Administration Consultation patient DNA appointment. tried to
(P3) contact on mobile number - straight to voicemail. will
flag to triage GP

19-Mar-2026 Ms Sophie Kinkaid Surgery consultation

Administration Consultation 38F attends for medication review. on
(P3) mirtazapine for mood. forget to take meds on holiday
and took aunt's amitriptyline 25mg BD, has been
taking for past 2/52 and finds it is better for mood.
mirtazapine giving nightmares. had one week off
mirtazapine before starting amitriptyline. has also
increased pregabalin to 300mg BD. keen to keep
taking amitriptyline. has started self harming again,
cutting thighs. superficial cuts. not with the intention
of suicide. denies any thoughts of suicide. has got in
contact with her addictions team who will follow this
up. has a lot of stress at the moment. lives with kids
and babys dad - no issues at home. D/w Dr El-Nahal
- ok to keep taking amitriptyline with increased
pregabalin dose. advised weekly dispense and
follow up in 2/52 for review discussed with patient
happy with plan. knows to phone NHS24 if any
thoughts of suicide. advised not to increase dose of
medication without consultation first

NHS Confidential: Personal data about a patient

Edinburgh Postnatal Depression Scale¹ (EPDS)

Postpartum depression is the most common complication of childbearing.² The 10-question Edinburgh Postnatal Depression Scale (EPDS) is a valuable and efficient way of identifying patients at risk for "perinatal" depression. The EPDS is easy to administer and has proven to be an effective screening tool.

Mothers who score above 13 are likely to be suffering from a depressive illness of varying severity. The EPDS score should not override clinical judgment. A careful clinical assessment should be carried out to confirm the diagnosis. The scale indicates how the mother has felt *during the previous week*. In doubtful cases it may be useful to repeat the tool after 2 weeks. The scale will not detect mothers with anxiety neuroses, phobias or personality disorders.

Women with postpartum depression need not feel alone. They may find useful information on the web sites of the National Women's Health Information Center <www4women.gov> and from groups such as Postpartum Support International <www.chss.iyo.edu/postpartum> and Depression after Delivery <www.depressionafterdelivery.com>.

SCORING

QUESTIONS 1, 2, & 4 (without an *)

Are scored 0, 1, 2 or 3 with top box scored as 0 and the bottom box scored as 3.

QUESTIONS 3, 5-10 (marked with an *)

Are reverse scored, with the top box scored as a 3 and the bottom box scored as 0.

Maximum score: 30
Possible Depression: 10 or greater
Always look at item 10 (suicidal thoughts)

Users may reproduce the scale without further permission, providing they respect copyright by quoting the names of the authors, the title, and the source of the paper in all reproduced copies.

Instructions for using the Edinburgh Postnatal Depression Scale:

1. The mother is asked to check the response that comes closest to how she has been feeling in the previous 7 days.
2. All the items must be completed.
3. Care should be taken to avoid the possibility of the mother discussing her answers with others. (Answers come from the mother or pregnant woman.)
4. The mother should complete the scale herself, unless she has limited English or has difficulty with reading.

Dear Dr. Murphy,

Re: Elizabeth Wilson,
D.o.B.: 17/12/87 - 5027
5 Wishawhill Street, Wishaw, ML2 7PY.

DIAGNOSIS:

Anxiety / Obsessionality

MEDICATION:

Methadone 25mls O.D.

Please Discontinue Venlafaxine XL***Please Commence*** Paroxetine 10mg mane

I saw Elizabeth Wilson in the Addiction Psychiatry Clinic at Airbles Road Addiction Centre on 9th February 2016. She was referred in by her Addiction Worker, Gillian Wilson (Charge Nurse, Wishaw Integrated Addiction Service).

In the past, she has been tried on a number of different antidepressants including Prozac, Mirtazapine and Trazodone. She is adamantly against anything which she perceives to be sedative.

She denies taking any street drugs over the past six years. She doesn't drink alcohol. She has no drug allergies. She smokes two cigarettes per day. She is currently buying Brufen from the chemist but only uses her own medications.

FORENSIC HISTORY:

She talked about "all sorts". She claimed not to have been in trouble with the Police for the last eight years. She had served a six month sentence in prison for what she described as "an armed robbery". She claimed her only part in it was shoplifting.

NHS Confidential: Personal data about a patient

~ 2 ~

Elizabeth Wilson
17/12/87 ~ 5027
(9th February 2016)

PREMORBID PERSONALITY:

She found discussing her premorbid personality somewhat difficult. In the past she described herself as being happy. She has no religious affiliations and has no time for any hobbies.

PAST MEDICAL HISTORY:

She spent a period of time receiving kidney dialysis having taken a mixed overdose a number of years ago. She denied any major operations or illnesses. She has never been knocked out.

PERSONAL HISTORY:

She was born in Lanark and raised in Wishaw. She moved down to Southampton eight years ago when she was 21 years old with her then partner and stayed there for around three years. She subsequently moved back to the West of Glasgow.

Her mother and father separated before she was born. Her father is aged 54 and lives in Whitburn. Liz Anne is not in touch with him. Her mother is aged around 50 and suffers from depression. She lives locally. Liz Anne initially told me that she grew up in care but in fact modified this to say she was in care for the age of 14 until 17½ years. There are long standing problems in her relationship with her mother. She said "I hated her" and went on to say that they somehow weren't allowed to do things that she wanted. She has two siblings; Liam Wilson aged 32 who lives in Bellshill and Kelly Wilson aged 32 who lives locally. She told me her brother had sexually abused her sister but not her. She had told her mother the facts of this sexual abuse when she was around 9. She told me her brother is autistic and spent a good deal of time in care.

At age 17½, she was pregnant with her first child. She has four children; Billie Wilson aged 9, James Wilson aged 5, Eva Wilson aged 3 and Scott Johnston aged 14 weeks. Billie Wilson was a result of her first relationship. Both James and Eva were to her second partner and Scott Johnston is to a third partner.

She started taking drugs around eight years ago. She initially smoked Heroin and claimed to have injected it only six or seven times. She has been checked out for blood borne viruses and is negative. She admitted to smoking Crack Cocaine constantly for around two years and has taken Amphetamines on occasion. She took at least six Ecstasy tablets every weekend for around 2½ years from the age of 16 onwards when she was in care. She no longer drinks alcohol. She did go through a stage of drinking dragon soup a year or two back. She has never had shakes or sweats or delirium tremens.

Dear Doctor Keegans

Re: **ELIZABETH WILSON**
Address: **5 WISHAWHILL STREET**
WISHAW
ML2 7PY

CHI1712875027

This lady was referred to our team by Linsey Ann McKean Substance Misuse midwife in the antenatal period. Unfortunately contact was not established until after she had given birth to her son Scott. On assessment she presented with her mood at a fair level and she appeared to be managing with the baby who has spent a longer period of time in the hospital as he has had an infection.

At this time it was agreed to further appointment to monitor her mood since this time her mood has been up and down. She continues to have contact with addiction services and they have referred her to psychiatrist to review her medication as she feels her mood has worsened and she has had a couple of episodes of self harm therefore she is being seen by the consultant. Also referral will be made by addiction service to psychology to address her issues from the past which continue to have impact on her day to day life.

At this time it was agreed that she would continue to work with addictions services and at this time no further input from this team therefore case closed and she will be discharged.

If you wish to discuss further, please do not hesitate to contact me.

Yours sincerely,

M. Crichton

Dear Dr Curran

Patient Name: Elizabeth Wilson
Patient date of birth: 17/12/1987
Patient Address: 5 Wishawhill Street, Wishaw, ML2 7PY

I reviewed this 28 year old para 4 four previous SVDs who requested sterilisation. I note she has previously had the pill, implant and Depo which sadly she fell pregnant on. She has slightly unstable circumstances at the moment having recently split from her youngest child father and on the Methadone programme. I explained that we don't tend to offer the sterilisation under the age 30 and certainly not the best time to have an irreversible procedure done so soon after a recent break-up. I explained another option would be the Mirena coil which gives her secure contraception for 5 years. She is happy for this and I have inserted one today without difficulty.

The cavity was 7cm it was inserted under asepsis and she is aware she has to perform a thread check in 6 weeks time. She is aware she will have to have it replaced in 5 years. I also informed her that she may have some irregular bleeding for up-to 6 months after.

Kind regards

Yours sincerely

Dear Ms Wilson,

Re: COMMUNITY DIETETICS – HOULDSWORTH CENTRE

I am sorry you were unable to attend your review appointment to the above Service on 5th May 2016.

If you would like another appointment please contact me on **01698 201440** and I will be happy to re-arrange.

If I do not hear from you within two weeks, I will assume that you do not wish to attend the Service and as such, you will be discharged from the clinic list.

Your doctor's file will be updated accordingly.

Yours sincerely,

Karen Martin
Community Dietitian

CC: Dr J Curran Houldsworth Centre, Kenilworth Ave, Wishaw..

The Community Dietetic Appointment Service follows the guidelines of NHS Lanarkshire Allied Health Professional Did Not Attend (DNA) Policy. If you require further information please call the department on 01698 201440 to discuss or request a written copy of the policy

Dear MS WILSON

SECOND LETTER

It has come to our attention that you again failed to attend your appointment with Dr Crossan on Tuesday, 28th February, 2012 at 2.20 p.m.

We realise that there may be a good reason for this but would appreciate that if you are unable attend an appointment in future that you please telephone the Surgery and cancel so that other patients may be seen.

However, if you fail to attend your appointment again your name may be removed from our Practice list.

Yours sincerely

Dear Dr Gunn

Patient Name: Elizabeth Wilson
 Patient date of birth: 17/12/1987
 Patient Address: 5 Wishawhill Street, Wishaw, ML2 7PY

Thank you for referring the above named patient to the Addictions Psychology Service.

I offered Ms Wilson an initial assessment appointment on 28th April 2016 which she cancelled. Upon her request I rearranged an appointment for 12th May 2016 however she failed to attend.

Subsequently, Ms Wilson has not responded to a letter requesting that she gets back in touch with the Addictions Psychology Service to arrange a further appointment.

As such, I am assuming that she is not in a position to engage with psychology at the present time and I therefore have no choice but to discharge her from my caseload.

Please do not hesitate to contact me if you have any questions or concerns.

Yours sincerely

Authorised on 03/06/2016 14:00:45 by Isabel Traynor.

Dear Dr Curran,

Re: ELIZABETH WILSON 5 WISHAWHILL STREET WISHAWHILL WISHAW

The above patient did not attend the initial appointment to the Community Dietetic Service with regard to receiving nutrition support.

Further appointments were offered but no response received.

As such, the patient is discharged from the Service in accordance with Department DNA Policy guidelines.

Should you wish our intervention in the future, please do not hesitate to re-refer.

Yours sincerely,

Karen Martin

CLINICAL INFORMATION**History of presenting complaint / examination findings / investigation results****Presenting complaint**

Main
presenting Complaint: anxiety/ hx of sexual abuse

Reason for Referral: Dear Doctor

I would be extremely grateful for any help you could offer Elizabeth who has in the past abused drugs but has now been clear of all drugs for approximately seven years, apart of course from her Methadone which she stopped three weeks ago. She has been fairly stable since then and has no intention of recommencing either Methadone or any drug of abuse. Her Pregabalin was increased from 50mg twice a day to 75mg twice a day, but she now wishes for this to be reduced back to 50mg which I will do today. Her main underlying problem is of anxiety and she tells me that her anxiety relates to childhood sexual abuse and it would appear that she has abused illicit drugs in the past in order to escape from her feelings of anxiety relating to her past experiences.

In view of the fact that she is now drug free she would like to re-engage with Psychology in order to address her underlying anxieties which relate to her past history of sexual abuse and to that end I would be extremely grateful if she could be assessed at your Clinic.

Thank you very much indeed for seeing her.

Yours sincerely

Paul D Flanigan
GP Houldsworth Centre

Dear Elizabeth

The following appointment has been made for you with Sean Morgan, Clinical Associate in Applied Psychology. This appointment may last up to 1 hour.

Date: Tuesday 20th December 2016
Time: 9.30am
Venue: Houldsworth Centre, Level 1, Kenilworth Avenue, Wishaw, ML2 7LP

If this time is unsuitable, please telephone us on **01698 354027** as soon as possible and an alternative appointment can be arranged.

If you no longer require this service, please telephone **01698 354027** to let us know.

Please complete the enclosed questionnaires before attending and bring them to your first appointment. If you wear glasses, please remember to bring these with you.

This is not the start of therapy but a meeting with a member of our team to discuss your needs and possible service options.

Please note if you do not attend this appointment without prior notification, you will be discharged from the service and referred back to your GP/referrer.

Please bring this letter along with you to the appointment.

We look forward to meeting with you.

