19-Jun-2026 Dr Bob Shaw Administration

Administration	Scanned Document *SCI Referral Letter :*

19-Jun-2026 Dr Bob Shaw Surgery consultation

Administration (P3)	Consultation ~2/12 feeling increasingly weak, hands, legs and face puffy.o/e oedematous as above. ?ascitic abdo (although states abdo girth unchanged in recent times). pulse 112 ??irreg (although agitated and cold due to being caught in rain shower). ?pallor?first presentation cirrhotic liver diesase. Suggest blood tests: states impossible to obtain peripheral blood/hospital invariably require to use central veins.I think enough here to refer direct to gastro urgently: initially responded in angry manner to this accusing me (from a point where rapport appearred good) of "doin nothin for me". ICE explored: stated expected medication to sort this but by end of consultation I think it was clear that when booked appointment patient strongly suspected something complex and significant was ongoing.I will also refer for ECG.

10-Jun-2026 Ms Gemma Murray Administration

Administration (P3)	SMS text message sent to patient This is a message for all Yellow Practice patients. Please note that the practice will be closed on Monday the 15th of June for the public holiday. Please ensure you have requested any prescriptions with time to give the team 48 working hours to process so you do not run short whilst the practice is closed. Many thanks {Active Patients List}

Administration (P3)	SMS text sent to patient	The Yellow Practice will be upgrading our computer systems. This is part of a National Strategy and is something the practice must do. From the 12th-17th of February, the practice will operate on emergency appointments only and will be unable to issue routine prescriptions during this time. Please can you check if you are due to request your repeat medication between the 11th and 17th, and if so, please request your medication before this time.

13-Jan-2026 Mrs Jo Johnson Surgery consultation

Administration (P3)	Telephone encounter	
Intervention	Medication review done by pharmacist	Confusion about prescription/pharmacy - Nicholas would like HarmonyRow pharmacy to be his chosen pharmacy however the Rx from last week went to Craigton; Nicholas will collect from Craigton and I will issue next rx in 3 weeks time and send to ***** Row; discussed the fact he purchased soluble co-codamol from H/R - tells me this was for a friend - discussed the risk of low level overdose of paracetamol over a prolonged period - assures me isn't taking additional co-codamol and tells me has been clean for 7 years. I did say that I would prefer to know if he ever did start supplementing his co-codamol so that we could mitigate the risk of liver toxicity to him by prescribing codeine by itself - Nicholas tells me he understands this.

15-Dec-2025 Dr Marianne Simpson Surgery consultation

Diagnosis (P3)	been for hip xray but not reported yet. Says has spoken to radiology and still waiting on chest CT. Weight increased a lot since out of jail in March - feels more sob on exertion, legs feel swollen (left worse than right as prev DVTs and increased injecting that limb in past).	
Diagnosis (P3)	both legs scarred, swollen, non tender but solid. Nil acute.	
Diagnosis (P3)	discussed urine sample - agreed given hx and previous scripts to commence pregabalin 150mg bd for longstanding left leg pain, cocodamol 30/500 bd as currently taking this. Review in 1 month re. script and also xray of hip.	
Diagnosis (P3)	meantime to try and continue going to the gym and do light exercise due to left hip pain (see 24/11) - advised if xray ok may need physio rather than ortho as was asking for a scan.	

09-Dec-2025 Dr Marianne Simpson Administration

Diagnosis (P3)	pt changed appt to telephone call but no answer on landline - no mobile.	

03-Dec-2025 Ms A Docman Other

02-Dec-2025 Dr Marianne Simpson Administration

Diagnosis (P3)	reviewed notes - prev on pregabalin 300mg bd last prescribed 2023 and stopped in prison. Long hx of ? PE/recurrent DVT as a result of previous injecting drug use. Been on methadone, buvidal and presently espranor.	

24-Nov-2025 Dr Marianne Simpson Surgery consultation

Examination	Urine opiate level SPECIMEN ID: B,25.0413659.QSPECIMEN TYPE: UrinePositive	
Examination	Urine Methadone SPECIMEN ID: B,25.0413659.QSPECIMEN TYPE: UrineNegative	
Examination	Urine ketamine level SPECIMEN ID: B,25.0413659.QSPECIMEN TYPE: UrineNegative	
Examination	Urine Cocaine SPECIMEN ID: B,25.0413659.QSPECIMEN TYPE: UrineNegative	
Examination	Urine buprenorphine level SPECIMEN ID: B,25.0413659.QSPECIMEN TYPE: UrinePositive	
Examination	Urine Benzodiazepine SPECIMEN ID: B,25.0413659.QSPECIMEN TYPE: UrineNegative	
Examination	Urine Creatinine SPECIMEN ID: B,25.0413659.QSPECIMEN TYPE: Urine	15.9 mmol/L
Diagnosis (P3)	came out of prison in March - states since then been buying pregabalin 300mg daily for neuropathic pain down right leg for yrs - yrs ago bitten by a parasite, has had scans in England and treated with pregabalin but stopped when in prison but prev prescribed by gp. Keen to be reestablished on this via script. Also needing rivaroxaban - also was off this until recent admission to hospital. Overdue cxr as suggested by them. Feels chest lot better. States on espranor by ADRS and buying cocodamol for longstanding hip/thigh pain assoc with numbness lateral aspect both thighs but worse on left. Keen for xray hip also as feels bones rubbing and reduced movement. States no other drug use.	
Diagnosis (P3)	Limited adduction left hip and rotation causing pain in lateral aspect of hip.	
Diagnosis (P3)	agreed to script for rivaroxaban, to get hip xray along with cxr, to hand in UDS to see if actually taking pregabalin and I will review notes with follow up appt.	
Diagnosis (P3)	advised to take only paracetamol as no point taking cocodamol whilst taking espranor.

CLINICAL INFORMATION

History of presenting complaint

Presenting complaint

Description: ?cirrhotic liver disease ?beginning to decompensate

Comment: Dear Team

This gentleman presents in a rather unusual situation in that he informs me it is universally impossible to obtain blood samples and has been for decades other than via using central venous access.

He presents today with a 2 month deterioration in his general wellbeing alongside the new development of puffy hands, face and increasing chronic lower limb oedema.

On examination I suspect he is ascitic.

He looks pale.

There is a history of polysubstance use ongoing until relatively recently. I understand there is a history of hepatitis C with evidence of clearance (I do not know if this was spontaneous or following treatment) but it does not appear to me that there has been any form of assessment of his liver either by USS or Fibroscan at any point.

My suspicion here is that he has undiagnosed cirrhotic liver disease and is in the early stages of decompensation.

I appreciate it is highly unusual for such a referral to be made without blood test results but I am unsure what else to do other than to ask that he be seen at your clinic as soon as is practicable.

Many thanks
Bob [redacted]
GP [redacted]

3. VOLUNTARY AUTHORISATION FOR ORGAN OR TISSUE DONATION

You have a choice about organ or tissue donation after your death. To find out more about why it is important that you take the time to make your donation decision and record it, go to www.organdonationscotland.org

4. HOW WE USE INFORMATION

The information you have provided will be used by NHS Scotland to carry out its various functions and services including scheduling appointments, ordering tests, hospital referrals and sending correspondence.

Your information, including your name, gender, date of birth and address, will be passed to NHS National Services Scotland where it will be held on the Community Health Index (CHI). This information is used to register you with the GP Practice, transfer your medical records between GP practices in the UK, make payments to GP Practices for medical services provided, and to process and issue medical exemption certificates and entitlement cards.

NHS National Services Scotland shares information about you within NHSScotland to assist in the provision and improvement of NHS services and the health of the public. When we do this, we do it as described by NHS Scotland in the NHS Inform website under the "How the NHS handles your personal health information" section.

NHS Scotland is made up of various organisations such as NHS Health Boards, GP practices, the Scottish Ambulance Service or NHS National Services Scotland (the common name of the Common Services Agency for the Scottish Health Service). These organisations are individually responsible for your personal health information. In terms of data protection and privacy laws, they are known as 'data controllers'.

Find out more about NHS Scotland in the link provided above.

5. PATIENT DECLARATION

I declare that the information I have given on this form is correct and complete. I understand that, if it is not, appropriate action may be taken. To enable NHS National Services Scotland to confirm my eligibility to lawfully register with a GP and for the purposes of prevention, detection, and investigation of crime, the minimum necessary information from this form could be disclosed to relevant authorities.

I understand that more comprehensive information about how NHS Scotland handles my data is available from NHS Inform.

This information can be provided in other languages and formats on request. The NHS Inform helpline provides an interpreting service.

Patient / Patient's representative signature [signature] Date * 23/10/25

Representative's name (if applicable)

Relationship to patient (if applicable)

6. FOR PRACTICE USE

GP reference number

Practice code

GP name

Identification seen – do not take or retain photocopies

Please initial each relevant box (it is recommended that at least one form of the identification is seen to positively identify the applicant although it is not mandatory to provide identification to register)

Birth cert ☐ Student ID card ☐ Driving licence ☐ Passport or HC2 cert ☐ Home Office app reg card ☐ Other / None

I accept this patient onto the practice list and declare that, to the best of my knowledge, this information is correct. I acknowledge that the details may be authenticated from appropriate records, and that payments generated from this patient registration will be subject to Payment Verification.

NHS Confidential: Personal data about a patient

Patient
Name: Mr Nicholas McJury NHS Number: 4001149141

Operations / Procedures

None

Co-Morbidities

1. Chronic Hepatitis C virus
2. Harmful use of medication or illicit drugs
3. Pulmonary Embolism (PE)
4. Deep Vein Thrombosis (DVT)
5. Upper GI bleeding of unknown origin
6. Current Smoker

Action By GP And Community Teams

Please provide clexane treatment dose for life (several DVTs/PEs in the past).

Health Promotion

1. Smoking History - Current smoker
   Referred to Smoking Cessation Service: n/a
2. Weight: 65 kg, Height: 172.72 cm, BMI: 21.8

Infection and Risk Factors

1. Hepatitis C

Results Required for GP continued management

Full Blood Count(FBC) (01/08/2015)

PCV	0.345	0.40-0.50 - Low
MCV	82.7	80-100
MCH	28.5	27.0-32.0
MCHC	345	320-360

Renal Profile(U&Es) (01/08/2015)

Test Name	Result	Range
Sodium	138	133-146
Potassium	4.6	3.5-5.3
Urea	3.4	2.5-7.8
Creatinine	64	80-115 - Low
eGFRcreat (CKD-EPI)	>90	

Key Events During Admission

- Mr Mcjury was admitted with a gabapentin overdose. Had gabapentin for pain as was beaten with a steel bar one week ago has sutures in nose and due a ENT follow up. Mr Mcjury was caught shop lifting and had been tak to a holding room where Mr Mcjury took 12-17 gabapentin tablets in order to kill himself. Also had taken daily dose of methadone but denies taking a other drugs background of IVDU.
- While on the ward Mr Mcjury was reviewed by the psychiatry team.
- Had not been taking warfarin (INR subtherapeutic). Given the past history difficulty with compliance we would suggest to switch to life long clexane treatment dose.
- Not a good candidate for NOAC as we would be unable to monitor compliance and effect.

Thromboprophylaxis Advice

THIRD PARTY COPY

NHS Confidential: Personal data about a patient

Patient
Name: Mr Nicholas McJury NHS Number: 4001149141

The risk of developing blood clots can persist for some weeks after discharge. There are certain signs to look out for that could mean that you have a blood clot. You should contact your doctor immediately if you develop any of the following symptoms while you are in hospital or after you go home.

- Leg pain
- Leg swelling
- Warm or discoloured skin on the legs
- Enlarged or more noticeable veins near the surface of the skin on your legs
- New onset shortness of breath
- Unexplained chest pain
- Coughing up blood

Further Information

Please phone your GP, NHS 111 service or in the event of an emergency telephone - 999

MCV	86.1	80-100
MCH	29.8	27.0-32.0
MCHC	347	320-360

Key Events During Admission

- Mr McJury was admitted via the Emergency Department with chest pain a shortness of breath for investigation of a possible pulmonary embolism.
- Admitted in [redacted] custody after an arrest for shoplifting. Developed left si chest pain described as a dull ache radiating to his back along with shortne of breath and a cough without sputum or haemoptysis. Background of previous PE/DVT and was on warfarin but stopped 2-3 weeks prior. Had earlier consumed 5 cans of strong lager and an unknown quantity of an unknown substance for pain relief.
- Admission bloods showed WCC=6.4, Hb=122 and INR=1.1 (subtherapeutic). An initial troponin was negative, and a urine dip was NA Mr McJury was tender around his left posterior chest wall without bruising Calves were firm with scars and damage from IVDU.

Given Mr McJury's previous history there would be no therapeutic benefit of a CTPA. We have discussed rivaroxiban as a therapy and he his happy with this as this will not require regular blood monitoring. He will need to be on this FOR 6 months at least.

Thromboprophylaxis Advice

The risk of developing blood clots can persist for some weeks after discharge. There are certain signs to look out for that could mean that you have a blood clot. You should contact your doctor immediately if you develop any of the following symptoms while you are in hospital or after you go home.

- Leg pain
- Leg swelling
- Warm or discoloured skin on the legs
- Enlarged or more noticeable veins near the surface of the skin on your legs
- New onset shortness of breath
- Unexplained chest pain

Diagnosis

1. Left leg DVT and probable PE

Co-Morbidities

THIRD PARTY COPY

NHS Confidential: Personal data about a patient

Patient

Name: Mr Nicholas McJury NHS Number: 4001149141

None Stated

Infection and Risk Factors

None Stated

Investigations

XR Chest - There is a little patchy air space shadowing in the right lower zone but no focal dense consolidation. The remainder of the lungs appear clear. (08/08/2010)
NM Lung Perfusion Scan (Q) - There is generalised heterogenous perfusion.

There are segmental defects at the right upper lobe, left base, apical segment left lower lobe/posterior segment left upper lobe. A non-segmental perfusion defect is also noted at the right mid-zone

Conclusion: Appearances are suspicious for PE. Overall this is an intermediate-high probability study. (06/08/2010)
XR Chest - There is neither focal nor generalised pulmonary parenchymal abnormality. The cardiomediastinal contour is normal there is no mediastinal, chest wall or soft tissue abnormality.(06/08/2010)

Operations / Procedures

None Stated

Key Events During Admission

Mr Mcjury presented with swollen left calf and sudden onset SOB. A VQ scan suggested appearances suspicious for PE.

He has been warfarinised and given his previous history of DVTs, would need to be on warfarin for life. I understand he is not registered with a GP, and have advised him to register with a GP for regular INR checks. I have emphasised the importance of having therapeutic INRs and the risks associated with low or high INRs. He has assured me that he will register with a GP in the earliest opportunity.

Management Plan, Recommendation & Self-Care Instructions

Key Events During Admission

Dear doctor,

This patient attended with haematemesis and haematuria. He also complained of increased bruising and feeling lethargic. Hb was 82 this admission, INR was >8. Urea 4.9. His warfarin was reversed with 5mg vitamin K orally. His warfarin was held during this admission until his INR came down to <2. This patient admitted to not keeping track of his INR and has continued to take warfarin.

THIRD PARTY COPY

NHS Confidential: Personal data about a patient

Patient

Name: Mr Nicholas McJury NHS Number: 4001149141

There had been IV access issues during this admission and this patient had not been consenting to IV cannulation by the anaesthetists. A discussion regarding transfusion was made as his repeat Hb was 74. It was planned that an OGD be requested when his INR normalised. The patient has declined an OGD.

This patient requested to be discharged having full mental capacity and having had the risks of discharging explained to him, including re-bleeding, PE/DVT due to subtherapeutic INR. He has had bloodtests taken including a HIV, liver screen. A review from the hepatitis C nurses and alcohol liaison nurses had been requested but the patient was discharged before this could be done.

His bleeding has settled. We are discharging him on treatment dose clexane and he has been reloaded with warfarin. He is to stop clexane when INR therapeutic. The patient enquired about the newer anti-coagulants but we have explained that warfarin is still the drug of choice as opposed to the newer anti-coagulants due to its potential for reversibility. He is to take iron tablets.

Management Plan/Recommendation & Self Care Instructions

INR to be monitored in the community (patient states that Pat, a nurse monitors INR)

Outstanding Investigations

Awaiting full liver screen to come back including HIV and genotyping.
You will be advised of the results when they are available

Clinical Allergies

None Stated

ActionRequired By GP

Monitor his INR and compliance to warfarin closely. To stop therapeutic clexan when INR therapeutic.

Results Required for GP continued management

Thromboprophylaxis Advice

The risk of developing blood clots can persist for some weeks after discharge. There are certain signs to look out for that could mean that you have a blood clot. You should contact your doctor immediately if you develop any of the following symptoms while you are in hospital or after you go home.

- Leg pain
- Leg swelling
- Warm or discoloured skin on the legs
- Enlarged or more noticeable veins near the surface of the skin on your legs
- New onset shortness of breath
- Unexplained chest pain
- Coughing up blood

Further information

Please phone your GP, NHS 111 service or in the event of an emergency telephone - 999

website: www.uhs.nhs.uk/bloodclots

If anti-embolic stockings have been used for thromboprophylaxis during your hospital stay, they should continue to be worn until you return to your usual level of mobility.

Follow-up
Clinic: Review in SHO clinic on wednesday 29/7/15 11am
To be booked by: Doctor

History of presenting complaint
Presenting complaint

Description: irregular nodule righ tlung

Comment: Many thanks for seeing this 56 year old man who had a CT thorax in Southampton in January following an assault. This showed widespread emphysematous changes and an irregular 11mm nodule in the right lower lobe, further review was recommended. He ha s now moved back to Glasgow. He has a significant past medical history including PE and opiate misuse

Regarding Nicholas McJury, born 28 Oct 1966 (CHI 2810666490)

Dear Dr,

Your patient has been assessed for osteoporosis / fracture risk on **01 Mar 2023** following presentation to hospital with a fracture. This fracture was identified from a radiology report or medical records and this patient has not been seen in person by the Fracture Liaison Service. A report from this assessment is attached.

An appointment for full assessment by the Fracture Liaison Service, including DXA scan, will be now arranged.

Follow up

A DXA scan will be scheduled for your patient

Yours sincerely,

[redacted]
Osteoporosis Nurse Specialist

Radiology Examination 73948470: 15 Jan 2023 23:13

CT Chest/Abdo/Pelvis

CT Chest/Abdo/Pelvis

Clinical Details: Alleged assault, head injury on anticoagulant with left periorbital bruising, tender left upper chest and the right upper quadrant
Examination Dated: 15/01/2023 23:13
Title & Technique: CT trauma scan
Clinical Details: Alleged assault, head injury on anticoagulant with left periorbital bruising, tender left upper chest and the right upper quadrant
Findings:
Non-contrast CT head showed:
No haemorrhage, mass lesion, midline shift or signs of acute vascular occlusion.
Normal size, shape and configuration of the ventricular systems.
Preserved grey-white matter differentiation with no intra or extra-axial areas of fresh blood density.
The basal cisterns are clear with no evidence of brain oedema.
CT of the facial bones showed:
Fractured medial wall of the left orbit associated with a left orbital emphysema, no evidence of intraorbital haematoma.
No signs of maxillary or zygomatic fractures.
Intact pterygoid plates and orbital apices.
No signs of skull base fracture.
Intact nasal septum.
No signs of mandibular fractures.
CT of the cervical spines showed:
Maintained alignment of the scanned cervical spines with mild cervical spondylitic changes.
No signs of facet joint dislocation, spinous processes fracture or paraspinal soft tissue haematoma.
Preserved atlantoaxial spaces with no signs of odontoid fracture.
Preserved craniocervical junction with no signs of occipital condyles fracture.
Intact transverse processes and transverse foramina.

THIRD PARTY COPY

NHS Confidential: Personal data about a patient

Patient name: **Nicholas McJury**
Hospital number: **3513616**
NHS number: **400 114 9141**.

Unremarkable appearance of the soft tissue of the neck.
CT of the thorax showed:
No signs of mediastinal haematoma or aortic injury.
The trachea and major airways are patent.
No signs of pneumothorax or haemothorax.
Lungs showed bilateral extensive emphysematous changes with no signs of laceration or contusion.
An irregular nodule measured about 11 mm was noted in the right lower lung lobe peri fissural in location.
CT of the abdomen and pelvis with contrast showed:
No signs of parenchymal organs injury.
No free air or fluid noted in the abdomen or pelvis.
Mild increased wall thickness of the urinary bladder was noted likely suggestive of a a mild cystitis.
CT of the bones showed:
Preserved shoulder joints, no signs of scapular or clavicular fractures.
No signs of acute rib fractures.
Preserved sacroiliac joints with no signs of sacral fracture.
No signs of pelvic bones fracture.
Preserved femoral head and neck bilaterally with no signs of acute fracture or dislocation.
Maintained alignment of the scanned dorsal and lumbar spines with no signs of acute fracture or displacement.
No signs of sternal fractures.
Conclusion: A hairline fracture in the medial wall of the left orbit associated with left orbital emphysema, no intraorbital haematoma.
No other acute substantial trauma related findings could be identified.
Nontrauma related findings includes:
An irregular nodule in the right lower lung lobe on background of widespread emphysematous changes, the appearance is suggestive of a parenchymal scarring but chest physician consultation might be appropriate for further evaluation and to arrange appropriate follow-ups.
Mild increase wall thickness of the urinary bladder suggestive of a mild cystitis.
Bilateral reactive inguinal lymph nodes.
Recommendation: Please correlate with the clinical picture please note that cord and ligamentous injury could not be totally excluded with CT and the decision to clear the spine must be based on clinical assessment in addition to the CT findings.

Dear Dr. RM Mair,

Nicholas McJury; D.O.B: 28 Oct 1966; CHI: 2810666490
FLAT 1/2, 820 GOVAN ROAD, Glasgow, Lanarkshire, G51 3UP

Attendance: Specialty - Orthopaedics ; Clinic - SUOROR2-QEUH GENERIC ORTHO FRACTURE CLINIC
Date and Time of Appointment - 06/03/2023 14:00

Clinical Comments:
Diagnosis: Fracture right dominant midshaft ulna.

Date of Injury: Approximately eight weeks' ago.

Treatment: Conservative.

Your patient was reviewed today in the clinic. He sustained this injury whilst in Southampton approximately two months' ago. He was treated in a cast. He attended the Emergency Department on 25/02/2023.

On examination today out of cast, he has a good range of pronation and supination and this is pain free. He is ever so slightly tender over the fracture on stressing it, otherwise his arm is neurovascularly intact and reasonably functional.

Plan: I said he can stay out of the cast so long as he is sensible. I will review him in six weeks' time and get a further x-ray just to check this has gone on to heal.

Yours sincerely

Mr [redacted]

Dear Colleague

Re: Nicholas McJury DOB: 28/10/1966 CHI: 2810666490
Address: Flat 1/2 820 Govan Road, Glasgow, G51 2QJ

ADRS Care Manager Elaine [redacted]

This patient continues to attend the Alcohol and Drug Recovery Service and I reviewed them on 12th April 2023.

Nicholas was seen today as a "Walk in "patient at 1150 at Gorbals HC by duty worker [redacted] Lennie and myself.

Drug Use:

Home from Southampton permanently now to look after aging mum. £20 daily heroin smoked for most of his life and using since 17 years of age. Has had methadone in past. Came up to Scotland 2 months ago. Was on methadone 30mls from England, felt not stable on this. Has had counselling training, and says he has a degree. Reason for attendance today – "family in bits", and he feels he needs help. Has served a number of years in prison, 2 years in a recovery project called IOM house, run by [redacted] and probation, hopes to get into recovery work eventually. Had treatment years ago was in Glasgow.
Last used 8pm last night £10, by 4-5pm today he thinks will feel withdrawals. He feels is better for him to go onto Methadone, feels anxious about going onto Buprenorphine.
Risks, benefits and treatment options discussed, and Nicholas elected to start methadone.

Alcohol Use:

None. Has had AKI in past, renal function normal now he says.

Physical Health:

GP in Govan Dr Mair - on Pregabalin 600mg daily, 8-10 x tramadol 50mg daily (very infrequently taken) - and rivaroxaban for DVT, thinks also has nerve damage in his left hip. Think a recent MRI scan in Southampton may show lung cancer and he needs to follow this up. Recent broken right arm in an assault. No feeling(numb) in right thigh. 7 years ago paralysed in legs after a bite from a parasite - got himself arrested after dog and [redacted] died as couldn't cope, went to rehab after this, slept rough at one point woke up paralysed from waist down. 2 years in hospital. Re-learned how to walk. No longer taking tramadol but says he still collects them.

Mental Health:

Presented as bright, talkative, lots of information to relay about his past. Smartly dressed. As a child [redacted] and [redacted] split. [redacted] drinking, he looked after his [redacted] and his [redacted] Hx of CSA as a child. From 9-12yo. May report the person as still alive.

Contact with Children:

Contact with adult children 40y 38y 30y - a son and 4 [redacted] not sure where youngest [redacted] is - aged around 25yrs.

Legal:

2 warrants in England –feels unlikely to come for him, Magistrates court for shop lifting. Non driver, has licence not to drive on OST aware and agrees, information given re DVLA.

Social:

PIP and UC. Has fit notes on record.

Family inclusive practice. [redacted] - supportive and training to be a nurse. [redacted] "going blind". 76yo. his reason for coming home.

Care and Treatment Plan:

[redacted] to contact GP re his hip pain. [redacted] wants to start Methadone and chose this, to avoid using illicit drugs, to comply with appointments.
5 days script given for Methadone mixture 1mg/1ml 30mls daily. In past has been stable on 60-70mls. Taxi arranged for Monday.

CLINICAL INFORMATION

History of presenting complaint

Presenting complaint

Description: irregular nodule righ tlung

Comment: Many thanks for seeing this 56 year old man who had a CT thorax in Southampton in January following an assault. This showed widespread emphysematous changes and an irregular 11mm nodule in the right lower lobe, further review was recommended. He ha s now moved back to Glasgow. He has a significant past medical history including PE and opiate misuse

Date and Time of Appointment - 16/08/2023 10:30

Clinical Comments:
I tried to call this gentleman on 15 August, in lieu of his scheduled clinic appointment. I phoned the landline (there was no mobile number supplied) and his [redacted] answered. She informed me he is in prison in England, which is probably why he did not attend for a CT which we had organized. She would not disclose anything further and said he is likely to be away for some time and was under the impression he had a scan in England.

I will take him off our waiting list.

Yours sincerely

APPLICATION TO REGISTER PERMANENTLY WITH A GENERAL MEDICAL PRACTICE

NHS SCOTLAND

1. PERSONAL DETAILS (ALL FIELDS MARKED * ARE MANDATORY AND MUST BE COMPLETED AS FULLY AS POSSIBLE)

Male* ☑ Female* ☐ Is this your first registration with a GP Practice in the UK?* Yes ☐ No ☑ Will you be in the area for more than 3 months?* Yes ☑ No ☐
(If 'No', please complete a temporary resident form)

Date of Birth* 28-10-66

Title* MR

Surname* MCJURY

Forenames* NICHOLAS

Previous Surname*

email address # NICHOLAS.MCJURY@HMIE

Address* 820 GOVAN Road 1/2

Postcode* G51 3UP

Telephone # 0141-445-2395

Mobile #

The following information can be found on your current medical card:

Community Health Index (CHI) Number*

NHS Number*

The following information can be found on your birth certificate:

Town of Birth* GLASGOW

Country of Birth* SCOTLAND

Registered district of birth (Scotland only) SCOTLAND.

[redacted] maiden name ALLISON

the data supplied in these fields will not be input to, or updated in, the Community Health Index (CHI), but will be held on the GP Practice's system

2. HELP US TO TRACE YOUR PREVIOUS GP HEALTH RECORDS BY PROVIDING THE FOLLOWING INFORMATION

Address in UK when you were last registered with a GP*
ST MARYS Surgery
Southampton
ENGLAND.

