Intervention Medication reconciliation
(P3)
Intervention Post hospital dischrge med reconciliation with medical
(P3) notes IDL received from WGH dated 20/08/2020.
Kirsteen was discharged with a pre pack supply (10 days)
of enoxaparin 60mg, which I have added to file for
reference. She should be taking this every day throughout
her pregnancy, but reorder dates suggest poor
compliance. I have issued a further 10 days on acute, as
Kirsten is due at the beginning of September, and hopefully
she will order more if needed. I was unable to reach her
on the number we have on file as it went straight to
voicemail. I have also issued aspirin and metformin as
these medicatioons should also be taken throughout
pregnancy and Kirsteen has probably run out of these
from previous issue dates

24-Aug-2020 Ms Carly Marshall Repeat Issue

Dear Dr Smith

Ms Kirsteen Rooney (06/10/1983) 21 Newtown Drive, Macduff, AB44 1SQ

This lady attended the clinic today for antenatal review having recently returned to the Grampian area working towards an EDD of 4.4.09. Her pregnancy appears to remain uncomplicated meantime and she is happy to be booked for confinement in Dr Gray's Hospital. Fetal ultrasound scan assessment is reassuring today. I have therefore simply offered to see her back in the event of future concern and otherwise suggested that arrangement is made for her post-dates induction of labour should she reach T+10 days gestation. Post-natal DVT prophylaxis may be offered on account of her relatively increased BMI.

Yours sincerely

Dr N Maclean
 Consultant Obstetrician & Gynaecologist

Consultant: Dr Dina McLellan

Dear Dr McKay

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 105 Birkshaw Brae, Wishaw, ML2 0LE

Kirsteen defaulted from the consultant clinic on 15th October 2013. She attended today at 21+week's gestation without her hand-held maternity record. She has a due date of confinement of 25th March 2014. Kirsteen had been recommended Aspirin by her Midwife at booking as she had delivered two [REDACTED] on the 5th centile for gestational age. They were both healthy. Kirsteen herself is around 5ft and I suspect these [REDACTED] were constitutionally small rather than truly growth restricted. Her BMI is 35 however but she was unable to state whether or not she was of a similar weight in her last pregnancies. Both these [REDACTED] were delivered elsewhere.

We have arranged for Kirsteen to have a glucose tolerance test at 28 week's gestation and I will arrange a couple of growth scans for her at 34 and 38 weeks. I would be keen to avoid interfering in her pregnancy if the [REDACTED] is noted to be on the 5th centile again provided liquor volume and doppler are normal. The growth charts we use are not customised in any way and therefore probably inappropriate to make a decision on in Kirsteen's case.

Kirsteen's main risk factor for IUGR is smoking but she has managed to reduce this to <5 per day she states.

Kind regards

Yours sincerely

Dr Dina McLellan
Consultant Obstetrician
GMC NO. 3274363

Dear Kirsteen Rooney

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan Street, Wishaw, ML2 8PW

We recently wrote to you enclosing information and advice about possible treatments and management of your hand condition. We would hope the information has been of benefit. You may have been asked to use a splint previously provided for 8 weeks if you have been referred for Carpal Tunnel, Base of thumb and De Quervains. If you feel you still require an appointment following this, please phone the number below. It should be noted that undertaking this process for 8 weeks will not delay your appointment as you will retain your position on the waiting list.

If you wish to discuss this with us directly, please dial [REDACTED]

Yours sincerely,

Orthopaedic Service
NHS Lanarkshire

Consultant:

Dear Kirsteen Rooney

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan Street, Wishaw, ML2 8PW

We recently wrote to you enclosing information and advice about possible treatments and management of your hand condition. We would hope the information has been of benefit. You may have been asked to use a splint previously provided for 8 weeks if you have been referred for Carpel Tunnel, Base of thumb and De Quervains. If you feel you still require an appointment following this, please phone the number below. It should be noted that undertaking this process for 8 weeks will not delay your appointment as you will retain your position on the waiting list.

