 prevention chat. Waverley Medical Practice

08-Oct-2025 Mrs Angela Swinton (AS) Waverley Medical PracticeMain Surgery

Problem	Problem	Cardiovascular risk prevention screening
Examination	Systolic blood pressure	132 mm Hg
Examination	Diastolic blood pressure	80 mm Hg
Examination	O/E - height	177 cm
Examination	O/E - weight	65 Kg
Examination	Body Mass Index	20.75
Examination	Waist circumference	87 cm
Examination	Diabetes UK diabetes risk score	6
Social	Not interested in stopping smoking	
Social	Cigarette smoker	15 cigarettes/day
Comment	Comment	Attends for the Cardiovascular risk prevention screening. Has MH issues and currently on quetiapine. He is a smoker 15 a day and smokes approx 5 cannabis joints a day too, no other drug use. He does not drink alcohol. BP within range, heart rate a bit fast at 100BPM but anxious about being in here, he is to book in for an ECG for quetiapine monitoring and had a letter with him as a reminder so advised to book in at the Health Borad to get this done, Bp was also due and done today. No FH of diabetes, both ***** have heart issues. He walks a lot most days with his dog sometimes cycles to shops. Has long standing back pain & anxiety he says so doesn't work at present. Bloods taken for HbA1C and fasting lipids, he asked about a prostate chek too, he's been having frequency nocturia and hard to start the flow, PSA added to tests advised this is not a conclusive test and if raised needs to book in for a prostate exam, given a urine sample pot to send in a sample to chack for infection. He has been advised to book in with GP to review results of screening.

26-Oct-2020 Mrs Tricia Mieduniec (TM) Waverley Medical Practice Main Surgery

Problem Medication requested
 History History meds out of sync diazepam, Dihydrocodeine, fluoxetine & Quetiapine ones since frid
 Comment Comment needs all meds to be ready to be uplifted on a friday all acutes. I am working remotely and unfortunately docman items not opening from 22/9, 24/9 and 30/9 so GP will need to check to see what plan is for meds. Please ensure diazepam rx has a weekly amount to be issued as is a PRN dose and pharmacy needs to be clear on how much to give weekly.
 Comment Telephone encounter Borders pharmacy confirm have 2 weeks quetiapine and 1 week of diazepam left so to align everything will need 2 weeks of quetiapine, 3 weeks diazepam, 4 weeks fluoxetine and DHC. Have set this up as per previous doses - GP please check these are correct as per docman letters. Pharmacist working remotely. Any prescriptions printed centrally.

21-Sept-2020 Dr Jane Clifford (JCLIFFORD_18678) Telephone Consultation

History History requesting more diazepam as had to take 4 on friday so none left. declined. explained he has had a very slow reducing dose. unable to issue more at the moment. has other medication for anxiety. seeing a bereavement counsellor and awaiting psych team input. started shouting saying that I had to prescribe him something then hung up. I would keep px at 7 per week until seen by west team. explained I had initiated the reduction back in June - he was informed by letter and this was done after repeated requests for him to make contact to review medication. has had a very slow reduction. I would be reluctant to give extra diazepam in this situation when he and we have worked hard to slowly reduce it.

KIS Special patient note 21/9/20
has been on a slowly reducing dose of diazepam (2mg per week since june). currently getting 7 per week weekly disp. has fluoxetine and quetiapine too. i declined further px today patient angry and hung up. awaiting west team referral. some concerns re: drug seeking

19-Jun-2020 Dr Lucy Morton (LMO) Waverley Medical PracticeMain Surgery

Problem Anxiety with depression

History History triaged by phone due to covid pandemic. see email from worker at gala resource centre. says gets a lot of input from GRC (phoned him this morning) and bereavement scotland. says finds tel appts difficult. has had 2 tel appts with bereavement scotland. been involved with grc for 1 year, penumbra for 2 years prior to that. been on fluoxetine 20mg for a while. says finding it difficult to keep appts and mood low. a few months ago dog died. but has another dog. protective factor-new dog german shepherd. finds dog therapy. enjoys music and usually plays in a band. has a big family but says they don't understand. finds more short tempered than normal. has friends and good neighbours. says days are like groundhog day. uses music to block bad thoughts out. uses it as therapy. says against alcohol, heroin and other drugs. says has lost friends through heroin. says has been giving a neighbour money for last couple of years to help him out, then cut contact with him and this person allegedly threw an egg at his window. says this person allegedly was egging him and spitting in craigs face last night. says woke up this morning and was very frustrated and upset. says has calmed down from the situation. says wouldn't go and kill himself. doesn't feel like in that frame of mind. says neighbourhood has gone downhill and drug use.

Comment Comment says feeling back to his normal and feels can keep safe over weekend. seems to think he has crisis number if needed over weekend. if will contact samaritans or nhs24 if needed over weekend. I will phone monday for full review of mood and look at whether need to change antidepressant. worsening advice given

17-Jun-2020 Dr G Montgomerie (GSYME_18678) Telephone Consultation

History History triaged by phone as COVID19 was put in for a review but pt says he didn't ask for it, mood has been lower but not current suicidal thoughts, upset as dog has died a few weeks ago suddenly, says he doesn't like to contact gp, says hes on an even keel,

15-Jun-2020 Dr G Montgomerie (GSYME_18678) Telephone Consultation

History History tesco - 52 tabs given but needed only 50 for first 4 weeks, 143, 13,12,11 per week

15-Jun-2020 Dr Jane Clifford (JCLIFFORD_18678) Telephone Consultation

History History px issued tried to phone mobile and no response. letter to patient to make an appt for review and possibly consider only given further week if doesn't make contact. I suggest that on next prescription we start decreasing diazepam by 2mg per week ie 13 tabs in weekly disp dec to 12, 11, 10 etc so decreasing slowly over a 12 week period.