Postcode* SO14 4RJ

Name and address of previous GP Practice in UK*
St Albaian Towers
St Marys

Postcode* SO14 1RJ

If you are from abroad:

Date you first came to [redacted] the UK* [redacted]

If previously resident in the UK, date of leaving* [redacted]

Your most recent country of residence

If you have served in the British Armed Forces:

Service Number

Enlistment date* [redacted]

Are you a Reservist?* ☐ Yes ☐ No

If yes, please provide your address before enlisting*

Leaving date* [redacted]

Is this your first registration with a GP since leaving the Armed Forces?* ☐ Yes ☐ No

Postcode*

3. VOLUNTARY AUTHORISATION FOR ORGAN OR TISSUE DONATION

I would like to join the NHS Organ Donor Register as someone whose organs may be used for transplantation after my death.
Please tick the boxes that apply. Your consent to organ donation will be shared with NHS Blood and Transplant together with the information you have provided in Section 1 including your name, gender, date of birth address and CHI number. For more information on being an organ donor or privacy, please ask for the leaflet on joining the NHS Organ Donor Register or visit www.organdonationscotland.org

Any of my organs and tissue ☐ Or my

Kidneys ☐ Eyes ☐ Heart ☐ Lungs ☐ Liver ☐ Pancreas ☐ Small bowel ☐ Tissue ☐

Notes on tissue - heart valves and corneas come under the 'heart' and 'eyes' boxes respectively so the 'tissue' box covers donating other types of tissue, such as your tendons.

4. HOW WE USE YOUR INFORMATION

The information you have provided will be used by NHS Scotland to carry out its various functions and services including scheduling appointments, ordering tests, hospital referrals and sending correspondence.

Your information, including your name, gender, date of birth and address, will be passed to NHS National Services Scotland where it will be held on the Community Health Index (CHI). This information is used to register you with the GP Practice, transfer your medical records between GP practices in the UK, make payments to GP Practices for medical services provided, and to process and issue medical exemption certificates and entitlement cards.

NHS National Services Scotland shares information about you within NHSScotland to assist in the provision and improvement of NHS services and the health of the public. When we do this, we do it as described by NHS Scotland in the NHS Inform website under the "How the NHS handles your personal health information" section.

NHS Scotland is made up of various organisations such as NHS Health Boards, GP practices, the Scottish Ambulance Service or NHS National Services Scotland (the common name of the Common Services Agency for the Scottish Health Service). These organisations are individually responsible for your personal health information. In terms of data protection and privacy laws, they are known as 'data controllers'.

Find out more about NHS Scotland in the link provided above.

5. PATIENT DECLARATION

I declare that the information I have given on this form is correct and complete. I understand that, if it is not, appropriate action may be taken. To enable NHS National Services Scotland to confirm my eligibility to lawfully register with a GP and for the purposes of prevention, detection, and investigation of crime, the minimum necessary information from this form could be disclosed to relevant authorities.

I understand that more comprehensive information about how NHS Scotland handles my data is available from NHS Inform.

This information can be provided in other languages and formats on request. The NHS Inform helpline provides an interpreting service.

Patient/Patient's representative signature [signature] Date 24-2-23

Representative's name (If applicable)

Relationship to patient (If applicable)

6. FOR PRACTICE USE

GP reference number [ ]-[ ] GP name

Practice code [ ]-[ ] Mileage (No.) Road [ ] Water [ ] Footpath [ ]

Identification seen - do not take or retain photocopies

Please initial each relevant box (it is recommended that at least one form of identification is [redacted] to positively identify the applicant although it is not mandatory to provide identification to register)

Birth Cert. ☐ Student ID Card ☐ Driving Licence ☐ Passport or HC2 Cert. ☐ Home Office App Reg Card ☐ Other/None - specify [ ] Receptionist initials [ ]

I accept this patient onto the practice list and declare that, to the best of my knowledge, this information is correct. I acknowledge that the details may be authenticated from appropriate records, and that payments generated from this patient registration will be subject to Payment Verification.

has made good progress with DVT. Can walk approx 1
mile before he needs to rest. Previously has been
signed off sick with new debility. Repeats years
of probec. [redacted] 5. 2 older children were
brought up by [redacted] in law in Soton. They are
now 20 and 17. 17 yo [redacted] is now pregnant. 3
other children are in care somewhere, no contact
with them. Broken relationships. Hx of childhood
disrupted. [redacted] drinker, bringing [redacted] up on his
own. [redacted] remains v supportive. NFA since came out
of Camp [redacted] after 18m. Probation officer is BEcky
[redacted] at Town Quay. He was expecting resettlement

and leisure card for eg as part of package.
Remians on licence for 9m.
Examination: speech low volume, seems rather subdued. Dusky
blue legs bilat, old crater in left groin, good
pedal pulses. Old swelling left foot and post
thrombotic [redacted] ses.
Comment: happy for me to liaise with probation on his
behalf.

26 Nov 2004 | Surgery, G.P.Surgery: Dr [redacted] Dubras Entered at: Southampton Homeless Health Care | Entered: 12 Jun 2009 00:00

Problem title: [X]Assault by unspecified means
History: was beaten up in a phone box appro 2 weeks ago, at
8pm ish. Was attacked from behind and was pushed
over and kicked. Was unable to attend probation
last week as felt too battered. Still NFA, feeling
very despondent, want to be off drugs. Still no
leisure card etc. Willing to do cold turkey and
come off. Not eating well.
Examination: yellowing bruise over medial part of right
eyebrow, and bump over right temple with very
faded yellow bruise. Lump palpable right parietal
area of scalp. REdened area below medial aspect
of right eye. Small linear laceration vertically
on left side of upper lip, approx 1cm long.
Comment: I will do letter for Probation. Due to see them
next week.

Comment: Attended requesting a medical certificate. He is
due in court tommorrow morning and so can't see a
doctor then and there is no doctor present
on Thursday. He was not happy about this and was
requesting a note to confirm he had been here. I
declined and recommended he saw the doctor

20 May 2005 | Surgery, G.P.Surgery: Dr [redacted] Dubras Entered at: Southampton Homeless Health Care | Entered: 12 Jun 2009 00:00

Problem title: [X] Reactive depression NOS
History: has been back in Camphill prison, out of prison
this am; feels great. Has been using the gym, is
clean. Has appt with probation today and keen to
get benefits claim in as well. Would like to get
on a [redacted] course. Accomodate a priority today.
A grandfather 2 weeks; absolutely delighted.
Examination: cheerful, relaxed. Post thrombotic change noted in
left lower leg. Complaining of discomfort in left
side of his neck and localises what may be a small
lump in trapezius; advised to discuss this next
time when he has got all other issues sorted out.

	Problem: (Deep vein phlebitis/thrombophleb leg) or (deep vein [redacted] (G801.) (SNOMED: 195403006) (Deep vein thrombosis) Problem title: [X]Heroin addiction History: states not injected into femoria vein last 7yrs.	

Worried re recurrence of DVT; advised if active
and not injecting, is not currently at risk.
Comment: long chat about the fact he was clean in prison;
but seems to have little intent of staying drug
free in the imediate future.
Problem title: Deep vein thrombosis
History: had DVT 4yrs ago left leg. Was seen in SGH from
[redacted] custody early Aug 2005. Went in with leg
swelling. Last tok warfarin 6m ago.
Examination: post thrombotic change left leg
examine today(admits has used last night + as
just out prison)
Comment: discussed at length; he wants a sick note.
Explained he does not now have DVT; but has post
thrombotic change. He has been on sick or in
prison since 1988 when he came out of the army.
Feels he cannot contemplate anything else as he is
scared of getting a job where he does not earn
enough to pay rent, bills etc.

Fludoxacillin 500mg capsules - 28 capsule - 500 mg - ONE TO BE TAKEN FOUR TIMES A DAY

23 Dec 2008	Surgery, G.P.Surgery: Miss Glea Rowe Entered at: Southampton Homeless Health Care	Entered: 12 Jun 2009 00:00

History: Came out of HMP 4 days ago. Has felt 'hardness' in
L testicle for 5 weeks. No pain. Also since coming
out has swollen L calf. Previous DVTs in L leg.
Not on any anticoagulant since beginning of year.
Examination: L calf swollen+++ and very hard and warm to touch.
Tender.
Comment: To see Dr for further examination. Explained HCV
mouth swab results and need for blood test to
confirm RNA. Declines blood test at present,
strongly advised to come and have it done.

23 Dec 2008	Surgery, G.P.Surgery: D[redacted] Entered at: Southampton Homeless Health Care	Entered: 12 Jun 2009 00:00

History: 5 weeks feeling of hard lump in left testicle. May
be reducing in size. Normal bowels and urine
function. No discharge/ pus from glans.
Also left leg more swollen again for 3 days.
Usually somewhat swollen from previous DVTs.
Thinks may be due to walking. Clean of drugs
inside. Under DIP. No illegal drugs
everywhere since left prison 4 days ago.

Examination: small one cm solid lump in left scrotal sac.
Lump not attached to his testis. Is in area of
venous plexus. left leg 45cm circumf -marks
left
on left leg. Cellulitis over calf area.
Medication: Fludoxacillin Capsules 500 mg
Comment: remeasure left leg tomorrow over same markings.
Antibiotics for cellulitis. Reports no penicillin
allergy.
Ultrasound of testis required. Form marked urgent.
Patient advised contact the dept if not heard in
one week.

10 Dec 2010 12:23	Surgery: Mrs [redacted] Brown (Practice Nurse) Entered at: Southampton Homeless Health Care	

Plan: pt attended for warfarin script, by the time i got coag machine from nicholstown surgery and come back pt had gone.

10 Dec 2010 12:33	Surgery: Mrs [redacted] Brown (Practice Nurse) Entered at: Southampton Homeless Health Care	

History: pt attending for warfarin
Examination: pt weight 78. 6'9", INR 1.0 on coag machine
Plan: to discuss with Dr Dubras re: warfarin or clexane. Pt has used clexane before and is happy to use injections.

10 Dec 2010 18:39	Surgery: Mrs Rachael Brown (Practice Nurse) Entered at: Southampton Homeless Health Care	

Plan: spoke to Dr Dubras re: warfarin. As has not had warfarin for at least 3 weeks to start a loading dose of warfarin. pt advised to take 10mgs today, tomorrow and take 5mgs on Sunday, back to surgery for INR on monday. Pt happy with this plan.

16 Dec 2010 09:54	Surgery: Dr Lynda Martin (Clinical Practitioner Access Role) Entered at: Southampton Homeless Health Care	

Problem: Drug addiction therapy - methadone (XaCMF) (SNOMED: 310553000)
History: was on 70mls methadone; stopped 2w ago; doing well, death of a young friend who he tried to revive upset him, made a decision to stop;
was supposed to appear in court as a witnessed early dec, didnt appear because he was unwell- upset by the death of his friend
Plan: given copies of last discharge summaries, letter for the court
General Letter to Unknown

Problem: Drug addiction therapy - methadone (XaCMF) (SNOMED: 310653000)
History: attends for a sick note and asking for a weeks supply of warfarin; hasnt been sick noted since Aug; last injected 2 years ago; continues to smoke heroin; continues on methadone from the DIP 55mls [redacted]aching and intermittent swelling mainly L leg, we had a discussion about his intermittent use of warfarin; explained not safe to issue unless he is going to be available for monitoring- he accepts this.
Examination: [redacted] signs of chronic venous insufficiency, circ L 42, R 41.5; L black eye and various minor scalp lacerations from trying to break up a fight.
Plan: I dont think he has a current DVT but signs of past problems; he knows to attend ambulatory care for scan, med 3 ibv
Date (Xa0ck) (SNOMED: 410671006)

Problem: Drug addiction therapy - methadone (XaCMF) (SNOMED: 3106530000)
History: ex prison 24th May, requests sick note. On methadone 40ml daily
Examination: in good form; has put on a bit of weight. Sad tale about how whilst he was in prison the man who had offered to take care of his dog took her to the Second chance as he said he could et cope (with no details of owner) , and the dog was not claimed in 5 days so was put down. He found this really hard
Plan: positive re the future; keen to get into education as keen to train as a vet nurse and hoping to do some volunteer [redacted] PDSA.

Problem: H/O: Deep Vein Thrombosis (14A81) (SNOMED: 161508001) - Left leg.
Problem: Heroin dependence (X00Rz) (SNOMED: 231477003)
History: usual poor self care. Been off warfarin for about a week and left leg swollen again ++. Worried as it is above knee and bruising on lateral side of left thigh. Missing [redacted] and [redacted] died the day after [redacted]
Examination: O/E - weight (75k.) (SNOMED: 27113001) 80.9 Kg (12 st 10 lb). Both legs swollen but quite tense swelling left leg, with some delay in capillary refill left foot. Not particularly hot or red left side. Scab anterior aspect of left lower leg and post thrombotic change around medial aspect of left lower leg.
Plan: Must attend AMA on Tuesday. Appt made for 11am. I wonder if he would be a good candidate for rivaroxaban as the monitoring of warfarin is so difficult for him.

NHS Confidential Personal data about a patient

Problem: Drug addiction therapy - methadone (XaCMF) (SNOMED: 310553000)
History: did not attend ambulatory care as had a probation appointment but has rescheduled. Lost sch [redacted]
Examination: smells of alcohol somewhat this morning (states had a drink yesterday). Well presented otherwise with his dog outside. Walking is better today- no limp and leg appears to be less swollen though not formally examined
Plan: I gave him something of a hard time today for not putting his health first and explained that if he did not engage with treatment there was a risk that he could die from his medical conditions. He understands that and stated "but I've got it sorted". I'm in no doubt about his capacity to engage or not. Assess of mental capacity in accord Mental Capacity Act 2005 (XaKkR) (SNOMED: 51730100000103)

19 Nov 2014 11:33	Surgery: Dr [redacted] Dubras (Clinical Practitioner Access Role) Entered at: Southampton Homeless Health Care	

Problem: Drug addiction therapy - methadone (XaCMF) (SNOMED: 310653000)
Problem: Intravenous drug user (J60nA) (SNOMED: 228386008)
History: due in court later today. Understands that I wanted to discuss medication. mat [redacted] and [redacted] this weekend who have [redacted] him the riot act about cleaning up his act and staying clive. "I dont want to die" - though reports that he had stopped using. Not sure why he was put on pregabalin and acknowledges it was recent.
Examination: smells strongly of alcohol (says 1 can this morning). His parting comment to me was "you know what, I hate you" as he left with reduced pregabalin
Plan: he states clearly pregabalin stops him lor using class A drugs- I have explained that it is not licensed for that and therefore I cannot continue it as there is no indication about why it was started on his hospital discharge paperwork. Therefore to have weekly reduction with a view to stopping. He is not happy. however I have agreed to go wit rivaroxaban which he says clearly he will take as prescribed
Pregabalin 225mg capsules - 14 capsule - 1bd
Rivaroxaban 15mg tablets - 14 tablet - take 1 twice daily for 21 days then reduce to 20mg daily

23 Dec 2014 11:04 | Surgery: Dr [redacted] (Clinical Practitioner Access Role) Entered at: Southampton Homeless Health C

History: came out of prison 19th Dec, in Winchester prison for 4 weeks for possession of offensive weapon
would like more pregabalin, taking 250mg bd, not had any since Friday
was having injections of clexane whilst in hospital, none since Fri
Plan: explained will need to get confirmation from Winchester hospital about what he is/isn't taking so asked to come back mane. he was horrified that I wasn't prepared to give him anything today and slammed out of the room and building shouting 'I might as well buy it off the street'
I am concerned that he doesn't have any anticoagulant either, 7cm ilfelong due to PE 2010. would it be better to go back to rivoxaban rather than warfarin-need to discuss with him really
also I wonder if having managed without his pregabalin for 4 days whether we could stop it now, await info from Winchester

General Document to HMP Bullingdon Healthcare, Prison Healthcare

04 Aug 2015 12:30	Surgery: Dr [redacted] (Clinical Practitioner Access Role) Entered at: Southampton Homeless Health Care	

History: has been taking pregabalin since out of prison over past 2wks, would like more. understands that it is abuseable and would like to wean off it. was on it for leg pains when 1st went into prison but weaned off it at the beginnin got 6/12 sentence.
1st call to SGH AMU - was taking pregabalin 300mg bd, with them 31/7 to last night. nurse d/w SHO - they felt clexane would be safer than NOAC as previously was missing warfarin out then taking extra ones.
had heroin last Thurs, relapses in and plans to not take any more. wants to get to his [redacted] course in Sept, planning to change his life completely
has enough creams for 2wks
Examination: very very deviated nose
Plan: agreed to a rapidly reducing course of pregabalin
need to review clexane when runs out - ?NOAC would be better.
advised that he must attend ENT review

Examination: came in this afternoon, under the influence of alcohol and pregabalin, saying that he has drank couple cans of special brew has some methadone and bought some pregabalin off of someone saying that he had taken 9x300mg tablets today
minor scratch to left side of forehead, area cleaned and [redacted] dressing applied.
re dressed chest wounds, area [redacted] and steri strips in situ.
[redacted] very thoughtful and tearful this afternoon, slurring speech, but talking about the loss in his life and how he wants to go to [redacted] this year. and if he doesn't he doesn't know what he can do, saying that he has had enough of his lifestyle, but doesn't know how to make [redacted]ges in it.
Plan: saying that no point trying to make plans while under influence, and if wants to discuss this to return when clean and sober. [redacted] accepts this.

Serum vitamin D level (XE2e7) (SNOMED: 1031181000000107) 92 nmol/L [30 - 300]
Original text: Serum vitamin D

(DSS127) - Normal - No Action

<30 nmol/L is deficient - replacement is recommended.
30-50 nmol/L may be inadequate in some people,
consider replacement.
>50 nmol/L is sufficient in most people.
>300 nmol/L is at increased risk of toxicity.
Local guidelines for adults can be found in the Primary
Care Information Portal under Local Prescribing .
Guidance. In adults, if symptomatic, advise a loading
dose of 3200 IU vit D3 daily for 12 weeks, followed by
maintenance dose of 800 IU daily. In children,
recommend 400 IU daily of vit D when vit D is
30-50nmol/L and pharmacological dosing for deficiency.
This advice does not apply to those with hypercalcaemia
or CKD stage 4-5.
Plasma glucose level (XM0jr) (SNOMED: 1010671000000102) 5.4 mmol/L [4 - 6]

Original units: mL/min/1.73m2

Printed by Miss [redacted] Budden St Mary's Surgery 44 of 380

Abbreviated MDRD formula used. For black ethnic
group multiply by 1.21
Serum ferritin level (XE24i) (SNOMED: 999381000000106) 17 ng/ml [20 - 330]
Original text: Serum ferritin
Original units: ug/L
Interpretation Code: Outside reference range

Reduced Iron Stores: Less than 20
Serum creatine kinase level (XaES5) [redacted] 1000931000000105) 292 iu/L [40 - 320]
Original units: u/L

(DSS127) - Normal - No Action
Serum vitamin B12 level (XE2pl) (SNOMED: 993391000000108) 146 ng/L [130 - 800] - Original text: Serum vitamin B12
Serum folate level (42U5.) (SNOMED: 993411000000108) 4.5 ng/ml [4 - 20]
Original text: Serum folate
Original units: ug/l

Please note change of reference range
Serum alanine aminotransferase level (XaLJx) (SNOMED: 1018251000000107) 26 iu/L [10 - 40]
Original text: Serum ALT level
Original units: u/L
Serum TSH level (XaELV) (SNOMED: 1022791000000101) 1 miu/L [0.35 - 5]
Original units: miu/L

(DSS127) - Normal - No Action

Change in TSH method on 20/0/16.
No significant difference seen on evaluation.
Serum total bilirubin level (X9ERu) (SNOMED: 987581000000109) 7 umol/L [3 - 20]

We changed our bilirubin method on 07/04/2016.
The new method generates results that are approximately
14 % higher compared to the old method
Serum alkaline phosphatase level (XE2ze) (SNOMED: 1000621000000104) 74 iu/L [30 - 130]
Original text: Serum alkaline phosphatase
Original units: [redacted]
Serum sodium [redacted] (XE2q9) (SNOMED: 1000691000000197) 140 mmol/L [133 - 146] - Original text: Serum sodium
Serum potassium level (XE2qa) (SNOMED: 1000651000000109) 4.3 mmol/L [3.5 - 5.3] - Original text: Serum potassium
Urea [redacted] electrolytes (X77VI) (SNOMED: 1000971000000107)

(DSS127) - Normal - No Action
Serum urea level (XM0ti) (SNOMED: 1000951000000103) 7.1 mmol/L [2.5 - 7.8]
Liver function test, Urea and electrolytes, Blood haematinic levels Report, Abnormal, Other: Report ID: 1 64705032000148

came to get script for tramadol. not due until next week. has been using more than max dose. hx of drug abuse. also on pregabalin for chronic leg pain. detailed chat about prescription and drug overuse. clear explanation to patient that we will not issue script earlier than it is due.
discussed options. patient agreed to have weekly script from now on to avoid overuse. tramadol script issued for now as would not like to be in pain over weekend. also discussed about weaning off these meds.
discussed referral to drug and alcohol misuse team but patient declined .
no other concerns reported by patient

Has Post dated Rx for Tramadol, but unable to find a similar Rscript for Lyrica.
Possibility is that it may have been taken to another pharmacist, but unable to find evidence of issue from this surgery so I will give 1/52 supply on this occasion. Likely that additional supply was given to cover Christmas holiday period

08 Jun 2021	GP2GP Import, Healthcare related organisation: Forton Medical Centre: Miss [redacted] Voller	Entered: 30 May 2022 13:02

Good afternoon.

I phoned into the surgery and have been asked to email you.

I have spoken to a gentleman this morning Mr [redacted] McJury who is currently living in The Gosport Inn, Spring Garden Lane Bed and Breakfast.

[redacted] had been placed in the Bed and Breakfast due to the covid pandemic. On Monday 14.6.21 Gosport Borough Council no longer owe duties to [redacted] and have asked Nicolas to leave the Bed and Breakfast. [redacted] was made aware of this for several weeks and has been asked over the past 5 months to look for alternative accommodation and engage with Two Saints to source accommodation.

Wed 22 Mar 2023 14:04 Mr Nicholas McJury
Confidential: Personal Data 400 114 9141, 28 Oct 1966

Printed by Miss [redacted] Budden St.Mary's Surgery 76 of 380

This morning during my weekly call to [redacted] he disclosed to me that if he is made homeless on 14.6.21 and has to live on the streets he will take the five boxes of Tramadol pop the pills and swallow them with some alcohol with the intention of killing himself.

Regards

[redacted] Lind

Duty GP
Spoke to [redacted], his support worker , she spoke to him today, he was homeless in the past before being allocated at Gosport Inn due to the pandemic.he was gien a notice to leave and was given advice to contact low services to source an accomodation however the patient did not , she spoke to [redacted] today as gosport borough council would not have any further duties to support his accomodation and he will be evicted on 14/6/21, patient told her that he will take the tramadol tablets to end his life if made homeless again on 14/6/2021 he did not mention that he is going to do anything today however his speech was slurred and she thinks he was drunk, Tired to call the pt but he did not answer the mobile numbers that we hold in our records, so [redacted] provided me with his Current Mobile number 07459228844 [redacted] has also provided him with contact details of 101 hosiel in fareham, mental health crisis team number and advised him to call 111 if any concern.

someone answered the phone and stated that Nicholas is not here at the moment then said oh wait he just turned up, then I heard shouting then the line dropped. I tried to call the patient again but no answer and call been rejected twice Will call 101 to request social welfare check for this patient as discussed with Dr Mabharabu.
Spoke to 101 , requested Social welfare check, ref number 1681.
tried to inform the mental health crisis team- there was no answer, I tried x3 just to let them about the patient and his ideas if evicted on 14/6/21
Discussed again With Dr [redacted] no need to refer to crisis team as pt was reported to the [redacted] they would not accept a referral before we assess them and patient is not accepting phone calls so he will need [redacted] welfare check first.
Dr [redacted] asked me to send the patient a TextMsg to arrange a Tel appointment if would like to discuss.

Dear Vicky [redacted]
I am one of the doctors from the [redacted] Group. Nicholas McJury has requested for a sick note but the reason for his medical request is not clear and the time he has requested it for is longer than usual. I am unable to get a hold of him. We have a landline on the system ending 496 but it goes to voicemail. We have no other form of communication with him. Please could he send in another email to the surgery and clarify his medical reasons and ask him NOT to use any abbreviation. please write in full sentences. We give 3 months at a time.
Kind regards Dr Widea
The [redacted] Group

20 Sep 2022 18:15	Telephone House, Surgery: Dr [redacted] Owers (Clinical Practitioner Access Role)

Telephone encounter (9N31.) (SNOMED: 185317003)
SAME DAY DUTY service phone call
Surgery Connect phone system used

on duty list as requesting repeat meds

Issued 9th Aug, 24th Aug and 7th Sept
7th Sept was documented as issued early as going away for a funeral.