If you wish to discuss this with us directly, please dial [REDACTED]

Yours sincerely,

Orthopaedic Service
NHS Lanarkshire

CLINICAL INFORMATION**History of presenting complaint / examination findings / investigation results****Presenting complaint**

Main presenting Complaint: dehydration? secondary to vomiting syndrome
 Date Of Onset: 01-May-2026
 Reason for Referral: Apparently has history of cyclical vomiting syndrome. Pt advises that has been vomiting day and night for 8 days - cyclizine ineffective. Passing v little urine. says usually requires iv fluids and antiemetics when previously as severe as this.
 I think she may have AKI/ dehydration.
 I would be grateful for your review

Dear Dr Peak,

Discharge Summary

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan, Street, Cambusnethan, Wishaw, ML2 8PW
Date of admission: 08/05/2026
Date of discharge: 10/05/2026

Diagnosis- Cannabis hyperemesis

Discharge Medication: As per IDL
Follow up: None

This lady presented with further cyclical vomiting. She has resumed smoking cannabis and it is likely that this triggered her symptoms.

She had a mild AKI which resolved quickly with IV fluids.

She was discharged home once tolerating oral intake.

Yours sincerely

Dr Mhairi Sinclair
Consultant Acute Physician

Authorised on 12/05/2026 20:42:45 by Dr Mhairi Sinclair.

Dear Ms Rooney

I am sorry you were not able to attend the appointments which we have arranged for you at the Genetic Clinic to discuss the family history of osteogenesis imperfecta. I have not been able to investigate the family history further since we do not have your family history form which was given to you by Mrs Marion McJannett our Health Visitor. I would be pleased to take this further if you get in touch.

I have not arranged a further appointment for you, in view of the pressure upon our clinics, but would be very pleased to do so should you let us know that you wished to be seen.

I hope all goes well with you and your new baby. Kind regards.

Yours sincerely,

Dr Sheila A Simpson

Dear Dr Murray,

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan Street, Wishaw, ML2 8PW

Situation

I reviewed this 37-year-old para 5 for vulval biopsy today.

Background

Kirsteen has had vulval pruritus and discomfort for many years. Her symptoms have recently improved since starting emollient, trimovate and balneum.

Recommendations

I have today taken 2 x 4mm punch biopsies from the vulva under local anaesthetic and will write with the results.

Yours sincerely,

Dr Gordon Buchanan

Consultant: Dr Sreedevi Gurram

Dear Dr Murray

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan Street, Wishaw, ML2 8PW

The above lady was referred to my clinic with vulval biopsies showing features of HPV infection and VIN3.

Kirsteen is 38 year old para 5 who has been complaining of vulval itching. She has tried a few steroid creams in the recent past with no relief.

She is up to date with her smears. She had borderline nuclear changes in the past. Following smears have been normal. She is due a smear test.

On examination today she has warty changes on the vulval skin involving almost the whole of the anterior vulval including the clitoral area. Changes are in keeping with VIN. There were no suspicious features to suggest malignancy.

In view of the extensive area of VIN, discussed with the option of Imiquimod instead of surgery.

Surgery is standard management for VIN3 however in view of the extensive involvement, especially the clitoral area it would be safer to opt for the Imiquimod in the first instance. If she is able to tolerate it and the lesion responds to medical treatment, surgery would be less extensive. Cervical smear test was performed today. Vagina and cervix appeared normal. Cervix felt normal on bimanual examination.

Kirsteen had recent ultrasound scan for pelvic pain which is also within normal limits.

I would be grateful if you can provide her with a prescription for Imiquimod to be used twice weekly for 16 weeks. Please also prescribe her Instillagel to be used 30 minutes prior to application of Imiquimod. She would need to wipe the Instillagel off and apply Vaseline around the surrounding skin to prevent Imiquimod affecting the healthy skin and minimise the side effects.

I will see her back in 4 months' time for a review. If her symptoms worsen prior to that or she wishes to proceed with surgery she will contact my secretary. I have organised medical photography today.

Yours sincerely

Subject: prescription

hello

as discussed on the phone I would appreciate it if one of you GPs could issue a prescription for Kirsteen Rooney CHI 0610836986 for enoxaparin (clexane) 60mg SC to be taken once daily. once she has the prescription, she will attend the midwife for training on how to administer.

the reason for prescription is that she is 15 weeks pregnant and high risk for thrombosis (age / BMI / parity / smoker).

thank you for your help

Consultant: Doctor Uzma Minhas

Dear Dr Ritchie

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan, Street, Cambusnethan, Wishaw, ML2 8PW

Situation

Kirsteen is a 38 year old who was arranged to have a follow up in colposcopy following a histology result which confirmed CIN1 after a borderline abnormal smear and HR-HPV positive in October 2021. At her followup in feb 2022 Cx biopsy was done. At the time of biopsy she requested for treatment even if the histology is CIN1 and hence this appointment was arranged.

