REDACTED] has had a drug problem since at least 2000 [REDACTED]

She lives on her own [REDACTED]

[REDACTED] Lisa has desperately been trying to cut down. She is now down to smoking £5.00 worth of heroin per day, she was attending Addaction but missed 2 appointments with them as they sent out appointments to her home address [REDACTED] [REDACTED] did not inform her of the appointments.

She is very keen to be seen and to have help to reduce and stop her drug taking. Earlier this year we had a long chat about blood borne viruses, she has now had serology done and this is all normal. She is very keen to change what is happening in her life right now and I would be most grateful if she could be seen. She is not getting to see [REDACTED] and she feels that this is very good motivation for her to quit drugs altogether. [REDACTED] she has not been eating very much recently. I would be most grateful if you could send her a further appointment.

Yours sincerely

Dr M Kennedy

Dear Dr Kennedy,

Re: Lisa Park, 82f Balgarthno Rd, DD2 4RA

I am writing as the temporary key worker for Lisa at Time Tay Change at the TDPS. I would like to take the opportunity to give a brief update of Lisa's progress over the last three month period.

Lisa has unfortunately been discharged from the service this week following significant non-engagement with us. As you will be aware, Lisa had not been on a prescribing programme with us for some time, but had been working towards reassessment for this. Lisa was offered numerous pre-tolerance appointments, and also the opportunity to meet with key-workers to offer support during this period. She attended few of these. After discussion with one of our specialist psychiatrists, it was decided that we were no longer able to offer appointments to Lisa, and have advised her to attend at Addaction for reassessment if this is what she feels that she wants.

Should Lisa work back through the assessment part of the service, we would be delighted to have her back at Time Tay Change, and would be very glad to offer any advice and support possible in achieving this.

NHS Confidential: Personal data about a patient

CLINICAL INFORMATION

History of presenting complaint / examination findings / investigation results

Presenting complaint

Description: Please see below

Comment: Dear Doctor

I would be most grateful if you could see Lisa again. She has been known to have had problems with drug use since at least 2000. [REDACTED] She feels she has had enough of being on drugs all the time [REDACTED]. She has been injecting again since about October of this year. She has had to cut down a bit lately as she ran out of money over Christmas. She is injecting slightly smaller quantities but is still injecting daily. She has numerous injection sites on her arms. She is quite keen to be seen again and I would be most grateful if you would send her a further appointment.

Yours sincerely

Dr M Kennedy

Dear LISA PARK 0708740049

An appointment has been made for you at the following clinic:

Clinic: **SUBSTANCE MISUSE ASSESSMENT INDUCTION**

Appointment: **Tue 15 Sep 2009 at 10:30**

Please go to: **CONSTITUTION HOUSE, 55 CONSTITUTION ROAD, DUNDEE, DD1 1LB**

Should you be unable to attend this appointment, you must contact the department as soon as possible on telephone number: **01382 424544**.

Please ensure you are on time. If you are late for your appointment, you may not be seen and will be given another appointment.

Please complete and return the enclosed drug diary, which is part of your ongoing assessment process. The drug diary should be completed on a daily basis stating amounts, frequency and which drugs you are using.

If any of your details have changed please inform a member of staff when you attend. Your travelling expenses for attending your appointment will be reimbursed if you have proof that you are in receipt of benefit. Further information will be provided to you at the above appointment.

Yours sincerely

Dear Dr

SEXUALLY TRANSMITTED INFECTIONS REQUIRING ONGOING MANAGEMENT

Your patient has been found to have genital Chlamydia/Gonorrhoea/Trichomonas.

Please contact a Health Adviser at the Department of Genito-Urinary Medicine and they will arrange appropriate follow-up and partner notification. A Health Adviser will be available at Ninewells Hospital Monday – Friday during clinic opening times and can be contacted on **01382 425533**.

You can also ask your patient to contact the Department of Genito-Urinary Medicine direct on **01382 425542** and ask to speak to a Health Adviser.