So 1 month scripts issued apart - 15 days (9-24th Aug), 14 days (24th Aug to 7th Sept) and now requesting after 13 days
Not due until 5th Oct.

went to VM at 16.20. Message left stating I would call back.
called 16.34. No answer
Actions (XaIUl) (SNOMED: 717331000000105) - requesting too early on 3rd occasion. Therefore I am not happy to issue this - it is due 5th October

History: Substance misuse assessment (XaKi0) (SNOMED: 777041000000105);
Agreed to be seen;
Patient with history of illicit drug use;
Previously injecting drug user (XaKcY) (SNOMED: 416479009); denies current;
Was in prison before, last released in March this year from HMP Guys [redacted]
Was on methadone maintenance 60 mg daily dose script whilst detained at HMP Guys Marsh;
Currently not engaging with community services; states was on methadone 60 mg daily dose script, lost the script a few weeks ago and started illicit drug use (XaAvf) (SNOMED: 307052004);
On remand (13HS.) (SNOMED: 160532003);
In [redacted] custody (Ua0Se) (SNOMED: 224388007)for two days, states no medication was administered;
On assessment patient states using the following substances since last released from prison;
Heroin misuse (XaLQN) (SNOMED: 2009910000000100)£200 worth daily, smoked, last used 3/7;
Crack/cocaine £200 worth daily, smoked, last used 3/7;
Denies the use of any other substances;
Denies drinking alcohol;
Physical health: DVT both legs and nerve damage, on prescribed rivaroxaban and pregabalin;
States no mental health issues;
Denies self-harm or suicidal ideation present at the time of assessment;
Has fixed abode;
[redacted] of (133E) (SNOMED: 160503002)five, non dependant;
Examination: On examination patient presents mild signs and symptoms of opioid withdrawal, COWS = 6;
No signs and symptoms of stimulant withdrawal present;
Drug screening test (XSFAa) (SNOMED: 1014661000030101) performed and emerged positive to opioids, cannabis and cocaine;
Diagnosis: Opioid drug dependence NOS (E240z) (SNOMED: 75544000);
Cocaine drug dependence NOS (E242z) (SNOMED: 31356009);
Plan: Methadone maintenance therapy (Ua1MY) (SNOMED: 2009310000000103);
Titration on methadone starting 10mg today with further increase to 20mg from tomorrow for three days;
Symptomatic relief medication PRN;
Daily observations to monitor withdrawals;
Location in hatched cell for 24 hours access;
Referral to psychosocial team for support;
Review as needed;
Previously injecting drug user (XaKcY) (SNOMED: 416479009)
Teenstaller (1991.) (SNOMED: 105542006)
Clinical opiate withdrawal scale (Xa7Bw) (SNOMED: 763699005) 6
Resting Pulse Rate: (record beats per minute): 90 or below

Recall: DART 9 Day Review (26 Oct 2022)
Reminder/Alert: ISMS CLIENT - Priority: High
Reminder/Alert: OPIATE DEPENDANT - Priority: High
Methadone Maintenance 2019 Care Plan Created
Days 1-5 checks for new ORT clients during custody 2018 (PPG) Care Plan Created
Methadone Maintenance 2019 Instruction: Administer methadone as prescribed in accordance with SOP.
Methadone Maintenance 2019 Instruction: Provide Health Education about overdose risks and tolerance issues and ensure this is understood.
Methadone Maintenance 2019 Instruction: Observe for signs of opiate withdrawal or over sedation and when necessary complete a COWS assessment.
Methadone Maintenance 2019 Instruction: Task or discuss with SMS GP / ANP any dosage or general concerns. (SMS Staff, Prescribers, and Client)
Methadone Maintenance 2019 Instruction: Complete a review every 3/12 minimum and include:
- Presentation
- Current MMT dose and other prescribed medication
- Physical Health (including BBV checks)
- Mental Health (including any thoughts of self harm)
- Any illicit drug and/or alcohol use
- Areas of concern and risk factors
- UDS if possible

(SMS Staff and Client)
Methadone Maintenance 2019 Instruction: Encourage engagement with Psychosocial Team. (SMS Staff, Prescriber, and Client)
Methadone Maintenance 2019 Instruction: Jointly review treatment and set future goals i.e reduction or continued maintenance. (SMS Staff, Prescribers, and Client)
Methadone Maintenance 2019 Instruction: Offer groups and provide with any relevant patient information leaflets (SMS Staff, Prescribers, and Clients)
Methadone Maintenance 2019 Instruction: If there are any medication changes, book for review following LOP, if not, book for clinical review in 3/12. (SMS Staff, Prescribers, and Clients)
Methadone Maintenance 2019 Instruction: Provide on-going support on an ad-hoc basis
Days 1-5 checks for new ORT clients during custody 2019 (PPG) Instruction: Complete cares as plan for New SMS clients.
Days 1-5 checks for new ORT clients during custody 2019 (PPG) Instruction: Any new starters on methadone should have had an assessment by a suitably qualified clinician and an appt with the SMS GP / ANP
Days 1-5 checks for new ORT clients during custody 2019 (PPG) instruction: Induction to methadone should be monitored by the prescriber, or a suitably trained clinician.
Days 1-5 checks for new ORT clients during custody 2019 (PPG) Instruction: Provide Health Education and patient information on methadone and explain that it can take 2-4 weeks (or more) to achieve an optimal dose with methadone.
Days 1-5 checks for new ORT clients during custody 2019 (PPG) Instruction: Client should be monitored by a suitably trained professional daily in accordance with Day 1-5 LOP

Days 1-5 checks for new ORT clients during custody 2019 (PPG) Instruction: Provide Health Education about overdose risks and tolerance issues and ensure this is understood. (SMS Staff and Client)
Days 1-5 checks for new ORT clients during custody 2019 (PPG) Instruction: Record COWS and document conscious level on days 1-5
Days 1-5 checks for new ORT clients during custody 2019 (PPG) Instruction: If client appears sedated or intoxicated discuss with a member of the clinical team for consideration of withholding any sedative medication
Days 1-5 checks for new ORT clients during custody 2019 (PPG) Instruction: Day 5 should (where possible) be a joint review with Psychosocial and booked onto appropriate ledger.
Days 1-5 checks for new ORT clients during custody 2019 (PPG) Instruction: Act in accordance with LOP s and SOP s
Days 1-5 checks for new ORT clients during custody 2019 (PPG) Instruction: Book for a dose check/ COWS in line with LOP and discuss or task SMS GP / ANP for further management. Repeat this step until optimal dose has been achieved. (SMS Staff, Prescribers, and Client)
Days 1-5 checks for new ORT clients during custody 2019 (PPG) Instruction: Provide on-going support and encouragement
Days 1-5 checks for new ORT clients during custody 2019 (PPG) Instruction: Book for 3/12 review recall when stabilised
Days 1-5 checks for new ORT clients during custody 2019 (PPG) Review next due on 20 Nov 2022 09:37
Methadone Maintenance 2019 Review next due on 13 Nov 2022 09:37

Have you ever had worries that you just can't get rid of?: No
Some people find their mood changes frequently – as if they spend everyday on an emotional roller coaster. Does this sound like you?: Yes
Do you get annoyed when friends or family complain about their problems? Or do people complain that you're not sympathetic to their problems?: No
Have you ever felt like you didn't have any feelings, or felt distant or cut off from other people or from your surroundings?: No
Has there ever been a time when you felt so irritable that you found yourself shouting at people or starting fights or arguments?: No
Do you often get in trouble at work or with friends because you act excited at first but then lose interest in projects and don't follow through?: No
Do you tend to hold grudges or give people the silent treatment for days at a time?: No
Have you ever tried to avoid reminders, or to not think about, something terrible that you experienced or witnessed?: No
Has there ever been a time when you felt depressed most of the day for at least 2 weeks?: Yes
Have you ever been troubled by repeated thoughts, feelings, or nightmares about something you experienced or witnessed?: No
Have you ever been in a hospital for non-medical reasons such as in a psychiatric hospital? (Do NOT include going to an A&E Department if you were not hospitalised.): No
Have you ever felt constantly on guard or watchful even when you didn't need to, or felt jumpy and easily startled?: No

Yes (Y0427)
Overview Notes (Y0028)
Full substance misuse assessment completed 26.10.22. .

Summary.
Long history of heroin and crack use.
Previous IV 15/20 yrs ago.
25ml Methadone.
Motivated to stop drug use and get stable on methadone.
Prescribed 600mg pregabalin for pain relief.
Mental health is okay. would like grief counselling in the future.
No SASH concerns.
Previously [redacted] an IOM house, Southampton.
Sentencing 11th Nov via videolink.
5 children. 12 [redacted] limited contact.
Good family support.

Care plan opened with the following objectives:

- to complete in-cell work. Provided with Motivation and Triggers and Cravings first.

- 1-1s to support recovery. Focus on relapse prevention due to likely short sentence.

- Once sentenced, Nicholas would like to apply to be a peer supporter on the wing and help other prisoners in recovery. I will support him with the application process.

- Referral to either Southampton or Gosport. Nicholas does not know where he will be [redacted] release, possibly an IOM house.

- Nicholas wants to get stable on his methadone, he thinks this will be at 30-35ml

- Naloxone education to be reviewed and provided on release from custody.

Review of care plan (XaJQm) (SNOMED: 425288008)
Lifestyle advice regarding harm minimisation (XaJvg) (SNOMED: 385991005)
Signs and symptoms of PS intoxication and what to do in the event of a potential overdose.
Paraphernalia and blood borne virus conversation had, especially regarding potentially contaminated equipment
Given advice regarding signs and symptoms of stimulant overdose and what to do in the event of an overdose
Given advice regarding signs and symptoms of depressant overdose and what to do in the event of an overdose.
Advised of naloxone
Advised of low tolerance after a period of abstinence, including following leaving custody
Yes (Y0427)
Yes (Y0427) - 100% consent given.
Mild (X793b) (SNOMED: 255604002)
None (X80ak) (SNOMED: 260413007)
Overview Notes (Y0028) - painter and decorator approx 30 yrs [redacted] wants to be a support worker in the community, helping people with drug and alcohol addiction.
NOTMS - Client is not a veteran of the British Armed Forces (Y21ae)
Overview Notes (Y0028) - No debt or financial concerns. stated that he receives good money from PIP and is good at money management.

History: Seen by general practitioner (8N21.) (SNOMED: 185278030)Court next Friday . Hoping he may be released

History injecting drug use . Was abstinant for some time but relapsed a few months ago .
Hepatitis C . Treated by QA Hospital ~ 2015 / 2016
POCT positive on reception
History recurrent blood clots . Rivaroxaban life long
Maintains he had a parasitic infection several years ago which caused paralysis of his lower legs and reports he spent 18 month in Hospital . including intensive care .
Maintains still has numbness left buttock that radiates into back left thigh and that Pregabalin started them .
Does not correlate with what I can see in his medical record

Advised we will review and reduce if no indication found to continue
He would be happy to see Physio

Review of care plan (XaJQm) (SNOMED: 425268008)
Overview Notes (Y0029) - Received two in-cell packs on Triggers and Cravings and Motivation. He has a good understanding of what triggers and cravings are and recognises his own. His personal triggers are bereavement and past trauma. He feels that he is in the preparation stage of the cycle of change as he relapsed 3 months ago but has been in recovery for 7 years and knows what changes he needs to make. Provided with certificates and two more in-cell packs on Heroin Awareness [redacted] Mindfulness, as per his care plan.

Overview Notes (Y0029) - Received two in-cell packs on Mindfulness and Heroin Awareness. He reflected on his experiences with heroin, in particular his most recent use of heroin 6 months ago. He explored the short term and long-term effects of his use. He did some good work on managing his emotions and stated that reading and studying helps him to keep his brain stimulated. He reflected on the period in his life where he was heroin free and the progress he made in this time. Provided with certificates and two more in-cell packs on Self development and Emotions and Feelings.

Review of care plan (XaJDn) (SNOMED: 425268008)
Overview Notes (Y0308)
Saw [redacted] on the wing and he asked for a letter of engagement for court tomorrow, Tues 15th Nov. [redacted] said there is no chance he will be released, and it is possible his case will be transferred to the crown court. [redacted]
Also received two in cell packs from [redacted] on Emotions and Feelings and Self-development. [redacted] identified some healthy coping mechanisms for stress such as reading or watching comedy. New coping strategies he would like to try are keeping healthy and learning more. He did some good work on self-esteem, anger and grief also. [redacted] reflected on some of his past decisions and what he has learnt from them. He wants to get back into recovery and set out how his can be achieved, mainly with the right support network.
Provided with certificates and two more in-cell packs on stress Management and Harm reduction, as per his care plan. Also provided [redacted] with a letter of engagement for court tomorrow.

History: review of iron tablets.
These were started in 2014 following an upper GI bleed when Hb 83.
Hb has remained above 130 since then in 2016 and 2017. Last done 2/11/22 and was 155.
No current indication for iron.
Therefore I have removed this from repeat.

Pt turned up at reception
Says going to [redacted] Scotland on Monday
Very cross about everything
Says CGL have sorted methodone in scotland?
I asked him what he knew about the CT results and what Ed had said that there was nodules and ? lung cancer - tried to talk to him about this but he wanted to discuss what to do when he got there
He said that he can register with his [redacted] GP - I had printed off pt summary for him to give the GP, he then said

things may take awile to get sorted and that he may sleep for 3 days as will be tired when he gets there. explained that cannot send his scripts to Scotland but all the information and paperwork that i gave to him will be enough.

He then asked what was he supposed to do about his plaster on his arm? - said that cannot get a fracture clinic appt today best to go to ED today.

He did take the paper work then left.
Face to face consultation (Y2930) (SNOMED: 325851000000105)

Active Problem: Intravenous drug user (Ub0nA) (SNOMED: 228388006) (27 Jan 2003 - Ongoing)

20 Oct 2014	Problem: Drug addiction therapy - methadone (XaCMF) (SNOMED: 310853000) Problem: Intravenous drug user (Ub0nA) (SNOMED: 228388006) H: attends for medication- explained I wont do until he has seen [redacted] and had the INR check done. Somewhat disgruntled, tried to convince me that he was having the tests and clearly was intent of just getting the script and leaving with out the blood test. P: once INR has been done I am happy to issue his script			
20 Oct 2014	Pregabalin 300mg capsules	one To be taken Twice Daily	8 capsule	A
19 Nov 2014	Problem: Drug addiction therapy - methadone (XaCMF) (SNOMED: 310853000) Problem: Intravenous drug user (Ub0nA) (SNOMED: 228388006) H: due in court later today. Understands that I wanted to discuss medication, met [redacted] and [redacted] this weekend who have [redacted] him the riot act about cleaning up his act and staying sober. "I dont want to die" though speorts that he had stopped caring. Not sure why he was put on pregabalin and acknowledges it was recent. E: smells strongly of alcohol (says 1 can this morning). His parting comment to me was "you know what, I hate you" as he left with reduced pregabalin P: he states clearly pregabalin stops him for using class A drugs- I have explained that it is not licensed for that and therefore I cannot continue it as there is no indication about why it was started on his hospital discharge paperwork. Therefore to have weekly reduction with a view to stopping. He is not happy, however I have agreed to go with rivaroxaban which he says clearly he will take as prescribed.

08 Oct 2004		
08 Oct 2004	(X) Reactive depression NOS	
08 Oct 2004	Surgery, G.P.Surgery Dr [redacted] Dubras Entered at: Southampton Homeless Health Care	Entered: 12 Jun 2009 00:00

Problem: Reactive depression (XE1YC) (SNOMED: 87414006) ((X) Reactive depression NOS)
Problem title: (X) Reactive depression NOS
History: attends for sick note, previously DVT. In fact has made good progress with DVT. Can walk approx 1 mile before he needs to rest. Previously has been signed off sick with serv debility. Reveals years of probes: [redacted] of 5. 2 older children were brought up by [redacted] in law in Soton. They are now 20 and 17. 17 yo [redacted] is now pregnant. 3 other children are in care somewhere, no contact with them. Broken relationships. His own childhood disrupted: [redacted] drinker, bringing [redacted] up on his own. [redacted] remains v supportive. NFA since came out of Camp [redacted] after 16m. Probation officer is RF.city [redacted] at Town Quay. He was expecting resettlement and leisure card for eg as part of package.
Remians on licence for 6m.
Examination: speech low voulme, seems rather subdued. Dusky

blue legs bilat, old crater in left groin, good pedal pulses. Old swelling left foot and post thrombotic changes.
Comment: happy for me to liaise with probation on his behalf.
MED3 issued to patient 10 weeks nervous debility from 28.9.04
MED3 issued to patient (8Q11) (SNOMED: 133100000103) (New Episode)

Active Problem: Heroin dependence (X00Rz) (SNOMED: 231477003) (24 Feb 2006 - Ongoing)

24 Feb 2006	Surgery, G.P.Surgery Dr Louise Dubras Entered at: Southampton Homeless Health Care	Entered: 12 Jun 2009 00:00

Problem: (Deep vein phlebitis/thrombophlebitis leg) or (deep vein thromb) (G80.) (SNOMED: 195403008) (Deep vein thrombosis)
Problem title: (X)Heroin addiction
History: states not injected into femoral vein last 7yrs.
Worried re recurrence of DVT, advised if active and not injecting, is not currently at risk.
Comment: long chat about the fact he was clean in prison, but seems to have little intent of staying drug free in the imediate future
Problem title: Deep vein thrombosis
History: had DVT 4yrs ago left leg. Was seen in SGH from [redacted] custody early Aug 2005. Went in with leg swelling. Last tok warfarin 6m ago.
Examination: post thrombotic change left leg expansive today(admits has used last night + as just out prison)
Comment: discussed at length; he wants a sick note. Explained he does not now have DVT, but has post thrombotic change. He has been on sick or in prison since 1988 when he came out of the army. Feels he cannot contemplate anything else as he is scared of getting a job where he does not earn enough to pay rent, bills etc.
MED3 issued to patient 4 weeks post thrombotic

26 Nov 2004	Surgery, G.P.Surgery: Dr [redacted] Dubras Entered at: Southampton Homeless Health Care	Entered: 12 Jun 2009 00:00

Problem title: [X]Assault by unspecified means
History: was beaten up in a phone box approx 2 weeks ago, at 8pm ish. Was attacked from behind and was pushed over and kicked. Was unable to attend probation last week as felt too battered. Still NFA, feeling very despondent, want to be off drugs. Still no leisure card etc. Willing to do cold turkey and come off. Not eating well.
Examination: yellowing bruise over medial part of right eyebrow, and bump over right temple with very faded yellow bruise. Lump palpable right parietal area of scalp. Reddened area below medial aspect of right eye. Small linear laceration vertically on left side of upper lip, approx 1cm long.
Comment: I will do letter for Probation. Due to see them next week.
[X]Assault by unspecified means (U3z..) (SNOMED: 52684005) (New Episode)
[X]Assault by unspecified means (U3z..) (SNOMED: 52684005)

Inactive Problem: (Deep vein phlebitis/thrombophlebitis) or (deep vein thromb) (G801.) (SNOMED: 195403006) (24 Feb 2006 - 25 Mar 2006)

24 Feb 2006		
24 Feb 2006	Deep vein thrombosis	
24 Feb 2006	Surgery, G.P.Surgery: Dr Louise Dubras Entered at: Southampton Homeless Health Care	Entered: 12 Jun 2009 00:00

Problem: (Deep vein phlebitis/thrombophleb leg) or (deep vein thromb) (G801.) (SNOMED: 195403006) (Deep vein thrombosis)
Problem title: [X]Heroin addiction
History: states not injected into femoris vein last 7yrs. Warned re recurrence of DVT, advised if active and not injecting, is not currently at risk.
Comment: long chat about the fact he was clean in prison; but seems to have little intent of staying drug free in the imediate future
Problem title: Deep vein thrombosis
History: had DVT 4yrs [redacted] left leg. Was seen in SGH from [redacted] custody early Aug 2005. Went in with leg swelling. Last tok warfarin 6m ago.
Examination: post thrombotic change left leg expansive today(admits has used last night + as just out prison)
Comment: discussed at length; he wants a sick note. Explained he does not now have DVT; but has post thrombotic change. He has been on sick or in prison since 1998 when he came out of the army. Feels he cannot contemplate anything else as he is scared of getting a job where he does not earn enough to pay rent, bills etc.
MED3 issued to patient 4 weeks post thrombotic

Care Plans - Inactive

29 Oct 2022	Methadone Maintenance 2018 (Yorkshire Prisons)	Reviewed: 05 Nov 2022

Care Goal: To support the client to improve health, reduce the risk of illicit drug use, engage in psychosocial support, improve general well-being and move towards recovery.
Reviewed: 05 Nov 2022, Continuing with care
Review Due: 05 Dec 2022 08:30
1) Administer methadone as prescribed in accordance with SOP.
2) Provide Health Education about overdose risks and tolerance issues and ensure this is understood.
3) Observe for signs of opiate withdrawal or over sedation and when necessary complete a COWS assessment.
4) Task or discuss with SMS GP / ANP any dosage or general concerns. (SMS Staff, Prescribers, and Client)
5) Complete a review every 3/12 minimum and include:
- Presentation
- Current MMT dose and other prescribed medication
- Physical Health (including BBV checks)
- Mental Health (including any thoughts of self harm)
- Any illicit drug and/or alcohol use
- Areas of concern and risk factors
- UDS if possible

(SMS Staff and Client)
6) Encourage engagement with Psychosocial Team. (SMS Staff, Prescriber, and Client)

THIRD PARTY COPY

NHS Confidential: Personal data about a patient

Printed by Miss [redacted] Budden St.Mary's Surgery 171 of 380

7) Jointly review treatment and set future goals i.e reduction or continued maintenance (SMS Staff, Prescribers, and Client)
8) Offer groups and provide with any relevant patient information leaflets. (SMS Staff, Prescribers, and Clients)
9) If there are any medication changes, book for review following LOP, if not, book for clinical review in 3/12. (SMS Staff, Prescribers, and Clients)
10) Provide on-going support on an ad-hoc basis.

23 Oct 2022	Days 1-5 checks for new ORT clients during custody 2019 (PPG) (00 Practice Plus Group)	Reviewed: 05 Nov 2022

Care Goal: To observe client during ORT induction, maintain client safety and monitor for intoxication or signs of opiate withdrawal following retoxification or new titrations during custody
Reviewed: 05 Nov 2022, Continuing with care: stabilisation period completed
1) Complete cares as plan for New SMS clients.
2) Any new starters on methadone should have had an assessment by a suitably qualified clinician and an appt with the SMS GP / ANP
3) Induction to methadone should be monitored by the prescriber, or a suitably trained clinician
4) Provide Health Education and patient information on methadone and explain that it can take 2-4 weeks (or more) to achieve an optimal dose with methadone.
5) Client should be monitored by a suitably trained professional daily in accordance with Day 1-5 LOP
6) Provide Health Education about overdose risks and tolerance issues and ensure this is understood. (SMS Staff and Client)
7) Record COWS and document conscious level on days 1-5
8) If client appears sedated or intoxicated discuss with a member of the clinical team for consideration of withholding any sedative medication
9) Day 5 should (where possible) be a joint review with Psychosocial and booked onto appropriate ledger.
10) Act in accordance with LOP s and SOP s
11) Book for a dose check/ COWS in line with LOP and discuss or task SMS GP / ANP for further management. Repeat this step until optimal dose has been achieved. (SMS Staff, Prescribers, and Client) -
12) Provide on-going support and encouragement
13) Book for 3/12 review recall when stabilised.

SO14 0LT

Dear Dr Bubras

Re: Nholas McJury
DOB: 25/10/1966
Address: n/fa

I met this man for the first time at the GIP centre on Thursday 5th July 2007. Apparently he is well known to the Bargate Project but he is presently on a 18 month DRR for shoplifting. I understand that he is supposed to be on warfarin from yourself because of a previous DVT in his left leg but he had not arranged to collect that yet.

He was only about 2 weeks out of prison and his urine was positive for buprenorphine, opiates, cannabis, cocaine and benzodiazepines and migraine for methadone and speed. He told me that since he had been released he had mainly been using a mixture of subutex 8mgs or subutex 4mgs although he had been taking up to 4 a day. most recently he said he had run out of subutex and had been using "little Mo" of heroin from and there a £10 bag from time to time he sold. He was quite clear that he prefers subutex. He had apparently been almost detoxed off opiates on subutex in prison but had been kept on 2mgs until his release. He was quite happy to accept subutex and I arranged for him to have 8mgs that day and 16mgs daily there after. He seemed quite happy and accepted that his use of up to 32mgs was excessive. He said that he had [redacted] smoking the heroin when he had been using and that he had not injected for several years and had no intentions of doing so.

His partner is with the Bargate Project and on methadone although he tells me with that with his illicit supply of subutex he has tried to convert her over to this drug instead.

To be honest once he had established he was going to get a script he had little interest in giving much information to me, I understand he is living in pub and intends to purchase a ¼ share of one, he has a partner, who, as I say, is with the Bargate Project. This was a very brief assessment and I did not have time to get into the background history although apparently he has considerable trauma

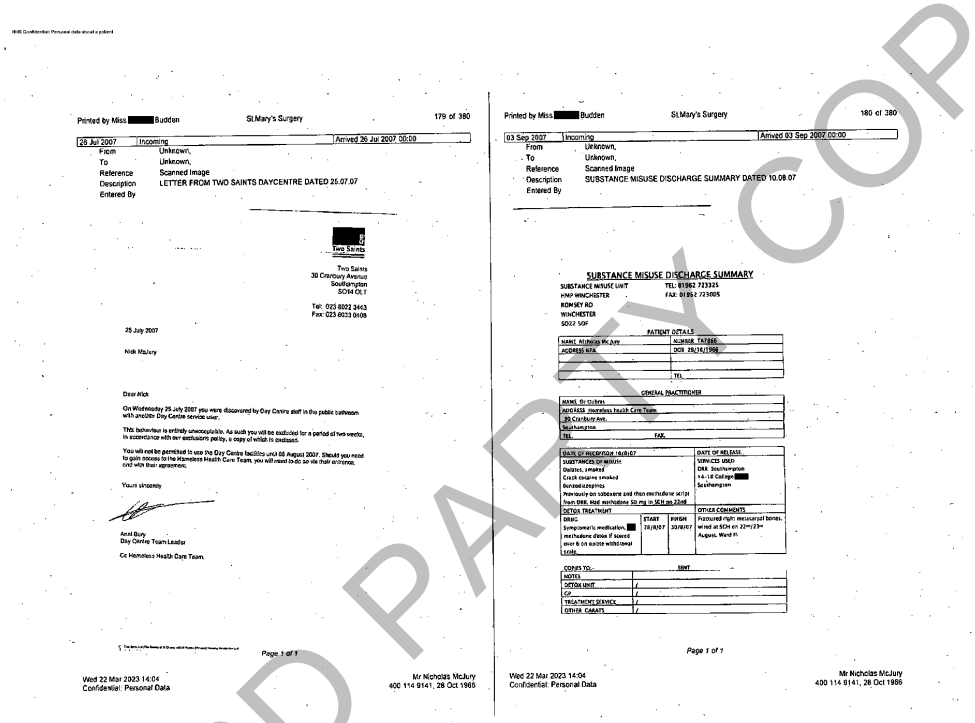

from his times in Glasgow. He says that he gets nightmares when he sleeps and will often wake with the bed soaking. His appetite however is ok and his weight steady. When I pressed him about the positives in his urine he said that he thought benzodiazepines must have been from time in prison because he had not used since his release. he get slightly more edgy about his use of crack, he said at one point he uses "little bits here and there" but later said that he was a fairly regular user but then denied buying it regularly. No doubt time and regular testing will tell. He uses cannabis occasionally and denied any other drugs.

As noted above I started him off on a subutex script at Boots on the High Street and he will be reviewed in due course and I shall write to you then.

Yours sincerely

Dr [redacted] Crichton
Consultant Psychiatrist

Dear Nick

On Wednesday 25 July 2007 you were discovered by Day Centre staff in the public bathroom with another Day Centre service user.

This behaviour is entirely unacceptable. As such you will be excluded for a period of two weeks, in accordance with our exclusion policy, a copy of which is enclosed.

You will not be permitted to use the Day Centre facilities until 08 August 2007. Should you need to gain access to the Homeless Health Care Team, you will need to do so via their entrance, and with their agreement.

Yours sincerely

Anne Bury
Day Centre Team Leader

Dear Dr Dubras

Re: [redacted] MCJURY DOB 30/01/1968
First Hill Cranbury Terrace, Southampton SO14 0QZ

I assessed this gentleman on 18th September 2008 at the Southampton DIP because his prescription had stopped last week. He did not attend the appointment on Friday and therefore did not receive a prescription over the weekend. He tells me that since then he has had to resort to injecting Heroin up to £80 to £90 in his arms. He denies any injecting into his groin or neck. I gather he also tried Methadone over the weekend which he bought illegally. This gentleman was unsuspecting during the interview but he wanted his prescription of 80mls of Methadone reinstated. His urine drug screen today revealed a test positive for Cocaine, Methadone and Opiates. I have decided to restart his prescription of Methadone at 40mls and this can be reviewed next week to consider a further increase. We will keep you informed of any further developments.

Yours sincerely

Dr Donall Mcnelis

Dear Dr DOLmio

Re: [redacted] MCJURY DOB: 28.01.1966

I am writing with regards to [redacted] McJury, he was a client at the GP Service in Southampton, but has been closed to Substance Misuse Services as a result of his failure to engage with us and repeated missed appointments, in fact he stopped turning up altogether.

Nick tested reactive for Hepatitis C on an oral mouth swab screen and needed a blood test to confirm whether he was RNA positive for Hepatitis C and needed further treatment and referral to the Hepatologist. I have spoken to Nick in clinic since about this and gave him a blood test form, to my knowledge he has defaulted from having the blood test. This letter is by way of information only and perhaps you could mark up on his medical records should you have the opportunity to do so that [redacted] was reactive for Hepatitis C and results faxed over for Hepatitis C confirmation, if he is positive [redacted] to will need referral and treatment from the Hepatologist.

Yours sincerely

Fiona MacKay

Key Events During Admission
Dr Mabey prescribed warfarin IM odd and Tuesday when EDS. A VTE scan suggested appointment suspicious for PE.
Pt has been re-referred and given his previous history of DVTs, would need to be on warfarin for life. I reminded he is not registered with a GP, and have advised him to register with a GP to register INR checks. I also emphasised the importance of having therapeutic INRs and the risks associated with low or high INRs. He has accepted and said he will register with a GP in the earliest opportunity.

Management Plan, Recommendation & Self Care Instructions
Hospital INR chosen. On warfarin for life.

Allergies
None Stated

Action Required By GP
Check INR on Monday and action warfarin dose accordingly

Management Plan

Clinic	Home District	Priority
To be Specified by		Additional Information

Medication (Approved Name)

Re Nicholas McJury DOB 28/10/1966

Dear Olusoga

See attached discharge letter for the above named patient. He was commenced on Warfarin for pulmonary [redacted] and pulmonary infarction. He was advised that he would need warfarin for life and would need regular monitoring.

Unfortunately Mr McJury never attended the Warfarin clinic despite the fact that his INR checked despite the fact that a near patient testing was available and that [redacted] was no necessity for a venous sample.

Mr McJury procured repeat prescriptions of Warfarin and was I presume taking this medication. His last prescription was for 28 mg Warfarin tablets, issued on 5th Dec 2010.