Today following discussion she changed her mind and decided to go for monitoring.

However I also noticed that she has been discharged following multiple DNA's for a vulval abnormality. She had a vulval biopsy in August 2021 which confirmed VIN3. The area involved is quite extensive extending on both the sides of her vulva and clitoris. She was referred to Dr Siddique for further treatment while being started on Imiquimod to decrease the covered area. She had been non-compliant with imiquimod and missed 3 appointment with Dr Siddique. She subsequently missed her appointments with Dr Gurram on multiple occasions and hence was discharged from the clinic.

Today she was more worried about her vulva and felt that her symptoms are worse. She is keen for surgical treatment.

Assessment

On review I noticed she has abnormal area on the right side vulva measuring 7.5x4.5cm clinically amounting to VIN3. On the left side abnormal lesion measures 4.5x2.5cm, clitoris is also involved.

Recommendations

She stopped using Imiquimod after the first application as she felt very uncomfortable with it. Today we had the same discussion again about the options and I have stressed the use of Imiquimod so that we can try to decreased the size of the area that is involved. This will increase the possibility of primary closure after the WLE excision. Since the VIN3 area is quite extensive I will be referring her to Glasgow Royal for a review and possible plan for WLE. She has agreed to try Imiquimod. She already has the numbing gel, Imiquimod cream also the Balneum barrier cream. She would require a repeat prescription for that once these have finished.

For the FU of CIN1 she would require a repeat smear test in 12 months time at her GP and referral to colposcopy if abnormal.

Dear Dr Baird

Kirsteen Rooney (06.10.83)
25 Colleonard Court Banff

Kirsteen returned to the clinic for review today. Her pregnancy appears to be progressing without undue complication and it seems she is set on the idea of a Banff delivery. I will see her back for a last check on 22.6.06 therefore as a matter of precaution.

She mentioned a family history of osteogenesis imperfecta and hence I will ask the Genetics Team by copy letter to see her as a matter of reassurance, albeit it will not impact on her pregnancy management at this relatively late gestation.

Yours sincerely

Dr N Maclean
Consultant Obstetrician & Gynaecologist

Still able to pass urine.
headache

Last vomit 9pm, taking cyclizine but feels not effective. vomited multiple times today. looking for IM stemetil
Looked through all clinical portal only account for 2 episodes of admission to hospital for vomiting. patient advises was diagnosed by GP
No cyclizine on ECS
no cardiorespiratory symptoms
no abdominal pain
reduced appetite, drinking plenty
no change to bladder or bowels
no fever
no rash or photophobia

PMH: CVS
Meds: cyclizine, omeprazole - cyclizine not on ECS
OTC: Nil
Allergies: penicillin
SH: smoker 10/day. no alcohol intake. denies recreational drug use. 5

Examination - Looks very well
good colour, no cyanosis, no anaemia, no jaundice
no lymphadenopathy
full reg pulse
HS: I + II +0
Chest: equal expansion, bilateral air entry, nil added
Abdo: soft and non tender, no guarding, no rebound tenderness, no distension, bowel sounds active, no renal angle tenderness

Diagnosis - vomiting

Treatment - advised unable to issue IM as no active vomiting
struggled to identify diagnosis of cyclic vomiting - note 2 admission to ED but no correspondence from further care
Agreed to issue stemetil as feels cyclizine not working.
note ketones in urine and consistent history of pattern of symptoms
advised to wait for 8 hours after cyclizine before stemetil
any worsening symptoms should seek medical advice
happy with same

Dear Kirsten,

An appointment has been arranged for your baby to have their six week assessment carried out on Friday 9th May at 9.35a.m. Also at this time the doctor will carry out your post natal. If this is not suitable please contact the surgery and an alternative appointment will be sent out.

Please ensure you bring your parent held record (red book) for your appointment.

Yours sincerely,

Dr. K. E. H. McKay

Dear Kirsteen Rooney

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan Street, Wishaw, ML2 8PW

Your patient was seen at the clinic on 28/01/2022 and at this visit,

A diagnostic biopsy of the cervix was taken and the result was CIN1.

Your patient has been treated for High Grade disease and has now been discharged from the colposcopy clinic. I recommend that a follow up smear should be taken in 2 months' time.

Your patient has been advised of the results and that she will be invited to attend for her next smear test. Your patient will therefore appear on your Recommended Call List (RCL) on SCCRS in due course.