11-Jun-2020 Mrs Tricia Mieduniecki (TM) Waverley Medical PracticeMain Surgery

Problem Anxiety with depression
 History History Anxiety not great since *****cant remember anything of it but revealed in later life , has contact details for support re this but struggles to make the first contact step. Sometimes has thoughts of suicide , but not active planning and dog / family name strong protective factors.

Examination Examination A little unkempt. Good rapport, good eye contact , no psychosis , reactive , no active thoughts SH / suicide.

Comment Comment Disussed , listened , I have provided sexual abuse resources again - really encouraged him to make contact as will be good support for him , well aware of crisis numbers and who to turn to if feelings SH or suicide strong. Review 4 weeks or sooner if needed.

30-Apr-2019 Dr Wathani Sivaniah (WS391) ROXBURGH ST SURGERYMain Surgery

History History Attended as stating that MR DHC not effective- same as taking 1 -30mg DHC in the morning- explained that same dose of DHC. advised modified release- recommended in chronic pain- he became unhappy- about how this was all decided by people without back pain- Then complained re presence of another patient in waiting room- that wind him up- complained that previous practice had led to all several patients being made into junkies- and how back pain had not been dignosed until attended here. Becoming very aggressive agitated and threatening. Advised would smash up the other patient in the building.I requested that he modify his volume. Discussed anger. and mood- offered change in meds- again- became aggressive and agiated. complined that everyone eas else were junkies. Patient walked out- attended reception aggressive manner- I requested Dr F to attend-. Told him to "F....off" . walked out

Vaccinations

24-Jun-2021 Mr Anonymous User (ANON)

Administration of second dose of SARS-CoV-2 (severe acute respiratory syndrome coronavirus 2) vaccine (Right Arm) C-19 (By I Campbell)
PV46687/ AZ/IM/RUA/C-19 (By I Campbell)

12-Apr-2021 Mr Anonymous User (ANON)

Administration of first dose of SARS-CoV-2 (severe acute respiratory syndrome coronavirus 2) vaccine (Right Arm) C-19 (By J Cleland)
PV46676/ AZ/IM/RUA/C-19 (By J Cleland)

Referrals

16-Jan-2026 Dr Vikas Das Mahesh (VM)

8HTK.: Referral to stop-smoking clinic (SCI Gateway Referral)
. Referral Type: Self Referral; Reason: Out Patient

16-Jan-2026 Dr Vikas Das Mahesh (VM)

8Hlu.: Referral to healthy lifestyle programme (SCI Gateway Referral)
. Referral Type: Self Referral; Reason: Out Patient

18-May-2022 Dr G Montgomerie (GSYME_18678)

8H...: Referral for further care (SCI Gateway Referral)
. Referral Type: Self Referral; Reason: Out Patient

22-Jun-2020 Dr Lucy Morton (LMO)

8H49.: Psychiatric referral (SCI Gateway Referral)
. Referral Type: Self Referral; Reason: Out Patient

16-Oct-2019 Dr Gillian Arbuckle (GARBUCKLE_18678)

8H...: Referral for further care (SCI Gateway Referral)
. Referral Type: Self Referral; Reason: Out Patient

13-Jun-2019 Dr Gillian Arbuckle (GARBUCKLE_18678)

8H...: Referral for further care (SCI Gateway Referral)
. Referral Type: Self Referral; Reason: Out Patient

22-Jan-2019 Dr Alistair Wright (AW389)

8H51.: General surgical referral (SCI Gateway Referral)
SelfReferral, Out Patient. Referral Type: Self Referral

13-Feb-2018 Dr Alistair Wright (AW389)

8H77.: Refer to physiotherapist (SCI Gateway Referral)

SelfReferral, Out Patient. Referral Type: Self Referral

27-July-2016 Dr Wathani Sivaniah (WS391)

8Hc.: Referral to mental health team (SCI Gateway Referral)

SelfReferral, Out Patient. Referral Type: Self Referral

20-July-2015 Dr James Frost (JF387)

8H55.: Neurosurgical referral (SCI Gateway Referral)

SelfReferral, Out Patient - Follow-up/Return. Referral Type: Self Referral

05-Aug-2014 Dr Alistair Wright (AW389)

8H55.: Neurosurgical referral (SCI Gateway Referral)

SelfReferral, Out Patient - New. Referral Type: Self Referral

22-May-2013 Dr Alistair Wright (AW389)

8H54.: Orthopaedic referral (SCI Gateway Referral)

SelfReferral, Out Patient. Referral Type: Self Referral

05-Oct-2012 Dr Alistair Wright (AW389)

EMISSPR150: Neurosurgery referral (SCI Gateway Referral)