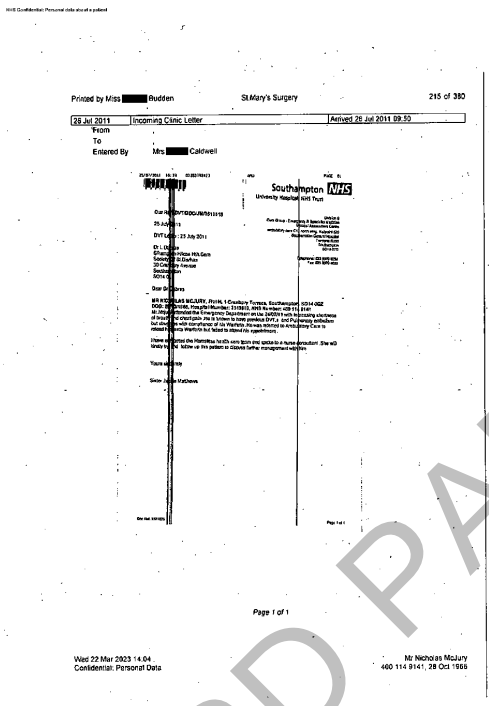

I trust this information proves useful.

Yours sincerely

Dear Dr Dubois

Re: Nicholas MCJURY
NFA DOB: 26/10/1966

Unfortunately I have Nick booked into my clinic into a normal routine slot today without any keyworker or any information, as a result of trying to work out what was going on I did not have time to do a suitable assessment. Nick is actually closed to our service but I understand he has been in hospital with a PE in the last few weeks. Despite being discharged only last night, his urine test was positive for opiates, cocaine, heroin, benzodiazepines. As well as always been a very heavy drinker and I think the mix of different taking [redacted] I did not have time to do anything other than a brief assessment today and we will basically see him at our drinking clinic here where he will consume 60ml methadone and he will be prescribed supervised consumption on a Saturday and Sunday at Boots West Quay.

Yours sincerely

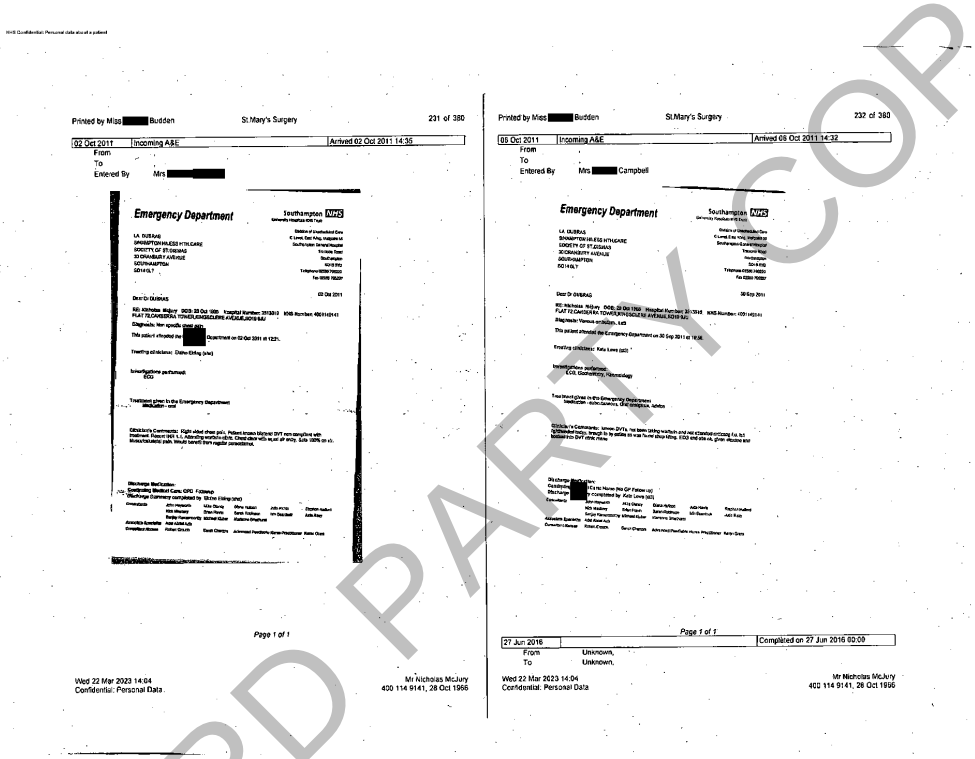

Dr [redacted] McJury

Dear Dr Dubras

MR NICHOLAS MCJURY, Flat 72, Canberra Tower, Kingsclere Avenue, Southampton Hampshire, SO16 9JU
DOB: 29/1/1958, Hospital Number: 2513616, NHS Number: 400 114 9141

I was hoping to see Mr McJury today in the Pulmonary Embolus Clinic. He had had an intermediate probability of pulmonary embolus V/Q scan at the beginning of August. Unfortunately he self discharged prior to any treatment. He was then investigated for calf swelling at the end of the month and was found to have bilateral above knee DVTs.

I would be very happy to follow-up Mr McJury in clinic but unfortunately I am not entirely sure where he is residing at the moment. One piece of clinical information indicates that he has been treated at the Southampton Homeless Health Care. Please let me know if we can help. I would be very happy to follow him up.

With best wishes

Yours sincerely

Dr Rachel Linsley
Consultant in Respiratory Medicine

MR NICHOLAS MCJURY, Flat 1, The Cranbury, Cranbury Terrace, Southampton Hampshire, SO14 0LH
DOB: 29/1/1958, Hospital Number: 2513616, NHS Number: 400 114 9141

Just a short note to let you know that Mr McJury did not attend his chest clinic appointment today. I am [redacted] sure I posted you writing to me after his last non-attendance giving me up-to-date information on his address. The copy of your letter seems to have been mislaid, however my specialist nurse will give this surgery a ring tomorrow to clarify his address so we can send him a further appointment out.

With best wishes

Yours sincerely

Dr L Dubras
Homeless Healthcare Team
30 Cranbury Avenue
Southampton
SO14 0LT

Dear Dr Dubras

MR NICHOLAS MCJURY, 56a Northam Road, Southampton, SO14 0PB
DOB: 28/10/1986, Hospital Number: 3513019, NHS Number: 400 114 9141

I saw this gentleman in our Nurse-led Hepatology Outreach Clinic at New Road. He tells me that he tested positive for hepatitis C in 1990 and was fully vaccinated against hepatitis A and B by the 1990s. He has a past history of intravenous drug use over 15 years between 1987 and 2004. He is currently smoking heroin. He has a past history of a DVT and a pulmonary embolism. He also tells me that he has a previous history of depression. He currently lives with his partner and is drinking two cans of alcohol daily. He normally has symptoms of nausea and some fatigue, compatible with his hepatitis C virus. We had made a follow-up appointment for this gentleman to have a neck ultrasound but we could get exams across from funding results on him. Unfortunately he failed to turn up for his appointment. We would obviously be very keen for him to re-engage with our service down at New Road and should you see him in your surgery, we would be very grateful if you could encourage him to do so.

Yours sincerely

Diagnosis
Opiate and cocaine dependency

[redacted]
Methadone 40 mg [redacted] Mthly

Review: 28/6/2006
Address - English Church Housing, 40 Southampton Street,
In HMP Winchester for 1 week in December 2005, given CBAS in December. Started
using heroin and crack cocaine again after release. Initially IV heroin, now smoking
£40- 50 of heroin and also of crack cocaine. NO amphetamines, benzodiazepines,
cannabis or alcohol.
RS - NAD
CVS - DVT right leg diagnosed 2 years ago, ? if should still be on medication, not
taking now. BP 99/70, Pulse - 76/min, ECG QTc 434ms, ? abnormal ECG (Left
ventricular hypertrophy) - may to GP. No FH of MVD.
GIT - NAD
GU - NAD
Mental health – says he feels 'very down', never suicidal. NO psychosis.
Social
Has 3 children, 2 in Scotland, 2 in Southampton, both working. Daughter has two
children, very close often. Partner also using drugs, says she wants treatment.
Drug tests
Tests 28/6/2006: Positive for opiates and cocaine.

Dose
Methadone 40mg daily, supervised consumption.

14/8/2006 in Prison for 6 weeks, released 22/9/06, using heroin £50-60 IV [redacted]
1g, £ 60-70 crack cocaine smoking, inhaled, drinking 1-2 cans 9% beer daily. Started
on methadone 40 mg daily.
18/9/2006 – Hep C positive, negative to Hep B & HIV. Given form for Blood test –
re Hep C, doesn't want to see hepatologist.
19/9/06 methadone increased to 50mg daily 14/9/06 increased to 60mg until 11/9/06
then DNA, restarted again on 18/09/06: 60 mg daily until 17/10/06.

Review: 27/10/2006
On OMR from December 2005, using heroin £40-60 daily and crack cocaine IV daily,
nil alcohol, cannabis, benzodiazepines or amphetamines.
RS - NAD
CVS - DVT in right leg for last 2 years, on warfarin.
BP 95/70, Pulse - 70/ min, ECG QTc- 434ms.
GIT - NAD
GU - NAD
Pupils 2.5, nil reaction.

Drug tests
Positive for opiates and cocaine.

Mr Nicholas McJury
400 114 9141, 28 Oct 1966

Printed by Miss [redacted] Budden St Mary's Surgery 256 of 380

Dose
Methadone 60mg daily supervised consumption.

15/11/06 increased methadone to 80mg daily.
13/12/06 still using £20 heroin, smoking, BP 110/60, Pulse 84/min, pupils 3-2 reactive,
skin clammy, in mild withdrawal. Methadone increased to 90 mg daily, supervised
consumption.

14/8/07
Smoking £20 heroin and £20 crack cocaine daily.
BP 95/60, pulse 68/min, Pupils 3, slight reaction.
Living in Bolivia Street. He and partner have been attending clinic regularly. Not
involved in criminal activities now either.
Methadone dose increased to 95 mg daily supervised.
Due to move to New Road SN8 on 10/9/07
Test 23/8/07 Positive to methadone, cocaine and opiates.

Seen in the clinic in 2008 and again in September 2011, and RG out of treatment.

11/01/2012 Review
Address – 50a Northam Road, Southampton.
GP for 28 days, Hamilton Healthcare Team.
In prison for 3 months, released yesterday, maintained on methadone 40mg daily,
used most, Partner is in prison for the next 2 months. Started at least of heroin and
pipe of cocaine last night, Smoke 4 cans of 5% beer yesterday, [redacted] cannabis (last
was a month ago – 17, 4, 3 and 2 years) daily frequency.
Current Health – RS – diagnosed with pulmonary embolism last year. No asthma.
CVS – NAD, GU – has Hep c, diagnosed in 2008, did not want to address this then.
Mental health – no depression or psychosis.
No allergies.
On BP 80/60, pulse 72/min, pupils approx. Not ordered or in withdrawal. ECG
QTc 434ms & 434ms.
Drug test – positive to opiates, cocaine, methadone and benzodiazepines
Treatment – methadone 40 mg daily, will decrease methadone and will change to
subutex.

30/5/2013 Review
Released from prison on 24/5/2013, maintained on Methadone 40mg daily, last dose
on 24/5/2013, confirmed. Did not attend clinic appointment on 24.5.2013 Linked 650
reels of heroin and crack cocaine on Saturday26th, 7 cans of 10% alcohol and 1 spliff of
friends and not in treatment.

Current Health – RS, CVS, GIT, GU – all NAD.
Mental Health – no depression or psychosis
No allergies but no medication from GP other than Warfarin for DVT – 3 years ago.
On – BP 110/60, pulse 60/min, pupils 3-2.5, slight reaction, Not noticed as in
withdrawal.

Dear Dr Dubras

Re: Nicholas McJury DOB: 28/10/1966
59A Northam Road, Southampton SO14 0PB
NHS No. 400 114 9141

I reviewed Mr McJury at the New Road Centre on the 27th August 2014. My colleague Dr Andrea Hardman was also present. Mr. McJury was released from Winchester Prison today. He was sent to Winchester Prison on the 10th May 2014 for an offence of taking a vehicle away without the owners consent. Since release this morning, he had consumed two cans of strong lager. His breathalyser result was 0.27. His urine test was positive for methadone only. He was on prescribed methadone of 40mgs per day.

Mr McJury was adamant that he wants to cut down and stop methadone and eventually go statrts on a low dose of Subaxone. He showed a positive outlook towards life. He enjoys taking his dog out for walks and is looking forward to enjoying freedom since release from prison. He suffers from chronic sleep difficulties and complained of nightmares. His mood can be variable. His appetite is ok and there is no weight loss. He did not present with any persistent mood symptoms, any psychotic symptoms of behaviour.

On the physical health side, he states that he is on warfarin for DVT. He said he is also on pregabalin 150mgs two to three times a day. He said he wants to reduce and stop this in the near future. He was previously hep C positive and his engagement with hepatology services was sporadic. He said he is now [redacted] get help and agreed to see the hepatology nurse. The routine ECG performed today showed v QTc of 438. I enclose a copy of the ECG for your attention. His pulse rate was 79 per minute, his blood pressure 80/60.

Management Plan

- To continue methadone 40mgs per day. This will be supervised consumption on a [redacted] basis. He will collect this from West Quay [redacted] Pharmacy over the Bank Holiday week end and then at the clinic at New Road Centre.
- Follow up by the hepatology nurse for hep C.

An NHS Teaching Trust with the University of Southampton
Trust Headquarters, Adelaide Health Centre, Tebbutt Road, Totton, Southampton SO40 3RE

Nicholas McJury DOB: 28/10/1966

- I believe that you would continue to monitor his physical health, particularly given the history of DVT and the pulmonary embolism in the past. I would not be sure whether Mr. McJury was giving the reliable information regarding his physical health, in that his compliance with warfarin or blood tests. He appears stable at the moment. This may be a good time to try and engage him to comply with the medication and physical health monitoring.

Yours sincerely

Dr Vanessa S Gallagher

Sharing of Information

At Homeless Healthcare Team we use a computer system called TPP SystmOne to record all of your health information; for example: details of your consultations, health conditions such as diabetes or epilepsy, medication prescribed to you etc.

This system is also used by other teams locally such as District Nursing, Minor Injuries Unit, Alcohol Day Detoxification, Tuberculosis Screening Team and Podiatry as well as other teams around the country.

We also get information from healthcare teams like hospitals and other GP surgeries that don't use TPP SystmOne by fax, secure NHS email or sometimes over the phone.

It can be very useful if we are able to share the information on our record with other health professionals involved in your care. Some examples of the benefits of consenting to this are:

- A Podiatrist or TB Nurse in Southampton will be able to see details of your current health problems so won't need to ask you for all of these details.
- The Nurse at the Minor Injuries Unit will know if you have any drug allergies.

Please indicate here if you are happy for us to share your data in this way?

☑ Yes I give consent for my health information to be shared
☐ No I do not give my consent for my health information to be shared

It can also be very useful for our doctors and nurses to see information that has been recorded by other health professionals involved in your care either electronically or by other means. Some examples of the benefits of consenting to this are:

- If you have been prescribed medication by the Alcohol Nurse or a Nurse at the Minor Injuries Unit in Southampton and want us to prescribe it for you again we won't have to confirm the details because we will already be able to see the information on the computer.
- We will be able to see when you are having a detoxification or when you have started medication for Tuberculosis. This will help us in caring for you.
- If they don't use TPP, we can request copies of your previous notes from your last surgery

Please indicate here if you are happy for us to see information given to other health professionals:

☑ Yes I give consent for you to view and/or request health information
☐ No I do not give my consent for you to view and/or request health information

Name: NICHOLAS MCJURY Date: 20/10/[redacted]
DOB - 28/10/1966
Signature: N.MCJURY

Please note that you can change your mind at any time and also that you can ask for particular information to be 'made private' so that no-one outside of our team can see it, even if you have agreed to share your record.

Dear Dr Dubras

MR NICHOLAS MCIURY, 50a Northam Road, Southampton, Hampshire, SO14 0PB
DOB: 28/10/1966, Hospital Number: 3513816, NHS Number: 400 114 9141

This gentleman failed to attend his Nurse Led Hepatology Clinic appointment today. This is the second appointment that he has not attended and I am therefore going to discharge him. Perhaps if you see Nicholas you could just encourage him to be re-referred. He is also very welcome to attend our Hepatology Clinic at New Road on a Tuesday morning. I understood that Nicholas is quite anxious that he may need a liver biopsy. We do however have a Fibroscan machine and this is a non invasive pain free technique for assessing liver fibrosis. Perhaps if you see him you could let him know this.

Best wishes

Yours sincerely

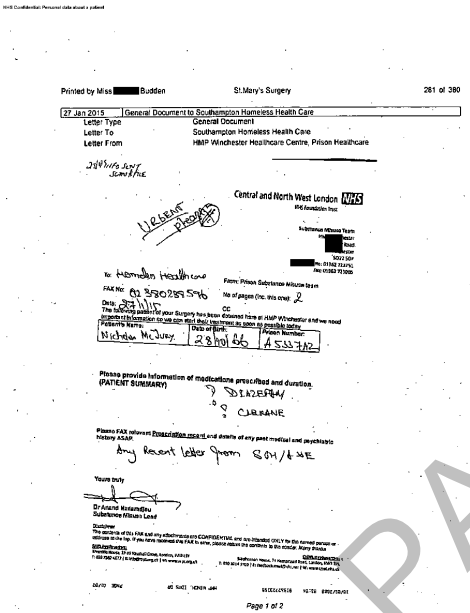

Clare Phillips
Hepatology Nurse Specialist

Dear Dr Dubras

Re: NICHOLAS McJURY DoB: 28 / 10 / 1966

MEDICATION RE-START

With reference to your above-mentioned patient, I write to inform you that Nick is a prison leaver who was prescribed Methadone 30mg in prison.

He reports that prior to prison he was using £20 Heroin [redacted] smoking, and has only used once since being released on Friday 20th February, when he used £10 each of Heroin and Crack Cocaine, by smoking. He has been drinking 2 cans of 9% lager daily but denies that alcohol is a problem.

I therefore explained the risks of respiratory depression associated with alcohol and Opiates. Nick reports that Heroin became a problem when he was 24 years old following his discharge from the armed services, which followed an injury in the 2nd Gulf war. [redacted] had a DVT, which he has stopped treatment for, and reports that he is ok. He reported that last year he felt he was on 'a suicide mission' and was using chemically as he didn't value his life. We discussed the support available for ex-servicemen and [redacted] said he has all the information but hasn't found it helpful.

Nick's partner died last year, he has children over 18 years old who live in Southampton, and he has 6 grandchildren, with good contact and no social services involved. 2 girls of 19 yrs and 12 yrs live in Scotland. [redacted] has no outstanding offences.

Thromboprophylaxis Advice

The risk of developing blood clots can persist for some weeks after discharge. There are certain signs to look out for that could mean that you have a blood clot. You should contact your doctor immediately if you develop any of the following symptoms while you are in hospital or after you go home.

- Leg pain
- Leg swelling
- Warm or discoloured skin on the legs
- Enlarged or more noticeable veins near the surface of the skin on your legs
- New onset shortness of breath
- Unexplained chest pain
- Coughing up blood

Further information

Please phone your GP, NHS 111 service or in the event of an emergency telephone - 999
website: www.uhs.nhs.uk/bloodclots

If anti-embolic stockings have been used for thromboprophylaxis during your hospital stay, they should continue to be worn until you return to your usual level of mobility.

Dear Dr Dubras

Re: [redacted] McJury DOB: 28/10/1966
NFA
NHS No. 402 114 9141

Mr. McJury was [redacted] at River Road centre on the 24th July 2015 to continue his methadone prescription. He was released from prison yesterday after spending 3 months in prison for possession of blunt weapon. He was sentenced to 8 months but released after 3 months. He has another case coming up for alleged theft in October this year. He is probation for a year. His probation officer is Vanessa Collins.

Mr McJury reports using £10 worth of heroin and cocaine each and 6 pints of normal strength lager last night. He blew 0.36 on breathalyser. He tested positive for opiates, cocaine and methadone. He is on methadone 50mgs [redacted] He preferred to continue methadone at the same dose. Mr McJury is currently homeless. He was going to day centre to explore his options. He said he will also see his GP for physical health medications. He has a history of Depression but denied feeling Depressed at the moment. He was not clinically depressed. His physical obs were in the normal range, pupils reactive at 3-4mm. Mr McJury will continue Methadone 50mgs daily supervised at our clinic and at the Boots West Quay over the weekend.

Yours sincerely

Dear Dr Dubras

Name: Nicholas McJury Date of Birth: 28/10/1966
NHS Number: 4001149141
Client Address: NFA
Date referred during admission to SGH: 02/08/15
Problem/diagnoses: Intentional OD
Risks: High risk of reoffending, Low in all other areas at present.
Psychotropic medication at discharge: Nil
Management plan: To meet with Probation, New Road and re-activate benefits.

Key issues relating to the referral
Nicholas was admitted to SGH following intentional overdose of gabapentin. Nicholas reports he was released from Prison last week. He was lead to believe his accommodation was held for him however he returned to find other tenants in the property and all of his belongings had been disposed of. Nicholas reports shoplifting in order to obtain clean clothes. He was assaulted later than night and admitted to SGH. On release from SGH he reports obtaining additional gabapentin from a contact for pain. He then returned to John Lewis and attempted to shoplift a further outfit. He was caught in this process and took the overdose in police presence because he could not see another way out at this time.

Past psychiatric history
No psychiatric history reported.

Past medical history
Nicholas has ongoing physical complications as a result of significant IV drug use historically. He is positive for Hep C. Nicholas is due to return to SGH surgical team in order for his mass to be re-set.

Family history
No history of mental illness that Nicholas is aware of.

Personal and social history
Nicholas reports was abused as a child

NHS Confidential Personal data about a patient

Name: Nicholas McJury Date of Birth: 28/10/1966
NHS Number: 4001149141

Nicholas describes himself as being institutionalised because he has spent most of his adult life going in and out of prison. He reports that he has never grown up because of a sense that [redacted] has stopped for him [redacted] he has been detained. Nicholas reports having [redacted] family despite his [redacted] being separated. He has two [redacted] with the same parents and [redacted] siblings. He has two [redacted] in Scotland and [redacted] and a son in the south. [redacted] His last his wife and [redacted] approximately one year ago. His wife's death was sudden and unexpected. He reports a long period of self-neglect and increased drug use after this time leading to his detention again in March of this year.

Forensic history
Nicholas has a long forensic history which is well documented elsewhere. He is currently in touch with Probation officer Yvonne Collins.

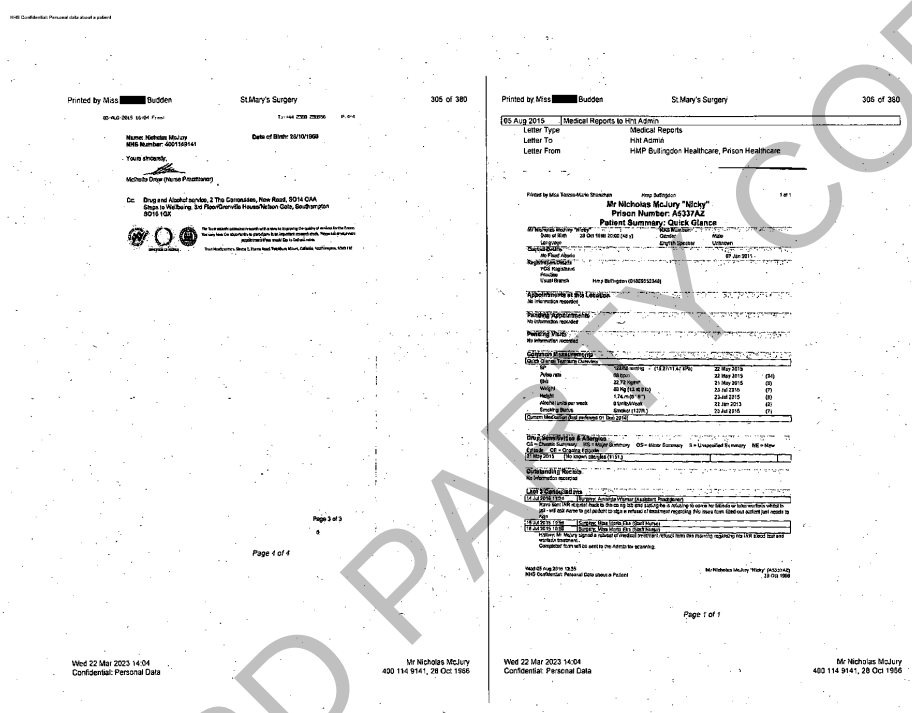

Substance and alcohol use
Nicholas has reduced from a 90mg to 50mg Methadone prescription. He also has a key worker at New Road named Estelle.

Mental state
Appearance and behaviour: He was dressed in hospital attire Nicholas was sat on the bed watching a portable DVD player when staff approached him.
Speech: His speech was normal in tone and volume
Mood: Mood appeared bright and stable. Some anxiety however this is understandable given he is of no fixed abode with a lot of professional input and appointments to remember at present.
Self-harm/ suicidality: Low risk of self-harm and suicide at present. Nicholas has demonstrated planning for the short, medium and long term future.
Thoughts: He regrets his actions. He is planning to see Yvonne and Estelle and reactivate his benefits as soon as possible. He has used hospital phone where necessary to make contact. Nicholas expressed wishes to return to college and study criminology and/or psychology. Nicholas expressed that he would find regular contact with mental health staff or counsellors helpful.
Perceptions: No evidence of perceptual abnormalities.
Cognition: He is oriented to time place and person.

Impression
Nicholas appears a very resourceful man. He is already in touch with all of the appropriate services to meet his needs. There appears to be some ongoing issues related to grief from his father and his wife. It also appears he felt overwhelmed by the events of the past week and benefited from time with staff to put his thoughts in order. Nicholas seems satisfied with reassurance from staff that his plans appear sensible and he appears to have everything in hand.

Management/Care plan
He requested and has been given information on the recovery college and access courses at Southampton College.
Liaison recommended crisis counselling and will refer to Steps to Wellbeing for the purpose of regular counselling support for anxiety and coping skills Nicholas adjusts to non-institutionalised living.

CARE OF HOMELESS HEALTHCARE TEAM 20 CRANBURY AVENUE SOUTHAMPTON
HAMPSHIRE SO14 0LT

I am writing following the receipt your referral on 30 August regarding the above patient. You report that the patient presents with multiple bereavements and adjustment issues.

Unfortunately, we are unable to accept this referral due to the nature of the presenting problem, which does not fall within the remit of Steps to Wellbeing. We are commissioned to provide NICE-compliant psychological interventions for those with mild to moderate common mental health problems. The most common primary diagnosis is of Depression and/or Anxiety Disorders (ICD10: Mixed Anxiety and Depressive Disorder (QA05), Generalised Anxiety Disorder (QC20), Post Traumatic Stress Disorder (PTSD), Panic Disorder (with or without Agoraphobia), Specific Phobias and Social Phobia.

I would like to add that as our treatment options are brief interventions it would be inadvisable for Mr McJury to access treatment with us while his circumstances are so changed. We would be welcome to return to us following a period of stabilisation when he may be better able to engage with the demands of short-term therapy.

On the basis of the above, we are not able to accept this referral and are challenging to your care. Should you wish to discuss this, please contact me on 02380 272 000.

Yours sincerely,

Liz Doyle

Re: Nicholas McJury, DOB: 25/05/1965, NHS No: 400 114 9141
CARE OF HOMELESS HEALTHCARE TEAM 30 CRANBURY AVENUE SOUTHAMPTON HAMPSHIRE SO14 0LY

I am writing following the receipt your referral on 6th August regarding to above patient. You report that the patient presents with multiple bereavement and adjustment issues.

Unfortunately, we are unable to accept this referral due to the nature of the presenting issue, which does not fall within the remit of Steps to Wellbeing. We are commissioned to provide appropriate psychological interventions for those who are in moderate common mental health problems where the primary diagnosis is of Depression and/or Anxiety Disorders. This may include depression, Generalised Anxiety Disorder (GAD), Obsessive Compulsive Disorder (OCD), Post Traumatic Stress Disorder (PTSD), Panic Disorder (with or without Agoraphobia), Specific Phobias and Social Phobia.

It appears to me that as our most relevant options are brief interventions it would be inadvisable for Mr McJury to engage in treatment with us whilst his circumstances are so changeable. He would be welcome to return to us following a period of consolidation when he may be better able to engage with the demands of short-term therapy.