Yours sincerely

Secretary
Psychological Therapies Team

Dear Dr Keegans

Re: Elizabeth Wilson, 5 Wishawhill Street, Wishaw
D.o.b: 17.12.87 ~ 5027

A Recovery Plan review was undertaken between myself and Gillian Wilson, Charge Nurse for North Lanarkshire Integrated Addiction Service. Unfortunately Elizabeth was not present today however on discussing matters with her Key worker she has done extremely well. She came off Methadone in December 2016 and has been doing very well since. She remains abstinent and it is clearly apparent through discussions with her Key Worker and through reading the notes that she appears to be a very strong and resilient individual. She has three small children. There was previous Social Work involvement however her case is closed at present. Following a period of monitoring and continued support it is our intention to close the case if the situation described remains satisfactory. We will of course be happy to see Elizabeth at short notice should there be any concerns and please do not hesitate to contact us should she report any difficulties.

Kind Regards

Yours sincerely

Dr M Coates

CLINICAL INFORMATION**History of presenting complaint / examination findings / investigation results****Presenting complaint**

Main presenting Complaint: LOW MOOD - ONGOING ANXIETY DISORDER STRUGGLING TO COPE DUE TO DISTURBED SOCIAL CIRCUMSTANCES - SELF HARM THOUGHTS

Reason for Referral: Dear Colleague

I shall be obliged an opinion on this lady who has been up until now care of the Addiction Services. She has been on Methadone but has come off and done remarkably well. She has been complaining of ongoing low mood anxiety symptoms which has been maintained so far on Pregabalin and Venlafaxine 2 to 5. Elizabeth has recently been under tremendous stress and has been made homeless but her kids are also been sexually abused by an 8 year old and the police have not done anything about it. She saw me on Tuesday in a very disturbed state when she was unable to cope at all. She initially presented with thoughts of self harm but during the course of consultation she did made me aware that the kids are the protective factor and assures of her safety. She is desperately looking for help and a referral to yourself has been made so I have been told by the addiction case worker to psychology and also to CMHT. She is once again occupied by her physical health which seems to go in line with the protective factor with regard suicidality. I intend to review her in the community.

I shall be obliged if she could be seen by yourselves at your earliest convenience for an assessment.

Thank you very much.

Yours sincerely

Dr S Kumar
General Practitioner

Community Care Outcomes

Discuss all the outcome areas with the patient who will identify their own outcome(s):

Feeling safe and secure

☒

Having satisfying things to do

☒

Having good social contacts

☒

Staying as well as you can

☒

Live where you want and as you want

☒

Have control over your daily life and routine

☒

Improve confidence and morale

☒

Improve mobility

☒

Improve your skills and learn new ones

☒

Reduce symptoms

☒**Assessment and Initial Treatment Plan**Information obtained from: Patient ☒ Carer ☐ Other ☐**Presenting Complaint and its History** (Include info about sleep, appetite, sociability, capacity for enjoyment, etc.)

Nurse/AHP Comments

Describes having a 'breakdown' 5/6 weeks ago, where she was unable to get out of bed, crying constantly and self harming in the form of pulling her hair out. Has thoughts of 'not wanting to be here' though advises that her children are a protective factor.

Has been unable to leave her house for weeks at a time.

2 of her children were sexually abused by a fellow minor (8 year old boy) which brought back past traumas of own childhood sexual abuse by her eldest brother.

Describes episodes of anger where she 'screams and shouts'.

Has a poor appetite going days without a proper meal, substitutes this with 4 to 8 cans of red bull per day.

Has a poor sleeping pattern however states this is due to her youngest child being a poor sleeper and has had no problems sleeping in the past.

Medic/Advanced Nurse

Conclusions

Medical Diagnostic Formulation and Support

Record Provisional ICD10 classification diagnosis? (required by medics for ICP standards)

Details continuation (if required)

Advance Statement

Does the patient have an Advance Statement?

No

Assessment of need completed for patient within local/national timescales (18 weeks)?

Yes

Other Considerations

Does the patient have capacity to consent to treatment? (Medics and specifically-trained staff)

Yes

Does the patient have capacity in other aspects (eg financial, welfare)?

Yes

Would this patient benefit from the Care Programme Approach (CPA)?

No

Initial Treatment Plan

1. Drug Treatment:

To continue to be directed by GP.

2. Psychological/Psychosocial/Vocational Treatment

Already referred to psychology.

3. Other (please specify):

1. Continue with social work support.

2. Continue with home care.

3. Continue to engage with 'Families First'.

4. Continue to engage with health visitor.

5. Engage in Moira Anderson Foundation input.

Patient and Carer Involvement

Was the patient involved in the assessment process?

Is there an informal (unpaid) or formal carer (including young carers)?

Informal carers who may be family or close friends, have a major role in supporting people with mental health difficulties to recover or cope as best they can with the condition. Informal carers are not paid carers (NHS QIS MH ICP Standards, 2008.)

Instructions & Guidelines

Please consider the following, when carrying out the assessment:

- Expansive Mood and Ideation (euphoria, excessive optimism)
- Over Activity (pacing, restlessness, impacting on day to day activities)
- Depressed Mood and Ideation (hopelessness, low self worth, low self esteem)
- Anxiety, Phobias and Panics (intense worry, fear, feelings of panic, catastrophic thoughts etc)
- Somatic Pre-Occupations (excessive worries about physical self/health, unresponsive to levels of reassurance, despite absence of physical evidence)
- Sleep Disturbance (insomnia, early morning waking, disrupted sleep pattern, excessive sleep)
- Appetite (eating problems, loss of appetite, binge eating, purging, poor nutritional intake, self-starvation, special dietary requirements)
- Memory (difficulty recalling familiar names or events, losing way, losing objects or forgets plans)

NHS Confidential: Personal data about a patient

- Attention/Concentration (easily distracted or finds it difficult to follow programmes or conversations)
- Energy, Drive and Interest (poverty of thought, lack of interest in normal social activity)
- Obsessional Ideas and Compulsive Behaviour (excessive pre-occupation, checking, counting, washing, hoarding)
- Hallucinations (auditory, visual, gustatory, tactile, olfactory)
- Delusions (unusual beliefs, guilt or worthlessness, hypochondriacal, grandiosity, paranoia, nihilistic, etc)
- Behaviour and Aggressive Behaviour (physical harm to others, history of assault, violence, thoughts or harming others, carrying weapons/potential dangerous objects, domestic abuse, aggressive behaviour, damage to property, abusiveness, irritability, threatening behaviour)
- History of Alcohol and/or Drug Problems

Mental Health Risk Assessment

This assessment uses colour coding to categorise risk at 4 levels:
 Green = Low Risk Yellow = Medium Risk Amber = Medium to High Risk Red = High Risk
 Refer to the Directive tab for assistance in completing this form.

Factors to be considered when undertaking an initial assessment, or if there is a change in clinical presentation of a person with a suspected mental health problem:

- Has a physical cause for the problem(s) been ruled out?
- Has a drug and/or alcohol intoxication been ruled out as a cause?
- Is person physically well enough (e.g. not sedated, intoxicated, vomiting or in pain) to undertake an interview with mental health staff?
- Is the person's violent or aggressive behaviour a factor which requires to be managed?
- Is there a known mental health or learning disability history for background assessment and care planning information, including any current Staying Well Plans and other coping mechanisms?
- Is there an alert for this patient on the patient information system e.g. MIDIS, PIMS, Trak Care?
- Is there any legislation relevant to the treatment of this patient?
 For example, Adults with Incapacity Act (2000), Adult Support and Protection (Scotland) Act 2007, Mental Health (Care and Treatment) (Scotland) Act 2003, Lasting Power of Attorney, etc.

Please check appropriate box (R = Red, A = Amber, Y = Yellow, G = Green, DK = Don't Know)

Assessment Date: 09/06/2017 Time (24 hr clock): 11:00
 Completed by: Lyn Collins / Darren Newbiggin Designation: Charge Nurse / Student Nurse
 Next Review Date:

Q1 Background History and Presentation

- 1A Why is the person presenting now? What recent event(s) triggered this presentation?
 Give details below (eg divorce, anniversary, or other significant event):
 Crying constantly, couldn't get out of bed and self harmed by pulling her hair out, although stated she did not know this was a form of self harm at the time. Fleeting and vague suicidal ideation though not acted upon this due to her children.
 2 children sexually abused by another minor approx 5/6 weeks ago.
 Not going out the house for weeks at a time.

1B Is the person socially isolated? Yes (Y) ☐ No (G) ☒ DK (DK) ☐

1C What is the person's level of social support? (i.e. partner/significant other, family, friends) - Give details below:

Lives with 3 children.
 Has good support from 1 friend and youngest child's father.
 No contact with mother who stops her seeking her unless child.
 Abused by older brother as a child. Older brother has autism.
 No contact with other brother as he is in the army.
 Interacts superficially with 2 sisters.
 Input and support from social work, families first, home support, health visitor and addictions worker.

1D Does the person have major financial, housing or accommodation problems? Yes (Y) ☐ No (G) ☒ DK (DK) ☐

1E Does the person have a history of violence or previous use of weapons? Yes (Y) ☐ No (G) ☒ DK (DK) ☐

1F Does the person have a history of self harm? Yes (Y) ☒ No (G) ☐ DK (DK) ☐

1G Does the person have a history of suicidal thoughts/intent/plans? Yes (Y) ☐ No (G) ☒ DK (DK) ☐

1H Does the person have a history of mental health problems or psychiatric illness? Yes (Y) ☐ No (G) ☒ DK (DK) ☐

PERSONAL INDEPENDENCE PAYMENT Request for Information

Dear Sir/Madam,

Atos Healthcare is contracted to carry out assessments for Personal Independence Payment by the Department for Work and Pensions. The person named below has made a claim for Personal Independence Payment and has indicated that you are involved in their treatment or care:

Claimant's name: Miss ELIZABETH WILSON

Date of birth: 17/12/1987

Address: 37 ST. CATHERINES CRES, DYKEHEAD, Shotts, Lanarkshire,
ML7 4JG

It would be very helpful in assessing their benefit claim if you could complete the enclosed report form. Please provide information on the following key areas within your response:

- Please confirm diagnosis, medication/dose, current treatment or therapy and functional abilities for the majority of days.. Thank You.

You should base your responses on your knowledge of the claimant and on her records. If the claimant has died or recently moved to another area please still complete the report if you can. **We hold the claimant's consent** (or the consent of a person appointed to handle their affairs due to the claimant's mental incapacity to do so) **to allow us to approach you for this information**

To ensure compliance with the Rehabilitation of Offenders Act 1974 your report should not contain any reference to criminal convictions, whether spent or not, unless the information is directly relevant to the claimant's condition or disability. This report is not subject to the Access to Medical Reports Act 1998. The claimant does not need to read it before it is returned.

The claimant may, at any stage, request a copy of this report to be sent to them by the Department for Work and Pensions. Harmful and embarrassing information should not be included in your report.

Your Report

Claimant's name & Ref: Miss ELIZABETH WILSON JL811545B

When did you last see the claimant? / /

Where did you last see the claimant?

Notes:

- Please record relevant information based on your knowledge of the claimant and their records.
- Please write down facts rather than opinion. We require an objective report - please only include information that is recorded in the claimant's records and information about disabling effects that you or another professional have directly observed.
- It may be helpful to the claimant to enclose any relevant correspondence contained in their file - for example, a copy of a care plan or reports. Please ensure that any third party information is removed. Third party information is any sensitive information that refers to someone other than the claimant - for example, the claimant's family.
- Please complete all sections as fully as possible but write "not known" if appropriate. "Not known" can be helpful.
- Relevant information is anything that relates to health conditions or disabilities which impact on an individual's functional ability.

1. Treatment/therapies/support - Current, planned, response and prognosis

Provide details of any drug and non-drug treatment, therapy or support packages that you are involved in, including details of aids and appliances used and, if known, who prescribed them. Please provide details of frequency and, if relevant, dosage.

JL811545B: Miss ELIZABETH WILSON

Page 1 of 3

NHS Confidential: Personal data about a patient

2. Effects of the disabling condition(s) on day to day life

If known, it would be helpful to have information on the claimant's ability to:

- *Manage their health conditions and treatment*
- *Communicate*
- *Walk or move around*
- *Get somewhere on their own*
- *Make simple decisions*
- *Prepare, cook and eat food*
- *Wash, bathe and use the toilet/ manage incontinence*
- *Dress and undress*

Only include information that has been confirmed by a health professional.

Please state if this is not known.

THIRD PARTY COPY

3. Does the claimant have a history of threatening or violent behaviour?

No ☐ Yes ☐ Don't know ☐

If yes, tell us about their behaviour within the last 5 years. Use the space below at Part 5

4. Could your claimant travel to an assessment centre by public transport or taxi?

Yes ☐ No ☐ Don't know ☐

If no, please tell us why. Use the space below at Part 5

JL811545B: Miss ELIZABETH WILSON

Page 2 of 3

NHS Confidential: Personal data about a patient

JL811545B

5. Additional information

Use this section if there was insufficient space in one of the previous boxes OR to add important relevant factual information that has not been written in the body of the report. Do not use the section to provide an opinion.

