*Ultrasound***US Abdomen**

Focused gallbladder scan only.

The gallbladder was again inadequately distended as patient had not fasted prior to scan. The gallbladder wall appears generally mildly thickened. Within the posterior wall of the gallbladder, towards the fundus, there is a 2 mm echogenic immobile focus, which may indicate adenomyomatosis. No obvious gallstones.

The CBD measures 6 mm in the porta hepatis, which is at the upper end of normal for patient's age.

ACCESSION	EXAM DATE/TIME	PROCEDURE	ORDERING PROVIDER	STATUS
	29/07/2020 13:42	US Abdomen	Choudhury ,Ahamodur Rahman	Auth (Verified)

US Abdomen

29/07/2020, 11:42, US Abdomen

Indications: ?Liver collection ?Pancreatitis evidenc ?Liver pathology. Significantly deranged LFTs. Raised Lipase. RUQ/Epigastric pain

Report:

The liver appears large in size and demonstrates increased reflectivity suggestive of fatty infiltration. An ill-defined avascular area of increased echogenity is seen in the right lobe of the liver measuring 52 x 20 mm ?atypical haemangioma ?FNH. The CBD appears dilated measuring 7.4 mm. There is antegrade flow in the portal vein.

The gallbladder appears contracted (postprandial) so gallbladder wall pathology cannot be excluded however gallbladder sludge is seen. There also appears to be a well defined hyperechoic focal speck in the gallbladder wall. A repeat scan is recommended to assess the gallbladder for wall pathology.

Both kidneys appear normal in size, shape and echotexture. The right kidney measures 120 mm and the left kidney measures 121 mm. No hydronephrosis, renal calculi or lesions seen bilaterally.

The spleen (118 mm), proximal abdominal aorta and pancreatic head and body appear normal. The distal abdominal aorta and pancreatic tail could not be visualised due to overlying bowel gas.

Scanned by W.Chaudhrey- Sonographer

Procedure		Units	Reference Range	
Vitamin D2 Serum	<5	nmol/L		
25 Vit D Method	See Below ^{T5}			
25 Vit D Comment	See Below ^{T6}			

Textual Results

T5: 31/07/2020 09:00 (25 Vit D Method)

LCMSMS

T6: 31/07/2020 09:00 (25 Vit D Comment)

~

TARGET Vit D = Vit D2 + Vit D3

<30 nmol/L Deficient, treatment recommended

30-50 nmol/L

Insufficient in some people e.g. those with documented osteoporosis or high fracture risk or those at increased risk of developing VitD deficiency because of reduced exposure to sunlight religious/cultural dress code, dark skin.

>50 nmol/L Sufficient for most people

 Unsure of duration or time.
 States 'he knew he had them as how he was confused after'.
 No tongue biting/incontinence.

States felt unwell.
 Nauseous and retching.
 Shaking.
 Anxious.
 Head fullness.

No head strike.
 No LUTS
 No diarrhoea.

Worried about dose of subutex-has a Day Lewis Pharmacy in Loughton. Today will be third day not taken his prescribed dose.

Examination

Anxious.
 Very tremulous at rest.

Able to hold conversation-clear history at times, freely discusses drug and alcohol use, as well as 16 year old daughter with ex-partner who died. Daughter is adopted-only receives photos and mail 1-2 per year.

Sweaty palms.
 Actively retching.

No JACCOL

HS Dual.
 Tachycardia
 Well perfused.

Chest
 AE good.
 No gross adventitious sounds

Abdomen
 Diffuse tenderness.

Dr Abood Consultant

40 M

Background:

- ETOH excess- drinks 3 litres port/day (?60 units/day)
- Ex-IVDU, currently on buprenorphine regime

PC

Seizures, alcohol withdrawal

HPC

Stopped drinking approx 24 hours ago

x3 seizures- x1 in street, x1 in tent

No tongue biting/urinary incontinence

Woke up choking on vomit

Tremulous

Hallucinating

Unwell

Anxious

Intermittent abdominal pain- sometimes "excruciating"