On the basis of the above, we are not able to accept this referral and are discharging to your care. Should you wish to discuss this, please contact me on 02380 272 000.

Yours sincerely,

Thromboembolism advice
The risk of developing blood clots can persist for some weeks after discharge. There are simple signs to look out for that could mean that you have a blood clot. You should contact your doctor immediately if you develop any of the following symptoms while you are in hospital or after you go home.

- Leg pain
- Leg swelling
- Warm or discoloured skin on the legs
- Enlarged or more noticeable veins near the surface of the skin on your legs
- New onset shortness of breath
- Unexplained chest pain
- Coughing up blood

16th September 2015

Dear Dr Dubras

Re: Nicholas McJury dob 28/10/1966
Flat Mo Old Northam Road, Southampton, SO14 0PJ

Mr McJury is currently receiving opiate substitution treatment here at the Southampton Drug and Alcohol Recovery Service. Each time he attends we have concern due to the way his presents as if drug or alcohol affected. His gait is unsteady, sometimes he is very drowsy, barely able to stay awake, and on other occasions he talks to himself at length and becomes confused as to who he is with or where he is.

When I spoke to Mr McJury today, he seemed very tired, was limping and slightly unsteady. He tested positive for methadone (prescribed), opiates, benzodiazepines and cocaine. He was unable to clarify what other medications or substances he is taking, but stated he has to take 13 tablets a day that are prescribed for him including pregabalin. I am going to book him in to see Dr Hanaf for a review, and it would be very helpful if you would send us a list of medications that are prescribed for him, and any other information that might support our assessment of his current state. Mr McJury himself suggested we contact you for this clarification.

Kind regards,

Yours sincerely

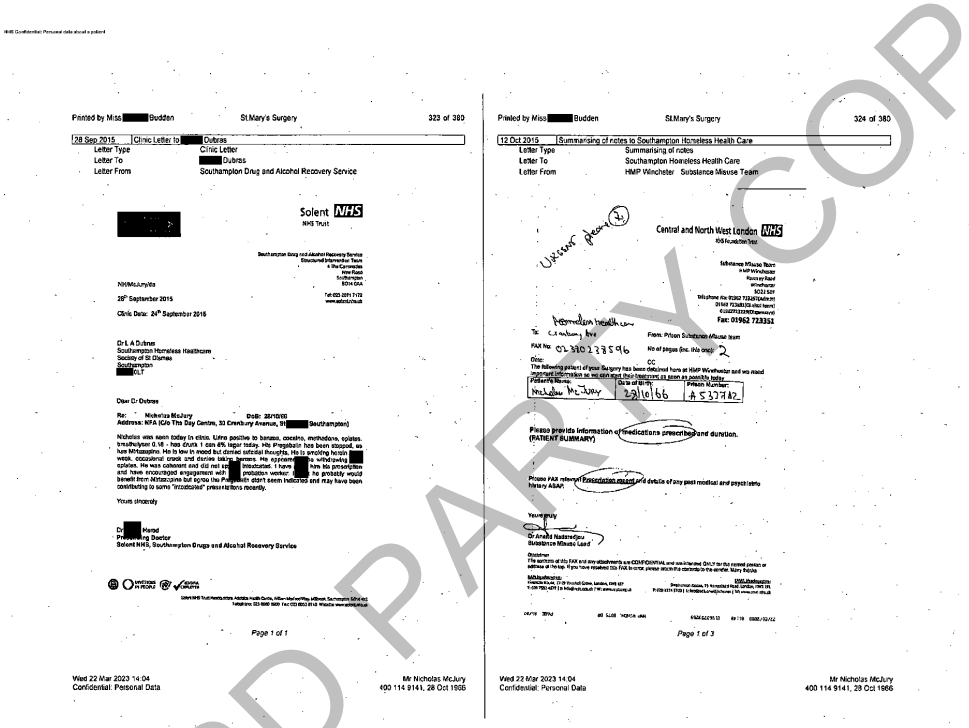

Shella Worth
Clinical Manager

Dear Dr Dubras

Re: Nicholas McJury DoB: 29/10/66
Address: NFA (C/o The Day Centre, 33 Cranbury Avenue, [redacted] Southampton)

Nicholas was seen today in clinic. Urine positive to benzos, cocaine, methadone, opiates. breathalyser 0.18 - has drunk 1 can 8% lager today. His Pregabalin has been stopped, as has Mirtazapine. He is low in mood but denied suicidal thoughts. He is smoking heroin [redacted] week, occasional crack and denies taking benzos. He appeared to be withdrawing [redacted] opiates. He was coherent and did not appear [redacted] intoxicated. I have [redacted] him his prescription and have encouraged engagement with [redacted] probation worker [redacted] he probably would benefit from Mirtazapine but as his Pregabalin didn't seem helpful and may have been contributing to some "intoxicated" presentations recently.

Yours sincerely

Dr [redacted] Herod

Medication Consent

Date	Name	Prison Number
21/10/22	Nicholas McJury	A7049EW

From [redacted] carefully.

All prisoners will be risk assessed by the Healthcare team who will assess the prisoner's behaviour and ability to be responsible for their medication. The clinicians of the Healthcare team is final. A risk assessment will be repeated at any time especially where a prisoner's circumstances change.

Prisoners must understand and agree the following:

1) It is your responsibility to keep all medication held in possession safely. If you feel unable to do this you must inform a member of the Healthcare team or your wing officer immediately. You are responsible for the safe keeping of any medication and therefore if medication is lost or stolen it may not be replaced.
2) You must not give away or sell any medication prescribed to you to another prisoner.
3) You must not have in your possession medication that does not belong to you.
4) You must keep all medication stored in use in the original, labelled container and you must not tamper with it in any way.
5) You must take your medication at the prescribed or agreed time(s) or the correct dose. Keeping it another time or saving it up constitutes unauthorised possession.
6) You must report any loss of medication or difficulty complying with these instructions to Healthcare staff or your wing officer immediately.
7) You must return any unused medication to the Healthcare department. This includes cream and all other items issued to you by the Healthcare team.
8) You must inform Healthcare when you have 7 days left of any repeat medicine on monthly repeats to ensure that a new supply can be ordered in good time.
9) You must ensure all empty boxes, bottles, inhalers etc to the Healthcare department before any further medication can be [redacted]
10) It is a disciplinary offence to falsely declare that you overdosed on medication.
11) If you do not follow this agreement and these conditions you will be reported to Healthcare staff who will retrieve medicines held in your possession. Disciplinary proceedings will be implemented as appropriate. You will be directed randomly to ensure that you are complying with the Possession Policy requirements.
12) I agree to take all medication that I am prescribed at the treatment hatch if not in possession followed by appropriate action if refuse.
13) I agree to allow mouth checks by the officer following administration of medication.
14) I understand that if I am found to have attempted to remove/divert my medication that my medication will be reviewed and may be changed, reduced or stopped.
15) If I am being bullied I am able to talk with a member of the Healthcare Team in confidence and they may facilitate alternative arrangements for medicines administration.

I have read or have had [redacted] to me the above return medication compact and understand that disciplinary action may be taken against me if I fail to comply with medication compact.

Signed N.McJury

SUBSTANCE MISUSE TREATMENT CONTRACT

Name:	NICHOLAS WILLIAM
Prison Number :	A7040DJ
Date of Birth:	28.10.66
Treatment Start Date:	24.10.22

I have had explained to me the following terms under which a safe Detox Treatment will be provided to me by medical and nursing staff at [redacted] UK

- I am willing to undertake The Treatment Programme on C wing and I take full responsibility for my actions throughout.
- I understand that giving inaccurate information about how much and what types of drugs I use can be dangerous and possibly fatal.
- I understand that Care UK does not tolerate ANY forms of abuse to any staff members.
- I will be honest and truthful giving information during my assessment and detox.
- I will give random supervised urine samples as requested.
- I will attend appointments as necessary with other parts of associated services such as the Psychosocial and Healthcare Teams.
- I will not use illicit or "black market" drugs whilst on this detox.
- I will not divert my medication to take another time or to supply other inmates.
- I will not discuss the details of my or any other inmates detox programmes with other inmates or staff.
- I will not take medication from another person or other sources.
- Please be aware that you will be required to drink 200mls of water after taking any prescribed Detox medicines

I understand that failure to comply with the treatment may result in one or more of the following steps being taken:

- A multi-disciplinary review of my clinical care.
- Altering or stopping my detox treatment to protect my or other prisoner's health and safety.
- A review of my custodial needs within detox.

THIRD PARTY COPY

Consent to PHE NDTMS

The following words are to be used by all treatment providers in written or oral form for the purposes of gathering consent from individual clients to share some treatment data with Public Health England (PHE).

What NDTMS is and does: NDTMS is the National Drug and Alcohol Treatment Monitoring System (NDTMS). It is used by PHE to collect information about drug and alcohol treatment in England. If you consent, your treatment service will share some of your treatment information with NDTMS.

What information NDTMS uses and why: PHE collects some personal information about people in treatment including your initials, date of birth, gender, the local authority area in which they live and the first part of your postcode. This reduces the risk of you being counted twice. This information is only shared with PHE if the people using treatment services agree and PHE never contact service users:

- your full name and address are NOT passed on to PHE
- no identifiable information held on NDTMS is passed on to the [redacted] or any other organisation
- your information is held on NDTMS to support ongoing trend and other research analysis[1]

The information is used to understand how many people are using these treatment services, how good the services are at helping people with substance misuse issues, to help improve them and produce statistics and research about drug and alcohol use and treatment. PHE never publish NDTMS information that could be used to identify individuals.

How NDTMS will protect your information: the security of the data you provide to NDTMS is of utmost importance and PHE staff are bound by law to protect the confidentiality of the information they collect and use. The personal information held is kept to a minimum and PHE makes sure that staff can [redacted] see the information that is required to do their job.

Sharing and linkage of NDTMS information: some information from NDTMS is cross referenced with data from other government departments and reports are sent back to them so that they can monitor the effectiveness of the national drug and alcohol strategies. Any data matching with other government departments is undertaken by PHE. At no point is your personal information shared with the [redacted] or any other organisation. In addition, sometimes you may be seen by more than [redacted] agency and to assist with treatment outcomes profiles (TOP), NDTMS may share TOP information about you between the agencies from which you may have received treatment.

Withdrawal of consent: If you do not want information about you to be passed on to NDTMS then you have the right to say this and/or ask for your treatment information at your current service to be removed. This will not have any impact on the treatment you receive. You can ask your service or your keyworker for a copy of the NDTMS patient information leaflet for more information.

I consent to share my data with PHE NDTMS for the purposes set out above.

General Medical Services Registration and Summary Care Record - Patient Consent Form

Please make sure you have read and understood all the information about this form in sections 1 and 2 below. If you do not understand this information, please ask a member of the healthcare [redacted] to explain it to you.

After you have [redacted] this information, please show your choices by ticking the boxes below.

If you need help to fill out this form, please ask a member of the healthcare team.

General Medical Services (GP) registration

Yes – I would like to be General Medical Services registered, including automatic re-registration with a new healthcare provider if I move between places of duration
☐ Consent (permission)

OR

No – I would not like to be General Medical Services registered
☐ I do not consent (I do not give permission)

Summary Care Record

You will automatically have a Summary Care Record unless you tell us that you do not want one. This will include:

(1) basic information about medication, allergies, and adverse reactions; and
(2) extra information as explained above in section 2 of this form.

If you are happy for all this information to be included and available to healthcare staff, you do not need to do anything else in this part of the form – do not tick either of the boxes below.

You can choose to limit what information your Summary Care Record includes by choosing from one of the options below. You must be aware that if you choose one of these options, this may impact on the speed and quality of the care you receive, in an emergency, healthcare staff may still obtain important information about you with other healthcare providers acting for you.

☐ I only agree to 'basic information' about my medication, allergies, and adverse reactions being included and shared – I do not give permission for additional information about my health to be included.

OR

☐ I would not like a Summary Care Record at all.

Change Grow Live

Discussion/Goal Plan:

-Opiate MAT options discussed.
-Benefits and side effects of opioid MAT explored.
-Currently on methadone 20mg and would like to remain on methadone but with a 5mg increase.
- 5mg increase agreed.
- PSI offered, and he agreed to engage in SMART groups.
- Recovery care plan goals are to stay abstinent from illicit, come and give some illicit drug free UDS.
- Nicholas is keen to give back to community and be involved in inspiring other illicit users.
- Nicholas has been informed he must attend GP to receive treatment for his infected finger.
- I will review Nicholas again in 6 months or sooner.

Request for GP:
I would appreciate if you could share any blood test results when conducted.
There are harms associated with Pregabalin and Gabapentin. There is a risk of addiction. Users can become heavily tolerated because they may use higher than recommended doses and mix with other substances risking fatal overdose.
Please take care when prescribing other medications that may be misused e.g., opioids or sedative medications such as Benzodiazepines, Z drugs, Gabapentinoids as this increase further the risk of misuse, overdose, and addiction.
Please inform us if this patient is being prescribed medication that is likely to have significant interactions with Methadone / Buprenorphine.
Please be especially careful with regards to medications which prolong the QT interval (e.g. Citalopram, Mirtazapine, antidepressants, and most antipsychotics).

Please provided us with an up-to-date GP summary.
Our NHS email address: [redacted]

Yours sincerely

SP

Dear Dr Ali-Maye

MR NICHOLAS MCJURY, Two Saints Day Centre, 30 Cranbury Avenue, Southampton, SO14 0LT
DOB: 28/10/1956, Hospital Number: 3513616, NHS Number: 400 114 9141

GP Information Only

This is to inform you that this patient did not attend his telephone consultation with us.

For the record, he was referred to the Lung Cancer Services for an 11 mm pulmonary nodule.

The Team of the Week lung MDT recommended a follow-up scan in three months' time.

I have requested it and an appointment will be forwarded to him.

He no longer lives at the home address we have in our system therefore we will send the correspondence at the day centre where he attends internally.

Yours sincerely

SO14 0LT

Dear Mr Mcjury

MR NICHOLAS MCJURY, Two Saints Day Centre, 30 Crediory Avenue, Southampton, Hampshire, SO14 0LT
DOB: 28/10/1966, Hospital Number: 3513414, NHS Number: 400 114 9141

GP Actions: NK

Diagnosis: Right forearm fracture.

DNA clinical appointment.

Plan: One week fracture clinic follow-up.

You were due to be seen in the fracture clinic for a follow-up, where we were aiming to review the fracture in your right forearm and arrange for a change of your plaster.

Unfortunately you did not attend this clinical appointment. I did try contacting you via your mobile number but unfortunately there was no answer.

I have arranged a further fracture clinic appointment in one week, as it is pivotal that we ensure the fracture is not displacing. If these fractures do displace, there is a high chance they will go on to need surgical management.

Please do let us know if there is a reason why you cannot attend this appointment and we will try to make alternative arrangements.

Kindest regards

Yours sincerely

Dear Dr Ab-Maye

MR NICHOLAS MCJURY, Two Saints Day Centre, 30 Crosbury Avenue, Southampton, Hampshire, SO14 1LT
DOB: 28/10/1956, Hospital Number: 2513616, NHS Number: 400 114 9141

This man did not attend a trauma clinic follow up today with me. He attended the emergency department recently following an assault and there was a concern as to whether he had an injury to his orbital wall medially.

I take it from his non-attendance today that he is making a good recovery and he has no significant problems from his eyelid/eye vision etc. I have not arranged any further appointments unless either you or he contacts us.

Kind regards

Yours sincerely

Dear Dr Ab-[redacted]

MR NICHOLAS MCJURY, 152 Golden Grove, Southampton, United Kingdom, SO14 9PW
DOB: 28/08/1988, Hospital Number: 3513616, NHS Number: 400 114 9141

Diagnosis: Right medshaft ulna undisplaced fracture.

Plan: For below elbow cast upon patient's request and review in three weeks' time.

I reviewed this gentleman today who is three weeks down the line following an injury to his right ulna, which was treated in a backslab.

Today we removed the cast and obtained a new radiograph, which showed some callus around the fracture site, with similar position to the previous one.

I understand that Nicholas is on methadone and a few other drugs. I can see that his arm is not necessarily swollen today and he had intact neurovascular bundle.

I advised him today that we should apply a sugar-tong cast to avoid any rotation in his forearm and to improve the fracture healing, but he insisted that he did not want this and that it was his body and his choice and that he was not willing to go for anything above the elbow. The plaster the only thing he was willing to accept was a below elbow cast.

We had a long discussion about risks and benefits for each option and I explained to him that we have the option of doing nothing, although this will mean that the fracture will likely displace and he will require surgery. Having a below-elbow cast is not ideal in this situation and it will allow rotation around the fracture site and there is a high chance of fracture displacement that might require surgical intervention, with all of the complications that accompany surgical intervention. The recommended option was a sugar-tong type cast which he clearly refused and did not want as an option at all.

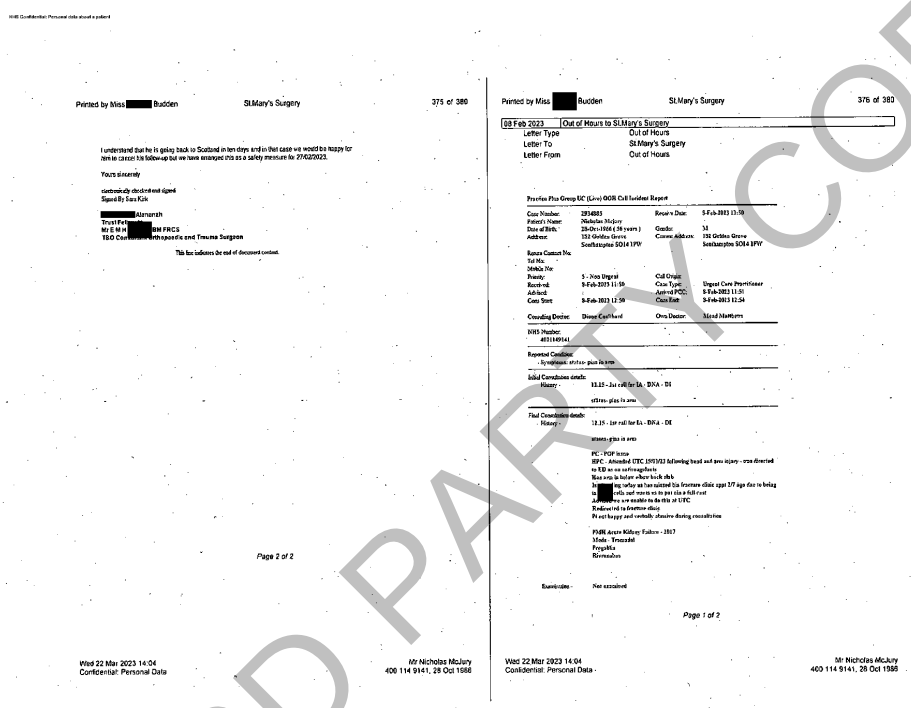

In light of this long discussion and explaining his options to him, he did not want to follow our advice and wanted to proceed with a below elbow cast. We agreed to offer this and see him again in three weeks' time to check on the fracture position.

NICHOLAS MCJURY

This is your Homelessness Application declaration under Section 214 of Part 7 of The Housing Act 1996 and information to you about the Privacy Notice

Gateshead Council
20 JAN 2021
Housing Options

Important you read this declaration and the privacy notice attached;

The Homelessness Application Declaration: This is a declaration from you (the applicant/s who are applying for homelessness assistance) that:

I/we understand that once an application for homelessness assistance is taken it is an offence to give false statements, withhold any information or fail to disclose any change of circumstances with regard to a) the assessment of any homelessness application and b) any duty that may be owed as a result of that application.

214 False statements, withholding information and failure to disclose change of circumstances

(1) It is an offence for a person, with intent to induce a local housing authority to believe in connection with the exercise of their functions under this Part that he or another person is entitled to accommodation or assistance in accordance with the provisions of this Part, or is entitled to accommodation or assistance of a particular description—

(a) It is an offence to knowingly or recklessly to make a statement which is false in a material particular, or

(b) Knowingly to withhold information which the authority have reasonably required him to give in connection with the exercise of those functions.

(2) Also if before an applicant receives a notification of the local housing authority's decision on their application there is any change of facts material to the case, the applicant must notify the authority as soon as possible by the following means – in person at the authority's Housing Options Offices, by writing, telephoning, or emailing the local authority.

This is your Authorisation of Information Disclosure

GBC will carry out inquiries to any individuals, agencies statutory and non-statutory bodies both now and in the future for the purpose of:

1. Assessing any application for homeless assistance under the Housing Act 1996 and any support needs (including your health, financial and employment needs).
2. Performing any duty that may arise out of that assessment under the Housing Act 1996 Part Seven.
3. Assessing any application for housing including whether I/we are eligible for social housing and my/our housing needs.
4. Assessing any possible duty under Section 17 of the Children Act where a decision might be reached on any application that a housing accommodation duty is not owed, or has been owed but has come to an end, or if you are a single person any assessment under adult social care legislation.
5. To protect the public funds administered by the Council for the prevention and detection of fraud.

Information may be obtained and shared with (landlords; individuals; with any Council Department (including Benefit Services and Social Services); Government Department or Agency; Police; Hospital; Doctor; School and also suppliers of Gas, Water, Electricity, Digital Communications, Satellite TVs, Mobile telephones and landlines; voluntary sector bodies including bodies providing debt advice and support. This list is not exhaustive but information will only be sought or given when it is appropriate to meet one or more of the 5 purposes set out above.

Discharge Management - Acute Kidney Injury

Highest AKI stage recorded during admission	Stage 3
Medicines Reviewed	Yes
Medicines Review	No AKI related changes to regular medication
Follow Up U+Es including Creatinine and eGFR	Discharge team to review at 1 Day(s)
Advisory Notes	It is recommended that all patients who have had an AKI should have a follow up creatinine / eGFR after 3 months (or earlier if clinically indicated). Higher risk patients may need yearly follow up for two to three years after an AKI (NICE 2014). Patients who sustain an AKI are at risk of future hospital admissions and repeat AKI episodes. All AKI episodes should be recorded in the primary care record.

Preventing blood clots after discharge
The risk of developing blood clots can persist for some weeks after discharge. There are certain signs to look out for that could mean that you have a blood clot. You should contact your doctor immediately if you develop any of the following symptoms while you are in hospital or after you go home.

- Leg pain
- Leg swelling
- Warm or discoloured skin on the legs
- Enlarged or more noticeable veins near the surface of the skin on your legs
- New onset shortness of breath
- Unexplained chest pain
- Coughing up blood

Key Events During Admission
Background - PE's 2011, DVT 2015 on rivaroxaban (but has ceased taking of own accord), ex IVDU (not used for 7 years), Chronic Hepatitis C. On prolestion.

Admitted via ED to UHS on 9/7/16 after waking up with pain and numbness involving Nicholas left buttock and left leg, with associated loss of sensation and power. Nicholas reported generalised body aches and reduced urine output. Initial concerns regarding potential cauda equina due to reduced power in his left leg however, on further examination, extensive erythema was noted over Nicholas' left buttock extending into his groin and thigh. AKI noted on initial bloods (Urea 26.6 and Creat 476) with a CK of 88685 and Nicholas was subsequently transferred to GICU for haemofiltration. Nicholas gave a history of injecting vitamins into his left buttock one day prior to his presentation, however there were concerns regarding a long lie in view of his history of previous drug use.

MRI Pelvis demonstrated extensive myonecrosis affecting the left gluteal component and suspicions of mycotic aneurysms.

Nicholas was initially difficult to manage on the filter and non-compliant, however he has now adjusted to the new regime well. He has been being filtered overnight with the filter coming down during the day, allowing [redacted] a little more freedom. His creatinine is slowly reducing and we have been offloading around 2-3litres of fluid a day via the filter. Nicholas is presently passing around 5-10mls of urine an hour and this has been static throughout his admission. He has a left IJ Vascath inserted on 10/7/16. Alternative IV access has proved difficult throughout his admission.

Nicholas has remained on a Heparin infusion throughout his admission in view of his previous extensive thromboembolic disease (DVT's and PE).

Whilst on the unit Nicholas has been reviewed by the orthopaedic team who have advised that no surgical intervention or further imaging is presently required. The orthopaedic consultant overseeing his care here (Mr [redacted]) handed over his care to Group Captain Sherry (Consultant Plastic Surgeon) for on-going input.

Nicholas has been commenced on IV Tazocin (4.5g TDS) and IV Clindamycin (1200mg TDS) on 10/7/16 (today day 9). On advice of the microbiologists he is to complete a total of 12 weeks antibiotic therapy with at least 2 weeks of IV therapy, before stepping down to oral co-amoxiclav if there is evidence of clinical improvement.

Investigations During Admission
ECG
sinus rhythm
MRI Spine Lumbar/Sacral
See attached reports

Management Plan
1. Transfer under the care of the renal team for haemofiltration
2. Ongoing orthotentics input
3. Presently remains on a heparin infusion in view of history of DVT/PE
4. Complete a total of 12 weeks antibiotic therapy
5. Continue IV heparin infusion as necessary.

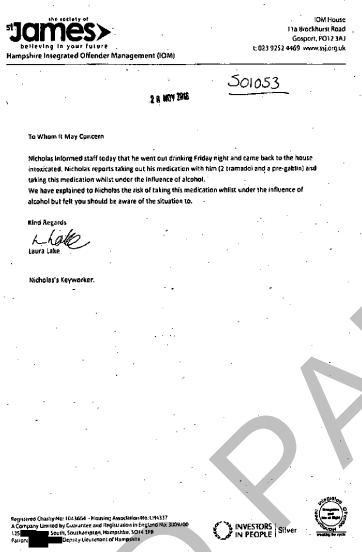

No drugs on discharge

Allergy / adverse reactions
None Stated

Infection Risk Status
None

To Whom It May Concern

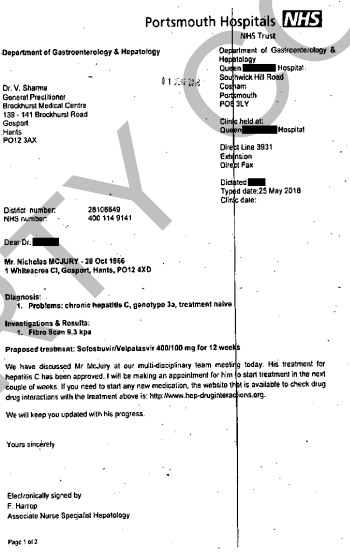

Nicholas informed staff today that he went out drinking Friday night and came back to the house intoxicated. Nicholas reports taking out his medication with him (2 tramadol and a pre-gabilin) and taking this medication whilst under the influence of alcohol.
We have explained to Nicholas the risk of taking this medication whilst under the influence of alcohol but felt you should be aware of the situation to.

Kind Regards
Laura Lake

Nicholas's Keyworker.

Dear Dr. [redacted]

Mr. Nicholas MCJURY - 28 Oct 1966
1 Whitesacres Cl, Gosport, Hants, PO12 4XD

Diagnosis:
1. Problems: chronic hepatitis C, genotype 3a, treatment naive

Investigations & Results:
1. Fibro Scan 9.3 kpa

Proposed treatment: Sofosbuvir/Velpatasvir 400/100 mg for 12 weeks

We have discussed Mr McJury at our multi-disciplinary team meeting today. His treatment for hepatitis C has been approved. I will be making an appointment for him to start treatment in the next couple of weeks. If you need to start any new medication, the website that is available to check drug drug interactions with the treatment above is: http://www.hep-druginteractions.org.

We will keep you updated with his progress.