25/09/2016 10:32:17/2/3

THIRD PARTY COPY

I understand that, in certain circumstances, this report will be released to the claimant, their legal representative and any authority deciding an appeal in relation to their entitlement to benefit. I also understand that the only information that can be withheld is medical evidence that would be harmful to the person's health.

Relevant Background Information

Knowledge of family including Health Professional's involvement / interventions.
Social background, extended family support.

Lizanne was accommodated by The Local Authority as a young person.
Health Visitor (HV) first knew Lizanne when she was resident in Blue Triangle Housing in Wishaw in 2007. In July 2007 Lizanne suffered renal failure due to drugs and alcohol misuse and was admitted to The Renal Unit at Monklands District General Hospital.

History of chaotic drug misuse and history of self harm and mental health issues.
Currently attends GP and is on medication for her mental health.

Lizanne is a victim of domestic violence in all of her relationships.

Billie Wilson was removed from Lizanne's care from August 2008 and has lived with Lizanne's mother.

Lizanne has a very poor relationship with her mother and is not currently in contact with her.

James, Eva Rose and Scott all had neonatal abstinence syndrome following birth and all required treatment within the neonatal unit.

Lizanne engages well with the HV.

She tends to be anxious and worried about her parenting ability and requires reassurance.

Lizanne is kind to others and tries to help others in need.

Has had many changes of address.

Family require to register with GP in Shotts.

Child's Health and Development (How I Grow and Develop)

Being healthy, Learning and achieving, Being able to communicate, Learning to be responsible, Confidence in who I am, Becoming independent, Enjoying friends and family.

Please consider age and stage of development of each child

Scott Wilson (29/10/15): Scott was born at term and was admitted to the NNU with neonatal abstinence syndrome. He was discharged home at 4 weeks old. Admitted to children's ward for a few hours on 12/12/15 with bronchiolitis.

Frequent DNA's (Did Not Attend) for immunisation (Lizanne contacts HC sometimes with a reason). Currently up to date with immunisation.

DNA Neonatal outpatient appointments on 12/12/15, 22/4/16 and 9/9/16 – referred back to GP care at this time.

Admitted to ward for a few hours on 10/3/16 with rash on legs and irritable. Observed on ward and bloods taken. Reviewed by Consultant. Referral to SWD.

General health good and development is within normal parameters for age. He is vocal and communicates his needs.

NHS Confidential: Personal data about a patient

Eva Rose Wilson (24/10/12): Eva Rose was born at term and was admitted to the NNU with neonatal abstinence syndrome for a short stay and observation. General health is good. Immunisation is up to date. Eva Rose attended Craigneuk Family Learning Centre in a supported placement. Attendance was variable. Eva Rose was examined at WGH on 3/4/13 with bruise marks to her legs and feet. Diagnosed with rash and other non specific skin eruption. Blood tests were taken. Eva Rose was allegedly sexually assaulted within her home on 10/3/17 by an 8 year old boy.

James Wilson (14/1/11): James was placed on CP Register category Physical Neglect following birth and his name removed on 15/4/11. James was admitted to NNU with neonatal abstinence syndrome and discharged home from unit. Was admitted to paediatric ward from 29/3/11-1/4/11 with respiratory infection and urinary tract infection. Renal scan carried out and James was treated with long term antibiotic and followed up by Paediatrician until 13/5/15 when he was discharged. James attended Craigneuk Family Learning Centre in a supported placement from 30/6/11. James had frequent DNA's for immunisation, Orthoptic Clinic and Paediatric Clinic. General health good and development within normal parameters. James was allegedly sexually assaulted within his home on 10/3/17 by an 8 year old boy.

Parenting Capacity (What I need from the people who look after me)

Everyday care and help. Keeping me safe, Being there for me, Play, encouragement and fun, Understanding my family's history and beliefs, Knowing what is going to happen, Guiding and supporting me to make the right choices.

Lizanne ensures her children are clean, dressed appropriately and provided with adequate food. She is very tactile in hugging her children and demonstrating her love for them. Reciprocal interactions between Lizanne and her children have been observed at home visits.

Lizanne keeps her children generally safe but ongoing domestic violence will impact their safety within their home.

Lizanne relies on friends as she does not currently have a good relationship with her mother.

James and Eva Rose have made friends in their new locality and get to play outdoors in their garden.

NHS Confidential: Personal data about a patient

Environmental Factors (My Wider World)

School, Support from family, friends and other people, Local resources, Enough money, Comfortable and safe housing, Work opportunities for my family, Belonging

Scott attended Craigneuk Family Learning Centre in a supported placement from January 2017 until June 2017. An application form for Shotts Family Learning Centre will be accepted in October 2017.

James and Eva Rose are settling into Dykehead PS.

Lizanne is receiving appropriate benefits currently.

Recently moved to current home in Shotts which provides adequate accommodation for their needs and good garden space for outdoor play.

What is the analysis of the children / young person's well-being? (Please include summary analysis of strengths, adversities, needs and risks identified).

All three children are generally well and active. Their growth and development is within normal parameters. Lizanne reacts to any acute illness by accessing health services appropriately.

All three children have had many DNA appointments but currently they are all immunised to date with no outstanding appointments.

Lizanne is with her children constantly and they usually know what to expect.

Lizanne was seriously assaulted by Jim Johnston and her children were upstairs at the time. The children require to be protected from violence and the consequences of violence on Lizanne.

What is the analysis of parenting capacity? (Please consider the impact of strengths and adversities in relation to parenting capacity).

Lizanne has had enduring mental illness and is currently on medication prescribed by her GP.

Lizanne is mainly on her own in caring for her children. She has had several partners and has been a victim of domestic violence in all her relationships. She was recently seriously assaulted by Jim Johnston and lost consciousness. Her children require to be protected from violence within their home and the consequences of violence impacting on their lives. Despite this she shows love and emotional warmth to her children and meets their needs. Lizanne requires to ensure her children's safety when she brings new partners into her home.

Lizanne was devastated when James and Eva Rose were sexually assaulted within her home and this resulted in a deterioration of her mental health.

Lizanne requires reassurance that she is a good mum and that she cares for her children.

Please enclose summary of significant events

NHS Confidential: Personal data about a patient

Recommendations:

Please consider desired outcomes for child (ren) / young people. Clearly consider your assessment of risks / needs including health professionals interventions, need for registration and involvement in child protection plan.

Lizanne should continue to have support in her care of her children.

Lizanne requires to protect her children from violence perpetrated by her partners to her and ensure their safety at all times.

Scott will commence Shots Family Learning Centre after his second birthday.

What are the parents / carers views about the child and young person's well-being? (please summarise using their own words wherever possible):

Lizanne engages well with HV and is open in discussing her and her children.

What are the child / young person's views about the child and young person's well-being? (based on child's age, stage and capacity to communicate):

When seen in their home, all three children are happy, vocal and interact in a loving way with their mum.

Significant event:	Workers meeting held in Wishaw SWD. Lizanne has deteriorating mental health following assault on James and Eva Rose from an 8 year old child within Lizanne's home and who will not be prosecuted and Police have closed incident. Recent benefits sanctions which have now been re-instated. James's attendance at school is 55 per cent and Eva Rose's attendance at nursery is 44 per cent. SWD will put in Home Support Service from 12/6/17 to ensure James and Eva Rose attend school/nursery. Lizanne has not moved to Tinto Crescent. Lizanne has an appointment with GPW on 9/6/17. Lauren Casey will follow up referral to Moira Anderson Foundation for Lizanne, James and Eva Rose. Police advise that Lizanne was charged with possession of cannabis April 2017. Lauren Casey SW will discuss with her senior to progress to TRD/Child Protection due to agency concerns.

Consultant: Dr Isabella Traynor, Clinical Psychologist

Dear Elizabeth Wilson

Patient Name: Elizabeth Wilson
Patient date of birth: 17/12/1987
Patient Address: 37 St Catherine's Crescent, Shotts, ML7 4JG

Please get in touch with the Addiction Psychology Service.

As you recently missed your appointment with me it would be good if you could get in touch as soon as possible so that I can arrange a new appointment. The phone number is 01236 707183.

However, if you don't feel able to attend for another appointment at the moment, please also call the service to let us know and we may be able to assist you by providing further guidance.

It is important to note that if we do not hear from you within the next two weeks, we will assume that you wish to be discharged from the Addiction Psychology Service. If this happens, then you can discuss your ongoing support with other addiction workers or your GP.

Yours sincerely

Dr Isabel Traynor

PERSONAL INDEPENDENCE PAYMENT Request for Information

Dear Sir/Madam,

Atos Healthcare is contracted to carry out assessments for Personal Independence Payment by the Department for Work and Pensions. The person named below has made a claim for Personal Independence Payment and has indicated that you are involved in their treatment or care:

Claimant's name: Miss ELIZABETH WILSON

Date of birth: 17/12/1987

Address: 37 ST. CATHERINES CRES, DYKEHEAD, Shotts, Lanarkshire,
ML7 4JG

It would be very helpful in assessing their benefit claim if you could complete the enclosed report form. Please provide information on the following key areas within your response:

- Please confirm diagnosis, medication/dose, current treatment or therapy and functional abilities for the majority of days.. Thank You.

You should base your responses on your knowledge of the claimant and on her records. If the claimant has died or recently moved to another area please still complete the report if you can. **We hold the claimant's consent** (or the consent of a person appointed to handle their affairs due to the claimant's mental incapacity to do so) **to allow us to approach you for this information**

To ensure compliance with the Rehabilitation of Offenders Act 1974 your report should not contain any reference to criminal convictions, whether spent or not, unless the information is directly relevant to the claimant's condition or disability. This report is not subject to the Access to Medical Reports Act 1998. The claimant does not need to read it before it is returned.

The claimant may, at any stage, request a copy of this report to be sent to them by the Department for Work and Pensions. Harmful and embarrassing information should not be included in your report.

Notes:

- Please record relevant information based on your knowledge of the claimant and their records.
- Please write down facts rather than opinion. We require an objective report - please only include information that is recorded in the claimant's records and information about disabling effects that you or another professional have directly observed.
- It may be helpful to the claimant to enclose any relevant correspondence contained in their file - for example, a copy of a care plan or reports. Please ensure that any third party information is removed. Third party information is any sensitive information that refers to someone other than the claimant - for example, the claimant's family.
- Please complete all sections as fully as possible but write "not known" if appropriate. "Not known" can be helpful.
- Relevant information is anything that relates to health conditions or disabilities which impact on an individual's functional ability.

1. Treatment/therapies/support - Current, planned, response and prognosis

Provide details of any drug and non-drug treatment, therapy or support packages that you are involved in, including details of aids and appliances used and, if known, who prescribed them. Please provide details of frequency and, if relevant, dosage.

Prescribed & administered for Anxiety / Depression
 Antidepressant: Paroxetine 20mg daily @ Brooklands College.
 & CBT by Anna Collins of W.R.T. & Kip Kersh
 wishes.

When last seen her was 8yo parent &
 being made harder. No record of more
 recent studies.

Last collected medication on 6/9/17.

2. Effects of the disabling condition(s) on day to day life

If known, it would be helpful to have information on the claimant's ability to:

- Manage their health conditions and treatment
- Communicate
- Walk or move around
- Get somewhere on their own
- Make simple decisions
- Prepare, cook and eat food
- Wash, bathe and use the toilet/ manage incontinence
- Dress and undress

Only include information that has been confirmed by a health professional.

Please state if this is not known.

not ready

3. Does the claimant have a history of threatening or violent behaviour?

No ☒ Yes ☐ Don't know ☐

If yes, tell us about their behaviour within the last 5 years. Use the space below at Part 5

4. Could your claimant travel to an assessment centre by public transport or taxi?

Yes ☒ No ☐ Don't know ☐

If no, please tell us why. Use the space below at Part 5

Dear Dr. Murphy

Our client Elizabeth Wilson
Address – 37 St. Catherine's Crescent, Shotts, ML7 4JG
(Date of Birth 17/12/1987)

We refer to the above. Please note that we have been consulted by Elizabeth Wilson and now act on her behalf in relation to an action against her former partner James Gordon Johnston in which our client is seeking an Interdict and a Power of Arrest.

In order to assist in persuading the Court to attach a Power of Arrest to the interim interdict and interdict sought by our client, we require a Report from you in relation to our client's mental health.

We understand from our client that she has suffered from mental health difficulties but that her partner's behaviour towards her which has been verbally and physically abusive has caused a deterioration in her mental health. She was involved in a relationship with Mr. Johnston from in or about July, 2013 until in or about late August, 2017. We are enclosing a Mandate signed by our client authorising the release of information to us. We should be obliged if you could provide us with a Report in relation to our client's mental health and in particular if she has disclosed to you any concerns with regard to her former partner's behaviour towards her and whether you can say that there has been a deterioration in her mental health since July, 2013.