We will require the patient's name, and address and a contact telephone number (mobile if possible) together with the diagnosis, treatment given and date of treatment.

The patient needs to be aware, should you be phoning on behalf of your patient, that a Health Adviser from this department would contact them.

Kind regards

Yours sincerely,

Dr Jackie Paterson

Dear Client

You were referred to Tayside Drug Problems Service, following assessment, it was agreed that you were suitable for treatment. You have been placed on our high priority waiting list.

The service is actively managing the waiting list. We will contact you as soon as we are able to allocate you a keyworker.

In the meantime, if you wish to access support whilst you are waiting to be allocated a keyworker, you may choose to access Addaction - Dundee Direct Access Service. Their address is as follows:

**Unit 6 Nethergate Business Centre
The Nethergate
Dundee
DD1 4ER**

Telephone Number: (01382) 206888

If you are already being seen by Addaction please ignore the above. They will contact us regarding your progress with your consent.

Yours Sincerely

PP S. Davis

Date 23/02/2010

Dear Doctor Moira Kennedy

Factual Report for Disability Living Allowance

I am writing to you about Miss Lisa Park, Date of Birth 07/08/1974

Note. If the person has died or recently moved to another area please still complete the report if you can.

Your patient (or person appointed to handle their affairs) has made a claim for Disability Living Allowance. This is a benefit for people with severe disability. Entitlement is based on the amount of personal care or supervision needed or difficulty with getting around as a result of this disability. In order to decide this claim we need further information about their medical condition(s).

We hold your patient's (or a person appointed to handle their affairs) written consent to allow us to approach you for this information.

We would be grateful if you would answer the questions on this factual report based on your knowledge of the patient and their records. A special examination is not required. It would be very helpful in assessing your patient's benefit claim if you could reply within 10 working days. You may make a claim for a fee of £33.50 with your report.

The person making the claim may, at any stage, request a copy of this report to be sent to them. If there is any information you think would be harmful to their health, for example an adverse diagnosis or prognosis unknown to them, please provide details on the appropriate section of the report, marked "Harmful Information".

Please include in your report any relevant information contained in letters or reports from hospitals or consultants. If you think it is essential to send us originals or any copies of any letters from consultants, please obtain the author's consent for the correspondence

<https://www.scigw.scot.nhs.uk/web/message/letter.aspx>

Page 2 of 9

to be used in connection with your patient's claim.

To ensure compliance with 'Rehabilitation of Offenders Act 1974', your report should not contain any reference to criminal convictions, whether spent or not, unless the information is directly relevant to the customer's condition or disability. This report is not subject to the Access to Medical Reports Act 1998. The patient does not need to read it before it is returned.

The Disability Living Allowance and Attendance Allowance Helpline is set up to answer enquiries. Please get in touch with them if you want to ask about anything in this letter. To make sure you receive a good standard of service from the Disability Living Allowance and Attendance Allowance Helpline, our Managers may monitor or record telephone calls without warning.

Thank you for your help.

Yours sincerely

D. Manderson

On behalf of the Department for Work and Pensions

Harmful Information – do not copy

We may have to send a copy of the report to your patient. Certain information may be withheld if it appears to the Decision Maker or Appeal Tribunal that its disclosure would be **harmful to your patient's health**. An example of what may be harmful information is a diagnosis or prognosis that is **not** known to your patient, such as malignancy, progressive neurological conditions or **major** mental illness.

Please note that we cannot withhold information on any other grounds. For example, information relating to comments or remarks likely to cause embarrassment to the customer, carer, the author or a professional colleague.

Please only write about harmful information on this page.

A large empty rectangular box with a thin black border, intended for writing about harmful information. A large, light grey diagonal watermark reading "THIRD PARTY COPY" is overlaid across the entire page, including this box.

Dear Mr Kinghorn

Re: Lisa Park 07/08/1974, 12d Burnside Court, Dundee DD2 3AE

I am writing to you with regard to the above patient. We received a letter from yourself requesting information regarding her conditions and symptoms and we have also received a letter signed from Lisa saying she is happy for us to do this.