SelfReferral, Out Patient - New. Referral Type: Self Referral

01-Mar-2010 Dr Richard Leaver (RL393)

Referral for further care

Referred To: BORDERS GENERAL HOSPITAL, NHS. Referral Type: Out Patient. Speciality Type: Physiotherapy. Referral Nature: Not Specified. ,

Referral Reason: Musculoskeletal, urgency=low. Referral Type: Unknown (0)

Test Results

29-Jan-2019 Mrs Lucy Munro (LM390)**Result:** Full blood count - FBC

Basophil count	0.06 x10 ⁹ /l	(No range available)
Eosinophil count	0.27 x10 ⁹ /l	(No range available)
Monocyte count	0.46 x10 ⁹ /l	(Range: 0.2 - 1)
Lymphocyte count	3.3 x10 ⁹ /l	(Range: 1 - 4)
Neutrophil count	4.97 x10 ⁹ /l	(Range: 2 - 7.5)
Mean corpusc. Hb. conc. (MCHC)	335 g/L	(Range: 320 - 360)
Mean corpusc. haemoglobin(MCH)	32 pg	(Range: 27 - 32)
Haematocrit	0.429 L/L	(Range: 0.4 - 0.54)
Red blood cell (RBC) count	4.5 x10 ¹² /L	(Range: 4.5 - 6.5)
Mean corpuscular volume (MCV)	95.3 fl	(Range: 80 - 100)
Platelet count	203 x10 ⁹ /L	(Range: 150 - 400)
Total white cell count	9.1 x10 ⁹ /L	(Range: 4 - 11)
Haemoglobin estimation	144 g/L	(Range: 130 - 180)

29-Jan-2019 Mrs Lucy Munro (LM390)**Result:** Plasma fasting glucose level

Serum fasting glucose level	4.8 mmol/L	(Range: 3.9 - 6.1)
-----------------------------	------------	--------------------

29-Jan-2019 Mrs Lucy Munro (LM390)**Result:** Serum creatinine

GFR calculated abbreviated MDRD > 60		(No range available)
Serum creatinine	75 umol/L	(Range: 64 - 110)
Serum potassium	4.2 mmol/L	(Range: 3.5 - 5)
Serum sodium	142 mmol/L	(Range: 137 - 144)

29-Jan-2019 Mrs Lucy Munro (LM390)**Result:** Prolactin level

Prolactin level	260 mU/L	(Range: 74 - 407)
-----------------	----------	-------------------

29-Jan-2019 Mrs Lucy Munro (LM390)**Result:** Serum TSH level

Serum TSH level	0.94 mU/L	(Range: 0.3 - 4.9)
-----------------	-----------	--------------------

29-Jan-2019 Mrs Lucy Munro (LM390)**Result:** Fasting blood lipids

Serum cholesterol/HDL ratio	4.2	(Range: 2 - 5)
Serum LDL cholesterol level	3.5 mmol/L	(Range: 2 - 3.5)
Serum HDL cholesterol level	1.2 mmol/L	(Range: 1 - 1.5)
Serum fasting triglyceride level	0.64 mmol/L	(Range: 0.6 - 1.7)
Serum cholesterol	5 mmol/L	(Range: 3.5 - 5.18)

29-Jan-2019 Mrs Lucy Munro (LM390)**Result:** Liver function test

Serum alkaline phosphatase	91 U/L	(Range: 40 - 150)
ALT/SGPT serum level	11 U/L	(No range available)
Serum bilirubin level	7 umol/L	(Range: 3 - 21)
Serum albumin	38 g/L	(Range: 35 - 50)

19-Jan-2018 Mrs Lucy Munro (LM390)**Result:** (Non Coded Event - ESR)

Erythrocyte sedimentation rate (Non Coded Event - Erythrocyte sedimentation rate)	5 mm/hr.	(No range available)
--	----------	----------------------

19-Jan-2018 Mrs Lucy Munro (LM390)**Result:** Full blood count - FBC

Basophil count	0.08 x10 ⁹ /l	(No range available)
Eosinophil count	0.31 x10 ⁹ /l	(No range available)
Monocyte count	0.44 x10 ⁹ /l	(Range: 0.2 - 1)
Lymphocyte count	2.94 x10 ⁹ /l	(Range: 1 - 4)
Neutrophil count	7.03 x10 ⁹ /l	(Range: 2 - 7.5)
Mean corpusc. Hb. conc. (MCHC)	345 g/L	(Range: 320 - 360)
Mean corpusc. haemoglobin(MCH)	33.6 pg	(Range: 27 - 32)
Haematocrit	0.415 L/L	(Range: 0.4 - 0.54)
Red blood cell (RBC) count	4.26 x10¹²/L	(Range: 4.5 - 6.5)
Mean corpuscular volume (MCV)	97.4 fl	(Range: 80 - 100)
Platelet count	233 x10 ⁹ /L	(Range: 150 - 400)
Total white cell count	10.8 x10 ⁹ /L	(Range: 4 - 11)
Haemoglobin estimation	143 g/L	(Range: 130 - 180)

19-Jan-2018 Mrs Lucy Munro (LM390)**Result:** Serum creatinine

GFR calculated abbreviated MDRD > 60		(No range available)
Serum creatinine	76 umol/L	(Range: 64 - 110)
Serum potassium	4.6 mmol/L	(Range: 3.5 - 5)
Serum sodium	138 mmol/L	(Range: 137 - 144)