We thank you in anticipation of your assistance and look forward to hearing from you.

Yours faithfully

Dear Sir/Madam

**RE: ELIZABETH WILSON – DOB: 17/12/87
5 WISHAWHILL STREET, WISHAWHILL, WISHAW, ML2 7PY**

Thank you for your correspondence of the 11th December 2017 wherein you request a report to assist in persuading the Court to attach a Power of Arrest to the interim interdict sought by your client, in particular you request a report in relation to your client's mental health.

I have searched her medical records, paying particular attention to her consultations with the various GP's in the Practice relating to the period from July 2013 until the present day.

I note an entry from the 30th January 2013 recording Elizabeth's drug addiction maintenance therapy being Methadone. In September 2013 it is recorded that her mental health had deteriorated because she had stopped her antidepressant medication of her own accord. In March of 2015 there is a record of her complaining of depression with suicidal thoughts but without any intent due to the vulnerability of her children. She was noted to be smelling of alcohol at that time but she denied

having taken any. It is noted that on the 7th September 2015 she was certified as unfit for work due to depression. On the 7th September 2015 it is noted that she was thirty two weeks pregnant with her fourth child and that her mother had custody of her oldest daughter, who at that time was aged nine years. It was also noted that she was a single parent with financial difficulties and had an on off relationship with her current partner. She was also noted to be self harming and was referred urgently to Wishaw Resource Network; which is the local Psychiatric Service.

At various consultations, it has been noted that her children are well looked after and always well presented and that they all appear to be happy children.

On the 4th May 2016 she attended for a sick note and was diagnosed as suffering from anxiety. Up until that date, it would appear that her diagnosis was depression and although the two are often associated with each other, this is the first time that anxiety has been described as her main symptom. There is no recorded cause for this. She was commenced on Pregabalin for anxiety towards the end of June 2016 and there is an entry on the 17th August 2016 commenting that the Pregabalin was helping with her panic attacks and she was noted to be staying at home most of the time. On the 19th August 2016 she was commenced on Sertraline; a medication which is the first line therapy in general anxiety disorder. On the 14th October 2016 she was noted to be reducing her dose of Methadone and in that consultation Dr Curran noted that she had told her that her youngest child's father helps her a lot; although she was living on her own. On the 9th November 2016 she was noted to be struggling with anxiety which was thought to be due to the rapid reduction of her Methadone programme and it would appear from that entry that the reason for the speed in reduction was because Elizabeth wanted to reduce the dose herself. On the 29th November 2016 it is noted that she was completely clear of Methadone and had not used illicit drugs for approximately seven years. It is also noted that her anxiety was related to childhood sexual abuse. On the 31st March 2017 she was noted to have attended with Eva Rose and the baby and it is noted that, as always, the children were well turned out, happy and thriving.

There is mention made of the forthcoming case against a child who had allegedly interfered with Eva Rose and it is also noted that Elizabeth seemed genuinely concerned and upset for the children of the family of the alleged. She was also noted to be feeling more anxious than usual and was having trouble sleeping. On the 23rd May 2017 it is recorded that she had presented as, not coping and tearful, and had been made homeless; with three children to support and the only help that she had was her Social Worker. It would appear from her notes that the last attendance with her GP was on the 23rd May 2017. It also appears from her medical records that the last time she collected a prescription from the Surgery was on, or around, the 6th September 2017.

Throughout this period, Elizabeth has been attending Psychology and Wishaw Resource Network. There is correspondence in her file regarding various problems that she has had but I feel that this information should be sought from Psychology and Psychiatry separately. The Psychologist who has most recently been dealing with Elizabeth, is Doctor Isabel Traynor, Clinical Psychologist at Addictions Psychology Service which is based at Coathill Hospital in Coatbridge. She has also been attending Miss Gillian Wilson, Charge Nurse at Wishaw Integrated Addiction Service, Kings House, King Street, Wishaw, ML2 8BS and perhaps you may wish to seek information from them first hand.

I hope this information is helpful to you and to Elizabeth.

Yours sincerely

Paul D Flanigan

Consultant: Isabella Traynor

Dear Ms Wilson,

Patient Name: Elizabeth Wilson
Patient date of birth: 17/12/1987
Patient Address: 37 St Catherine's Crescent, Shotts, ML7 4JG

Thank you for referring the above named patient to the Addiction Psychology Service (APS).

As you are aware, I offered Ms Wilson an initial assessment appointment on 05.10.2017, to which she turned up 35 minutes late. During that appointment I gathered limited information and the discussion mainly focused on her current situation.

She told me that she has four children, three of which are in her care and one who resides with her mother.

She was visibly anxious throughout the appointment. She reported experiencing panic but did not give me too much information about this.

She said that her anxiety is not as bad as it was in the past. For instance, she said she never used to leave the house and would avoid people and places. However, because she has to get her children up and ready for school she has no choice but to leave the house and face her anxiety.

She described her mood as being 5 on an arbitrary scale of 0 to 10. She went on to describe her mood as erratic. She said that she can go from 0-100 in a matter of seconds and she also frequently cries out of the blue.

From her descriptions it would appear that she has a general negative view of self and also believes that others judge her in a negative way.

To cope, she said that she just tries to keep as busy as she possibly can and continues to avoid people. She reported intermittent use of self harming since age 12; mainly cutting her arms and legs.

During the brief appointment, she told me that she is currently preoccupied with her relationship with her ex-partner who is serving time in prison for domestic violence offences. She acknowledged that this relationship is unsafe and volatile. Despite this she was unclear whether she would reconcile with him when released from prison.

We agreed to meet again in a fortnight after our initial assessment appointment. However, Ms Wilson failed to attend (on 17.10.2017). Subsequently, she did not respond to a letter requesting that she get back in touch with the department.

Unfortunately, I, therefore, have no choice but to discharge her from the service.

Ms Wilson was referred to the APS approximately one year before her current referral and did not attend appointments offered to her at that time. As such, I would suggest that some further preparatory work is carried out before any subsequent re-referrals are considered, focussing on her motivation and, perhaps, helping her with her anxiety.

Consultation not coping fearful has been put home less acc. three kids no support, only help social worker, 'don't want to be here' no plans kids protective factor now off methadone and not used drugs, has been taking 50mg venlafaxine and 50mg of pregabalin at night and feels this is helping. 'DW would GP regarding incentive' Mrs Cheryl Hill

19/05/2017

Medication requested Last but not the 2 or 3/7 ago when she moved house. Requested 50mg pregabalin 100mg bid. See as reqd.

Dr Elaine Crossan

02/05/2017

Consultation worsening anxiety attack recent sexually assaulted by juvenile, so involved pheno inc venlafaxine to 225mg 3 times a day 1/12

Dr Saurabh Kumar

21/03/2017

Consultation Elizabeth was in today with Eva Rose & the baby, as always, the children were well turned out, happy & thriving. She has agreed with Social Work to close the case against the child who interfered with Eva Rose as there is a case against the boy in connection with his own siblings & she feels it would be more traumatic for Eva Rose. In fact, she seemed genuinely concerned & upset for all the children of that family. She feels more secure than usual & has trouble sleeping. Her venlafaxine was increased a couple of weeks ago & she has been referred back to Psychology. She says her social work support is very good, she's pregnant 10 weeks bid. See as reqd.

Dr Elaine Crossan

08/03/2017

Consultation review line struggles come at 0830 single mum 3 kids also mood low is off methadone & weeks now no sh thought, kids protective factor plan inc venlafaxine to 150mg first hand over assessed medication back in chemist

Dr Saurabh Kumar

14/02/2017

Failed encounter Dr Kumar - Monday 13/2/17 @ 2.30 p.m. - 2nd letter sent.

Mrs Denise Angus

20/01/2017

Telephone encounter not coping on pregab 50mg. Has been taking 50mg venlafaxine and 50mg of pregabalin at night and feels this is helping. 'DW would GP regarding incentive' Mrs Cheryl Hill

29/11/2016

Consultation now off methadone and not used drugs for 7 years anxiety relating to childhood sex abuse is underlying problem to win and try venlafaxine as venlafaxine not helping and she doesn't like them or feel good on them reduce pregab to 50 as feels unwell on 75 bid

Dr Paul Flanagan

29/11/2016

Consultation Given appt with me despite having explained to receptionist it was regarding her increased anxiety since stopping methadone and pregabalin being increased, says this is the first day she has been out the house for 2 weeks, doesn't like venlafaxine either - I apologised that I couldn't help but have given her an appt with gp later this morning and she is happy to come back.

Mrs Denise Angus

09/11/2016

Consultation T/C is reducing methadone quickly on her request / seen gillian drug counsellor from 5 mins to stopping in 1 week alone / gillian wanted her to do it slower struggling with anxiety which seems fairly natural also low back pain by pregab at 75 bids help both symptoms at venlafaxine at 100 mg as were prev working seen gillian on monday

Dr J Curran

05/11/2016

Failed encounter NP Angus - Thursday 3/11/16 at 11.15 - 1st letter sent.

Dr J Curran

14/10/2016

Consultation see previous - still a lot anxiety / finds it difficult to get out on pregabalin 50 bid still attends addiction and only on 8mg methadone on own / young girl's father helps alot increase venlafaxine re 1/12

Dr J Curran

19/08/2016

Consultation 13 mins late today! 'adv will not see if late again on mirtazapine but too sedating / doesn't want child support waits psychology by venlafaxine 50 re 1/2 pregab 50 bid helping anxiety alot

Dr J Curran

18/08/2016

Administration NOS arrived 12.15 mins late up town - will make another appointment

Dr Pauline Keegan

17/08/2016

Nurse telephone huge Pregabalin is helping with panic attacks but feels mirtazapine isn't helping, mood is low, not going out of house also makes feel drowsy, appt arranged with gp

Mrs Denise Angus

29/06/2016

Consultation came with her 3 youngest kids: she has 4; the oldest is 10 & lives with her grandparents. The kids were lovely, bright, lively, well behaved & seemed well cared for. Has just started mirtazapine & is waiting to see Psychiatrist. A friend gave her some pregabalin 50mg, to help with anxiety: she has been taking 1 bid & says she feels a bit better. Wondered if she could have some on Rx. I don't have any objection to this.

Dr Elaine Crossan

15/06/2016

Consultation 10 mins late appt apologised stopped going to psychiatrist as he was married and won't see as attends addiction home addiction issues according to patient, so then for 7 years still on methadone explained that the addiction team have access to psychiatry and psychology on paroxetine 20 mg from psychiatry / seems off worried this can be difficult then start mirt 15 / been on this bid and worked but was sedating at higher dose agreed to try continue re 1/12 advised to seek psychology from addictions team

Dr J Curran

14/06/2016

Telephone encounter Feels paroxetine ineffective, has stopped seeing psychiatry/psychology because they are male, was directed towards addictions services but says this is not required. Female Dr appt.

Mrs Euan Grant

03/06/2016

Administration NOS asked patient if any allergies / she said no / Rx

Mrs Rosalind Dundas-Laing

03/06/2016

Consultation no pos mirtazapine

Dr J Curran

04/05/2016

Consultation see image only saw psychiatrist yesterday but it was a different one and didn't want to see him - they were going to send out an appointment for her usual. Doc also missed her psychology appointment last week as son unwell - going back 12/5/16/15 says panic symptoms esp when outside chat - re importance of psychology and this may not be able to sort all symptoms 1st bid

Dr Pauline Keegan

04/05/2016

Telephone encounter Psychiatry appt yesterday, different clinician, Lic-An didn't want to talk with. Has psychology appt 12th May, wishes Dr appt. Feels antidepressant ineffective.

Mrs Euan Grant

06/04/2016

Consultation saw psych 3/32 ago - doesn't feel the paroxetine 10mg are helping feels anxious all the time increase to 20mg appt not improving re - advised we wouldn't add in meds or up if any further and if not settling we'd need to contact Psychology to dietitian next week

Dr Pauline Keegan

01/04/2016

Failed encounter Dr Saurabh Kumar - no letter sent as phoned to apologise.

Dr Pauline Keegan

31/03/2016

Telephone encounter missed appointment this am - with Dr Saurabh then phoned and apologised but wanted to speak to GP phoned her back - answer machine left message to re-book tel appointment

Dr Pauline Keegan

31/03/2016

Failed encounter Rx treatment course 16/03/16 blood test

Mrs Sharrine Mowle

10/02/2016

Administration NOS Script for paroxetine at Denny chemist they will return it to surg pt. Patient informed.