Yours sincerely

Kanan Rana

Dear Dr Siddiqui

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan Street, Wishaw, ML2 8PW

I would be grateful if you can see the above lady with VIN3 requesting surgical management.

She has changes on the vulval skin involving almost whole of the anterior vulva including the clitoral area. She has tried Imiquimod but is unable to tolerate the side effects and is now keen to pursue treatment.

She is aware that this option might affect her sexual function. While awaiting review by yourselves I have advised her to try Imiquimod just over the clitoris rather than whole of the anterior vulva to minimise the extent of surgery.

You will be able to find the images under photo web in clinical portal. If you are unable to access them, please e-mail my secretary and she will send the images to you.

Yours sincerely

Dear Dr Ritchie

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 105 Birkshaw Brae, Wishaw, ML2 0LE

Diagnosis 8mm seborrhoeic keratosis right upper aspect of right breast

Management Reassurance and discharge to GP

Thanks for your referral regarding the above 35 year old lady who is currently 31 weeks pregnant and has had an increasingly roughening lesion on her right breast for at least a year. On examination today there is an 8mm seborrhoeic keratosis. I did not feel on dermoscopy there were any concerning features and I am happy to discharge her back to your care.

Yours sincerely

Dr Jane Colgan
Speciality Doctor

Dear Dr Ritchie

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan Street, Wishaw, ML2 8PW

Your patient was seen at the clinic on 28/01/2022 and at this visit multiple directed biopsies were taken.

The test results indicate that your patient requires further treatment (CIN1), which would be best managed as an outpatient at the colposcopy clinic. Your patient has been asked to return for outpatient treatment.

Another appointment has been arranged for her to attend the clinic at Wishaw General Hospital on 22/04/2022.

Yours sincerely

Kanan Rana
Associate Specialist in Obstetrics & Gynaecology

Dear Dr Ritchie,

Discharge Summary

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan Street, Wishaw, ML2 8PW
Date of admission: 28/09/2019
Date of discharge: 28/09/2019

Diagnosis: - Unplanned pregnancy

Procedure: MTOP

Follow up: Pregnancy test in 3 weeks time

Kirsteen had a medical termination of pregnancy on the 28th of September 2019 at 8 + weeks gestation. She has been advised to repeat a Biostat test in 3 weeks time. She declined contraception with ourselves presently and mentioned she had an appointment to have a Nexplanon inserted at the surgery in the near future.

Kind regards

Yours sincerely

Dr Dina McLellan
Consultant Obstetrician

Kirsteen Rooney; D.O.B: 06/10/1983; CHI: 0610836986
229 CAMBUSNETHAN, STREET, CAMBUSNETHAN, Wishaw, Lanarkshire, ML2 8PW

Diagnosis: Multi focal high grade dysplasia (VIN 3).

Arrangements were recently made for Mrs Rooney to have an extensive area of dysplasia on the the left and right side of the vulva excised. Her surgery was uncomplicated. Mr Telfer closed the wound with bilateral tunnelled wee flaps.

Pathology has confirmed that she had no invasive squamous cancer. Multifocal VIN was present.

Arrangements have been made for Mrs Rooney to be followed up at my clinic.

Kind regards

Yours sincerely

Dr Nadeem Siddiqui

Dear Dr Ritchie

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan Street, Wishaw, ML2 8PW

Kirsteen was seen in the combined obstetric diabetic clinic today, having been diagnosed with gestational diabetes. In spite of dietary modification her blood glucose levels remain high, particular they are fasting readings therefore today I have commenced her on Metformin 500mgs to be taken twice daily. She will have serial growth scans throughout the clinic, and regular telephone consults with the diabetes team.

Yours sincerely

Dr Colin Malcolm
Consultant Obstetrician & Gynaecologist
GMC No 6128605

Authorised on 05/06/2020 09:37:14 by Dr Colin Malcolm.

Dear Dr Murray

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan Street, Wishaw, ML2 8PW

The above lady did not keep her clinic appointment today. I note she has been referred to Glasgow for management of her VIN and she has failed to keep her appointments with them on 3 occasions too. I am unable to organise any further appointments to my clinic and I am discharging her back to your care.

I note she was recently seen at the Colposcopy Clinic in January by Dr Rana.

Yours sincerely

Dr Sreedevi Gurram
Consultant Obstetrician & Gynaecologist
GMC No. 5206741

Clinical Details

Details Illegible

Pregnancy Test Negative

The test is a measure of urinary HCG level.
Dilute urine in early pregnancy may give a negative result.
Positive results may be obtained 5-10 days post miscarriage.
Diagnosis of pregnancy should not be based solely on a
"Pregnancy Test" result.