19-Jan-2018 Mrs Lucy Munro (LM390)**Result:** Liver function test

Serum alkaline phosphatase	96 U/L	(Range: 40 - 150)
ALT/SGPT serum level	12 U/L	(No range available)
Serum bilirubin level < 5		(No range available)
Serum albumin	36 g/L	(Range: 35 - 50)

19-Dec-2016 Mrs Lucy Munro (LM390)**Result:** Full blood count - FBC

Basophil count	0 x10 ⁹ /l	(No range available)
Eosinophil count	0.1 x10 ⁹ /l	(No range available)
Monocyte count	0.3 x10 ⁹ /l	(Range: 0.2 - 1)
Lymphocyte count	1.8 x10 ⁹ /l	(Range: 1 - 4)
Neutrophil count	8.7 x10⁹/l	(Range: 2 - 7.5)
Mean corpusc. Hb. conc. (MCHC)	333 g/L	(Range: 320 - 360)
Mean corpusc. haemoglobin(MCH)	31.9 pg	(Range: 27 - 32)
Haematocrit	0.428 L/L	(Range: 0.4 - 0.54)
Red blood cell (RBC) count	4.48 x10¹²/L	(Range: 4.5 - 6.5)
Mean corpuscular volume (MCV)	95.6 fl	(Range: 80 - 100)
Platelet count	233 x10 ⁹ /L	(Range: 150 - 400)
Total white cell count	10.9 x10 ⁹ /L	(Range: 4 - 11)
Haemoglobin estimation	143 g/L	(Range: 130 - 180)

19-Dec-2016 Mrs Linda Ormiston (LO388)**Result:** Plasma fasting glucose level

Serum fasting glucose level	5.5 mmol/L	(Range: 3.9 - 6.1)
-----------------------------	------------	--------------------

19-Dec-2016 Mrs Linda Ormiston (LO388)**Result:** Serum creatinine

GFR calculated abbreviated MDRD > 60		(No range available)
Serum creatinine	65 umol/L	(Range: 64 - 110)
Serum potassium	4.5 mmol/L	(Range: 3.5 - 5)
Serum sodium	138 mmol/L	(Range: 137 - 144)

19-Dec-2016 Mrs Linda Ormiston (LO388)**Result:** Prolactin level

Prolactin level	227 mU/L	(Range: 74 - 407)
-----------------	----------	-------------------

19-Dec-2016 Mrs Linda Ormiston (LO388)**Result:** Serum TSH level

Serum TSH level	0.61 mU/L	(Range: 0.3 - 4.9)
-----------------	-----------	--------------------

19-Dec-2016 Mrs Linda Ormiston (LO388)**Result:** Serum fasting total cholesterol

Serum fasting triglyceride level	0.67 mmol/L	(Range: 0.6 - 1.7)
Serum fasting total cholesterol	4.9 mmol/L	(Range: 3.5 - 5.18)

19-Dec-2016 Mrs Linda Ormiston (LO388)

Result: Liver function test

Serum alkaline phosphatase	92 U/L	(Range: 40 - 150)
ALT/SGPT serum level	11 U/L	(No range available)
Serum bilirubin level	5 umol/L	(Range: 3 - 21)
Serum albumin	37 g/L	(Range: 35 - 50)

23-Aug-2016 Mrs Lucy Munro (LM390)

Result: Erythrocyte sedimentation rate

Erythrocyte sedimentation rate	2 mm/hr.	(No range available)
--------------------------------	----------	----------------------

23-Aug-2016 Mrs Lucy Munro (LM390)

Result: Full blood count - FBC

Basophil count	0 x10 ⁹ /l	(No range available)
Eosinophil count	0.2 x10 ⁹ /l	(No range available)
Monocyte count	0.5 x10 ⁹ /l	(Range: 0.2 - 1)
Lymphocyte count	2.4 x10 ⁹ /l	(Range: 1 - 4)
Neutrophil count	10.2 x10⁹/l	(Range: 2 - 7.5)
Mean corpusc. Hb. conc. (MCHC)	330 g/L	(Range: 320 - 360)
Mean corpusc. haemoglobin(MCH)	31.9 pg	(Range: 27 - 32)
Haematocrit	0.447 L/L	(Range: 0.4 - 0.54)
Red blood cell (RBC) count	4.62 x10 ¹² /L	(Range: 4.5 - 6.5)
Mean corpuscular volume (MCV)	96.7 fl	(Range: 80 - 100)
Platelet count	218 x10 ⁹ /L	(Range: 150 - 400)
Total white cell count	13.4 x10⁹/L	(Range: 4 - 11)
Haemoglobin estimation	148 g/L	(Range: 130 - 180)

23-Aug-2016 Mrs Lucy Munro (LM390)

Result: Serum creatinine

GFR calculated abbreviated MDRD > 60		(No range available)
Serum creatinine	73 umol/L	(Range: 64 - 110)
Serum potassium	3.7 mmol/L	(Range: 3.5 - 5)
Serum sodium	141 mmol/L	(Range: 137 - 144)

23-Aug-2016 Mrs Lucy Munro (LM390)