APPLICATION TO REGISTER PERMANENTLY WITH A GENERAL MEDICAL PRACTICE

1. PERSONAL DETAILS (ALL FIELDS MARKED * ARE MANDATORY AND MUST BE COMPLETED AS FULLY AS POSSIBLE)

Male ☐ Female ☒ Is this your first registration with a GP Practice in the UK? Yes ☐ No ☒ Will you be in the area for more than 3 months? Yes ☒ No ☐
(If 'No', please complete a temporary resident form)

Date of Birth* 11/12/89 Address* 37 St Catharine's cres
Title* MISS
Surname* Wilson
Forenames* ELIZABETH Postcode* ML7 4JG
Previous Surname* Telephone #
email address # Mobile # 07930162954
The following information can be found on your current medical card:
Community Health Index (CHI) Number* NHS Number*

The following information can be found on your birth certificate:

Town of Birth* Warrack Country of Birth* UK
Registered district of birth (Scotland only) Mother's maiden name Wilson

the data supplied in these fields will not be input to, or updated in, the Community Health Index (CHI), but will be held on the GP Practice's system

2. HELP US TO TRACE YOUR PREVIOUS GP HEALTH RECORDS BY PROVIDING THE FOLLOWING INFORMATION

Address in UK when you were last registered with a GP* Name and address of previous GP Practice in UK*
5 Wishawhill St Wishaw Dr Morphy Wishaw
Postcode* ML2 3PJ Postcode*

If you are from abroad:

Date you first came to live in the UK* DD MM YYYY If previously resident in the UK, date of leaving* DD MM YYYY
Your most recent country of residence

If you have served in the British Armed Forces:

Enlistment date* DD MM YYYY Service Number
Are you a Reservist? Yes ☐ No ☒ If yes, please provide your address before enlisting*
Leaving date* DD MM YYYY
Is this your first registration with a GP since leaving the Armed Forces? Yes ☐ No ☒ Postcode*

3. VOLUNTARY AUTHORISATION FOR ORGAN OR TISSUE DONATION

I would like to join the NHS Organ Donor Register as someone whose organs may be used for transplantation after my death. Please tick the boxes that apply. Your consent to organ donation will be shared with NHS Blood and Transplant together with the information you have provided in Section 1 including your name, gender, date of birth address and CHI number. For more information on being an organ donor or privacy, please ask for the leaflet on joining the NHS Organ Donor Register or visit www.organdonationscotland.org

Any of my organs and tissue ☒ Or my
Kidneys ☐ Eyes ☐ Heart ☐ Lungs ☐ Liver ☐ Pancreas ☐ Small bowel ☐ Tissue ☐

Notes on tissue - heart valves and corneas come under the 'heart' and 'eyes' boxes respectively so the 'tissue' box covers donating other types of tissue, such as your tendons

Patient signature E. Wilson

4. HOW WE USE YOUR INFORMATION

The information you have provided will be used by the GP Practice to carry out its various functions and services including scheduling appointments, ordering tests, hospital referrals and sending correspondence.

Your information, including your name, gender, date of birth and address, will be passed to NHS National Services Scotland where it will be held on the Community Health Index (CHI). This information is used to register you with the GP Practice, transfer your medical records between GP practices in the UK, make payments to GP Practices for medical services provided, and to process and issue medical cards, medical exemption certificates and entitlement cards.

NHS National Services Scotland shares information about you within NHSScotland to assist in the provision and improvement of NHS services and the health of the public. When we do this, we make sure that the information which identifies you as a person and your health information are separated or anonymised. Health condition and treatment information which could identify you will not be used for research purposes by the NHS unless you have consented to this.

For more information on how NHS National Services Scotland uses your personal information visit www.nhs.uk. If you have any queries or concerns about how your personal information is used by the NHS please ask for the leaflet 'Confidentiality - it's your right', visit the NHS Inform website at www.nhs.uk/infom or ask your GP surgery.

NHS National Services Scotland is the common name of the Common Services Agency for the Scottish Health Service.

5. PATIENT DECLARATION

I declare that the information I have given on this form is correct and complete. I understand that, if it is not, appropriate action may be taken.

To enable NHS National Services Scotland to confirm my eligibility to lawfully register with a GP and for the purposes of prevention, detection, and investigation of crime, relevant information from this form will be disclosed to the NHS Business Services Authority, NHS National Services Scotland, the Home Office, Identity and Passport Service, HM Revenue and Customs, the General Register Office and Local Authorities.

SHOULD YOU BE TESTED FOR BLOOD BORNE VIRUSES? (Hepatitis B or C, HIV)

Blood borne viruses are infectious and can lead to various problems including liver disease. The virus is found in the blood of persons who have this type of infection and is spread through contact with the blood of an infected person. This may result from sexual contact, the use of contaminated needles or equipment or receiving a transfusion of infected blood or blood products before 1992. Treatment is available for these infections.

Testing for blood borne infection is an enhanced medical service provided by the Practice to those deemed at increased risk of contracting this type of infection, supported by NHS Lanarkshire.

The following statements will help determine if you should be tested for blood borne infection. You can check any box that applies to you.

- ☐ I am in one of the following groups, but I have been tested and have been at no further risk since then
- ☐ I am in one of the following groups, but I do not wish to disclose which one
- ☐ I have injected recreational drugs and/or used cocaine (even if it was only once or many years ago)
- ☐ I received blood clotting factor concentrate manufactured before 1987 (e.g. for haemophilia)
- ☐ I received a blood transfusion or organ transplant before 1992
- ☐ I received a blood product from a donor who later tested HIV, Hepatitis C or B positive
- ☐ My mother has/had HIV, Hepatitis B or C
- ☐ I have a sexual or household contact that is positive for HIV, Hepatitis B or C
- ☐ I have or have had a sexually transmitted infection
- ☐ I am a man who has had sex with another man
- ☐ I have had multiple sexual partners
- ☐ I have HIV or Hepatitis B or Hepatitis C infection
- ☐ I or my family originate from a part of the world where HIV, Hepatitis B or C is more common
- ☐ I have had medical or dental care in a country where HIV, Hepatitis B or C is more common
- ☐ I have had tattoos or body piercing in circumstances where infection control methods have not been ideal (e.g. the use of contaminated equipment)
- ☒ Not applicable

If you have ticked any of the above Practice Nurse Sharon Ghani can discuss this with you in confidence (in person or by telephone) or you can contact Family Planning/Sexual Health services by calling 0300 303 0251.

Dear Dr Arnott

Re: Elizabeth Wilson
CHI: 1712875027

I am writing with an update on the above.

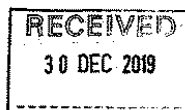

Prescription details: Methadone 65mls daily from Lloyds Town Clock Pharmacy Wishaw
Progress: Elizabeth is currently on maintenance dose of Methadone, she engages well with service. Recently open to Children and Families Social work Team for support – due to losing house in Shotts, moved to Wishaw for short period of time in temp accommodation, and is now in Permanent Accommodation in Shotts again. Elizabeth will continue to be seen monthly in clinic.

I would be most grateful if you could send me a list of the above patients prescribed medication.

If you require any further information please do not hesitate to contact the team.

Yours Sincerely,

Jennifer Scott

Date: 30 September 2020

Dear Practice,

Elizabeth Wilson CHI: 1712875027 137 Springhill Road Shotts ML7 5HH

We are writing to update you on your patient's treatment; they are currently in receipt of Opiate Agonist Therapy via NHS Lanarkshire Addiction Services. Please find attached a report of recently prescribed medication from our service for your information.

We would like to request that you add their Opiate Agonist Therapy to your records as an outside practice repeat medication. This will allow this therapy to show on the patient's Emergency Care Summary (ECS) and also allow the practice to monitor for potential drug interactions with other prescribed medication.

NHS Lanarkshire Addiction Services would also ask your practice to take the opportunity to review the prescribing of potential medication of misuse in your patient. Drugs such as benzodiazepines, opiates, and gabapentinoids have been increasingly implicated in Drug Related Deaths. Such medication, if clinically appropriate, should be prescribed at the lowest dose possible and reviewed regularly. If there is no longer a clinical need for the medication, then please consider tapering and then stopping this. Where any risk of misuse is identified, consideration should be made to supplying these prescriptions in instalments.

We will endeavor to keep you updated on the progress made by your patient, however please contact the patient's key worker within the local CARES/ART team in the first instance if you have any questions regarding your patients care or to update them on any significant changes to their prescribed medication.

Yours sincerely,

Dr. Steve Conroy,
Lead General Practitioner,
On behalf of the Community Prescribing Service.

OST Update for GP

OST Update for GP

Dear Doctor,

Please find below the last 12 items prescribed for this patient by NHS Lanarkshire Addiction Services.

NHS Lanarkshire Addiction Services request that their regularly prescribed Opiate Agonist Therapy is added to your practice records as an out of practice repeat to allow this to highlight potential drug interactions and to ensure that this information is on the patients Emergency Care Summary (ECS) to allow continuation of medication if the patient is admitted to hospital.

Tel No: 01236 707157
Date: 09 April 2021

Dear Practice,

Elizabeth Wilson CHI: 1712875027 137 Springhill Road Shotts ML7 5HH

We are writing to update you on your patient's treatment; they are in receipt of Opiate Agonist Therapy via NHS Lanarkshire Addiction Services. Please find attached a report of recently prescribed medication from our service for your information.

We would like to request that you add their current therapy to your records as an outside practice repeat medication. This will ensure our prescribing is listed on the patient's Emergency Care Summary (ECS) and will also enable the practice to monitor for potential drug interactions with other prescribed medication. The current dose should not be annotated on the prescription as the practice will not be informed of dose changes, and this has the potential for error if a patient is admitted to hospital and the dose has not been updated.

NHS Lanarkshire Addiction Services would also ask your practice to take the opportunity to review the prescribing of potential medication of misuse in your patient. Drugs such as benzodiazepines, opiates, and gabapentinoids have been increasingly implicated in Drug Related Deaths. Such medication, if clinically appropriate, should be prescribed at the lowest dose possible and reviewed regularly. If there is no longer a clinical need for the medication, then please consider tapering and then stopping this. Where any risk of misuse is identified, consideration should be made to supplying these prescriptions in instalments.

We will endeavor to keep you updated on the progress made by your patient, however please contact the patient's key worker within the local CARES/ART team in the first instance if you have any questions regarding your patients care or to update them on any significant changes to their prescribed medication.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Steve Conroy".

Dr. Steve Conroy,
Lead General Practitioner,
On behalf of the Community Prescribing Service.

Data from page 1 of this form may be collected to learn about national patterns of sickness absence. Individuals will not be identified. Find out more at www.gov.uk/dwp/fit-note-data

Help getting back to work if you are employed

If you've been off work or are likely to be off work sick for 4 weeks or more, you may be able to have a free occupational health assessment. You will be able to discuss what advice and support you need to help you go back to work sooner. You can ask your GP or employer to refer you. For further information:

- in England and Wales visit www.fitforwork.org or phone 0800 032 6235
- in Scotland please visit www.fitforworkscotland.scot or phone 0800 019 2211.

What your doctor's advice means

You are not fit for work: Your health condition means that you may not be able to work for the period shown. You can go back to work as soon as you feel able to and, with your employer's agreement, this may be before your fit note runs out.

You may be fit for work: You could go back to work with the support of your employer. Sometimes your employer cannot give you the support you need and if this happens your employer will treat this form as though you are 'not fit for work'. You don't need to get another of these forms from your doctor.

For more information please visit www.gov.uk and type 'patients and employees' into the search field.

Fill in the **Your details** section. You can ask someone to do this for you if you cannot fill in your details yourself.

Your details – Please use BLOCK CAPITALS

What you need to do now

- If you are employed, please show this form to your employer. You could get Statutory Sick Pay (SSP) which is paid by your employer. If your employer cannot pay you SSP they will give you SSP1 to claim benefits.
- If you are self-employed, you could claim benefits.
- If you are already claiming benefits, please send this form to the office dealing with your claim.
- If you need to make a claim to benefits, visit www.gov.uk/browse/benefits or phone 0800 055 6688 (8am to 6pm Monday to Friday) or textphonerevsrcll 0800 023 4888.

Dear Elizabeth Wilson

Patient Name: Elizabeth Wilson
Patient date of birth: 17/12/1987
Patient Address: 137 Springhill Road, Shotts, ML7 5HH

VIRTUAL FRACTURE CLINIC

Diagnosis : Left displaced proximal humerus fracture - 25th October 2021.

Treatment : Collar and cuff and follow-up one week for careful clinical assessment and repeat x-rays of left shoulder.

Your A&E summary and x-rays were reviewed in the Orthopaedic Virtual Fracture Clinic today. Unfortunately, your full A&E notes haven't reached us yet. I understand that you fell down some concrete steps injuring your left shoulder. You have sustained a left proximal humerus fracture. The bone is broken in several pieces and the position displaced.

This injury will be very painful and I hope A&E have given you some strong painkillers. If these are not helping I would advise contacting your GP who would be able to give you some stronger painkillers. We would encourage you to wear the collar and cuff sling that they have given. You should really try and prevent any movement of the shoulder currently until the pain settles down.

We are going to bring you back to the Fracture Clinic next week to re-assess you and take some further x-rays. If the position is improved then we can carry on treating your injury with just the sling. If the position has worsened on x-ray then we may need to discuss the possibility of surgery.