Looking through her past medical history of note on the computer, I see that it is documented that she was using drugs from around 1995 and again drug particular cannabis dependence is noted in 2000 and 2003. In 1999 she was felt to have depression this was again noted in 2003. Looking specifically through her notes she has been injecting and smoking heroin for a couple of years. She has been seen at the drug problem service a couple of years but missed her appointments with them. From what I can see in the notes she has continued to use heroin, however, has been assessed by the DPC yet again on the 7th April and she is due to be seen again in the near future with intent upon starting treatment. In terms of her low mood and depression, the last time this was mentioned specifically in her notes was in 2007. At this appointment she requested antidepressants and was given them, although has not been on them since. Looking further back into her notes, she was on antidepressants on and off in 2000 and 2003.

Dr. D.F. Gemmell, Dr. M.S. Kennedy, Dr. A.M. Emslie-Smith, Dr. N.C. Smeaton, Dr. P. Lockwood, Dr C.L. Moir

19 April 2010

Dear Mr Kinghorn

In terms of going out in the day or routine tasks, such as making a meal, I am afraid I am unable to comment as there is nothing in her notes with regard to this. Neither is there anything about anxiousness when she is in places she is unfamiliar with. I cannot say this is not the case it is just that we have not discussed this with her. At present she is on no regular medications, and as mentioned she is back in contact with the Drug Problem Service.

In summary, I can confirm from she is back in contact with Drug Problem Service.

In summary, I can confirm that our records show that she is a heroin user and in the past has been treated with antidepressants. She does not see us very often, however, the last time I saw her I would agree there would be an element of anxiety in her presentation.

Yours sincerely

Dear Dr Kennedy

Ms Lisa Park, 12D Burside Court, Lochee, Dundee (D.O.B. 07/08/1974)

I act on behalf of your patient Ms Lisa Park and enclose Mandate. My client applied for Disability Living Allowance but was turned down. She has appealed this decision. The Tribunal dealing with her Appeal will be looking at her condition as at 16th March. I would be grateful if you could prepare a report with that date in mind.

I understand from Lisa that she is a heroin user and also suffers from low mood and depression. She states that she does not do much during the day and finds it hard to deal with routine tasks. She would not for example ordinarily plan and prepare a main meal for herself on a daily basis.

She states she finds it hard to go out on her own and gets anxious when out and about in places that she is not familiar with and would need someone to be with her to calm her down.

I would be grateful if you could prepare a report outlining my client's conditions with any specialist referrals and reports and details of any medication.

Otherwise, I would be grateful if you could comment on my client's symptoms and state whether in your opinion are consistent with her diagnosis.

Yours sincerely,

Peter Kinghorn
Principal Solicitor

Dear Dr Kennedy

RE: LISA PARK, 12D BURNSIDE COURT, DD2 3AE, DUNDEE
DGB-07.08:1974-0049

Lisa was doing reasonably well on the Methadone programme previously when she then detoxed but unfortunately relapsed very dramatically [REDACTED]

She had a period of renewed treatment in 2007 but never really stabilised on her drug treatment programme. She failed to attend assessment in September 2009 and was discharged, however she has engaged better since April 2010.

She described injecting since September 2009 into her arms and had multiple sites as evidence.

[REDACTED]

[REDACTED] she has a lot to do in her house to occupy her time.

We therefore agreed the following plan.

Tolerance testing for 40mg on the 11th May 2010, increasing to 60mg on the 12th May 2010, with review on the 17th May 2010.

We will keep you informed of her progress.

Dear Dr Kennedy

Ms Lisa Park (DOB - 07/08/74) of 12A Burnside Court, Dundee, DD2 3AE

I act on behalf of Ms Lisa Park. Ms Park applied for Disability Living Allowance. Her claim was turned down. She has appealed this decision. The Tribunal dealing with her appeal will be looking at her medical condition as at 16th March 2010.

I understand Ms Park suffers from a drug problem and depression and anxiety.