Result: Liver function test

Serum alkaline phosphatase	93 U/L	(Range: 40 - 150)
ALT/SGPT serum level	13 U/L	(No range available)
Serum bilirubin level	6 umol/L	(Range: 3 - 21)
Serum albumin	41 g/L	(Range: 35 - 50)

24-Feb-2016 Mrs Lucy Munro (LM390)

Result: Plasma fasting glucose level

Serum fasting glucose level	5.2 mmol/L	(Range: 3.6 - 6)
-----------------------------	------------	------------------

11-Feb-2016 Mrs Lucy Munro (LM390)

Result: Serum creatinine

GFR calculated abbreviated MDRD > 60		(No range available)
Serum creatinine	61 umol/L	(Range: 60 - 110)
Serum potassium	4.3 mmol/L	(Range: 3.5 - 5)
Serum sodium	138 mmol/L	(Range: 135 - 145)

11-Feb-2016 Mrs Lucy Munro (LM390)

Result: Liver function test

Serum alkaline phosphatase	81 U/L	(Range: 26 - 100)
ALT/SGPT serum level	15 U/L	(Range: 10 - 42)
Serum bilirubin level	7 umol/L	(Range: 5 - 25)
Serum albumin	43 g/L	(Range: 36 - 47)

11-Feb-2016 Mrs Lucy Munro (LM390)

Result: Erythrocyte sedimentation rate

Erythrocyte sedimentation rate	1 mm/hr.	(No range available)
--------------------------------	----------	----------------------

11-Feb-2016 Mrs Lucy Munro (LM390)

Result: Full blood count - FBC

Basophil count	0 x10 ⁹ /l	(No range available)
Eosinophil count	0.1 x10 ⁹ /l	(No range available)
Monocyte count	0.5 x10 ⁹ /l	(Range: 0.2 - 1)
Lymphocyte count	2.5 x10 ⁹ /l	(Range: 1 - 4)
Neutrophil count	6.6 x10 ⁹ /l	(Range: 2 - 7.5)

THE CONTENT OF THIS LETTER IS CONFIDENTIAL
AND MAY NOT BE DISCLOSED WITHOUT THE
CONSENT OF THE WRITER

Dear Mrs Moutrie

Craig MEIN (26.6.67) 22 Forest Hill Galashiels

I saw Craig and his parents together with Miss Jenkins in Selkirk on 11 October.

The history is pieced together from your own reports and from the interviews with Craig and his [REDACTED]

The complaints:

A Hearing took place on 6.9.78 because of ten offences of break-ins and thefts often together with other boys. Craig had previously been on informal supervision with Miss Jenkins and Mr Morrison before her. The Panel were concerned, rightly in my view, because Craig at such a young age had engaged in so much delinquency and, as usually happens, he did not in the setting of having to account for his deeds, show remorse.

The school report indicates good attendance but headaches and sore stomachs in the past and poor progress because of lack of interest. His behaviour was perfectly acceptable.

The social work reports indicate that both [REDACTED] and it is clear that all three boys have been in trouble following the [REDACTED] serious accident in December 1975 and its sequelae.

Family History:

[REDACTED]

[REDACTED]

2

Craig MEIN

talk of surgery.

Craig had not been told of the details of the events and he had thought, as he mentioned to me, that his [REDACTED] had

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

Siblings:

Craig is the youngest of a large family and was born after the [REDACTED] conceived a [REDACTED] while on the pill and lost her through death when [REDACTED] was only ten days old. The [REDACTED] was worried during her conception of Craig and was sterilised after his birth.

[REDACTED]

[REDACTED]

give Craig money for treats.

[REDACTED]

Craig is the only boy still at primary [REDACTED]

The first theft occurred from a grown-up friend of [REDACTED] for whom both she and Craig babysat. Craig's theft from her spoilt [REDACTED] friendship with this family.

1915 Confidential: Personal Data about a patient

3

Craig MEIN

Past History:

Craig was born by a breech delivery two weeks before term weighing six pounds. He was no trouble as a [REDACTED] and his development was normal.

He was born in Halifax, lived there for three or four years, then moved with the family to Wales for two years, then lived in Hull for about 2½ years and moved to Scotland following the [REDACTED] accident. He has been in four different schools.

Following the [REDACTED] accident, Craig had a number of physical symptoms including stomach pains and dizzy spells and was in hospital for two days for investigations for ? appendicitis.

The older members of the family appear always to have felt somewhat guilty towards him and to have indulged him with gifts and treats. At the same time, essential family information seems not to have come his way at times.

He enjoys tinkering with electrical apparatus.

At Interview:

Craig is a smallish, very attractive looking pre-pubescent boy, over eager to please and lacking in assertiveness and masculine self-esteem. He was very forthcoming and frank.

He gave a good account of his life and indicated that his happiest school years were in Hull where he was 'the teacher's pet', having at that time a man teacher whom he liked. This did not go down well with the other children and the boys used to tease him and he felt sad.

Practical work is what he excels in in school.

He seems concerned about his [REDACTED] and somewhat preoccupied with the possibility that drinking may be a problem. He also felt 'right sorry for him'. There are hints that prior to the accident there was some friction in the family in relation to drink but that since the accident this has not been a problem but the [REDACTED] has of course been chronically anxious and unwell.