Yours sincerely

RE: WILSON, Elizabeth, 137 SPRINGHILL ROAD , , Shotts ML7 5HH

CHI: 1712875027

Dear Doctor S Arnott ,

Your patient attended University Hospital Wishaw on 25/10/2021 at 16:05

The presenting complaint was: fall-face & left arm injuries

Diagnosis:

Diagnosis Notes:

Investigations:

Radiology Exams:

Procedures:

Medications:

Follow up:

Notes:

**Additional
Information:**

Presented to ED with significant pain in left shoulder after a fall. She states this fall was after consuming alcohol excess with a friend at home. As a result of this and an argument with her friend, she fell down several concrete stairs. Swollen left shoulder and tender to palpation over proximal humerus and anterior aspect of shoulder joint. Nil other injuries and no head injury. L arm neurovascularly intact. XR confirms undisplaced humeral fracture. Treated in collar and cuff as per consensus document and discharged with analgesia and virtual fracture clinic referral.

Yours faithfully
Sophie Everitt

Dear Elizabeth Wilson

Patient Name: Elizabeth Wilson
Patient date of birth: 17/12/1987
Patient Address: 137 Springhill Road, Shotts, ML7 5HH

You failed to attend your second Fracture Clinic appointment for your left proximal humerus fracture. I sent you a letter last week as well but you may not have received it yet when you failed to attend the first appointment.

I have phoned the number that we have got saved on your hospital notes today and there was no answer. I have left a voicemail asking you to phone back the Fracture Clinic. If you receive this letter and still wish to have care under the orthopaedic team at Wishaw General Hospital I would be grateful if you could contact us and a further appointment will be arranged. I haven't sent out a routine appointment currently as clearly they are not reaching you.

Yours sincerely

Miss Elizabeth Crighton
Consultant Orthopaedic Surgeon

Dear Dr Arnott,

Discharge Summary

Patient Name: Elizabeth Wilson
Patient date of birth: 17/12/1987
Patient Address: 31 Tírce Crescent, Newmains, Wishaw, ML2 9HF
Date of admission: 16/01/2022
Date of discharge: 16/01/2022

Diagnosis - Probable pancreatitis

Co-Morbidities Previous IV drug misuse (Methadone)
 Anxiety
 Recent fracture left humerus
 Smoker
 Previous renal calculi

Discharge Medication: As per HEPMA IDL

Follow up: As below

This 34-year old lady presented to the Emergency department with a history of abdominal pain and vomiting. By the time of attendance she was clinically well and examination was reassuring, other than epigastric tenderness. Routine bloods were on the whole within normal limits, other than a raised amylase. Her CXR and ECG were unremarkable, as was her urinalysis.

The Emergency Department were concerned that Elizabeth may have been suffering from pyelonephritis, although she had no real urinary symptoms or evidence of sepsis to support this. She was admitted to the medical unit where we arranged imaging of her abdomen which suggested a possible pancreatic pseudocyst. She was reviewed by the surgical team who were happy she could be discharged home with follow-up in their Ambulatory Care unit.

Yours sincerely

Dr Greig Loudon
 Consultant Acute Physician

Dear Dr Arnott,

Discharge Summary

Patient Name: Elizabeth Wilson
Patient date of birth: 17/12/1987
Patient Address: 137 Springhill Road, Shotts, ML7 5HH
Date of admission: 18/01/2022
Date of discharge: 21/01/2022

Diagnosis - Likely delayed presentation of pancreatitis

Procedure:

Co-Morbidities

1. Ex-IVDU on Methadone
2. Depression
3. Anxiety

Your patient's admission is well summarised in her immediate discharge letter. Following a recent discharge from the medics where she had a CT KUB that showed some cysts around her pancreas she was advised to return to the SACU for a contrast CT scan which had shown three simple appearing cysts within her upper abdomen, two appearing to arise from the uncinate process of the pancreas which most likely would be post inflammatory in nature although her pancreas was grossly normal. Of note her serum amylase was mildly raised during her admission and on her initial presentation to the medics.

She was admitted from SACU as she was feeling generally unwell and unable to tolerate much oral diet and therefore was commenced on IV fluids, antiemetics and Creon. She had an ultrasound scan to look for any evidence of gall stones which was normal, however showed her CBD was slightly dilated. Of note her liver function tests were normal during her admission.

When we were happy that she was managing to tolerate oral diet she was discharged home with Creon and a plan for an out-patient MRCP. We will be in touch following the results of her MRCP.

Many thanks,

Discharge Medication:

To: S ARNOTT BURNBRAE MEDICAL PRACTICE	Re: ELIZABETH WILSON 31 THREE CRESCENT, NEWMAINS, WISHAW, LANARKSHIRE, ML2 9HF DOB: 17/12/1987 Hosp. No.: CHI No.: 1712875027
--	---

Date of Admission: 15/01/2022 **Ward:** WG ECU
Mode of Admission: **Consultant:** Dr Greig Loudon (GENERAL MEDICINE-A1)
Admission Reason: Flank Pain
Discharge Date: 18/01/2022 **Follow Up:**

Co-Morbidities PMH:
 Previous IVDU
 Low Mood
 Anxiety

Clinical Progress This 34 year old presented with a 2-3/7 hx of right flank pain, against a 2/52 history of decreased oral intake. History elicited from patient was that of severe right flank pain, which radiated from the back to the front of the abdomen. The patient also stated that they had decreased bowel movements, and had also been vomiting. Admission bloods showed an amylase of 151. Initial clinical impression was of pyelonephritis. CT KUB was performed, which showed incidental findings of a lesion on the head of the pancreas, and one further lesion on the tail of the pancreas. Following surgical review, clinical impression was of a pancreatic pseudocyst. Surgical plan was therefore for the patient to return to SACU on 18/1/22 for bloods and CTAP w/ contrast. Patient aware of plan and is in agreement.

Dear Practice,

Elizabeth Wilson CHI: 1712875027 137 Springhill Road Shotts ML7 5HH

We are writing to update you on your patient's treatment; they are in receipt of Opiate Agonist Therapy via NHS Lanarkshire Addiction Services. Please find attached a report of recently prescribed medication from our service for your information.

We would like to request that you add their current therapy to your records as an outside practice repeat medication. This will ensure our prescribing is listed on the patient's Emergency Care Summary (ECS) and will also enable the practice to monitor for potential drug interactions with other prescribed medication. The current dose should not be annotated on the prescription as the practice will not be informed of dose changes, and this has the potential for error if a patient is admitted to hospital and the dose has not been updated.

NHS Lanarkshire Addiction Services would also ask your practice to take the opportunity to review the prescribing of potential medication of misuse in your patient. Drugs such as benzodiazepines, opiates, and gabapentinoids have been increasingly implicated in Drug Related Deaths. Such medication, if clinically appropriate, should be prescribed at the lowest dose possible and reviewed regularly. If there is no longer a clinical need for the medication, then please consider tapering and then stopping this. Where any risk of misuse is identified, consideration should be made to supplying these prescriptions in instalments.

We will endeavor to keep you updated on the progress made by your patient, however please contact the patient's key worker within the local CARES/ART team in the first instance if you have any questions regarding your patients care or to update them on any significant changes to their prescribed medication.

Yours sincerely,

Dear Practice,

Elizabeth Wilson CHI: 1712875027 31 Tírree Crescent Newmains ML2 9JA

We are writing to update you on your patient's treatment; they are in receipt of Opiate Agonist Therapy via NHS Lanarkshire Addiction Services. Please find attached a report of recently prescribed medication from our service for your information.

We would like to request that you add their current therapy to your records as an outside practice repeat medication. This will ensure our prescribing is listed on the patient's Emergency Care Summary (ECS) and will also enable the practice to monitor for potential drug interactions with other prescribed medication. The current dose should not be annotated on the prescription as the practice will not be informed of dose changes, and this has the potential for error if a patient is admitted to hospital and the dose has not been updated.

NHS Lanarkshire Addiction Services would also ask your practice to take the opportunity to review the prescribing of potential medication of misuse in your patient. Drugs such as benzodiazepines, opiates, and gabapentinoids have been increasingly implicated in Drug Related Deaths. Such medication, if clinically appropriate, should be prescribed at the lowest dose possible and reviewed regularly. If there is no longer a clinical need for the medication, then please consider tapering and then stopping this. Where any risk of misuse is identified, consideration should be made to supplying these prescriptions in instalments.

We will endeavor to keep you updated on the progress made by your patient, however please contact the patient's key worker within the local CARES/ART team in the first instance if you have any questions regarding your patients care or to update them on any significant changes to their prescribed medication.

Yours sincerely,

Dr. Steve Conroy,
Lead General Practitioner,
On behalf of the Community Prescribing Service.

Dear Doctor,

Please find below the last 12 items prescribed for this patient by NHS Lanarkshire Addiction Services.

NHS Lanarkshire Addiction Services request that their regularly prescribed Opiate Agonist Therapy is added to your practice records as an out of practice repeat, WITHOUT A DOSE, to allow this to highlight potential drug interactions and to ensure that this information is on the patients Emergency Care Summary (ECS) to allow continuation of medication if the patient is admitted to hospital.

Consultant: Emily Louise Ross

Dear Dr Arnott

Patient Name: Elizabeth Wilson
Patient date of birth: 17/12/1987
Patient Address: 48 Tinto Crescent, Wishaw, ML2 8JA

I reviewed this patient in my outpatient dietetic clinic on 1st August 2023.

When I spoke with Ms Wilson she informed me that she is experiencing ongoing vomiting and hence is struggling to keep foods and medications down. This has been ongoing for the last four weeks. She informs me that she is not currently on antiemetics and feels she would benefit from these with ongoing nausea and vomiting, and I would appreciate if you could review her and assess indication for these.

She has been managing small amounts of toast and soup and so I have advised her to opt for bland and dry foods as well as cold and smooth foods as these are often better tolerated with nausea and vomiting, and she said she thinks she will manage these.

She is currently taking Ensure Compact twice a day and she has been managing to keep these down. I therefore advised her to increase this to three to four times a day while her intake is very poor to try to maximise her nutritional status and minimise nutritional losses.

Ms Wilson says she is managing to drink plenty of fluids. I have discussed the importance of increasing her fluid intake due to increased fluid losses with vomiting. She informed me that she is due to have blood tests soon which may help to indicate if she is dehydrated.

I would appreciate if you could review this patient regarding her ongoing vomiting throughout her pregnancy.

I will continue to review this patient in my outpatient dietetic clinic. If you have any further queries or concerns please do not hesitate to contact me.

Yours sincerely

Emily Louise Ross

Dear Dr Arnott

Patient Name: Elizabeth Wilson
Patient date of birth: 17/12/1987
Patient Address: 48 Tinto Crescent, Wishaw, ML2 8JA

I apologise you've not had a booking letter regarding Elizabeth's current pregnancy. Elizabeth is a 35-year-old para 4+1 with an agreed EDD of the 1st of November 2023. She is a significantly vulnerable mother with a history of bipolar disorder as well as substance abuse and PTSD. She is cared for jointly with the LAMS midwives and addiction services. She is on methadone. She has had appropriate referrals to social work. She has custody of one of her children, Ava-Rose, who is 10 years old. Obstetrically, her baby is growing normally. She requires iron 200mg ferrous sulphate once a day. Thank you for prescribing this. We are reviewing her in the consultant lead clinic as well as regularly through her community midwifery clinic and the LAMS services due to her risk factors. There will be a post-birth case conference as this baby is currently on the child protection register, with regards to appropriate postnatal care of the baby.

Yours sincerely

Dr Ellie Jarvie, MB ChB, MRCOG, PhD

Dear Catrina Hayward

Patient Name: Elizabeth Wilson
Patient date of birth: 17/12/1987
Patient Address: 48 Tinto Crescent, Wishaw, ML2 8JA

Neonatal Pre-Birth Case Discussion 26 September 2023

Situation

I had a telephone consultation with the above named lady; 35-year-old para 4+1 gravida 6, EDD 01 November 2023 at 34+6 weeks' gestation.

Background

- Mental health illness (Bipolar disorder, previous Postnatal depression, PTSD) – under secondary Psychiatry Care.
- History of IVDU – (cocaine and benzodiazepine) – on methadone drug rehabilitation programme
- Significant social issues – unborn child on Child Protection Register (August 2023)

Assessment

She reported that she has remained on treatment with oral methadone, 50mg once daily, oral Pregabalin 150mg once daily, oral mirtazapine, 45mg once daily and Creon for management of her pancreatic insufficiency. She did not have any concerns regarding her ongoing pregnancy and seemed oblivious of input that she has had from Social Services Team during this pregnancy.

We discussed her infant's risk of Neonatal Abstinence Syndrome (NAS), including its clinical presentation and management and the need for infant to be monitored initially in hospital for up to 96 hours prior to discharge from hospital. She seemed very familiar with the information that I shared with her, following previous contact with her other children.