She describes herself as being poorly motivated and finds herself doing little during the day. She states she would not, because of poor motivation and low mood, be able to plan and prepare a main meal for herself on a daily basis known as the "main meal test".

Lisa also describes herself as getting very anxious when she is out particularly in place she does not know well. She requires someone to be with her to avoid her panicking, getting distressed and having a strong desire to get home.

I would be grateful if you could let me have a medical report outlining my client's medical condition, diagnosis and any specialist intervention which might be useful to the Tribunal. I would be grateful if you could also comment on my client's symptoms.

I look forward to receiving your report together with your fee in due course.

Yours sincerely,

Peter Kinghorn

Principal Solicitor

Dear Mr Kinghorn

Re: Lisa Park 07/08/1974, 12d Burnside Court, Dundee, DD2 3AE

Thank you for your letter regarding this patient. She is appealing her application for Disability Living Allowance as she was turned down for this. I can confirm that Lisa does suffer from drug dependency. She has been established on Methadone from the DPC but is still using other prescription drugs and I suspect this will probably continue. I believe she does have significant problems with her motivation and having seen her recently she does not appear to be looking after herself very well. Because of her drug abuse she probable does experience symptoms of anxiety and panic and she did come across as being anxious in the surgery recently.

If you require any further information, please do not hesitate to contact me.

Yours sincerely

Dr A Little

Dear Dr Kennedy

RE: LISA PARK, 12D BURNSIDE COURT, DUNDEE
DOB: 07.08.74 0049

Lisa has now commenced her Methadone 60mg.

Unfortunately she still feels in withdrawals in the morning and has been smoking a few lines of Heroin when she wakens.

She is still spending her time inert watching television and has not made any active plans to change her house as yet.

I'm still rather concerned that she is living with an active drug user and is not making dramatic changes having commenced on her Methadone. Her IV sights on her arm are also looking rather fresh considering she has been on the Methadone since the 12 May 2010.

I have therefore agreed to increase her Methadone to 80mg with further review on the 24 June 2010 where I hope she will be opiate free.

Kind regards
Yours sincerely

Dear Dr Kennedy

Lisa Park, 12D Burnside Court, Dundee, DD2 3AE DOB: 07/08/1974

This girl failed to attend my clinic today following incision and drainage of an abscess on her right hand on 15th February. She also failed to attend our Nurse Led Clinic on 2nd March. I assume that all is well healed and I have not arranged to send for her again.

With kind regards

Yours sincerely

Dear Dr Kennedy

RE: LISA-PARK, 12D BURNSIDE COURT, DUNDEE, DD2 3AE
CHI: 0708740049

I reviewed Lisa today 21 April 2011 here at the Drug Problem Centre for consideration of commencement of Methadone.

Lisa is a 36 year old woman who was referred to me via the Tayside Arrest Referral Service. She has been using Heroin on and off for around ten years. She is currently injecting between 0.4 and 0.6 grams daily. A recent check for blood borne viruses was negative.

Lisa has some history with the Drug Problem Centre. She has been on Methadone on several occasions before the most recently being in September 2010. Due to several missed appointments and failure to collect her prescription she was eventually discharged. Lisa has maintained periods of abstinence from opiates in the past but never longer than a few months.

Lisa admits to occasional Diazepam use but no other illicit drugs. She has been warned to cease all Diazepam use or her prescription may be in jeopardy. She does not drink alcohol and I note she is not prescribed any medication.

Lisa is living with [REDACTED] at the moment. This is due to her recent eviction from her own house due to an arrest for drug offences that ended in a house raid. Her living arrangement is currently stable but likely to be crowded as [REDACTED] is aware of her Heroin use but not that she is injecting. [REDACTED] is supportive of her seeking help at the Drug Problem Centre. Lisa funds her habit mainly by borrowing money. She has no criminal charges outstanding. Lisa is single. [REDACTED] At the moment she has no contact with her but hopes to re-establish this once she is stable. [REDACTED]

We had a chat today about Methadone. She is aware of its mechanism of action, the risks of its prescription and interaction with other illicit and prescribed medications and with alcohol. She is aware that any take home doses need to be kept safely locked away. We discussed relapse prevention and harm reduction.