Dear Ms. Rooney

I am sorry you were not able to attend the appointments which we have arranged for you at the Genetic Clinic to discuss the family history of osteogenesis imperfecta. I have not been able to investigate the family history further since we do not have your family history form which was given to you by Mrs Marion McJannet our Health Visitor. I would be pleased to take this further if you get in touch.

I have not arranged a further appointment for you, in view of the pressure upon our clinics, but would be very pleased to do so should you let us know that you wished to be seen.

I hope all goes well with you and your new baby. Kind regards.

Yours sincerely,

Dr Sheila A Simpson

Dr N Maclean's Antenatal Clinic - 25.5.06
 (Chalmers Hospital, Banff)

Dr Baird
 Banff & Gamrie Medical Practice
 Health Centre
 Charnie Street
 Banff
 AB45 1HY

Dear Dr Baird

Kirsteen Rooney (06.10.83)
25 Collesford Court Banff

Kirsteen returned to the clinic for review today. Her pregnancy appears to be progressing without undue complication and it seems she is set on the idea of a Banff delivery. I will see her back for a last check on 22.6.06 therefore as a matter of precaution.

She mentioned a family history of osteogenesis imperfecta and hence I will ask the Genetics Team by copy letter to see her as a matter of reassurance, albeit it will not impact on her pregnancy management at this relatively late gestation.

Yours sincerely

Dr N Maclean
 Consultant Obstetrician & Gynaecologist

DIRECT ACCESS COUNSELLING OUTCOME FORM

Location
Deveron Practice
Bexhill

Date 15.3.06

Dear Dr. Brown

Re: Kirsteen Rooney: 39 Whinhill Terrace, Bexhill AB45 1ET
 DOB 6.10.1983

Thank you for referring this patient to the direct access counselling service. The outcome for this referral is indicated below.

- Your patient has attended a first appointment and a period of counselling has been agreed. ☐
- Your patient did not attend the [] appointment. A letter suggesting that they make contact if a further appointment is required has been sent to them. ☐
- After the initial appointment your patient decided against any counselling at this time. Therefore I have discharged them from my care. ☐
- I am referring this patient back to you and I will contact you in due course. ☐
- After a period of counselling further meetings have had to be suspended. I am keeping the file open for [] weeks. ☐
- Your patient did not return the availability form that was sent out to them. Therefore I'm assuming they have decided against counselling at this time and I will not be including them on my waiting list. ☒
- Your patient has completed the counselling contract and has achieved their goals. ☐

COMMENTS.

I have just noticed that this lady has been referred again in March (this referral form) she will have received the availability form again so may return it this time.

Yours Sincerely

B.

Dr Baird
Banff & Gamrie Medical Practice
Health Centre
Clunie Street
Banff
AB45 1HY

Dear Dr Baird

Kirsteen Rooney (06.10.83)
39 Whinhill Terrace Banff

This 22 year old primigravida attended the clinic today for antenatal review now she is around 21 weeks gestation (EDD 1.7.06). She remains well in the pregnancy so far and whilst there have been recent concern regarding excessive fetal growth, fetal ultrasound scan assessment is reassuring. A detailed anatomy assessment could not be fully completed and hence she is to return for a cardiac scan in particular.

She would be enthusiastic to deliver in Banff but I have suggested central Hospital confinement may be more appropriate. We can clarify the booking arrangements when she returns for review on 25.5.06. Please do not hesitate to let me know of any prior concerns.

Post-natally DVT prophylaxis would be indicated on account of her relatively excessive BMI.

Yours sincerely

Dr Neil Maclean
Consultant Obstetrician & Gynaecologist

History of Presenting Complaint

This young lady has presented today in her first pregnancy.

Last menstrual period is around 1st October. Prior to that her periods were regular every four weeks.

This is her first pregnancy. Her height is 5'0, weight 106 kg. Blood pressure 126/70.

I have given her a prescription for Folic Acid to take.

I would be grateful if you could see her with a view to providing her with ongoing antenatal care and arrange delivery for her.

Kirsten Rooney
105 Birkshaw Brae
Wishaw
ML2 0LE

Dear Kirsten,

We would like to welcome you, [REDACTED] to our practice. As newly registered patient we would like to invite you [REDACTED] for a health check. There is no need for [REDACTED] to have this done as she is under 5 years old. This involves answering some questions and carrying out a simple examination.