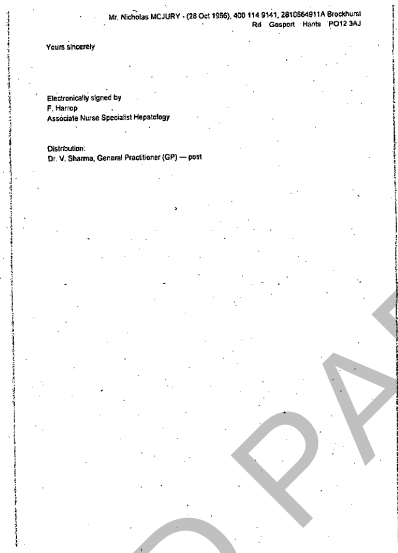

Yours sincerely

Dear Dr. [redacted]

Mr. Nicholas MCJURY - 28 Oct 1986
11A Brockhurst Rd, Gosport, Hants, PO12 3AJ

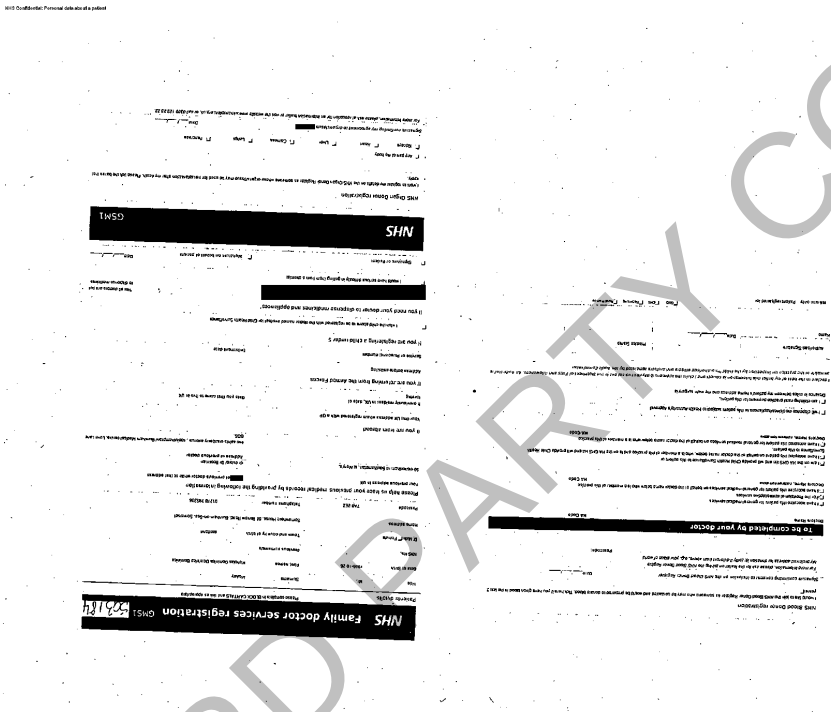

Diagnosis:
1. Chronic Hepatitis C, genotype 3a. Treatment naive

I was due to see Nicholas in our Nurse Led Hepatology Clinic at Campion Place today. He was due to start his treatment for hepatitis C, but did not attend. I tried contacting him by telephone and there was no answer on the mobile number that I had.

I am aware that he is staying in the Ibis Hotel in Portsmouth and I will endeavour to contact him again to see if he does actually want to start his treatment.

Dear Dr. Sharma

Mr. Nicholas MCJURY - 28 Oct 1968
1 Whiteacres Cl, Gosport, Hants, PO12 4XD

Diagnosis:
1. **Chronic hepatitis C genotype 3a (currently 8 weeks into a 12 week course of Epclusa)**
2. **Liver FibroScan 9.3 kPa prior to treatment indicating liver fibrosis**
3. **Hepatitis B core antibody positive**
4. **Thrombocytopenia**
5. **Ultrasound showing fatty liver disease**

Medication:
1. **Rivaroxaban**
2. **Pregabalin**
3. **Tramadol**

Management Plan:
1. **Currently 8 weeks into a 12 week course of Epclusa (Sofosbuvir/Valpatasvir)**

I reviewed Nicholas in the Hepatology Nurse Led Outreach Service at Gosport Induction hub on 3 August. He assures me he has continued to take his daily medication and I have dispensed his last 4 weeks whilst in clinic today. His bloods at his last review show that his hepatitis C RNA was not detected and his LFTs are entirely normal. He declined having bloods repeated again today. He was quite agitated about people being able to bleed him and I was not prepared to let him do a femoral stab when we had no couch in clinic today. I have therefore agreed to see him again in 4 weeks' time and we will repeat his bloods again at this point.

Dear Dr. [redacted]

Mr. Nicholas MCJURY - 28 Oct 1966
11A Brockhurst Rd, Gosport, Hants, PO12 3AJ

Diagnosis:
1. **Chronic Hepatitis C, genotype 3a, treatment naïve**
2. **Fibroscan score 9.3 kPa (indicates fibrosis of the liver)**
3. **Hepatitis B core antibody positive**
4. **Thrombocytopenia**

Nicholas was due to be seen at the Gosport Nurse-Led Outreach Clinic on Friday, the 5th January to commence his hepatitis C treatment and has previously been approved by NHS England. Unfortunately he failed to attend his appointment with us today. I have been informed he has been currently evicted from his HMO House and is currently residing at the Ibis Hotel over in Southsea Portsmouth. His key workers managed to make contact with him on the phone today and he has agreed to attend the Campion House Drop-in Clinic next Tuesday morning. We hope to see him then to discuss whether treatment at this time is suitable or whether we need to delay this process until he is in a more stable position.

Dear Dr [redacted]

Mr. Nicholas MCJURY - 28 Oct 1966
11A Brockhurst Rd, Gosport, Hants, PO12 3AJ
District Number: 28108649; NHS number 400 114 9141

Diagnosis: Chronic HCV

I reviewed Nicholas at the Gosport Inclusion service today. As you maybe aware, we have been chasing him from Gosport to Southsea due to him being placed in different areas with regards to his current housing. He was due to commence his treatment at Campion Place last week, however, in the meantime he was rehoused back in Gosport. Unfortunately, obviously, I did not have his hepatitis C treatment with me at Gosport today as we did not know he was back in Gosport.

We have therefore made arrangements for him to commence his treatment in 2 weeks' time on Friday, 16 February at Fareham Avalon Service. He will then need to be seen 2 weeks at the Gosport Avalon Service 2 weeks after that at Fareham. He will be alternating on a 2 weekly basis for the duration of his course of treatment due to us needing to keep a close eye on his clotting levels due to a possible interaction with his hepatitis C medication and his Rivaroxaban. We will keep you informed of when he starts treatment hopefully next week.

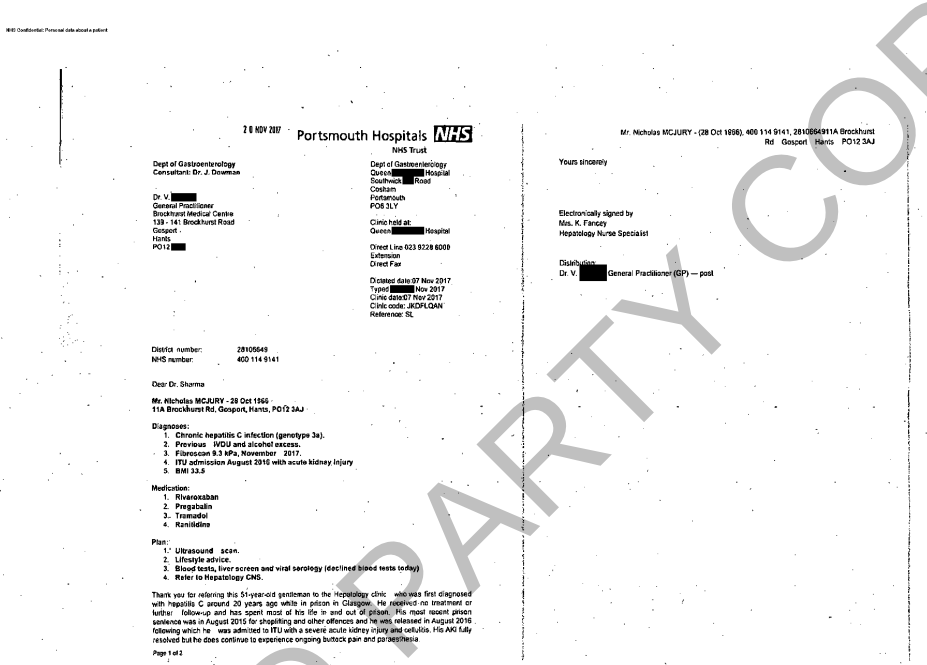

Yours sincerely

Dear Dr. Sharma

Mr. Nicholas MCJURY - 28 Oct 1966
11A Brockhurst Rd, Gosport, Hants, PO12 3AJ

Diagnoses:
1. **Chronic hepatitis C infection (genotype 3a).**
2. **Previous IVDU and alcohol excess.**
3. **Fibroscan 9.3 kPa, November 2017.**
4. **ITU admission August 2016 with acute kidney injury**
5. **BMI 33.5**

Medication:
1. **Rivaroxaban**
2. **Pregabalin**
3. **Tramadol**
4. **Ranitidine**

Plan:
1. **Ultrasound scan.**
2. **Lifestyle advice.**
3. **Blood tests, liver screen and viral serology (declined blood tests today)**
4. **Refer to Hepatology CNS.**

Thank you for referring this 51-year-old gentleman to the Hepatology clinic who was first diagnosed with hepatitis C around 20 years ago while in prison in Glasgow. He received no treatment or further follow-up and has spent most of his life in and out of prison. His most recent prison sentence was in August 2015 for shoplifting and other offences and he was released in August 2016 following which he was admitted to ITU with a severe acute kidney injury and cellulitis. His AKI fully resolved but he does continue to experience ongoing buttock pain and paraesthesia

Mr. Nicholas MCJURY - (28 Oct 1966), 400 114 9141, 28108849 1A Brockhurst Rd
Gosport Hants PO12 3AJ

Since August 2016 he reports having made quite a transformation in his life, now [redacted] sheltered accommodation and working as a drug support worker in Portsmouth. He is also attending college and has just completed level 3 in counselling and sociology. He reports being clean from [redacted] drug use for around 4 years and from intravenous drug use for 10 years. He currently consumes no alcohol, but until 3 years ago would drink up to 10 to 15 pints of beer per day. Unfortunately, the beneficial changes in his lifestyle have been associated with a significant weight gain, with his weight today of 101.5 kg corresponding to a BMI of 33.5. His current medications are Rivaroxaban for previous thromboses, Pregabalin, Tramadol, and Ranitidine.

His blood tests in October 2016 showed normal LFTs with an ALT of 26 although reduced platelet count of 148. Hepatitis C serology in May of this year confirmed genotype 3a with a viral load of 1.9 x10^6 IU/ml. No hepatitis B or HIV serology was available.

Examination today revealed him to be overweight with some tattoos but no stigmata of chronic liver disease. A Fibroscan gave a reading of 9.3 kPa (IQR 12%) with CAP of 389 dB/m consistent with significant steatosis and probably at least a moderate degree of fibrosis.

He has clearly made some significant lifestyle changes and is now in a much more positive situation. I have explained that we would be keen to offer treatment for his hepatitis C, but prior to this will need some additional information comprising further blood tests, including a liver screen and HBV/HIV viral serology, and an ultrasound scan. Unfortunately, he will only take his own blood and will not permit anyone else to perform venepuncture, and therefore the required blood tests could not be performed today. However, he was happy for me to request an ultrasound scan, and I will refer him to be seen in the Hepatology nurse led clinic where they may be able to arrange for him to take his own blood under supervision. I have also given him some general lifestyle advice regarding weight loss and exercise, and we will keep you informed of his progress.

Yours sincerely

his treatment, we have now had to start the process again and we have now had to resubmit the application to NHS England. He will now be embarking on a 12-week course of Sofosbuvir/Velpatasvir (Epclusa) for the eradication of his Hepatitis C. I have dispensed 4-weeks worth this medication today. This treatment has a potential success rate of over 98% if we have good compliance with the full treatment over the next 12 weeks.

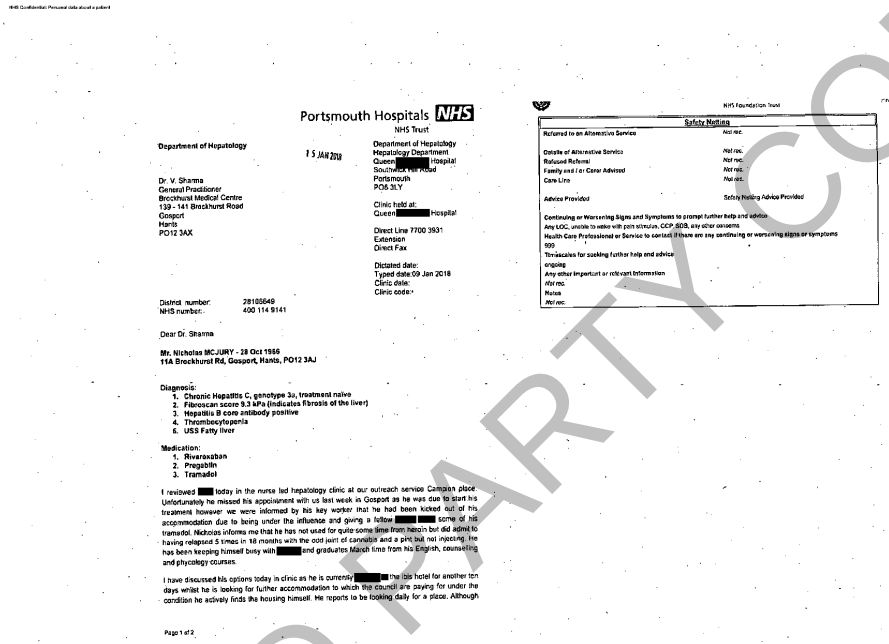

I have looked at potential drug drug interactions with his Rivaroxaban, Pregabalin and Tramadol and these are fine to take in combination with his Epclusa however there are multiple drug drug interactions with Epclusa and any additional medications commenced over the next 12 weeks should be [redacted] referenced against the website www.hep-druginteractions.org for any potential interactions prior to commencement. I will see him back at the Gosport Inclusion Service on Friday 6 July at 4 weeks into treatment to repeat his bloods and ascertain his response to treatment so far and we would dispense further medication at this point.

Dear Dr. Sharma

Mr. Nicholas MCJURY - 28 Oct 1966
11A Brockhurst Rd, Gosport, Hants, PO12 3AJ

Diagnosis:
1. Chronic Hepatitis C, genotype 3a, treatment naive
2. Fibroscan score 9.3 kPa (indicates Fibrosis of the liver)
3. Hepatitis B core antibody positive
4. Thrombocytopenia
5. USS Fatty liver

Medication:
1. Rivaroxaban
2. Pregablin
3. Tramadol

I reviewed [redacted] today in the nurse led hepatology clinic at our outreach service Camden place. Unfortunately he missed his appointment with us last week in Gosport as he was due to start his treatment however we were informed by his key worker that he had been kicked out of his accommodation due to being under the influence and giving a fellow [redacted] some of his tramadol. Nicholas informs me that he has not used for quite some time from heroin but did admit to having relapsed 5 times in 18 months with the odd joint of cannabis and a pint but not injecting. He has been keeping himself busy with [redacted] and graduates March time from his English, counselling and phycology courses.

I have discussed his options today in clinic as he is currently [redacted] the Isis hotel for another ten days whilst he is looking for further accommodation to which the council are paying for under the condition he actively finds the housing himself. He reports to be looking daily for a place. Although

he is very keen to get started I have explained due to his rivaroxaban he will need tight monitoring due to possible interactions so it would be best to wait for him to be stable before starting. I have reiterated that he will get treated we are not telling him he has lost his chance but as you may be aware currently as the guidance states he will only have one chance for a course of treatment and we would like to make sure it goes as smoothly as possible for him, I have explained that waiting a few weeks will not make any difference in his health and to engage with our services in the meantime. I have advised him to pop in next week again and keep us updated of his situation and been in contact with his key worker from Gosport. We will keep you updated of his progress.

Dear Dr. Sharma

Mr. Nicholas MCJURY - 28 Oct 1966
1 Whiteacres Cl, Gosport, Hants, PO12 4XD

Diagnosis:

1. **Chronic hepatitis C, genotype 3a (currently end of 12-week course of Epclusa**
2. **Liver FibroScan 9.3 kPa prior to treatment indicating liver fibrosis**
3. **Hepatitis B core antibody positive**
4. **Thrombocytopenia**
5. **Ultrasound showing fatty liver disease**

This gentleman is currently at the end of his 12-week course of Epclusa for eradication of hepatitis C. He has failed to attend his appointment with us today at the Gosport Inclusion Service for his end of treatment bloods.

We will send him a further letter to attend on the 5 October and hope to see him then.

If you would like information about how the Trust uses and share your personal data, please see the Trust's privacy notice on our website: http://www.porthosp.nhs.uk/aboutthetrust/privacy-notice.htm

Mr. Nicholas MCJURY - (28 Oct 1966), 400 114 9141, 281086491 Whiteacres Cl
Gosport Hants PO12 4XD

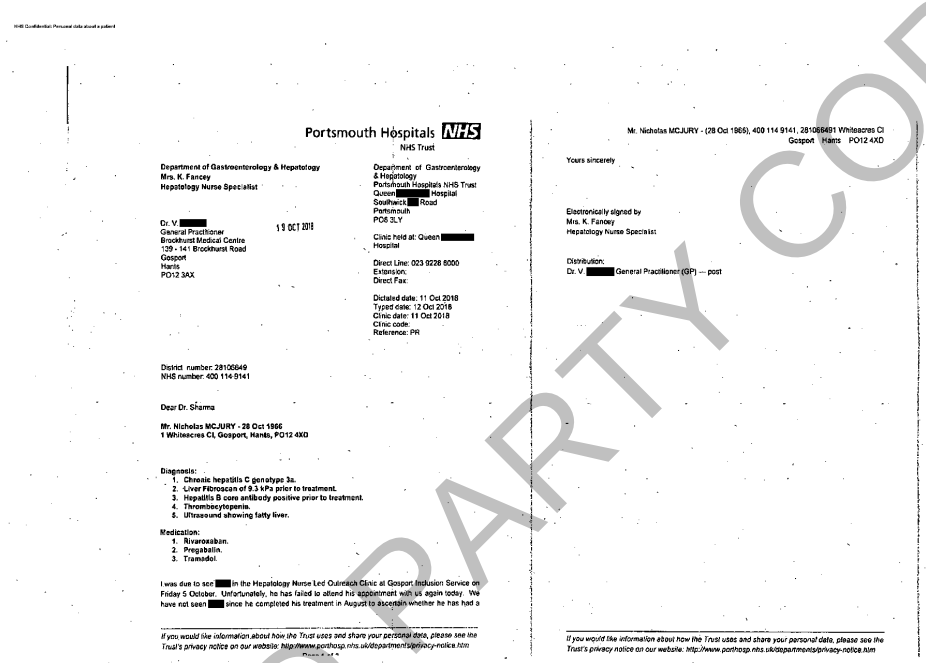

Nicholas turned up at the Hepatology Nurse-Led Outreach Service at Gosport Inclusion Centre on Friday 6th July quite late. He appeared quite high in clinic today with dilated pupils and a slightly verbally aggressive nature on occasion. He presented with a young lady who was also slightly aggressive and appeared under the influence of illegal drugs at the service today. As you are aware, Nicholas is currently four weeks into the 12-week course of treatment. He assures me that he has taken his daily dose of Epclusa over the last four weeks but that his treatment finished today which was reason for him not turning up this morning. I have discussed with [redacted] again today and the importance of continuing taking this medication regularly and he still has an 8 weeks of therapy to take to make this treatment successful. I have also discussed with him the fact that if he stops taking this treatment and does not turn up for his appointments he will not get a second opportunity to have treatment under the current NHS England Commissioning for the hepatitis C treatment.
I have rechecked his bloods today, his hepatitis C RNA has come back negative at 4 weeks into treatment. I have urged him to attend his next appointment in clinic at the beginning of August. I have dispensed a further four weeks medication today.

Yours sincerely

The Trust actively promotes research with a view to improving the quality of services for the future. You may have the opportunity to participate in an important research study. Please ask if you want more information or if you would like to find out more.

Trust Headquarters, Suite 1, Solent Road, Fareham Park, Fareham, Southampton, SO40 2RE

Mr. Nicholas MCJURY - (28 Oct 1969), 400 114 9141, 281068491 Whitepond Cl Gosport Hants PO12 4XD

response to his hepatitis C treatment or not. We also need to ensure that he has not hepatitis B reactivation on these medications and we have been unable to check this via blood test also.

This gentleman has a raised liver Fibroscan prior to treatment indicating some level of damage to his liver and we also need to keep an eye on this following his course of treatment however we have given him multiple appointments and he has failed to attend. I am not going to offer him any further appointments with us at present but the inclusion clinic that I run on the first Friday of every month is a drop-in service and he can attend back at that at any point if he wants to engage back with Hepatology.

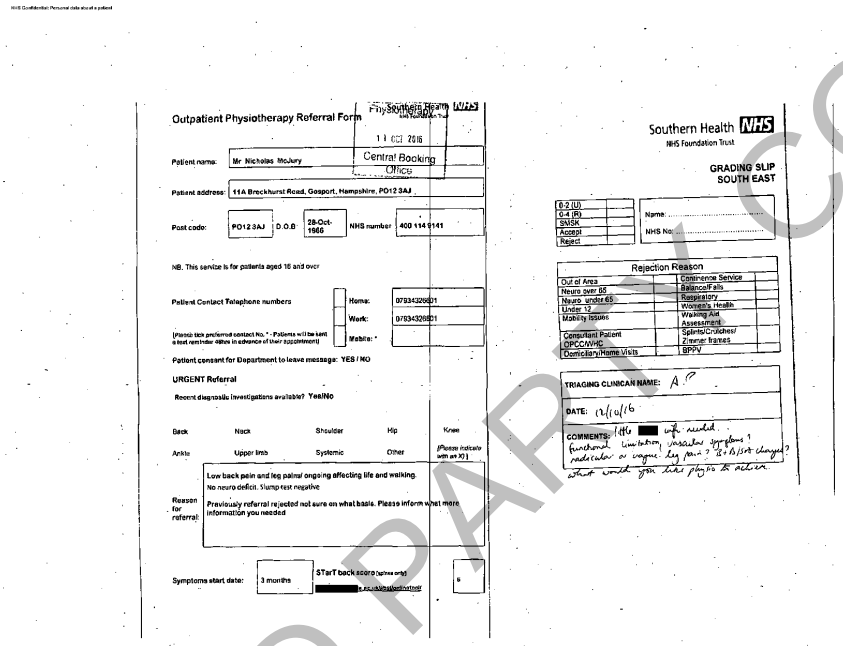

Yours sincerely

Dear Dr. Sharma

Mr. Nicholas MCJURY - 26 Oct 1968
11A Brockhurst Rd, Gosport, Hants, PO12 3AJ

Diagnosis:
1. **Hepatitis C genotype 3a**
2. **Fibroscan 9.2kPa**
3. **Ongoing intermittent drug use- crack cocaine**

I reviewed Nicholas in the nurse led hepatology clinic today. He reports being well and his housing situation remains unchanged but relatively stable at present being housed in the Ibis hotel until such time as he has permanent housing arranged. He reports intermittently using drugs although reports that he is not injecting.

I have explained the need for regular attendance of appointments and adherance to medication plainly to him today and he feels that he would be able to engage in what is expected of him. I do feel that we should perhaps just get on and treat him whilst he is keen however I do not know this gentleman well and therefore will discuss further with my colleagues.

I will aim to start treatment in 1/52 all being well.

Dear Dr. [redacted]

Mr. Nicholas MCJURY - 28 Oct 1986
11A Brockhurst Rd, Gosport, Hants, PO12 3AJ

Diagnosis:
1. **Chronic Hepatitis C genotype 3a, treatment naive**
2. **Previous IVDU and alcohol excess**
3. **Fibroscan 9.3 kPa - November 2017**
4. **Acute kidney injury August 2016**
5. **USS - fatty liver (Dec 2017)**

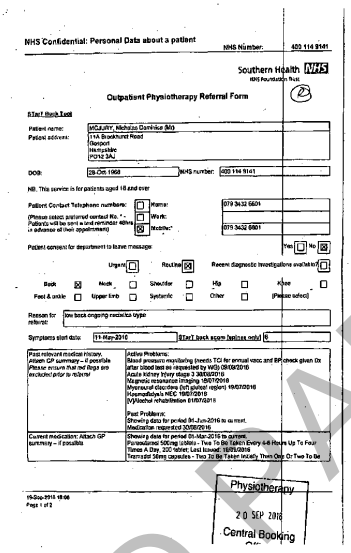

I briefly met with Nicholas McJury today in our nurse led hepatology clinic as he had attended QA for an ultrasound scan. He advised me that he has not had any treatment for his Hepatitis C before and he has been four years clean from IV drugs. Fortunately my colleague [redacted] Fancey was in the department when he attended as she will be reviewing him in Gosport for his treatment which will be discussed this Friday. She was able to obtain bloods today and we will inform you of the result of the MDT meeting.

Yours sincerely

Dear MJ BRIGG

Re: Mr Nicholas Dominica MCJURY DOB: 28 Oct 1966
Address: 11A Brockhurst Road, GOSPORT, Hampshire, PO12 3AJ

The above patient was referred to me for a 1:1 exercise programme. On the 17th May 2017 he cancelled an appointment with me and rebooked for the 24th May 2017. Unfortunately he failed to attend this appointment. I waited a couple of weeks for Mr McJury to contact and rebook, there was no contact and he was discharged.

He was reinstated and an appointment for the 20th June 2017 was arranged for him. This he attended and was aware that he needed to continue to attend appointments as well as the exercises given.

Unfortunately he cancelled the following appointment on the 29th June 2017 and was rebooked for the 10th July 2017. Again he has failed to attend the appointment and there has been no contact from him since.

I am therefore assuming that he no longer requires an appointment and have discharged him from our care.

Should he require treatment in the future a new referral will be necessary.

Yours sincerely

Dear Mr McJury

According to our records you have been at your current address for 18 months or longer.

As we are a homeless service you are required to register with a local GP.

If you need any assistance with this please contact the Homeless Healthcare Team.

Your records will automatically be removed from our system on August 1st 2015. Hopefully this will give you enough time to register with a local GP.

Yours sincerely

02 May 2014

Dear colleagues

Re: Mr Nicholas McJury. Date of birth: 28 Oct 1966
50a Northam Road Southampton SO14 0PB
Patient phone number 07535 518368
NHS number 405 114 9141

Mr McJury is well known to you and presents again with symptoms of a left sided DVT. He has not been looking after himself very well. He appears to have been taking warfarin and clexane sporadically but not had any medication for about a week, and reports his leg has become very swollen and painful in the last 48 hours as a result.

He was especially worried today because the swelling has extended above the knee as well as having bruising on the lateral side of the left upper thigh.

On examination the leg of tense and swollen but without overt signs of cellulitis. There are signs of chronic venous insufficiency at the left ankle.

I think he probably has a recurrent left sided DVT and welcome your assessment of this. In the long term he struggles with Warfarin monitoring so I wonder whether he would be a suitable candidate for rivaroxaban?

Many thanks
Yours faithfully

Dr Louise Dubras

09.01.2009

Dear Sir/Madam

Re: NicholasMcJury dob:28.10.1966 English Church Housing
10 Southampton Street
Southampton
Hants

This man has consulted on a couple of occasions since 23rd December. On that day he presented with an infection is his leg and a lump on his testicle. He has a history of a DVT in the leg.

Antibiotics were given and a referral was sent for a testicular ultrasound. He was asked to return for review on 24th December; unfortunately this did not happen.

He attended the emergency department on 3rd January 2009 with further pains in his leg, but did not wait for treatment so no further information is available from the hospital other than a record of his attendance there.

He is still awaiting the ultrasound appointment.

If further information is required about his medical condition I can be contacted a the above address/ phone number

Yours faithfully

Dr [redacted] Dubras, FRCGP.

Dear Becky

Re: Nicholas McJury - Date of Birth: 28.10.1966
Nfa, Southampton

I have seen Nicholas McJury on a couple of occasions, the first having been on the 10 October 2004 and the second on the 26 November 2004.

When I saw him in October he attended for a Sick Note. He told me that he had been released from Camphill Prison after an eighteen month sentence but has been of no fixed abode since he came out of prison. He described having been expecting a resettlement package and Leisure Card etc. and both in October and now he has been increasingly disillusioned with the arrangements that were made for him.