Recommendation

She does not require any further follow up appointment with me and the care of her infant after birth will be undertaken with routine input from the Neonatal Team as required.

Yours sincerely

Dr R Abara
Consultant Neonatologist
GMC 4442501

Date: 04 March 2024

Dear Practice,

Elizabeth Wilson CHI: 1712875027 31 Tiree Crescent Newmains ML2 9JA

We are writing to update you on your patient's treatment; they are in receipt of Opiate Agonist Therapy via NHS Lanarkshire Addiction Services. Please find attached a report of recently prescribed medication from our service for your information.

We would like to request that you add their current therapy to your records as an outside practice repeat medication. This will ensure our prescribing is listed on the patient's Emergency Care Summary (ECS) and will also enable the practice to monitor for potential drug interactions with other prescribed medication. The current dose should not be annotated on the prescription as the practice will not be informed of dose changes, and this has the potential for error if a patient is admitted to hospital and the dose has not been updated.

NHS Lanarkshire Addiction Services would also ask your practice to take the opportunity to review the prescribing of potential medication of misuse in your patient. Drugs such as benzodiazepines, opiates, and gabapentinoids have been increasingly implicated in Drug Related Deaths. Such medication, if clinically appropriate, should be prescribed at the lowest dose possible and reviewed regularly. If there is no longer a clinical need for the medication, then please consider tapering and then stopping this. Where any risk of misuse is identified, consideration should be made to supplying these prescriptions in instalments.

We will endeavor to keep you updated on the progress made by your patient, however please contact the patient's key worker within the local CARES/ART team in the first instance if you have any questions regarding your patients care or to update them on any significant changes to their prescribed medication.

Yours sincerely,

Dr. Steve Conroy,
Lead General Practitioner,
On behalf of the Community Prescribing Service.

OST Update for GP

OST Update for GP

Dear Doctor,

Please find below the last 12 items prescribed for this patient by NHS Lanarkshire Addiction Services.

NHS Lanarkshire Addiction Services request that their regularly prescribed Opiate Agonist Therapy is added to your practice records as an out of practice repeat, WITHOUT A DOSE, to allow this to highlight potential drug interactions and to ensure that this information is on the patients Emergency Care Summary (ECS) to allow continuation of medication if the patient is admitted to hospital.

Dear Dr Arnott,

Re: Name: Elizabeth Wilson
DOB: 1712875027

CHI No: 1712875027

Your patient, named above, had a medical assessment carried out with Lanarkshire Addiction Recovery Team (ART).

The assessment was carried out;

By Dr Claire Nugent and Ashleigh Andrews

On 01/05/24

At Stewarton House, Wishaw

Lizanne was admitted to hospital last week due to a significant drug overdose. Her son found her unresponsive and phoned 999. She left hospital against medical advice.

She remains on **Methadone 50mls daily**.

She will continue to have regular contact with her named nurse above and has ongoing social work input.

I should be obliged if you could inform us of any significant medication changes and consider the risk of drug overdose when prescribing.

Yours sincerely

Dr Claire Nugent

Team

Psychiatric Liaison Nursing
Service (PLNS)

Caitlin Kerr - Charge Nurse - General Psychiatry (Mental illness)

Situation:

Referral received this afternoon by ED medic Dr Alanaeem. Self-presented to ED with friend Angela following suicidality and self-inflicted wound to neck by razor. Wound superficial, requiring no treatment. Self-harm act carried out in the home of her Friend, Lizanne then disclosed same. Lizanne reports that she also disclosed suicidal ideation to social work today also. Social work also requested welfare check to be carried out following disclosure of suicidal ideation. Police responded however did not escort Lizanne to hospital as with friend.

PLNS attempted to assess Lizanne at 5pm this evening however due to over sedation this was not possible. Lizanne provided contradictory information regarding substance misuse, reporting alcohol early hours of this morning and also street Valium however later denied same.

Staff revisited at 9pm for purpose of assessment. Assessed by C. Kerr in relatives' room. Lizanne still slightly sedated at this point however coherent. Able to consent to assessment, fully orientated and able to engage in assessment process.

Background:

Currently open to Wishaw addictions services for support with alcohol and substances.

Social work input. Five children who are not currently under her care. Four children recently removed from her care which has since exacerbated drug use.

History of self-harming by cutting. Lizanne reports that has been a coping strategy for many years, stating that she feels relief following same. History of overdose.

Lizanne reports longstanding issues with low mood, and suicidal ideation since her teen years.

Good support from her Friend Angela.

History well documented electronically therefore will not repeat at length.

NHS Confidential. Personal data should be deleted

02/07/2024 22:49

Caitlin Kerr - Charge Nurse - General Psychiatry (Mental Illness)

Assessment:

Writer assessed Lizanne in relatives' room ED UHW. Upon arrival Lizanne required to be roused by writer to partake in assessment. Slightly sedated however more alert as assessment progressed, able to consent to assessment and engage in same. Lizanne presents as a slim female, dark brown hair dressed casually in hoodie and leggings. Appeared fairly well kempt, with hair tied back. No overt evidence of self neglect, nil malodour. Speech was of normal rate and tone, slightly hoarse. Orientated to TTP, with mini mental state examination briefly carried out to ensure appropriateness to progress with assessment. Nil evidence of distress/agitation throughout. No issues with cognitive function noted, able to provide timeline of decline in mental state and recent events leading to same. No evidence of perceptual disturbances. No evidence of illness which would impact decision making ability or capacity. Mood appeared flat, reactive at times when discussing her children. Pleasant and appropriate throughout assessment process.

Lizanne relayed events leading to ED presentation. She discussed how she had self harmed whilst at her Friends home, disclosing this to friend who then contacted services. Lizanne reports that she had also voiced suicidal ideation to social work which had prompted welfare check. Lizanne was unable to cite any apparent trigger for decline in mental state however as assessment progressed she was able to identified removal of her children as potential trigger. She advised that she had come to the hospital for "help". She reports that her friend had since left the department as she was caring for her son this evening. Describes friend Angela as a good support.

Lizanne was able to recognise the impact that social stress was having on her mood/mental state at present. She also displayed insight into negative impacts that alcohol/substances have on mental state discussing that she was keen to reduce same and was working with addictions service for this purpose. She appeared future focused when discussing her children, stating that she is aiming to regain custody. Reports enjoying time spent with children and advised that they "keep her busy" referring to maintaining routine/structure to her days.

Lizanne was reluctant to discuss drug use providing conflicting account of last usage. She reports alcohol in the early hours of this morning however denies any substances. Previous documentation also conflicts Lizanne's reported usage.

NHS Confidential. Personal data should be deleted

02/07/2024 22:49

Caitlin Kerr - Charge Nurse - General Psychiatry (Mental illness)

Lizanne generally dismissive of impact this was currently having on mental state which to be primary issue at present with low mood being secondary to same. We discussed benefits of reducing same, and how she would gain more benefit from treatments offered when able to meaningfully able to engage in same.

Lizanne discussed suicidality. Throughout assessment there was no acute risk of harm to self identified, with Lizanne presenting as future focused and displaying insight into current issues. She agreed that most appropriate services were in place to support her at present. Lizanne then stated that she "could not go home". When asked to elaborate she advised that she wanted "to be around others", alluding to hospital admission. We discussed the role of hospital admission and what Lizanne would feel the benefit to same would be. She advised that she would like to be in other peoples company. Discussed how this was not the role of inpatient admission. Lizanne then stated to writer "well I don't want to talk anymore" when admission not offered. We discussed accountability for individual safety which Lizanne was dismissive of. She did not voice active suicidal plan or intent, instead disgruntled with admission not being offered stating "can i go now", unwilling to engage in further dialogue. Reiterated OOH support available should same be required.

PLNS will update wishaw addictions service of ED presentation. No active suicidality at time of assessment, with future planning evidenced throughout. Lizanne has displayed help seeking behaviours by self presenting to ED for treatment/assessment and reaching out to SW and Friend earlier today disclosing suicidal ideation. At this time the most appropriate services are in place to best support Lizanne with no onward referral required at this time. No role for inpatient admission in the absence of acute mental illness. Social stressors exacerbated by alcohol/substances remain to be primary issue at present.

Risk:

Please see updated risk assessment

Recommendation:

No requirement for inpatient admission in the absence of acute mental illness. Presentation in-keeping with alcohol/substance misuse. Ongoing social stressors with removal of children in recent days has exacerbated drug use. Lizanne reports fleeting thoughts of suicide however no active plan or intent with strong

02/07/2024 22:49

Caillin Kerr - Charge Nurse - General Psychiatry (Mental illness)
evidence of future planning throughout assessment discussing how she would like to regain access to children and reduce substance use. No active risk identified however Lizanne remains medium risk due to substance misuse. Lizanne agreeable for PLNS to update her own team (addictions) and request contact tomorrow. Lizanne keen for hospital admission, however could not articulate why she would find this helpful instead stating that she would like to be around other people. Explained that this was not the role/function of hospital admission therefore not appropriate. Lizanne appeared to understand rationale. Explained routes to services should she require support within OOH period.

Burnbrae Medical Practice
Health Centre
36 Station Road
Shotts
ML7 5DS

Your Ref: 1712875027
Contact: Community Prescribing Service
Tel No: 01698 753839
Date: 19 September 2024

Dear Practice,

Elizabeth Wilson CHI: 1712875027 31 Tیره Crescent Newmains ML2 9JA

We are writing to update you on your patient's treatment; they are in receipt of Opiate Agonist Therapy via NHS Lanarkshire Addiction Services. Please find attached a report of recently prescribed medication from our service for your information.

We would like to request that you add their current therapy to your records as an outside practice repeat medication. This will ensure our prescribing is listed on the patient's Emergency Care Summary (ECS) and will also enable the practice to monitor for potential drug interactions with other prescribed medication. The current dose should not be annotated on the prescription as the practice will not be informed of dose changes, and this has the potential for error if a patient is admitted to hospital and the dose has not been updated.

NHS Lanarkshire Addiction Services would also ask your practice to take the opportunity to review the prescribing of potential medication of misuse in your patient. Drugs such as benzodiazepines, opiates, and Gabapentinoids have been increasingly implicated in Drug Related Deaths. Such medication, if clinically appropriate, should be prescribed at the lowest dose possible and reviewed regularly. If there is no longer a clinical need for the medication, then please consider tapering and then stopping this. Where any risk of misuse is identified, consideration should be made to supplying these prescriptions in instalments.

We will endeavor to keep you updated on the progress made by your patient, however please contact the patient's key worker within the local CARES/ART team in the first instance if you have any questions regarding your patients care or to update them on any significant changes to their prescribed medication.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Dr. Steve Conroy".

Dr. Steve Conroy,
Lead General Practitioner,
On behalf of the Community Prescribing Service.
Admin Building, Coathill Hospital, Hospital Street, Coatbridge, ML5 4DN

OST Update for GP

OST Update for GP

Dear Doctor,

Please find below the last 12 items prescribed for this patient by NHS Lanarkshire Addiction Services.

NHS Lanarkshire Addiction Services request that their regularly prescribed Opiate Agonist Therapy is added to your practice records as an out of practice repeat, WITHOUT A DOSE, to allow this to highlight potential drug interactions and to ensure that this information is on the patients Emergency Care Summary (ECS) to allow continuation of medication if the patient is admitted to hospital.

APPLICATION TO REGISTER PERMANENTLY WITH A GENERAL MEDICAL PRACTICE

ALL FIELDS MARKED * ARE MANDATORY AND MUST BE COMPLETED AS FULLY AS POSSIBLE

1. PERSONAL DETAILS

Is this your first registration with a GP Practice in the UK?

Will you be in the area for more than 3 months?

Yes ☒ No ☐

(If 'No', please complete a temporary resident form)

Male ☐ Female ☒

Date of birth *

17.12.1987

Address *

128 m High Street
Newarthill

Title *

MISS

Surname *

Wilson

Forenames *

ELIZABETH

Previous surname *

Wilson

Postcode *

ML2 5JH

Telephone #

Mobile #

07591194469

the data supplied in these fields will not be input to, or updated in, the Community Health Index (CHI), but will be held on the GP Practice's system.

The following information can be found on your current medical card:

Community Health Index (CHI) number *

NHS number *

The following information can be found on your birth certificate:

Town of birth *

LARK

Country of birth *

Scotland

Registered district of birth
(Scotland only)

Mother's maiden name

WILSON

2. HELP US TO TRACE YOUR PREVIOUS GP HEALTH RECORDS BY PROVIDING THE FOLLOWING INFORMATION

Address in UK when you were last registered with a GP *

31 Tree Cres Wishaw

Name and address of previous GP Practice in UK *

Dr Arnot
Burnside medical centre

Postcode *

ML2 9HF

Postcode *

ML7 5DS

If you are from abroad:

Date you first came to live in the UK *

If previously resident in the UK, date of leaving *

Your most recent country of residence

If you have served in the British Armed Forces:

Service Number

Enlistment date *

Are you a Reservist?