Could you please complete the forms enclosed before you are seen.

Could you please contact the surgery to arrange an appointment for yourself and [REDACTED] with our Practice Nurse who will carry out a brief examination – height, weight and blood pressure and test a specimen of urine. It would be helpful if you could bring a specimen of urine along with you.

Yours sincerely

Dr. K. E. H. McKay

Dear Dr Siddique

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan, Street, Cambusnethan, Wishaw, ML2 8PW

Thank you for seeing this 38 year old lady who is known to have lichen sclerosis atrophicus. She was discharged from follow up after multiple DNA's.

In August 2021 her vulval biopsies confirmed VIN3. She was referred to Glasgow for review and possible WLE in view of the large area being involved. She was also given Imiquimod cream with the intension that it might allow to decrease the extent of disease and possibly enable primary closure. Unfortunately patient DNA'd her GGC appointments, did not use Imiquimod and continued to smoke.

She is seen in colposcopy clinic again following cervical biopsy which had confirmed CIN1 for which she has chosen conservative management.

On examination she has extensively abnormal vulval with almost U-shaped involvement more on the right side. The abnormal area predominantly looked like VIN3 and measured 7.5cmx4.5cm on the right. Clitoral was also involved. On the left it was 4.5x2.5cm. No ulceration or cancer like changes were noticed on vulvoscopy.

After discussion I have given her Imiquimod for local application. She is keen for surgical management. I would appreciate if you could kindly review her and suggest how to proceed.

Yours sincerely

DR UZMA MINHAS

NEW Patient Services Registration Form

We are changing the way you order your medication online

From January 2023, ONLINE SERVICES will replace the current method of requesting prescriptions for patients over 16 years. Please note, the current method of online ordering will be phased out by end April 2023.

To register for online services, please download this form and complete the details below then send back to us by email [redacted] OR hand it into us OR post through the letterbox on the ground floor of the health centre.

Once you are registered, we will email you the information that will enable you to create a username and password to order prescriptions as well as view and cancel appointments, using our new Patient Services tool.

Please continue to use your usual method of requesting your repeat items until we email you with your registration details.

Please complete all fields in BLOCK CAPITALS

Patient Forename - Kirsteen	
Patient Surname -rooney	
Date of Birth - 06-10-1983	
Email [redacted] ✓	
This email will be used by us to send you your log in details	
Mobile Number [redacted] ✓	
Please indicate if you consent to us contacting you by text, to remind you about appointments or to ask you to contact us. We will not send identifiable information to you by text or email.	
☐	I consent to receive text reminders & to ask me to contact the practice. Yes ✓
☐	I DO NOT consent to receive text reminders or to ask me to contact the practice Yes

Dear Kirsten,

An appointment has been arranged for your baby to have their six week assessment carried out on Friday 21st June at 11.10 a.m. Also at this time the doctor will carry out your post natal.

If this is not suitable please contact the surgery and an alternative appointment will be sent out.

Please ensure you bring your parent held record (red book) for your appointment.

Yours sincerely,

Dr. K. E. H. McKay

Dear Dr MCKAY

Antenatal Rubella Screening Programme

Patients Name: 0610836986
Date of Birth: 06/10/1983 F
Address: ROONEY Kirsteen
Hospital Number: 105 Birkshaw Brde
CHI Number: Wishaw
Date of Delivery: Lanarkshire ML2 0LE

This patient, whom I understand is registered with you, was found to be non-immune to rubella antenatally.

She has now delivered, however, she declined to receive MMR vaccine post natally at Wishaw General Hospital. She has been informed that she is rubella non-immune and that MMR vaccination is recommended. I have advised her to attend your surgery to discuss MMR Vaccination. I would be grateful if you would arrange this.

It is important to advise the patient to use effective contraception for 1 month post vaccinations.

If patient agrees to have MMR vaccination, please carry out a second MMR vaccination three months later. Your patient has also been advised of the need for these vaccinations.

In due course, I would be grateful if you could complete the enclosed form and forward it to me. This will allow vaccination details to be recorded in the patient's obstetric case notes for clinical and audit purposes.

Yours sincerely,

Midwife

Dear Kirsten,

An appointment has been arranged for your baby to have their six week assessment carried out on Friday 13th June at 9.35a.m. Also at this time the doctor will carry out your post natal. If this is not suitable please contact the surgery and an alternative appointment will be sent out.