Craig feels both spoilt and restricted in the family and considers the oldest siblings pick on him.

He is clear that when he is angry he keeps his feelings bottled up inside and only in his daydreams does he permit himself more hostile fantasies.

He enjoys football but wished he had more opportunities to learn to swim properly and to dive. When he grows up he wants to be a plumber like his [REDACTED]

1046 Confidential: Personal data about a patient

4

Craig MEIN

Diagnostic Impression:

This boy's personality development has been affected by his being an indulged youngest child who lacks respect within his family setting and is greatly lacking in self respect as a boy. My guess is also that, like so many youngest children in big families, he is likely to doubt whether he was really the most important child in the family and perhaps the [REDACTED] and older [REDACTED] also find it easy to give him things to assuage their own guilt for not always being available to him as much as is needed.

I wondered whether the [REDACTED] required medical assessment for her menorrhagia and I felt quite sure that the [REDACTED] needed treatment for his chronic anxiety state.

Psychological report: This was available to me after the interview. Mr Ashby indicates that Craig is a boy of average abilities, with adequate reading skills but is over three years retarded for his age and ability in spelling for which he requires remedial help.

Future Plans:

The family knows that I will be writing to Dr Revels not only about Craig but about my concerns for [REDACTED] and I do hope that some contact with the family doctor will be achieved by both [REDACTED] despite [REDACTED] understandable fears and ambivalencies about the medical profession.

My own recommendation to the Panel would be that Craig's supervision order should be continued.

I would very much like the opportunity of contributing to his treatment by means of regular family interviews in the Borders, hopefully together with Miss Jenkins.

Yours sincerely

Sula Wolff

Dear Dr Revels

Mr Craig Mein 22 Forest Hill Galashiels (dob 26.6.67)

Diagnosis 1. Self poisoning with Triazolam, "magic mushrooms" and possibly other drugs

He was admitted urgently on 19.8.85 having been found unconscious by his [redacted] responding only to pain. He seemed confused when he had arrived home the evening before but wasn't smelling of drink.

He lives with his [redacted] [redacted] [redacted] [redacted] He smokes 5 cigarettes a day and he works as a bakers apprentice. He has had previous charges for breach of the peace although denies being a heavy drinker. He did admit to abusing drugs subsequently.

On examination he is rousable, at times aggressive. There were no focal neurological signs. His pupils were small but reacting. His pulse was 56, blood pressure and respiration normal.

Investigations Paracetamol, salicylates and alcohol not detected. Glucose 5.2, Blood urea, electrolytes, liver function tests normal apart from an alkaline phosphatase of 132 with a normal gamma GT of 17. Hb was 16.9 g/dl, WBC 12.6 with a lymphocytosis of 4.536. Chest and skull x-rays normal. ECG - sinus bradycardia, right axis deviation on clockwise rotation (normal variant).

Management His aggressive behaviour gradually wore off. He was seen by the Psychiatrists who will maintain contact. He should be strongly advised to refrain from further drug abuse.

Yours sincerely

O E EADE. DM MRCP

The Health Centre,
Currie Road,
GALASHIELS.

Dear Dr. Eccles,

Re: Craig Mein, 22 Forest Hill, Galashiels. D.O.B. 26.6.67.

Emergency referral seen at Ward 3, Peel Hospital on 20th August, 1985, by Susan Scobie, Pupil Nurse, Kiloran, Ruth Dorward and I.

We asked Craig to describe what had happened to make him take the overdose. He seemed a little vague as to why he did this, but describes having seen someone do this in a film a few nights previously. He says he took a handful of Mianserin tablets on waking at 4 a.m., and returned to bed. When his [redacted] attempted to wake him for work at 6 a.m. they found him unrousable, and he was admitted to Peel. He added that he had been feeling a bit low, as his [redacted] had finished with him the night before. He had also been taking 'magic mushrooms', but was not feeling intoxicated when he took the overdose.

Other problems are as follows - he is the youngest of a large family of seven children. He feels that he is not particularly close to any of his family, apart from a [redacted] who is currently in prison for theft. His [redacted] says he will end up like him, which distresses Craig. His childhood seems to have been fairly chaotic, spending some of it in the Priory Children's Home following an assault by his [redacted]. We note that his [redacted] has also had contact with Dingleton in 1983 when he took a large overdose. His [redacted] are now living together again, but Craig does not get on with his [redacted] having a very ambivalent attitude towards him. He says that he feels that he could talk with his [redacted] but does not, so he has no-one he can confide in.

Craig also feels dissatisfied with his job as an apprentice baker. He has not been doing the job for very long but has already lost it once. He dislikes having to clean up after everyone else, and feels that he may not be able to remain at the job for much longer. He also talked about his use of drugs, it seems that he uses cannabis, LSD, and magic mushrooms which are regularly available to him. He also drinks fairly heavily on occasions, commenting that he feels that he needs to escape from reality.

We took the opportunity to tell him about Kiloran and how it might be of use to him. He listened, but felt that he did not wish an admission at the moment. He was also not very keen on having any follow up, but I said we would send an appointment.

1975 Confidential - Personal data about a patient

2.