Yes ☐ No ☒

If yes provide your address before enlisting *

Leaving date *

Postcode *

Is this your first registration with a GP since leaving the armed forces?

Yes ☐ No ☒

3. VOLUNTARY AUTHORISATION FOR ORGAN OR TISSUE DONATION

You have a choice about organ or tissue donation after your death. To find out more about why it is important that you take the time to make your donation decision and record it, go to www.organdonationscotland.org

4. HOW WE USE INFORMATION

The information you have provided will be used by NHS Scotland to carry out its various functions and services including scheduling appointments, ordering tests, hospital referrals and sending correspondence.

Your information, including your name, gender, date of birth and address, will be passed to NHS National Services Scotland where it will be held on the Community Health Index (CHI). This information is used to register you with the GP Practice, transfer your medical records between GP practices in the UK, make payments to GP Practices for medical services provided, and to process and issue medical exemption certificates and entitlement cards.

NHS National Services Scotland shares information about you within NHS Scotland to assist in the provision and improvement of NHS services and the health of the public. When we do this, we do it as described by NHS Scotland in the NHS Inform website under the 'How the NHS handles your personal health information' section.

NHS Scotland is made up of various organisations such as NHS Health Boards, GP practices, the Scottish Ambulance Service or NHS National Services Scotland (the common name of the Common Services Agency for the Scottish Health Service). These organisations are individually responsible for your personal health information. In terms of data protection and privacy laws, they are known as 'data controllers'.

Find out more about NHS Scotland in the link provided above.

5. PATIENT DECLARATION

I declare that the information I have given on this form is correct and complete. I understand that, if it is not, appropriate action may be taken. To enable NHS National Services Scotland to confirm my eligibility to lawfully register with a GP and for the purposes of prevention, detection, and investigation of crime, the minimum necessary information from this form could be disclosed to relevant authorities.

I understand that more comprehensive information about how NHS Scotland handles my data is available from NHS Inform.

This information can be provided in other languages and formats on request. The NHS Inform helpline provides an interpreting service.

Patient / Patient's representative signature

WMS Confidential: Personal data about a patient

PATIENT INFORMATION

- Please complete GPR and registration questionnaires for all members of family who wish to join our practice and hand back in to reception.

IMPORTANT

- Once you have handed in your completed GPR an appointment will be given with the Practice Nurse for a registration medical.
- If you are on repeat medication, a copy of your tear off slip needs to be handed in along with your completed forms. This is to ensure that all medication data is correct.

NOTE - One of our policies is that if a patient defaults pre-booked appointments more than 3 times within a 12, month period (this means failure to cancel pre-booked appointments, which you are unable to attend) - A letter, will be sent to Practitioners Services requesting you to be removed from our practice list.

It is the responsibility of the patient to keep the practice informed of any change in contact details (mobile number, etc)

It is the responsibility of the patient to contact the practice for any test results (bloods results, x-rays, scans, hospital letters, etc)

1945 Confidential: Personal data about a patient

7647History from patient: Katrina, Midwife at Houldsworth Centre (01698 - 354966)Can we clarify the position with regard to this Patient. Patient has moved to a Wishaw address but advises Midwife that apparently due to her circumstances she has been told she can remain with our Practice. However her New address would be linked to different HV etcCan we let Katrina know if this is the case? [11/08/2023 08:13] (Megan Biggerstaff) (Internal Note) Patient should move GP Practice if out of area. No notes to say she has been told otherwise. Please contact patient and ask to register elsewhere, and contact midwife with update. thanks[11/08/2023 09:10] (Jacqueline Duffy) (Internal Note) spoke to patient who has applied to gp in wishaw, was at midwife yesterday and she told her she had done this Mrs Megan Biggerstaff

 29/03/2021 Administration NOS WILSON, elizabeth 17/12/1987askmyGP 8486938History from patient: mental healthlooking to speak to someone regarding her mental not suicidal (Allison Rae) (Internal Note) Telephone appointment at some point on Thursday 01.04.2021, thank you. Please advise(Danna Duffy) (Internal Note) informed Mrs Danna Duffy
 11/11/2020 Medication commenced Acamprosate 666mg 2 tabs TDS (prescribed by brand campal, as more cost effective)(Thiamine 50mg QDS, addictions requesting 100mg TDS, but guidance is 50mg QDS Mr Andrew Maguire
 29/10/2020 Third party encounter Jennifer, Charge Nurse Addictions - agitated and emotional. Children removed pending Child Protection investigation. Stopped Sertraline a few months ago - felt over saturated during the day. Agreed trial Mirtazapine. ART will refer to Addictions Psychiatry. Dr Susan Arnot
 06/10/2020 Administration NOS ART update - Methadone Mixture 1mg/tml 55mg daily, unsupervised and twice weekly dispensed on Mondays and Thursdays. Mrs Allison Rae
 22/06/2020 Anxiety with depression Mrs Allison Rae
 22/06/2020 Consultation Covid-19 - telephone encounter. Reports little difference since commencing sertraline and acknowledges that this is to be expected. Does acknowledge that "things have settled down". The older children have a place at the Hub, 3 days per week, through the summer holidays, which Elizabeth states provides routine and respite. Reporting appetite to be poor, poor sleep, however, does notice an improvement in her concentration. Denies further self harming behaviour, however, acknowledges that the thoughts are always there. Previous wound has healed. To continue sertraline 50mg and Elizabeth to make a follow up appointment in one month. Mrs Allison Rae

Full Report**Miss Elizabeth Wilson****17/12/1987 Female****Permanent**

04/06/2020 Consultation Covid-19 - telephone encounter. Elizabeth gave a recent history of relationship breakdown.

Working with addiction recovery team, social work and health visitor for support with 4 children. Reporting that she is not sleeping, eating or able to "keep on top of things". Fearful and anxious most of the time and resorted to self harming by cutting her arm. Strongly denies suicidal thought, intent or plan. Gives a long history of self harming behaviour, illicit drug misuse (maintenance methadone) and making poor life choices. Reports to have been prescribed venlafaxine and pregabalin in the past. Wants to feel less agitated and more in control of emotions, does not want anything that may cause any form of sedation. Discussed sertraline 50mg, believes she may have had this in the past and keen to try again. Effects and side effects discussed, aware she may not feel any benefit for a few weeks. Review in 2/3 weeks. Mrs Allison Rae

Re: Lizanne (Elizabeth) Wilson

Address: 40 Dinmont Crescent, Motherwell, ML1 3TT

DOB: 17.12.1987

To whom it may concern

I am writing to advise that the above-named individual was recently referred to our DBI (Distress Brief Intervention) service. After contact:

They did not wish support from our service currently.

☐

They have failed to respond to our calls and letter.

☒

They disengaged after initial contact.

☐

No further action will be taken by the DBI service unless the individual contacts the service or is re-referred.

We are a 14-day service looking to deal with stressors and challenges using a toolkit to support their needs.

Yours sincerely,

Lorna

Consultant: Alison Millar BBV Specialist Nurse

Dear Dr Ross

Patient Name: Elizabeth Wilson
 Patient date of birth: 17/12/1987
 Patient Address: 39 Shiel Gardens, Shotts, ML7 5JR

Situation
 Failed to attend Hepatitis Nurse Led Clinic

Assessment
 Elizabeth failed to attend her appointment at my clinic in Airbles Road for the assessment and treatment for her Hepatitis C infection. She also had an appointment with Addictions at the same time. Ross had kindly agreed to carry out bloods for me if she attended later in the day however, she did not attend.

I will try to contact her by telephone over the next couple of weeks to take forward a telephone consultation.

Kind regards.

Yours sincerely

Alison Millar
 BBV Nurse Specialist

Consultant: Dr Gordon Buchanan

Dear Dr Ross,

Patient Name: Elizabeth Wilson
 Patient date of birth: 17/12/1987
 Patient Address: 23 Marshall Lane, Wishaw, ML2 7NT

Situation

Elizabeth attended for termination of pregnancy today.

Background

She is a 37 year old para 5 (SVD's) with regular cycles but is unsure of her LMP. She has a history of previous IVU on methadone, anxiety, sexual abuse, pancreatic pseudocyst secondary to pancreatitis and a new diagnosis of Hepatitis C for which she started treatment last week after ID team review. She reports receiving previous renal dialysis after renal failure secondary to intentional medication overdose. She is overdue her smear by 9 years and is a smoker of 10 cigarettes per day. She is on multiple medications and has no allergies. She wishes to be sterilised.

Assessment

Transabdominal ultrasound revealed a singleton intrauterine pregnancy of 17+3 weeks gestation. Placenta was posterior, not low and her liquor volumes were normal at 4.3cm. Bloods today revealed a mild transaminitis.

Recommendations

I have explained the options of MTOP, STOP and continuing with the pregnancy and she wishes to think these over. She will let us know her decision. I haven't currently planned any routine follow-up with us but I am grateful to the GP for repeating her LFT's in 2 months to ensure normalisation of her transaminitis. She attended today with her additions midwife who will book her in for antenatal care should she decide to continue with the pregnancy.

Yours sincerely,

Dr Gordon Buchanan
 Consultant in Obstetrics & Gynaecology

Dear Dr Ross

Patient Name: Elizabeth Wilson
Patient date of birth: 17/12/1987
Patient Address: 37 Shiel Gardens, Shotts, ML7 5JR

Ross Miller referred Elizabeth to our service for the assessment and treatment of her HCV. Unfortunately she failed to attend her appointment with me on 16th October 2025. Ross had planned to obtain her bloods but she refused this.

I will ask that she is sent out a further appointment for my clinic in Airbles Road.

Yours sincerely

Alison Millar

Dear Dr Ross,

Discharge Summary

Patient Name: Elizabeth Wilson
 Patient date of birth: 17/12/1987
 Patient Address: 23 Marshall Lane, Wishaw, ML2 7NT
 Date of admission: 18/12/2025
 Date of discharge: 18/12/2025

Diagnosis-- Unplanned Pregnancy

Procedure:Dilatationand evacuation.

Co-Morbidities

DischargeMedication:

Follow up:

This 38 year old para 5 contacted the Women's Health unit requesting termination of pregnancy. An ultrasound scan on the 9th December demonstrated an intrauterine pregnancy of 17+3 weeks gestation. Initially the plan was for her to have a medical termination of pregnancy however she did not attend for this. There were multiple vulnerabilities identified including a previous documented drug abuse and being on the methadone programme. Despite not attending for medical termination of pregnancy she remained keen to proceed with termination, we offered her a surgical termination of pregnancy and she accepted this. This took place on the 18th December at 18+5 weeks gestation. A dilatation and evacuation was performed. This was performed under ultrasound guidance and was uneventful. A Mirena Intra-Uterine System was inserted at her request in order to provide 8 years of long-acting reversible contraception.

Yours sincerely

Dr Colin Malcolm

Dear Dr Ross

Patient Name: Elizabeth Wilson
Patient date of birth: 17/12/1987
Patient Address: 23 Marshall Lane, Wishaw, ML2 7NT

This 37 year old para 5 contacted the Women's Health unit requesting termination of pregnancy. She was unsure of her LMP. I note the background of significant mental health problems and substance misuse as well as previous children being on the child protection register. An ultrasound was arranged for her on the 11th November, however she did not attend. There has been no further contact from the patient. I am slightly concerned that she could be of an advance gestation with a concealed pregnancy, therefore I have contacted the Wishaw community midwives in order to hopefully facilitate contact with the patient to ensure her wellbeing. I would be grateful if you could facilitate with this in any way too please.

Yours sincerely

 Patient Address: 23 Marshall Lane, Wishaw, ML2 7NT

Situation

Failed to attend Hepatitis Nurse Led Clinic – 15th January 2026

Assessment

Elizabeth was due to attend my clinic in Airbles Road today for the assessment and treatment of her Hepatitis C. Unfortunately, she failed to attend although she did have an appointment with Ross in regards to her prescription. I spoke with Ross and he tells me that she had an accident at home and remains keen for treatment.

I will ask that she is sent one further appointment for my clinic in Airbles Road.

Kind regards.

Yours sincerely

Situation

Hepatitis Nurse Led Clinic – Airbles Road Clinic – 15th January 2026

Assessment

Elizabeth was due to attend my clinic in Airbles Road. Unfortunately, she failed to attend again. I spoke to her on the telephone prior to her appointment and she seemed keen to come. I note that she had a Dry Blood Spot Test carried out in August 2025, a repeat HCV PCR in December 2025 was insufficient. This was a new infection when referred. I would therefore be keen for a repeat Dry Blood Spot Test.

I do not think she seems to be struggling to come to clinic appointments. If a Dry Blood Spot Test is repeated and remains positive my plan would be to carry out a Telephone Consultation with her in the hope of getting her to engage with the service and on to treatment. I am not sending her any further appointments at this stage; however, I am happy for Ross to contact me if he has any contact with Elizabeth.

Kind regards.

Yours sincerely