My plan is to tolerance test Lisa at a dose of 40mg on 26 April 2011. This will be increased to 60mg the following day if she progresses well. She will continue to receive keyworking appointments at the Arrest Referral Service and I have made plans to see her myself on 5 May 2011. In the meantime I would appreciate if you could try to refrain from prescribing for her any additional opiates or benzodiazepines.

Please do not hesitate to contact if you have any queries.

Kind Regards
Yours Sincerely

Dr Kirsten McInnes

Dear Dr Kennedy

RE: LISA PARK, 12D BURNSIDE COURT, DUNDEE, DD2 3AE
CHI: 0708740049

I reviewed Lisa today 5 May 2011 here at the Drug Problem Centre.

At this point Lisa was to have started her Methadone but unfortunately she did not attend the tolerance test arranged for her as she had been in too much withdrawal in the morning leading her to use IV. She was then not in withdrawals and the tolerance test could not go ahead so she called to cancel. We had a chat today about when to stop using the night before.

My plan is to re-tolerance test her at a dose of 40mg of Methadone on 9 May 2011. This will be increased to 60mg the following day if she progresses well. I have made plans to see her myself on 18 May 2011 and she will receive follow up at the Arrest Referral Service.

Please do not hesitate to contact me if you have any queries.

Kind Regards
Yours Sincerely

Dr Kirsten McInnes

Dear Dr Kennedy

RE: LISA PARK, 12D BURNSIDE COURT, DUNDEE, DD2 3AE.
CHI: 070874 0049

I reviewed Lisa once again today, 18th May 2011 here at the Tayside Substance Misuse Service following her induction on to Methadone over the previous fortnight.

Lisa managed her tolerance earlier in the month. She is now on 60mg Methadone supervised daily dispensed. She is managing on the whole and unfortunately she feels symptoms of withdrawal late at night and has been injecting between 0.1-0.2g Heroin daily in order to help this. She denies any other illicit drug use and other than this appears to be doing much better. I have therefore agreed to increase her Methadone to 80mg supervised daily dispensed today. She will receive her follow up at the Arrest Referral Team. I have no plans to see her again myself but please don't hesitate to contact me if you have any queries.

Kind regards.

Yours sincerely

M. McInnes

Dear Dr Kennedy

RE: LISA PARK, 12D BURNSIDE COURT, DUNDEE
CHI: 07.08.74 0749

I reviewed Lisa today 30 June 2011 here at TDPS at the request of her keyworker at the Tayside Arrest Referral Service.

On the whole Lisa looks well although has been on a bit of an emotional rollercoaster since our last meeting. We talked at some length today about [REDACTED] Whilst she acknowledges that [REDACTED] this has obviously impacted her greatly although on the whole she appears to be coping well with this.

We discussed Lisa's current Opiate use. She is currently prescribed 80mg Methadone supervised daily dispensed but despite this she has been consistently using 0.2g IV Heroin approximately every other day. We discussed this and she denies any specific withdrawal symptoms and does not feel that she needs an increase in her Methadone however she describes a craving for the need to inject herself and I feel that this is clearly a psychological dependence she has developed rather than a need for any increase in Methadone. She is aware that this needs to be addressed sooner rather than later with her keyworker at the Arrest Referral Service as continuing illicit use will lead to termination of her prescription. We discussed Lisa's mood and she feels it is low at the moment. She has feelings of anhedonia and dysthymia and lack of motivation. She does very little throughout the day. She feels she is depressed and I have encouraged her to see yourself with regard to possible treatment for this.

I have left Lisa in the capable hands of the Arrest Referral Service. She is aware she needs to work hard with her keyworker to address reducing and stopping her illicit Opiate use. I have made no plans to see her again unless requested by yourself or the Arrest Referral Service but please do not hesitate to contact me if you have any queries.

Yours sincerely

Dr Kirsten McInnes