My main concern is that he is unable to say whether he would overdose again, and that he seems to have no-one to talk to about his problems. He laughed quite a bit, but in the pauses of conversation, his head was down and he looked very sad and depressed. We hope to see him again at home and will keep you informed of our progress.

Yours sincerely,

Minta Bubbs
Social Worker

Dear Dr Gould

I would be grateful if you could see this young man who presents with pain in the region of his right temporomandibular joint and audible clicking of this joint. He finds that the pain is increasing in severity and is made worse by chewing to such an extent that he now finds it difficult eating at all. I have arranged an x-ray of his temporomandibular joint which should be available by the time you see him and I will certainly forward a copy of the report on this x-ray as soon as it becomes available. ✓ 4.1.87

I wondered if the problem was primarily of the temporomandibular joint or whether there was some mal-occlusion problem here and would be very grateful for your advice with regard to his further management. Thank you for seeing him.

Yours sincerely

Dr R R Smith

Dear Charlie

My apologies for referring this young man with backache. He started to appear with this about 18 months ago and when simple analgesia did not settle things we had an x-ray performed at Galashiels Hospital the report of which reads as follows: "There is slight asymmetry of the L5 vertebral body with a large left transverse process which is possibly incorporated into the SI joint. The alignment is satisfactory and the disc spaces preserved." I will arrange for these x-rays to be sent to Peel for you. I took this report as being normal and arranged physiotherapy for him. However, that does not seem to have helped and indeed he even says that some of the treatment we have given such as Feldene has made his back worse.

On examination he has always had a good range of movement and free straight leg raising and indeed I have never been impressed that there is a great deal wrong with his back.

Both of his [redacted] are martyrs to backache and I am keen to discourage Craig from developing this sort of attitude as well and I feel that since I don't seem to be getting anywhere with him that a specialist opinion would be most helpful. Thank you for seeing him.

Kind regards.

Yours sincerely

Dear Dr Smith

Mr Craig W Mein 22 Forest Hill Galashiels (dob 26.06.67)

The above young boy was admitted with an episode of self-poisoning with "magic mushrooms". He had apparently been eating the mushrooms for the previous two nights and had also been drinking alcohol. He denied any other drug abuse or drug intake.

His past medical history includes one previous episode of self-poisoning with Triazolam and magic mushrooms.

On examination on admission he was high but not hallucinating. No cyanosis, clubbing or lymphadenopathy. Pulse 100 and regular, blood pressure 120/80, heart sounds pure and the chest clear. Abdominal and CNS examinations were unremarkable.

A routine blood screen for paracetamol and salicylate was performed and none were detected. Alcohol level 92 mg%. Urea, electrolytes, blood glucose and full blood count all normal.

Craig was admitted for observation following a stomach wash-out. The following day he was well, walking about with no dizziness or late effects from his mushrooms. Accordingly he was warned of the dangers of his behaviour and discharged home.

Drugs on Discharge: Nil.

Follow-up: No follow-up arranged.

Yours sincerely

Dear Bob,

Craig Mein, 22 Forest Hill, Galashiels (26.6.67)

I saw this young man with his eighteen-month history of lumbo-sacral back pain, probably related to the minor congenital anomaly at the lumbo-sacral junction but this is not amenable to any specific form of therapy. I have tried to reassure him that this is not a major problem and is unlikely to cause significant symptoms in the future. I have not arranged routine follow-up.

Yours sincerely,

Dear Bob,

Craig Mein, 22 Forest Hill, Galashiels
26.6.67

When I saw this lad at the clinic recently, I had obliques of his lumbar spine carried out and passed these as normal. However, David Hardwick has reported them as showing a defect in the pars interarticularis at L5 bilaterally.

I have subsequently discussed the x-rays with Iain Houston who is not convinced of the above and I must admit that I am not at all convinced that there is any bony defect.

I do not believe we need take matters further but I felt you should know of this possibility. I would think it important that the patient is not told.

Yours sincerely,

C.B. CLOWES

Dear Mr Clowes

I would be grateful if you could see this pleasant 26 year old man who has sacroisation of his L5/S1 vertebra which has led to chronic back pain. The pain seems to be constant and he has now been off work for some considerable time as a result of it. His description of the pain often does not quite match up with the clinical presentation i.e his back seems reasonably mobile, there is no transmission of the pain and straight leg raising is relatively unimpeded.

Past medical history; he was seen by you in 1987 for the same problem at that time you felt that the pain should clear up quite quickly. However it now seems to be quite considerably impinging upon his lifestyle. He is unable to get employment and at times is unable to perform normal activities. He is currently taking Tylex for the pain and as far as our records show he does not seem to be abusing these tablets. I would be most grateful for any help you can give in terms of treating his back pain or suggesting methods of rehabilitation. Thank you for seeing him.

Kind regards.

Yours sincerely

Dear Dr Owen

Re: Craig Mein 142 Woodstock Avenue, Galashiels, TD1 2EG (D.O.B 26.06.67)

Assessment Letter

Thank you for your urgent referral of this young man who I assessed on the 10th April at Ward 4 B.G.H where he had been admitted having ingested 90 Pylrex with a small amount of cocaine and 22 Diazepam twenty four hours previously.

I believe he had vomited a lot prior to admission but was still in physical discomfort when I saw him and quite weepy at times.