No bloods loss

DH

Vit B/Thiamine

Omeprazole 20 mg

NKDA

SH

Lives in tent in Loughton

ETOH/drug histroy as above- denies additional recreational drugs at this time

Non-smoker

No close family- estranged from ex-wife and step-daughters

VBG- pH 7.487, pCO2 3.17, pO2 10.9, lactate 2.5, glucose 7.3, BE -5.1, HCO3 21.6

Bloods- K 3.1, Bili 27, ALT 51, ALP 154, GGT 304, Lipase 148, no CRP

CXR- nil acute/focal

Patient Name: KERR, Colin James

MRN: WH1317864

Admit: 27/07/2020

NHS Number: 624-191-1090

Discharge: 17/08/2020

D/W Alcohol and drug service (CADS)- Scotland

- d/w CADS regarding re-starting buphremorphine on pt who recently received methadone and was not taking it (buphermorphine for 6 days).

- I spoke to CADS- Scotland as they were last prescribers.

- I spoke to service percriber "Angi"- CADS number 01786468282

- She was aware of Mr kerr's case. She was trying to contact pt he did not answer his phone.

- Angi confirmed that Mr Kerr was taking 18mg of suboxone.

- In terms of re-starting it, she suggested it can be re-started rapidly. She suggested the following regime from tomorrow:

* Day 1: 4mg

* Day 2: 8mg

* Day 3: 16 mg

* Day 4: 18 mg (regular dose) --> then continue with regular dose.

Plan:

- Prescribe suboxone as suggested --> Done

- Pt will be re-viewed by ALN early next week as he is on leave at the moment.

(already documented as addendum to today's WR but copied into separate note for visibility)

D/w Innocent + Serj (pharmacist)

Pt was being prepared for discharge today

However medical team were anticipating discharge Monday

Pt is on weaning regime of diazepam

It is therefore unsafe to expect that Pt would be able to wean himself successfully in community without support

This of course also ignores the very obvious safety concerns of sending a Pt with D+A issues out with a extended supply of benzodiazepines + opiates

I therefore cancelled discharge plans and informed Sister Mini

Call from Laila from IDT

Very upset that Pt is now not for discharge

They had been informed that Pt is MFFD and they had put in significant effort to arrange services for this gentleman

I explained that had I been asked I would have stated he is not ready to go

Explained weaning of benzos, Pt is not MFFD

Clearly there has been a breakdown in communication

Laila stated she will escalate

On review of notes, Consultant WR from this morning clearly states for discharge Monday
Nowhere on previous ward rounds has it stated MFFD

Plan

Continue weaning of benzos

Aim discharge Monday when safe to do so

<i>Miscellaneous Documents</i>

40 M

Background:

- ETOH excess- drinks 3 litres port/day (?60 units/day)
- Ex-IVDU, currently on buprenorphine regime

PC

Seizures, alcohol withdrawal

HPC

Stopped drinking approx 24 hours ago

x3 seizures- x1 in street, x1 in tent

No tongue biting/urinary incontinence

Woke up choking on vomit

Tremulous

Hallucinating

Unwell

Anxious

Intermittent abdominal pain- sometimes "excruciating"

No bloods loss

DH

Vit B/Thiamine

Omeprazole 20 mg

NKDA

SH

Lives in tent in Loughton

ETOH/drug history as above- denies additional recreational drugs at this time

Non-smoker

No close family- estranged from ex-wife and step-daughters

VBG- pH 7.487, pCO2 3.17, pO2 10.9, lactate 2.5, glucose 7.3, BE -5.1, HCO3 21.6

Bloods- K 3.1, Bili 27, ALT 51, ALP 154, GGT 304, Lipase 148, no CRP

CXR- nil acute/focal

ECG- not done

O/E

Tremulous

Lazy left eye (chronic, had operation age 7 yrs, more prominent when unwell)

Sweaty, flushed

Tachycardic

HS ok

Chest clear

Abdomen full, some epigastric tenderness- struggling to relax musculature but I think it is soft when relaxed

No peripheral oedema

Impression:

- Acute alcohol withdrawal- high risk of seizures
- Probable pancreatitis- clinically mild, no CRP, normal WCC/no fevers/no renal dysfunction/oxygen requirement/good BP etc

Plan:

- CIWA scoring
- Liberal chlordiazepoxide-> I am switching this to oxazepam in view of deranged LFT's
- IV fluids with K replacement

Patient Name: KERR, Colin James

Patient care taken over from day shift. Received on bed, awake. Observations taken. Due medications given. Personal care attended. Able to walk to the toilet independently. Noted patient unable to sleep after giving lorazepam. But patient remains calm. Asked if he has having hard time sleeping, he verbalised that he just woke up and he'll be sleeping after reading a book. No other unusualities noted. Kept comfortable on bed.