When I saw him in October he certainly seemed very low in mood. He appeared to have made good progress with regard to his CBT and, in fact, could walk about a mile before he needed to rest. Thus I signed him off sick with nervous dability because I felt he was very low in mood.

He came to see me on the 26 November describing having been beaten up in a phone box approximately two weeks ago. He says he was attacked from behind by two individuals and pushed over and kicked. This left him unable to attend probation as he felt very battered, both physically and emotionally.

When I saw him on the 26 November he had yellowing bruises over his face which could be compatible with the history that he gave.

I understand he is due to see you this week. If you require any further information, please do not hesitate to contact me.

Yours sincerely

Dr [redacted] Dubras
General Practitioner

Dear Mr McJury,

The Doctor would like you to have a blood test taken.
This can be done at Southampton General Hospital.
You will need to phone the appointment line on 02381204877 between Monday - Friday 8am-6pm to make an appointment.
The clinic will be able to access the request.

Alternatively, you can make an appointment at the surgery.

If you have any queries please do not hesitate to contact our Medicines Managers team on 02380 333778.

Yours sincerely

The Medicine Managers Team.

This Surgery Uses SMS text messages to communicate with patients. The mobile phone number (if any) we have recorded for you is . Please inform reception if you do not wish to receive text messages or if this number needs updating.

Following our phone discussion, we can confirm that Nicholas McJury is registered with us at the Homeless Healthcare Team. However the only medication he has been prescribed by us in 2011 is Warfarin 5mg where he was given a 3 day supply on 19/8/2011. There have been no other scripts issued for this gentleman.

Yours sincerely,

Pam [redacted]

Dear Mr McJury,

I write with regard to the appointment at the coagulation clinic which you missed last week. I have discussed your care with our doctor and it is becoming apparent that we are unlikely to be able to manage your risk of Deep Vein Thrombosis or Pulmonary Embolus with either warfarin or Low Molecular Weight Heparin (Clexane). This is due to the fact that we cannot adequately monitor your blood and in the absence of scan results it is impossible to do so safely.

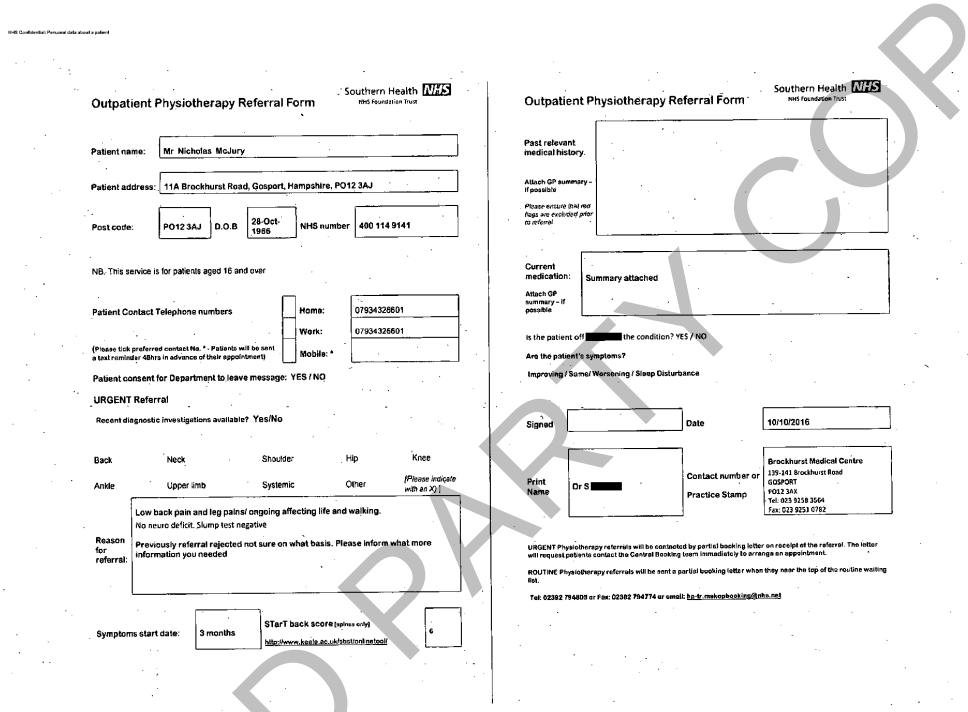

I am writing to you because I feel you are fully aware of the consequences of your actions and whilst we would be very happy to consider re-referral to ambulatory care the staff there are not willing to extend a further appointment at present as you have failed to attend another.

Yours sincerely

I am writing this letter re above named patient who is registered at our practice. He suffers from severe enduring mental health disorder and has been under the care of psychiatrists and GP's. He is on mood stabilisers that partially manage his symptoms. He is on a long term rehabilitation for drug and alcohol and has been clean for years.

Overall he is vulnerable adult and sudden change in circumstances and stress can act as a trigger to his relapse. He is actively participating in education and self improvement. I do not think he is ready to [redacted] the moment. I would appreciate if you could take his mental health problem and vulnerability into account while making decision on his ability to work. .

Yours sincerely

Dr S [redacted]

Dear [redacted]

Re: Mr Nicholas McJury. Date of birth: 30 Oct 1966
Care of Homeless Healthcare Team 30 Cranbury Avenue Southampton SO14 0LT
Patient phone number 07866 994476
NHS number: 400 114 5141

Further to our telephone conversation this morning I write to thank you for offering this gentleman an appointment tomorrow for scanning of both his legs to clarify his current status with regard to DVT. Nicholas has had an erratic history of anti-coagulation but assures me that he is no longer injecting heroin. He does smell of alcohol today and his breathalyser reading was 21.6g/dl.

Mr McJury's INR is 1.0 this morning (he would not permit an attempt at venesection and this was achieved via near patient testing) consistent with his history of LMWH dose over a week ago. We in fact only prescribed 2 pre-loaded syringes on 19th June so unless he has found another source I suspect he has not had any for over a month.

Best wishes

Nurse Consultant

Dear Mr McJury

Named GP for patients

You may be aware that all GP practices are required to provide all their patients with a named GP who will have overall responsibility for the care and support that our surgery provides to them.

As one of our patients, Dr [redacted] Boorman will be your named GP.

Dr Boorman will have overall responsibility for the care and support that our surgery provides to you. This does not prevent you from seeing any GP in the practice.

You do not need to take any further action, but if you have any questions, or wish to discuss this further with us, please contact our Registrations Department on 01278 795445.

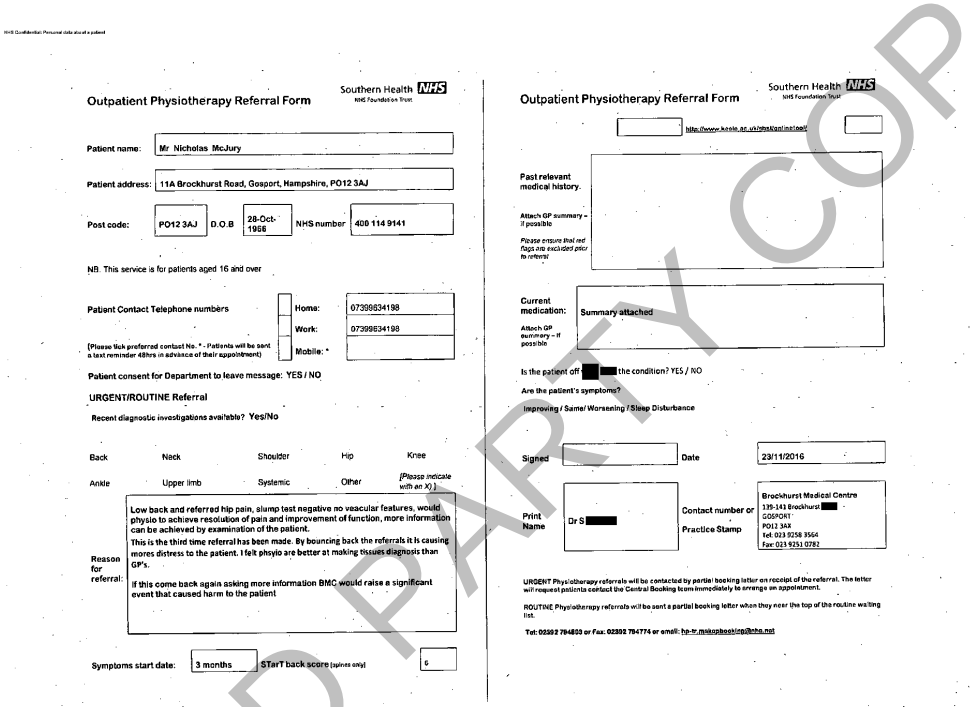

Kind Regards

Burnham & Berrow Medical Centre

Your health is our concern, but your responsibility.....

Work: 07399634198

Mobile: *

(Please tick preferred contact No. * - Patients will be sent a text reminder 48hrs in advance of their appointment)

Patient consent for Department to leave message: YES / NO

URGENT/ROUTINE Referral

Recent diagnostic investigations available? Yes/No

Back Neck Shoulder Hip Knee

Ankle Upper limb Systemic Other [Please indicate with an X]

Reason for referral:

Low back and referred hip pain, slump test negative no veacular features, would physio to achieve resolution of pain and improvement of function, more information can be achieved by examination of the patient.

This is the third time referral has been made. By bouncing back the referrals it is causing mores distress to the patient. I felt physio are better at making tissues diagnosis than GP's.

If this come back again asking more information BMC would raise a significant event that caused harm to the patient

Symptoms start date: 3 months STarT back score (spines only) 6

Dear Mr McJury

Your annual flu vaccination is now due
Flu vaccination provides the best protection against an unpredictable virus which infects many people and can cause serious illness and death each year.

Please phone 02392 583564 to book an appointment for your flu vaccination.

The vaccination is free and recommended yearly for those most at risk from flu.
This includes;

- children aged 2 to 16 years old on 31 August 2019*
- pregnant women
- anyone [redacted] a long term medical condition
- everyone aged 65 and over
- people with caring responsibilities

If there is someone you rely on to care for you, please ask them to contact their own GP Practice as they may be eligible for a free flu vaccination.

We look forward to seeing you soon.

Yours sincerely,

Brockhurst Medical Centre

For more information visit: www.nhs.uk/flujab

* Pre-school children aged 2 to 3 years will be vaccinated at their general practice. Children aged 4 to 10 years will usually be vaccinated at [redacted]

Please record the date and time of your vaccination appointment here and put it in an obvious place in your home.
Vaccination appointment: on: ____/____/____ at _____am/pm

Dear Mr McJury

You are receiving a regular supply of medication on a repeat prescription. You have not been seen by a Doctor recently for a review of your medication and the conditions that you take it for.

Please would you ring the surgery to make an appointment for a blood test in order to have a medication review before you need to make a further request for a repeat prescription.

Medication reviews play an important part in ensuring that your condition is managed optimally and give you the opportunity to discuss with your GP any problems you may be having with your medications.

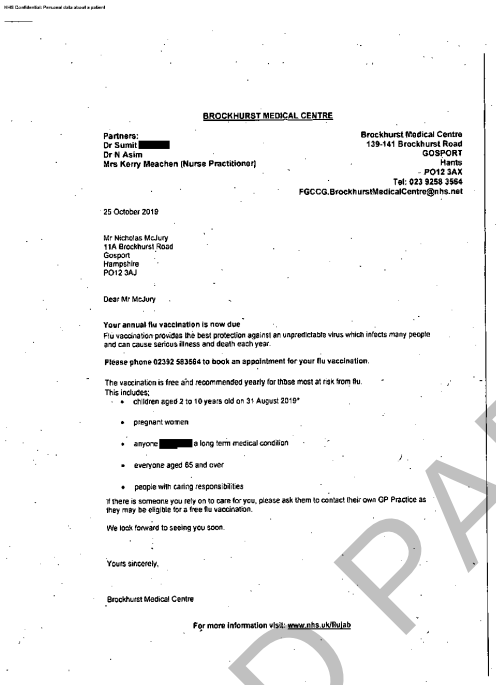

Many thanks

Yours sincerely

Dr [redacted]

Key Events During Admission

27/07/2016 - Returned to SGH with AKI secondary to Rhabdomyolysis and outstanding Left Buttock Cellulitis, which was continued to be treated with Co-amoxiclav 500/125 tds (after prior admission to ICU 09/07 with Haemofiltration, followed by admission to QAH on 19/07, during which Haemofiltration was not required as patient's condition improved)
Until discharge date today, patient's Renal Function Tests have steadily and continually improved, with Cr now in normal range and Urea only mildly elevated (8.1). And, throughout admission, pain was controlled with Paracetamol, Pregabalin and Tramadol (optimised to 50mg tds + 50mg bd prn to patient's satisfaction). Meanwhile, patient was monitored for any deterioration, while decisions were awaited from Adult Social Services / Parole Officer.

Investigations During Admission

None

Management Plan

Finish 12/52 course of ABX prescribed for initial insult of cellulitis
Continue with pain-control regime (including as required Tramadol)
Monitor coagulation status (as prior history of DVTs/PEs)

Allergies And Intolerances

1. nicotine, From:ePrescribing

Finish 12 week course of Co-amoxiclav
Continue with pain-control regime, as in hospital

Preventing blood clots after discharge
The risk of developing blood clots can persist for some weeks after discharge. There are certain signs to look out for that could mean that you have a blood clot. You should contact your doctor immediately if you develop any of the following symptoms while you are in hospital or after you go home.

- Leg pain
- Leg swelling
- Warm or discoloured skin on the legs
- Enlarged or more noticeable veins near the surface of the skin on your legs
- New onset shortness of breath
- Unexplained chest pain

Specialist Management: Acute Kidney Injury

Highest AKI stage recorded during admission	Stage 3
Medicines Reviewed	Yes
Medicines Review	No AKI related changes to regular medication
Follow Up U+Es including Creatinine and eGFR	Discharge team to review at 1 Day(s)
Advisory Notes	It is recommended that all patients who have had an AKI should have a follow up creatinine / eGFR after 6 months (or earlier if clinically indicated). Higher risk patients may need yearly follow up for two to three years after an AKI (NICE 2014). Patients who sustain an AKI are at risk of future hospital admissions and repeat AKI episodes. All AKI episodes should be recorded in the primary care record.

Key Events During Admission

Background - PE's 2011, DVT 2010- on rivaroxaban (but has ceased taking of own accord), ex IVDU (not used for 7 years), Chronic Hepatitis C. On probation.

Admitted via ED to UHS on 9/7/16 after waking up with pain and numbness involving Nicholas' left buttock and left leg, with associated loss of sensation and power. Nicholas reported generalised body aches and reduced urine output. Initial concerns regarding potential cauda equina due to reduced power in his left leg. However, on further examination, extensive erythema was noted over Nicholas' left buttock extending into his groin and thigh. AKI noted on initial bloods (Urea 26.6 and Creat 476) with a CK of 88865 and Nicholas was subsequently transferred to GICU for haemofiltration. Nicholas gave a history of injecting vitamins into his left buttock one day prior to his presentation, however there were concerns regarding a long lie in view of his history of previous drug use.

MRI Pelvis demonstrated extensive myonecrosis affecting the left gluteal component and suspicions of mycotic aneurysms.

Nicholas was initially difficult to manage on the filter and non-compliant, however he has now adjusted to the new regime well. He has been being filtered overnight with the filter coming down during the day, allowing him a little more freedom. His creatinine is slowly reducing and we have been offloading around 2-3litres of fluid a day via the filter. Nicholas is presently passing around 5-10mls of urine an hour and this has been static throughout his admission. He has a left IJ Vascath insiitu that was inserted on 10/7/16. Alternative IV access has proved difficult throughout his admission.

Nicholas has remained on a Heparin Infusion throughout his admission in view of his previous extensive thromboembolic disease (DVT's and PE).

Whilst on the unit Nicholas has been reviewed by the orthopaedic team who have advised that no surgical intervention or further imaging is presently required. The orthopaedic consultant overseeing his care here (Mr [redacted] has handed over his care to Group Captain Sherry (Consultant Plastic Surgeon) for on-going input.

Nicholas has been commenced on IV Tazocin (4.5g TDS) and IV Clindamycin (1200mg TDS) on 10/7/15 (today being day 9). On advice of the microbiologists he is to complete a total of 12 weeks antibiotic therapy with at least 2 weeks of IV therapy, before stepping down to oral co-amoxiclav if there is evidence of clinical improvement.

Investigations During Admission

ECG
sinus rhythm
MRI Spine Lumbar/Sacral
See attached reports

Management Plan

1. Transfer under the care of the renal team for haemofiltration
2. Ongoing ortho/plastics input
3. Presently remains on a heparin infusion in view of history of DVT'ws
4. Complete a total of 12 weeks antibiotic therapy
5. Continue IV heparin infusion as necessary.

No drugs on discharge

Allergies And Intolerances

Preventing blood clots after discharge
The risk of developing blood clots can persist for some weeks after discharge. There are certain signs to look out for that could mean that you have a blood clot. You should contact your doctor immediately if you develop any of the following symptoms while you are in hospital or after you go home.

- Leg pain
- Leg swelling
- Warm or discoloured skin on the legs
- Enlarged or more noticeable veins near the surface of the skin on your legs
- New onset shortness of breath
- Unexplained chest pain
- Coughing up blood

General Consent Form

Service User Nicholas Dominica Dominica McJury
Date of Birth 1966-10-28
Service Somewhere House

The reason we ask for sharing of information about yourself is so that you can receive proper care/support from our service. In order to do this effectively, we may need to shar some information about you with others involved in your care. As you may be receiving services from more than one agency we need your permission to disclose information if order for you to receive the best possible service. We will not disclose any information about you without your consent, unless we have a duty to do so in preventing harm to somebody else, to protect you, any current child abuse, money laundering and terrorism.

We also have a requirement to audit the information on all our clients for the government this is a national data system which monitors all clients engaged in services. The serv we adhere to is called NDTMS this information is a secure website that provides the government with outcomes of treatment. The information that they hold is used for statistic reasons to help with funding in the future.

You do not have to consent to share information, but by not doing so, it may be difficult to provide the service you require. We keep a written record of the information you have given us, [redacted] details of the care/support we have given you. If you wish to see this you may, please ask your addiction worker we will withhold any information that a third party written unless they have given consent to read.

We will only store information in accordance with the data protection act 1998.

We may use information where you cannot be identified to help manage and plan our service and to check our work to make sure we are providing good quality care.

Declaration

I Consent to the use of personal information about me for the above purposes.

Statement of Fitness for Work
For social security or Statutory Sick Pay

Patient's name: ~~Mr, Mrs, Miss, Ms~~ Nicholas Dominica McJury

I assessed your case on: 01 / 07 / 2016

and, because of the following condition(s): MAlcohol rehabilitation

I advise you that:
- [X] you are not fit for work.
- [ ] ~~you may be fit for work taking account of the following advice:~~

If available, and with your employer's agreement, you may benefit from:
- [ ] ~~a phased return to work~~
- [ ] ~~amended duties~~
- [ ] ~~altered hours~~
- [ ] ~~workplace adaptations~~

Comments, including functional effects of your condition(s):

This will be the case for

or from 01 / 07 / 2016 to 24 / 09 / 2016

I ~~will~~will not need to assess your fitness for work again at the end of this period.
(Please delete as applicable)

Doctor's signature

Date of statement: 01 / 07 / 2016

Doctor's address:
BURNHAM AND BERROW MEDICAL CENTRE
Love [redacted]
Burnham-On-Sea, TA8 1EU
Telephone: 01278795445

Unique ID: Med 3 04/10- 32FF5E18-3A18-42D7-8060-FFF49091E45

For the patient – what to do now

Please [redacted] the notes below then fill in your details and, if you are claiming social security benefits, sign and date the declaration. If you cannot fill in your details yourself, ask someone else to do it for you.

What your doctor's advice means

Not fit for work:
Your doctor will advise this when they believe that your health condition means you should refrain from work for the stated period of time.

May be fit for work taking account of the following advice:
Your doctor will recommend this when they believe that you may be able to return to [redacted] some support from your employer. Sometimes it may not be possible for your employer to act on the doctor's advice and you will not be able to return to work until you have furth recovered. You do not need to get a further Statement from your doctor to confirm this.

If you are employed
If you are not fit for work, or your employer cannot support your return to work, your employer should consider paying Statutory Sick Pay (SSP) based on the information provided If SSP cannot be paid, or your SSP is ending, your employer will give you form SSP1 to claim social security benefits. If you are self-employed, you may be able to claim social security benefits because of your health condition.

Social security benefit claimants
If you are claiming social security benefits because of your health condition, send this form t your Jobcentre Plus office. If you are claiming social security benefits for any other reason, you should contact a Personal Adviser to discuss the advice on the form. If you do any work you must inform Jobcentre Plus of your change of circumstances.

If you want to make a new claim to social security benefits you can:
- download a claim form at www.direct.gov.uk/benefits, or
- phone 0800 055 6688 (8am to 6pm Monday to Friday). Textphone users call 0800 023 4888.

Dear Mr McJury

Named GP for patients

You may be aware that all GP practices are required to provide all their patients with a named GP who will have overall responsibility for the care and support that our surgery provides to them.

As one of our patients, Dr [redacted] Boorman will be your named GP.

Dr Boorman will have overall responsibility for the care and support that our surgery provides to you. This does not prevent you from seeing any GP in the practice.

You do not need to take any further action, but if you have any questions, or wish to discuss this further with us, please contact our Registrations Department on 01278 795445.

Kind Regards

Burnham & Berrow Medical Centre

Your health is our concern, but your responsibility.....

Key Events During Admission

Mr. McJury was admitted having absconded having been investigated recently and found to have bilateral above knee deep vein thrombosis and intermediate probability V/Q scan on the previous admission. On examination, there were some decreased air entry at the right base with productive cough and in addition to therapeutic Clexane and Warfarin, Mr. McJury was commenced on Co-amoxiclav.

Mr. McJury made a good recovery from the chest infection and continued warfarin loading. Mr. McJury has reported that he is commited to attending his local health centre for daily Warfarin, regular INR monitoring as well as for methadone (currently taking 60mg each morning and 10mg PRN if required). Once the INR was therapeutic, Mr. McJury was deemed safe for discharge.

Management Plan, Recommendation & Self Care Instructions

Home to continue warfarin for six months - this has been discussed at length wit Mr. McJury and he is commited to regular warfarin and monitoring. Methadone replacement and gradual weaning. This is to take place at New Road and Southampton Homeless Healthcare Centres as discussed with Pam [redacted] Senior Nurse.

Key Events During Admission

- Mr McJury was admitted via the Emergency Department with chest pain a shortness of breath for investigation of a possible pulmonary embolism.
- Admitted in [redacted] custody after an arrest for shoplifting. Developed left si chest pain described as a dull ache radiating to his back along with shortne of breath and a cough without sputum or haemoptysis. Background of previous PE/DVT and was on warfarin but stopped 2-3 weeks prior. Had earlier consumed 5 cans of strong lager and an unknown quantity of an unknown substance for pain relief.
- Admission bloods showed WCC=6.4, Hb=122 and INR=1.1 (subtherapeutic). An initial troponin was negative, and a urine dip was NA Mr McJury was tender around his left posterior chest wall without bruising Calves were firm with scars and damage from IVDU.

Given Mr McJury's previous history there would be no therapeutic benefit of a CTPA. We have discussed rivaroxiban as a therapy and he his happy with this as this will not require regular blood monitoring. He will

Thromboprophylaxis Advice

The risk of developing blood clots can persist for some weeks after discharge. There are certain signs to look out for that could mean that you have a blood clot. You should contact your doctor immediately if you develop any of the following symptoms while you are in hospital or after you go home.

- Leg pain
- Leg swelling
- Warm or discoloured skin on the legs
- Enlarged or more noticeable veins near the surface of the skin on your legs
- New onset shortness of breath
- Unexplained chest pain

4. HOW WE USE YOUR INFORMATION

The information you have provided will be used by NHS Scotland to carry out its various functions and services including scheduling appointments, ordering tests, hospital referrals and sending correspondence.

Your information, including your name, gender, date of birth and address, will be passed to NHS National Services Scotland where it will be held on the Community Health Index (CHI). This information is used to register you with the GP Practice, transfer your medical records between GP practices in the UK, make payments to GP Practices for medical services provided, and to process and issue medical exemption certificates and entitlement cards.

NHS National Services Scotland shares information about you within NHSScotland to assist in the provision and improvement of NHS services and the health of the public. When we do this, we do it as described by NHS Scotland in the NHS Inform website under the "How the NHS handles your personal health information" section.

NHS Scotland is made up of various organisations such as NHS Health Boards, GP practices, the Scottish Ambulance Service or NHS National Services Scotland (the common name of the Common Services Agency for the Scottish Health Service). These organisations are individually responsible for your personal health information. In terms of data protection and privacy laws, they are known as 'data controllers'.

Find out more about NHS Scotland in the link provided above.

5. PATIENT DECLARATION

I declare that the information I have given on this form is correct and complete. I understand that, if it is not, appropriate action may be taken. To enable NHS National Services Scotland to confirm my eligibility to lawfully register with a GP and for the purposes of prevention, detection, and investigation of crime, the minimum necessary information from this form could be disclosed to relevant authorities.

I understand that more comprehensive information about how NHS Scotland handles my data is available from NHS Inform.

This information can be provided in other languages and formats on request. The NHS inform helpline provides an interpreting service.

Patient/Patient's representative signature X M. McGurk Date 25-3-25

Representative's name (if applicable) martha allison

NHS Register with a GP Surgery

PRF1

How to register with a GP surgery

To register yourself or someone else with a GP surgery, fill in this form and give it to the surgery you want to register with.

You should:

- use a 'tick' or 'x' for boxes where necessary
- complete all sections that apply to you or the person you are registering
- provide as much information as possible
- use BLOCK CAPITALS
- if you cannot answer a question or it does not apply write 'Not applicable' or 'N/A'
- only use black or blue ink
- ask at the reception desk of the surgery you want to register with if you need help completing this form

Which sections should be completed?

- Part A - all sections that apply.
- Part B - this section is optional, but will help the GP provide the best care.
- Part C - only complete these sections if you do not normally [redacted] the UK.

You may be contacted by the GP surgery if you do not complete all the relevant sections.

Register online
It is quick and secure to register with a new GP surgery online. Check the website of the surgery you want to register with for a link for the 'Register to a GP surgery' service.

PART A

Try to provide as much information as possible. If a question does not apply to you or the person you are registering write 'Not applicable' or 'N/A'.

Section 1 - Who is registering?

1 **Are you registering**

☑ Yourself (Go to Section 2 - Patient details) ☐ Someone else

Only provide your details if you are registering someone else.

2 **Your name**
NICHOLAS McJURY

3 **Your relationship to the person you are registering**

4 **Your contact phone number**
07350630457

You can help save lives as a blood or organ donor. Become someone's lifeline.

NHS Confidential: Personal data about a patient

Section 3 - Patients under 18 years

For children under 12 months only

1 **Where were they born?**

☐ England ☐ Northern Ireland ☐ Wales
☐ Isle of Man ☐ Scotland ☐ Outside the UK

2 **Where was the [redacted] living when the [redacted] was born?**

Postcode

For patients under 18 years

1 **Do you attend any of the following?**

☐ [redacted] ☐ Nursery ☐ Home [redacted]
☐ None of these

2 **Address**

Postcode

3 **Are any of these involved in your care?**

☐ Hospital specialist ☐ Health worker
☐ [redacted] ☐ None of these

4 **Have you had all your routine vaccinations?**

☐ Yes ☐ No ☐ Don't know

5 **Did you get your routine vaccinations in the UK?**

☐ Yes ☐ No ☐ Don't know

Section 4 - Additional information

1 **What is your ethnic group?**

Choose one section from A to E, then tick one box to best describe your ethnic group or background.

(A) White

☑ English, Welsh, Scottish, Northern Irish or British
☐ Irish ☐ Gypsy or Irish Traveller

Any other White background

(B) Mixed or multiple ethnic groups

☐ White and Black Caribbean
☐ White and Black African
☐ White and Asian

Any other Mixed or Multiple ethnic background

(C) Asian or Asian British

☐ Indian ☐ Pakistani ☐ Bangladeshi
☐ Chinese

Any other Asian background

(D) Black/African/Caribbean/British

☐ African ☐ Caribbean

Any other Black, African or Caribbean background

(E) Other ethnic group

☐ Arab

Any other ethnic group

☐ Prefer not to say

Section 4 - Additional information

2 Have you registered with a UK GP before?

☐ Yes ☐ No

3 If you have moved to the UK, what date did you arrive?

☐☐ ☐☐ ☐☐☐☐

4 Have you ever served in the UK Armed Forces or were you ever registered with a Ministry of Defence GP in the UK or overseas?