Please ensure you bring your parent held record (red book) for your appointment.

Yours sincerely,

Dr. K. E. H. McKay

Dear Dr Murray

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan Street, Wishaw, ML2 8PW

Situation

Vulval pruritus and discomfort for years

Background

Thank you for referring this 27 year old who has been treated for the past year for possible lichen sclerosis. She reports having had these symptoms for several years.

Assessment

On examination there were no typical signs of lichen sclerosis. There was vulval hyperaemia along both left and right labia minora and majora extending to the posterior fourchette. There were no sinister features ulceration or worrying features.

I have explained that the appearances are not typical of lichen sclerosis. She can continue to use her Epiderm as a wash. In a hand written note I have asked you to provide Trimovate a thin layer to be applied daily for 3 months and reducing thereafter. I have also asked you to prescribe Balneum cream as a barrier following application of the Trimovate to protect the vulval tissues.

Recommendations

I will arrange for her to attend for a vulval biopsy and perhaps this may give us a clearer diagnosis.

Yours sincerely

Dr Surindra Maharaj

Dear Dr Ritchie

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 105 Birkshaw Brae, Wishaw, ML2 0LE

I have seen Kirsteen in the antenatal clinic for booking. She is a 35 year old Para 3 currently 16 weeks pregnant and her expected date of delivery is 09th May 2019. Her BMI is 41.9. She's undergoing repeat scan for Nuchal Translucency.

Past Obstetric History

Her first two pregnancies were with her previous

1. During 2006 in her first pregnancy she went into spontaneous labour at 41 weeks gestation. She had a normal delivery and the weighed 2.7kg.
2. During 2009 in her second pregnancy she went into spontaneous labour at 39 weeks gestation and delivered normally. The weighed 2.64kg.

Her third pregnancy and this pregnancy are with her current

3. During 2014 Kirsteen had serial growth scans as she was measuring small for dates. The growth being less than the fifth centile with intermittent absent end diastolic flow, labour was induced at 39+1 week gestation. Following the first cycle of Prostin the cervix remained unfavourable. She then opted to be delivered by a semi elective caesarean section. This was a straight forward procedure. The weighed 2.3kg which is less than the fifth centile. The had good apgars. The blood loss during the delivery was 450ml.

She does not have any significant family history or mental health issues.

I had a detailed discussion with her about the mode of delivery, vaginal birth after caesarean section versus elective caesarean section. Pros and cons of both of these methods of delivery were discussed. The RCOG VBAC leaflet was also provided. Following the discussion, Kirsteen said she would like to opt for VBAC; however she understands that the decision may need to be revised based on the fetal growth pattern.

I have recommended low dose Aspirin which is to be continued until delivery. We shall arrange for an oral GTT at 28 weeks and serial growth scans. If there are no concerns I plan to see her at 32 weeks.

Yours sincerely

Dear Dr Baird

Kirsteen Ranney [REDACTED]
25 Colleenard Court Banff

Kirsteen failed to attend the clinic for review today apparently without explanation. I trust her pregnancy continues without undue complication and will leave the matter of her further care and arrangement of post-dates induction of labour in the hands of the Midwifery Team.

She appreciates I think that she would be best delivered in Elgin or Aberdeen despite her personal enthusiasm to try for a Banff delivery.

Yours sincerely

Dr N Maclean

Dear Dr Siddiqui

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan Street, Wishaw, ML2 8PW

I would be grateful if you can see the above lady with VIN3 requesting surgical management.

She has changes on the vulval skin involving almost whole of the anterior vulva including the clitoral area. She has tried Imiquimod but is unable to tolerate the side effects and is now keen to pursue treatment.

She is aware that this option might affect her sexual function. While awaiting review by yourselves I have advised her to try Imiquimod just over the clitoris rather than whole of the anterior vulva to minimise the extent of surgery.

You will be able to find the images under photo web in clinical portal. If you are unable to access them, please e-mail my secretary and she will send the images to you.

Yours sincerely

Consultant: Dr R Rajagopal

Dear Dr Ritchie

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan Street, Wishaw, ML2 8PW

I had a phone consultation with Kirsteen today as part of her consultant led obstetric booking appointment. She is a 36 year old para 4+2 with a final EDD of the 12th September 2020. She has a booking BMI of 47 and is rhesus positive. Kirsteen has had four previous deliveries and the third [REDACTED] was delivered by caesarean section. This was due to a failed induction due to IUGR and query intermittent absent EDF. On review of her operation though this appeared to be unremarkable and her fourth [REDACTED] was a successful VBAC. All her [REDACTED] have been under the 5th centile.