Informed Colin that ALN spoke with Ann Hay (01786479555), his last keyworker at Sterling CDAS in Scotland, who will hand over care to West Essex Stars. The link person, being Phylis Nnadi (01279425989). Phylis (Nurse Prescriber) then advised that the process of hand over goes through Essex Open Road, **Corinne Johns** Service Manager South & West Essex. Tel: 01279 434621 Harlow

Dr David Barry(Ward Dr) is aware of theses developments

Physical Health

Informed him that it appeared he has got some suspected infection. He said he was worried about his head injury that appears to have not been investigated after the assault with glass bottle.

Encouraged Colin to start looking for a GP in Loughton area and register with them

Impression: More stable- less tremors/sleeping problem/?Infection

Electrolytes normal

Patient requests I contact Day Lewis Pyles Lane Loughton 02085084929 (google) to ascertain subutex dose and to inform them he will be unable to pick up script. I have tried X 2-No reply.

.

Alcohol

He started drinking at the age of 14years and this then increased when he was 18 years He has been drinking @ 3 ports wine 19% (10.7x3=32.1units daily) He said that he had been period for 6 years. He also went for a rehab placement in 2017 in Aberdeen for 8months. He said he then went through a strenuous divorce in 2018 and that worsened his drinking pattern. He complained of poor sleeping and eating pattern before this admission. He said this seizure episode might have been alcohol related seizure He admitted to several falls. No significant weight loss reported. He was noted to be having severe anxiety and tremors, hallucinations

He was given leaflets of effects of alcohol, Essex Arc, Open Road, Essex stars, Mental health 24hrs if in future crisis

Drugs

He admitted to smoking heroin and crack cocaine since in his 20s. He has smoked 0.5g Heroin and 0.2g crack cocaine when money permits. He has been on both Methadone and Buprenorphine (Suboxone). He is a previous IVDU. He last injected in 2016.

He said he last smoked heroin and crack cocaine in June 2020

Patient Name: KERR, Colin James

MRN: WH1317864

NHS Number: 624-191-1090

Age/DOB/Sex: 46 years / 29/11/1979 / Male

Patient Ethnicity: Patient Refused

Location: R1H Syringa; Bay A; 03

Admit: 27/07/2020

Discharge: 17/08/2020

Encounter Type: Inpatient

Lead Clinician: Sinha ,Bijay Kumar

Therapies and Teams

He appears to have a high tolerance of benzodiazepines as noted on the drug chart

Vulnerable adult

He said when in Scotland he sustained Head Injuries and had to have sixteen staples on his head. He said the family of his ex-wife continued to threaten him and hence, left Scotland to live near her sibling **Nalia Kerr** of 13, The Milliners Court, The Croft, Loughton, IG10. He could not remember her telephone number

He then went on to say, whilst he was now living in the park in Loughton one of his friends attacked with a bottle and he sustained a broken left hand and ribs in July 2020

Psychiatric History

He is prev known to Psychiatric services in Scotland

Mental health

Appearance/Behaviour - 40-year old Caucasian male, average build and height, dressed in casual clothes, adequate self-care and grooming, interacting freely with good rapport and eye-contact. He expressed feeling low in mood and depressed. He was very tremulous and anxious on approach

Speech - Coherent, spontaneous, normal in volume and tone, no pressure or tangentiality

Mood - Subjectively 'feeling anxious and low in mood'; objectively euthymic. He was distressed about what was to happen to him when he leaves hospital and where he was going to live safely as he felt his life was threatened if he goes back to his tent in Loughton

Patient Name: KERR, Colin James

MRN: WH1317864

NHS Number: 624-191-1090

Age/DOB/Sex: 46 years / 29/11/1979 / Male