☐ Yes ☐ No ☐ Prefer not to say

If you were given a FMED133A form (sometimes called an FMED1 form) when you left the UK Armed forces, you should give this to your GP surgery.

5 Do you need an interpreter for your appointments?

☐ Yes ☐ No

6 What language?

☐

☐ British Sign Language (BSL)

7 Are you a carer?

☐ Yes ☐ No

8 What is your relationship to the person you are caring for?

☐

9 What type of [redacted] are you?

☐ Young [redacted] under 18 ☐ Paid as a job

☐ Unpaid, but may get benefits ☐ [redacted]

10 Do you have a [redacted]

☐ Yes ☐ No

11 What is your relationship to your [redacted]

☐

12 What type of [redacted] are they?

☐ Young [redacted] under 18 ☐ Paid as a job

☐ Unpaid, but may get benefits ☐ [redacted]

13 Carer's contact telephone number

☐☐☐☐☐☐☐☐☐☐☐☐☐☐

14 What pharmacy do you want your prescriptions sent to?

Pharmacy address

☐

Postcode

You can sometimes collect your prescription items from your GP surgery instead of having to go to a pharmacy. Your surgery may discuss this with you

15 Do you live more than 1 mile from your nearest pharmacy?

☐ Yes ☐ No

16 Would you have serious difficulty getting medicines or appliances from your nearest pharmacy?

☐ Yes ☐ No

Do you want important information from your GP record to be available to other health and care professionals?

Your GP surgery needs permission to share important information from your GP record. This is called a Summary Care Record (SCR). Your SCR can only be shared with health and care staff across England who are providing you with direct care. It gives them access to vital information from your GP record.

☐ **Yes, share a Summary Care Record with additional information**
Includes details of your medicines, allergies, adverse reactions and additional information, which includes details of any significant illnesses and health problems, operations and vaccinations

☐ **Yes, share a Summary Care Record without additional information**
Includes details of your medicines, allergies and adverse reactions only

☐ **No, do not share a Summary Care Record**
Details of your medicines, allergies, adverse reactions and any additional information will not be shared with anyone involved in your direct care

NHS Confidential / Personal data about a patient

PART B

You do not have to complete this section. But any information you do give will help the GP give you the best care.

Section 5 - Patient health

1 **Have you ever had any of these conditions?**

- ☐ Alzheimer's disease or dementia
- ☐ Asthma ☐ Cancer ☐ Diabetes
- ☐ Epilepsy ☐ Heart disease
- ☐ High blood pressure (hypertension)
- ☐ Stroke ☐ Thyroid disease

2 **What best describes you?**

- ☐ I smoke ☑ I used to smoke
- ☐ I have never smoked ☐ Prefer not to say

3 **On average, how many cigarettes do you smoke a day?**

4 **What date did you stop smoking?** DD MM YYYY

5 **How often do you drink alcohol?**

- ☑ Never ☐ Monthly or less
- ☐ 2 to 4 times a month ☐ 2 to 3 times a week
- ☐ 4 or more times a week ☐ Prefer not to say

6 **How many units of alcohol do you drink on a typical day when you are drinking?**

1 pint of 4% beer is 2.5 units. a small 125ml glass of wine is 1.5 units and a 25ml shot of spirits is 1 unit.

Units

7 **How often have you had six or more units of alcohol on a single occasion in the last year?**

- ☐ Never ☐ Less than monthly
- ☐ Monthly ☐ Weekly ☐ Daily or almost
- ☐ Prefer not to say

8 **What is your weight?**

Kilograms Or Stone Pounds

9 **What is your height?**

Centimetres Or Foot Inches

10 **Allergies**

11 **Mental health conditions**

PART C

Section 6 - Patients from abroad

Complete this section if you are:

- visiting the UK and do not normally live here.
- currently [redacted] the UK, but do not think of it as your permanent country of residence. For example, you are studying here or have come to the UK as part of your job.
- a permanent resident in the UK and receive a pension or benefit from a European country.

Information on eligibility to free care outside the GP practice

Anyone can register with a GP practice and receive free medical care from that practice. However, should you be referred for treatment outside the practice or need unplanned care, for example at a hospital, charges may apply if you are a visitor or temporary resident.

Some groups of visitors or temporary residents are eligible to receive this care free of charge. Documentation may be required to demonstrate eligibility.

Examples of those eligible include:

- refugees, asylum seekers, those receiving certain forms of state support
- suspected or confirmed victims of modern slavery and human trafficking
- temporary residents with a valid visa of over 6 months. You may have paid the immigration health surcharge with your visa application. Note that assisted conception services remain chargeable to this group
- visitors from the EEA will need to provide their EHIC (European Health Insurance Card), which covers immediately necessary unplanned treatment, or a S2 form which covers planned treatment.

Additionally, some services are free of charge to all visitors, including diagnosis and treatment for infectious diseases and sexually transmitted infections.

Immediate necessary care, maternity care and other urgent care that cannot wait until a chargeable visitor's departure from the UK will not be withheld or delayed due to charges. But non-urgent treatment will not be given until full payment is received.

More information can be found in the patient leaflet available from the GP practice.

Select the statement that applies to you

☐ I understand I may have to pay for NHS treatment outside of the GP practice.

☐ I do not have to pay for NHS treatment outside of the GP practice and have documents to prove this.

☐ I do not know if I have to pay for treatment.

THIRD PARTY COPY

NHS Confidential: Personal data about a patient

PART C

Section 6 - Patients from abroad (continued)

Giving us this information means that if you need NHS care outside the GP practice and you are entitled to that care without charge, it will be easier for you to demonstrate this entitlement.

We'll use the information to establish your chargeable status in order to recover NHS costs from countries responsible for your healthcare where applicable. This will not impact your entitlement to register with the GP practice or to receive free GP services.

1 Tick one of the following

- ☐ I have an S1 form issued by an EU or EEA member state
- ☐ I am entitled to an EHIC card, but I do not have one
- ☐ I have an EHIC card issued by an EU or EEA member state
- ☐ I am in receipt of a European pension or benefit
- ☐ I am in the UK as part of my employment
- ☐ None of these

Enter details from your EHIC

1	Country code	5	Personal identification number
2	Name	6	Identification number of the institution
3	Given name	7	Identification number of the card
4	Date of birth DD MM YYYY	8	Expiry date DD MM YYYY

How will your EHIC and S1 data be used?

By using your EHIC for NHS treatment costs your EHIC data and GP appointment data will be shared with NHS secondary care (hospitals) and NHS Digital solely for the purposes of cost recovery. Your clinical data will not be shared in the cost recovery process. Your EHIC or S1 information will be shared with Business Service Authority for the purpose of recovering your NHS costs from your home country.

SO14 1LT

Dear Dr Ah-Moye

MR NICHOLAS MCJURY, 182 Golden Grove, Southampton, United Kingdom. SO14 1PW
DOB: 28/10/1966, Hospital Number: 3513616, NHS Number: 400 114 9141

Diagnosis: Right midshaft ulna undisplaced fracture.

Plan: For below elbow cast upon patient's request and review in three weeks' time.

I reviewed this gentleman today who is three weeks down the line following an injury to his right ulnar, which was treated in a backslab.

Today we removed the cast and obtained a new radiograph, which showed some callus around the fracture site, with similar position to the previous one.

I understand that Nicholas is on methadone and a few other drugs. I can see that his arm is not massively swollen today and he had intact neurovascular bundle.

I advised him today that we should apply a sugar-tong cast to avoid any rotation in his forearm and to improve the fracture healing, but he insisted that he did not want this and that it was his body and his choice and that he was not willing to go for anything above the elbow. Therefore the only thing he was willing to accept was a below elbow cast.

We had a long discussion about risks and benefits for each option and I explained to him that we have the option of doing nothing, although this will mean that the fracture will likely displace and he will require surgery. Having a below-elbow cast is not ideal in this situation and it will allow rotation around the fracture site and there is a high chance of fracture displacement that might require surgical intervention, with all of the complications that accompany surgical intervention. The recommended option was a sugar-tong type cast which he clearly refused and did not want as an option at all.

In light of this long discussion and explaining his options to him, he did not want to follow our advice and wanted to proceed with a below elbow cast. We agreed to offer this and see him again in three weeks' time to check on the fracture position.

MR NICHOLAS MCJURY, Two Saints Day Centre, 30 Cranbury Avenue, Southampton, Hampshire. SO14 0LT
DOB: 28/10/1966, Hospital Number: 3513616, NHS Number: 400 114 9141

Diagnosis: K wire fixation fracture dislocation base right 5th metacarpal 3 weeks ago

Present state

This gentleman is still in his heavy post op dressing, he is comfortable with these in situ, he was able to demonstrate good range of movement of the MP joint PIP joint within the constraints of the heavy bulky dressing. He reports normal sensation in the hand.

Following discussion with Mr [redacted] Registrar it was felt that this is best to stay with the heavy dressings in situ and recall this gentleman in 2 weeks time for reduced dressings, removal of K wire and mobilisation to begin.

Yours sincerely

Dear Mr Mcjury

MR NICHOLAS MCJURY, Two Saints Day Centre, 30 Cranbury Avenue, Southampton, Hampshire. SO14 0LT
DOB: 28/10/1966, Hospital Number: 3513616, NHS Number: 400 114 9141

GP Action: Nil.

Diagnosis: Right forearm fracture.

DNA clinical appointment.

Plan: One week fracture clinic follow-up.

You were due to be seen in the fracture clinic for a follow-up, where we were aiming to review the fracture to your right forearm and arrange for a change of your plaster.

Unfortunately you did not attend this clinical appointment. I did try contacting you via your mobile number but unfortunately there was no answer.

I have arranged a further fracture clinic appointment in one week, as it is pivotal that we ensure the fracture is not displacing. If these fractures do displace, there is a high chance they will go on to need surgical management.

Please do let us know if there is a reason why you cannot attend this appointment and we will try to make alternative arrangements.

Kindest regards

Yours sincerely

Unfortunately you did not attend your clinic appointment for the second time. I hope that you are well.

I am concerned with your fracture in your right forearm. We need to ensure the fracture has not displaced, otherwise this will need to be treated with an operation.

We are requesting another clinic appointment for you and we would be grateful if you could please attend this.

If for any reason you cannot attend, please kindly call the above phone number to advise us.

Best wishes

Yours sincerely

Dear Dr Ah-Moye

MR NICHOLAS MCJURY, 182 Golden Grove, Southampton, United Kingdom. SO14 1PW
DOB: 28/10/1966, Hospital Number: 3513616, NHS Number: 400 114 9141

Diagnosis: Right midshaft ulna undisplaced fracture.

Plan: For below elbow cast upon patient's request and review in three weeks' time.

I reviewed this gentleman today who is three weeks down the line following an injury to his right ulnar, which was treated in a backslab.

Today we removed the cast and obtained a new radiograph, which showed some callus around the fracture site, with similar position to the previous one.

I understand that Nicholas is on methadone and a few other drugs. I can see that his arm is not massively swollen today and he had intact neurovascular bundle.

I advised him today that we should apply a sugar-tong cast to avoid any rotation in his forearm and to improve the fracture healing, but he insisted that he did not want this and that it was his body and his choice and that he was not willing to go for anything above the elbow. Therefore the only thing he was willing to accept was a below elbow cast.

We had a long discussion about risks and benefits for each option and I explained to him that we have the option of doing nothing, although this will mean that the fracture will likely displace and he will require surgery. Having a below-elbow cast is not ideal in this situation and it will allow rotation around the fracture site and there is a high chance of fracture displacement that might require surgical intervention, with all of the complications that accompany surgical intervention. The recommended option was a sugar-tong type cast which he clearly refused and did not want as an option at all.

In light of this long discussion and explaining his options to him, he did not want to follow our advice and wanted to proceed with a below elbow cast. We agreed to offer this and see him again in three weeks' time to check on the fracture position.

I understand that he is going back to Scotland in ten days and in that case we would be happy for him to cancel his follow-up but we have arranged this as a safety measure for 27/02/2023.

Yours sincerely

DOB: 28/10/1966, Hospital Number: 3513616, NHS Number: 400 114 9141

WARD ROUND 10 July 2016 WARD GICU

Diagnosis: Buttock (left cellulitis)

Plan: No immediate orthopaedic intervention needed

Mr McJury is 49-years-old and is under the care of the Medical Team at present. He gives a history of injecting vitamins into his buttock one day ago. However there is a history of drugs in the past that I am told and also a possible long lie on his buttock. His CK is significantly high.

On examination there are no concerns I have about necrotising fasciitis. Mr McJury says that initially he had significant numbness but now he is able to fully weight bear without any support and he says that his numbness has resolved significantly. There is no indication at present for any surgical intervention but of course please do let us know if the situation changes.

Kindest regards

Yours sincerely

About your patient

Full Name Mr Nicholas Mcjury

NINo NM502185B

Date of birth 28th October 1966

Address
Flat 1/2, 820, Govan Road, Glasgow, G51 3UP

Dear Doctor,

If you or someone in your directly employed team has issued a fit note for the above patient, please arrange for that person to complete this form.

Your patient is being assessed for Universal Credit and we need to find out whether they are able to do any work. By completing this form and providing factual information you will help our Healthcare Professional staff decide whether your patient needs a work capability assessment and if so support that assessment.

Please note
- General Practices have a **contractual obligation** to provide the information requested without charge.
- The form should be completed from your medical records. A separate examination is not necessary.
- Your patient has given consent to allow us to approach you for this information in accordance with GMC guidelines.
- An online version of this report which can be completed electronically and printed is available at www.gov.uk/government/publications/esa113-interactive-for-use-by-healthcare-practitioners
- **A fully completed form may help inform the work capability assessment or may mean that your patient will not need a further assessment. It will also help us to make a more informed decision on benefit entitlement.**

COMPUTER PRINTOUTS

You can send us a computer printout of the appropriate part of the patient record if you wish, but you will still have to complete any sections of the form where the answer is not clear from the printout. We are only able to accept information directly relevant to our enquiries. If a printout is available please make sure it includes the following:
- Active problems;
- Current medication with last prescribed date;
- Details of the last three consultations. Please remove any third party data.

P3055485/001170/1/2

If you have any queries about this form please phone the number above. If you would like to discuss anything with our Healthcare Professional staff, please phone the number above and ask for a member of the Healthcare Professional staff on the customer service desk. If there is any medical evidence that you think would be harmful to your patient's health, please give us this information on a separate sheet of paper so that it can be withheld.

Please reply within 5 working days. A business reply envelope is enclosed for your use.
Thank you for your help.
Yours sincerely

Clinical Comments:	Dear Doctor, Nicholas McJury was admitted to the QEUH on the 31/7/20 due to possible seizures in the community. He was noted to have collapsed at home following taking pregabalin and street Valium. Initially with a reduced GCS he was taken by the SAS to hospital. Upon arrival it was felt he possibly had a LRTI and a collapse secondary to drug misuse. He then proceeded to, against medical advice, sign himself out of hospital. He had the capacity to make this decision. Many thanks for your ongoing care ARDH

Dear Colleague,

Re: Nicholas McJury DOB: 28/10/1966 CHI: 2810666490
Address: Flat 1/2 820 Govan Road, Glasgow, G51 3UP

ADRS Care Manager	[redacted]

This patient continues to attend the Alcohol and Drug Recovery Service and I reviewed them on 15th August 2025.

Drug Use: MAT PRESCRIBING REVIEW

Attended for review, seen by care manager Tricia [redacted] & writer.Nicholas presented very well, no evidence of intoxication.Currently prescribed 20mg espranor daily & reports no further illicit drug use since NFOD July 2025. Nicholas reports that this had been an isolated incident & he had taken 6 locally sourced benzodiazepine tablets in conjunction with pregablin. Recognises social stressors as trigger to illicit use & reports that this had given him a fright & has no plans for any further use. Harm reduction advice given & aware of risks of return to illicit drug use. Happy on current dose at present an has no plans to make any changes at this time. Positive for opiates - taking over the counter 8/500 co-codamol for pain relief (within advised limits). Discussed efficacy of this in relation to espranor prescription, however does plan to attend GP to discuss analgesia. No changes suggested to pharmacy supervision - remain on 3 x weekly at present.A[redacted] RAG.
Alcohol Use: No alcohol use reported.
Physical Health: Registered with GP.Prescribed medications: rivaroxaban.Reports chronic pain in hips/legs following parasitic infection approx 10 years ago. Was previously prescribed pregablin for same however was taken off medication whilst in prison.

ECG 30.7.25 - QTc 431ms.

Last DBST 20.3.25 - negative. Aware of transmission routes & denies any risk factors. Appetite & sleep pattern ok.
Mental Health: Mood appears bright and reactive. No suicidal ideation or thoughts of self harm. Reports no concerns with mental health at present.

THIRD PARTY COPY

NHS Confidential: Personal data about a patient

Contact with Children: No contact with children.
Legal: On licence until next year.Nil else outstanding. DVLA - non-driver
Social: [redacted] in her tenancy. Regular contact with family. Linking in with local recovery community.
Care and Treatment Plan:

1. Espranor maintenance regime

2. Nicholas to remain illicit drug free

3. Continued engagement with care manager

4. GP re: physical health

5. Recovery community supports.

Drug screening test Urine dip / cup
Urine methadone positive • Urine buprenorphine negative • Urine cocaine negative • Urine amphetamine negative • Urine benzodiazepine negative • Urine opiate positive • Urine cannabinoid negative • Urine gabapentin negative • Urine pregablin negative

Please add or update the above ADRS prescribed medication(s) to your practice record as medication prescribed by specialist services.

Yours sincerely

Dr. M [redacted]
Yellow Practice
Govan Health Centre
5 Drumoyne Road
Glasgow
G51 4BJ

Dear Dr. M [redacted]

Nicholas Dominica McJury; D.O.B: 28/10/1966; CHI: 2810666490
FLAT 1/2, 820 GOVAN ROAD, Glasgow, Lanarkshire, G51 3UP

Admission: Specialty - General Medicine; Ward - QEUH Ward 6A Short Stay
Consultant - Dr Petros Karsaliakos; Date of Admission - 30/08/2025
Date of Discharge - 05/09/2025; Discharged to - Private Residence - no additional detail added

Clinical Comments:
FDL for the IDL of the 5th September 2025

I have reviewed the IDL and the contents are accurate. There is a chest x-ray in 6 weeks' time and a CT thorax in 2 months' time pending for this gentleman in the community.

Yours sincerely,

Petros Karsaliakos

Consultant General Medicine

Electronically Signed: Dr Petros Karsaliakos, Consultant

cc.

History of presenting complaint
Presenting complaint

Description: irregular nodule righ tlung

Comment: Many thanks for seeing this 56 year old man who had a CT thorax in Southampton in January following an assault. This showed widespread emphysematous changes and an irregular 11mm nodule in the right lower lobe, further review was recommended. He ha s now moved back to Glasgow. He has a significant past medical history including PE and opiate misuse

Gastroenterology
Secretary - 0141 451 6144
[redacted]

Dear Dr. M [redacted]

Nicholas Dominica McJury; D.O.B: 28 Oct 1966; CHI: 2810666490
FLAT 1/2, 820 GOVAN ROAD, Glasgow, Lanarkshire, G51 3UP

Attendance: Specialty - Gastroenterology; Clinic - SUSDGA801D-DR [redacted] LIVER THURSDAY PM
PLEASE DO NOT OVERBOOK UNLESS AUTHORISED BY CONSULTANT OR SECRETARY
Date and Time of Appointment - 25/06/2026 15:30

Follow Up: One week - 02/07/2026 (face-to-face consultation)

Clinical Comments:

Diagnosis:
1. Possible liver decompensation
2. Previous hepatitis C, treated in Southampton fourteen years ago - apparently fibroscan at the time was normal and the patient has been told he does not have cirrhosis
3. Previous DVTs - on long-term Rivaroxaban
4. Previous polysubstance use until recently

Thank you for referring this patient who I saw at Clinic today. He has gross pitting oedema to his lower back as well as in his right arm. I'm aware of his problem with previous DVTs and wondered whether this is the cause of the unilateral arm swelling. He says it's been present for a couple of weeks but on closer questioning, he says he lies on his right-hand side most of the time and I think it is probably dependent oedema from this. Clinically he did have ascites and I would be grateful if he could be started on Spironolactone, 200 mg once a day and Frusemide, 80 mg once a day.

THIRD PARTY COPY

NHS Confidential: Personal data about a patient

I managed to get bloods from his left arm and depending on the results of these, will decide whether he needs to be admitted to hospital. Otherwise, I will review him again at Clinic in one week's time to see the response to diuretics and repeat his blood tests.

It's not definite that he has decompensated liver disease as he tells me that when he was being treated for hepatitis C fourteen years ago in Southampton, he had a fibroscan and apparently it was normal with no evidence of cirrhosis (hepatitis C dry blood test PCR was negative in March 2025 and hepatitis B was also negative).

I'm arranging an urgent abdominal ultrasound to take place.

Yours sincerely

SHOUREN [redacted]

CONSULTANT GASTROENTEROLOGIST AND HEPATOLOGIST

PLEASE DO NOT OVERBOOK UNLESS AUTHORISED BY CONSULTANT OR SECRETARY
Date and Time of Appointment - 02/07/2026 15:00

Follow Up: 5 weeks - 06/08/2026 (face-to-face consultation)

Clinical Comments:
Diagnosis:
1. Possible cirrhosis
2. Gross oedema
3. Previous successful treatment of hepatitis C

This patient was due to attend Clinic today to have his bloods updated having started on diuretics last week. Unfortunately he didn't attend. Given I was concerned about him, I called him and he said he'd injured his ankle and tried to phone to cancel the appointment. He says he has actually not picked up his diuretics and I therefore asked him to do this.

Unfortunately I am on holiday for the next two weeks but I will ask our nurse specialist to update his bloods in a couple of weeks' time to monitor his renal function and I'll see him again in five weeks' time. Perhaps surprisingly, his liver function, kidney function and urinary protein were completely normal when checked last week. His full blood count was clotted but his coagulation screen was normal other than a slightly raised prothrombin time of 15 seconds.

Yours sincerely

CLINICAL INFORMATION

History of presenting complaint
Presenting complaint

Description: ?cirrhotic liver disease ?beginning to decompensate

Comment: Dear Team

This gentleman presents in a rather unusual situation in that he informs me it is universally impossible to obtain blood samples and has been for decades other than via using central venous access.

He presents today with a 2 month deterioration in his general wellbeing alongside the new development of puffy hands, face and increasing chronic lower limb oedema.

On examination I suspect he is ascitic.

He looks pale.

There is a history of polysubstance use ongoing until relatively recently. I understand there is a history of hepatitis C with evidence of clearance (I do not know if this was spontaneous or following treatment) but it does not appear to me that there has been any form of assessment of his liver either by USS or Fibroscan at any point.

My suspicion here is that he has undiagnosed cirrhotic liver disease and is in the early stages of decompensation.

I appreciate it is highly unusual for such a referral to be made without blood test results but I am unsure what else to do other than to ask that he be seen at your clinic as soon as is practicable.

Many thanks
Bob [redacted]
GP [redacted]

Statement of Fitness for Work
For social security or Statutory Sick Pay

Patient's name Mr, ~~Mrs, Miss, Ms~~ Nicholas Dominica McJury

I assessed your case on: 05 /06 / 2025

and, because of the following condition(s): drug addiction

I advise you that:
- [X] you are not fit for work.
- [ ] ~~you may be fit for work taking account of the following advice:~~

If available, and with your employer's agreement, you may benefit from:
- [ ] ~~a phased return to work~~
- [ ] ~~amended duties~~
- [ ] ~~altered hours~~
- [ ] [redacted]~~adaptations~~

Comments, including functional effects of your condition(s):

This will be the case for 3 Month(s)

or from / / **to** / /

I ~~will~~/will not need to assess your fitness for work again at the end of this period.
(Please delete as applicable)

Issuer's name Dr [redacted] Driver

Issuer's profession Doctor

What your advice means

'You are not fit for work'
Your health condition means that you may not be able to work for the period shown. You can go back to work as soon as you feel able to and, with your employer's agreement, this may be before your fit note runs out.

'You may be fit for work'
You could go back to [redacted] the support of your employer. Sometimes your employer cannot give you the support you need and if this happens your employer will treat this form as though you are '**not fit for work**'. You do not need to get another of these forms.

For more information please visit **www.gov.uk** and type '**fit note guidance for patients and employees**' into the search [redacted] Fit note guidance for employers is also available.

Data from **page 1** of this form may be collected to learn about national patterns of sickness absence. Individuals will not be identified. Find out more at **www.gov.uk/dwp/fit-note-data**

Fill in the **Your details** section. You can ask someone to do this for you if you cannot fill in your details yourself.

Your details – Please use BLOCK CAPITALS

Statement of Fitness for Work
For social security or Statutory Sick Pay

Patient's name	Mr, ~~Mrs, Miss, Ms~~ Nicholas McJury
I assessed your case on:	31 /03 / 2025
and, because of the following condition(s):	Drug addiction
I advise you that:	[X] you are not fit for work.
	[ ] ~~you may be fit for work taking account of the following advice:~~

If available, and with your employer's agreement, you may benefit from:

- [ ] ~~a phased return to work~~
- [ ] ~~amended duties~~
- [ ] ~~altered hours~~
- [ ] [redacted]~~adaptations~~

Comments, including functional effects of your condition(s):

This will be the case for	8 Week(s)
or from	/ / **to** / /

I ~~will~~/will not need to assess your fitness for work again at the end of this period.
(Please delete as applicable)

Issuer's name	Dr [redacted]
Issuer's profession	Doctor
Date of statement	31 /03 / 2025
Issuer's address	[redacted] Rd West 1600 [redacted] Road West, Cardonald Glasgow, G52 3QN Telephone: 0141 882 4567

Unique ID: Med 3 04/22

What your advice means

'You are not fit for work'
Your health condition means that you may not be able to work for the period shown. You can go back to work as soon as you feel able to and, with your employer's agreement, this may be before your fit note runs out.

'You may be fit for work'
You could go back to [redacted] the support of your employer. Sometimes your employer cannot give you the support you need and if this happens your employer will treat this form as though you are '**not fit for work**'. You do not need to get another of these forms.

For more information please visit **www.gov.uk** and type '**fit note guidance for patients and employees**' into the search [redacted] Fit note guidance for employers is also available.

Data from **page 1** of this form may be collected to learn about national patterns of sickness absence. Individuals will not be identified. Find out more at **www.gov.uk/dwp/fit-note-data**

Fill in the **Your details** section. You can ask someone to do this for you if you cannot fill in your details yourself.

Your details – Please use BLOCK CAPITALS

Surname	Mr, ~~Mrs, Miss, Ms~~ MCJURY
Other names	NICHOLAS
Address	FLAT 1-2, 820 GOVAN ROAD GLASGOW GLASGOW **Postcode** G51 3UP

What you need to do now

- **If you are employed:** Please show this form to your employer. You could get Statutory Sick Pay (SSP) which is paid by your employer. If your employer cannot pay you SSP they will give you form **SSP1** to claim benefits.
- **If you are self-employed:** You could claim benefits.
- **If you are already claiming benefits:** Please send this form to the office dealing with your claim.
- **If you need to make a claim to benefits:** Visit **www.gov.uk/browse/benefits** or phone **0800 328 5644** (8am to 6pm Monday to Friday). Textphone users call **0800 328 1344**.

CLINICAL INFORMATION

History of presenting complaint

Presenting complaint

Description: irregular nodule righ tlung

Comment: Many thanks for seeing this 56 year old man who had a CT thorax in Southampton in January following an assault. This showed widespread emphysematous changes and an irregular 11mm nodule in the right lower lobe, further review was recommended. He ha s now moved back to Glasgow. He has a significant past medical history including PE and opiate misuse