Kirsteen has a BMI of 47 and a history of previous gestational diabetes. She will have a Glucose tolerance test performed at 16 weeks and if this is negative it will be repeated at 28 weeks. This may change to random blood glucose and HbA1c checks due to the pandemic.

Kirsteen was keen to aim for vaginal delivery again and we discussed the risks with previous caesarean section including 1 in 200 risk of scar rupture, aim to avoid induction of labour with prostaglandins and the recommendation for continuous electronic fetal monitoring. Kirsteen also meets the criteria for prophylaxis with low molecular weight heparin from the first trimester due to her age, smoking status, BMI and parity. I have contacted her GP who will issue a prescription for Clexane 60mgs once daily and when she has received this she will contact the midwife for training on how to administer it.

The plan for this delivery is for low dose Aspirin, growths scan due to previous IUGR and raised BMI, GTT at 16/28 weeks, anaesthetic review in the third trimester if being offered due to current pandemic, review back at consultant led antenatal clinic at 32 weeks to review growth scan and confirm plan for delivery as well as to discuss timing of Clexane around time of delivery.

Yours sincerely

Dear Dr Ritchie,

Discharge Summary

Patient Name: Kirsteen Rooney
Patient date of birth: 06/10/1983
Patient Address: 229 Cambusnethan Street, Cambusnethan, Wishaw, ML2 8PW
Date of admission: 18/09/2023
Date of discharge: 18/09/2023

Diagnosis

Procedure: CT KUB

Co-Morbidities

1. Nil

Discharge Medication:

Follow up: Nil

Thank you for continuing the care of this 39-year-old lady whom I reviewed in SACU at Wishaw hospital. She had been reviewed by the surgical team the previous night with right sided abdominal pain and raised inflammatory markers. She underwent a CT KUB as her urine contained blood. A fecalith was found inside her appendix but there was no associated inflammation around the appendix and there was no evidence of renal or ureteric calculi. She was therefore discharged and asked to come back to SACU the next day for further bloods. Her bloods had improved somewhat with her white cells going from 17 down to 14 and her CRP rising slightly from less than 6 to 25. Her abdominal pain had almost completely resolved and her abdomen was soft and non-tender. Certainly examining her I do not think she has appendicitis and I have therefore discharged her with a strict worsening advice to come back if things do not improve.

Kind regards,

Yours sincerely

Mark Johnstone

Dear Dr Minhas,

**Kirsteen Rooney; D.O.B: 06/10/1983; CHI: 0610836986
229 CAMBUSNETHAN, STREET, CAMBUSNETHAN, Wishaw, Lanarkshire, ML2 8PW**

Thank you for referring this 38 year old lady who has extensive multifocal vulval dysplasia (VIN3). Your referral letter was very helpful.

Unfortunately, Mrs Rooney did not attend previous appointments so there has been some delay in her being seen at my clinic. She finally attended on 24th May.

Mrs Rooney mentioned to me that she had been having vulval itch for a few years. She uses Vaseline which she finds helpful.

Mrs Rooney is a smoker. She has problems with cyclical vomiting for which she takes Cyclizine.

Examination confirmed that she had an extensive area of VIN on the left and right sides of the vulva and in the midline anteriorly where particularly on the left side part of her clitoral hood was also involved. No sinister ulceration was present.

I have recommended excision of the VIN and closure with a plastics procedure. Mrs Rooney has agreed to have surgery and has signed a consent form. She is aware that the proposed surgery would not be done as a day case. I also mentioned that she would not be able to leave the ward for fresh air and a cigarette. Kirsteen informed me that she would be prepared to try a nicotine patch.

I will update you when pathology is available.

Kind regards

Additional Administrative Information

Patient will accept any site: Yes

CLINICAL INFORMATION**History of presenting complaint / examination findings / investigation results****Presenting complaint**

Main presenting complaint: dehydration? secondary to vomiting syndrome
 Date Of Onset: 01-May-2026
 Reason for Referral: Apparently has history of cyclical vomiting syndrome. Pt advises that has been vomiting day and night for 8 days - cyclizine ineffective. Passing v little urine. says usually requires iv fluids and antiemetics when previously as severe as this.
 I think she may have AKI/ dehydration.
 I would be grateful for your review

Reason for referral

Care type requested: Out Patient
 Expected outcome: Investigate