Generally though he was able to give a good account of himself with appropriate affect and good eye contact. He told me that the immediate precipitants to his overdose was that after a row his [REDACTED] had broken off the relationship. However she had accompanied him to the hospital and he was reassured about the future of their relationship.

HISTORY: Craig was a single man and was one of six [REDACTED] of a family who moved around a lot during his early childhood before returning to Galashiels to live when he was about nine. From before this time he had been played truant from school and although he didn't specify all the circumstances this was one of the reasons for his being sent to Wellington List D Residential Home at that age, where he remained until school leaving age. He remembers being very distressed when the time came to leave there.

Since then apart from his job creation schemes he has had very little employment, partly because of incapacity due to severe back pain./...

Borders Community Health Services NHS Trust
Dingleton Hospital, Melrose, Roxburghshire, TD6 9HN
Telephone: 01896 822727 Fax: 01896 823807

19/05/2016 Confidential: Personal data about a patient

/When younger he had engaged heavily in alcohol and recreational drugs, including amphetamines, ecstasy and cannabis. However four years ago having become involved with [REDACTED] nine years his junior he stopped all drug and alcohol use due to her influence. However it seems that involvement with the internet has become increasingly time and attention consuming. Craig no longer goes out to the pub in order to avoid the temptations of alcohol or drugs and [REDACTED] has become very dissatisfied at his increased isolation and reluctance to socialise.

Two years ago Craig's [REDACTED] As he was talking Craig realised the impact this had had on himself. [REDACTED] and always considered that in the long term he had been unaffected by this. However in retrospect although he was unsure what he felt at the time this was when he began playing truant. At that first meeting he wondered why he had not confided in his [REDACTED] and became tearful at this point.

Although distressed, Craig displayed no depressive symptoms and was rather sheepish about his overdose. We therefore agreed that Craig was fit for discharge once physically fit and that we would meet once more when he was home.

When I visited again on the 14th April Craig let me know how useful he found the previous session. He felt considerable relief having managed to discuss with his [REDACTED] the contents of our previous conversation and consequently feels much more part of his own family.

He also feels that he has worked out a compromise with his [REDACTED] which has improved their relationship i.e. He is more willing to socialise with her and will spend less time surfing the internet.

In summary Craig used this crisis to make some positive changes in his life and we agreed that there is no need for continuing contact with our services. I'm therefore discharging him from our books.

Yours sincerely

Dear Dr Owen

CRAIG MEIN 142 WOODSTOCK AVENUE GALASHIELS TD1 2EG DOB 26.06.67

MAIN DIAGNOSIS 1 Self poisoning - COCODAMOL, COCAINE
OTHER DIAGNOSES 2 Psychosocial problems

ADMITTED 09.04.98
DISCHARGED 11.04.98
CONSULTANT Dr O E Eade

PRESENTING COMPLAINT This 30 year old gentleman presented with an overdose of 19 TYLEX tablets and he had taken CODEINE nasally and DIAZEPAM x 2 tablets. This had followed an incident with his [REDACTED] the previous night, apparently becoming increasingly withdrawn over the last year. He has recently been aggressive with labile mood and spending prolonged periods of time on Internet, with increasing use of nasal COCAINE and Cannabis. He took the pills at 10 o'clock at night over a half hour period, wanted to kill himself. He felt differently on attending the hospital. This was after vomiting through the night and continuing through into the day. Now bilious vomit, no haematemesis. He felt extremely unwell.

PAST MEDICAL HISTORY chronic back ache for which he takes TYLEX, ?sacralization of L5/S1. Recurrent urinary tract infections for which he has had investigated in Edinburgh. Self poisoning with loss of consciousness 1985.

DRUGS ON ADMISSION COCODAMOL two tablets prn.

SOCIAL HISTORY Lives on his own, unemployed, smokes about 20 a day, user of drugs of abuse.

ON EXAMINATION He looked unwell, unkempt with normal sclera and no jaundice, anaemia, clubbing, cyanosis or lymphadenopathy. Pulse 60 per minute. BP 126/64. Heart sounds I + II + 0. Peripheral pulses present. No oedema. JVP not elevated. Trachea central, expansion right = left = normal, percussion resonant, breath sounds vesicular, nil added. Abdomen soft, non-tender, with no masses, no organomegaly, bowel sounds present. Neurologically fully intact.

INVESTIGATIONS
Hb 15.4 g/dl, white cell count $14.3 \times 10^9/l$, platelets $194 \times 10^9/l$.
Coagulation normal.
Na 141, K 4.3, CO2 24, urea 4.8 mmol/l, creat 98 $\mu\text{mol/l}$.
Glucose 5.4 mmol/l. Salicylate and paracetamol not detected - albeit 24 hours post dose.
Alb 46, Bili 19, Alt 19, Alp 66.

TELEPHONE : 01896 754 333 FAX : 01896 823 476

M05 Confidential: Personal data about a patient

MANAGEMENT AND PROGRESS He was commenced on a PARVOLEX infusion and an intravenous infusion of fluids from which he made a good recovery. Repeat liver function tests and coagulation screen were essentially normal and he was referred to Dingleton for psychiatric review. He was discharged home once medically fit.

DRUGS ON DISCHARGE Nil

FOLLOW UP There was a request for the GP to check LFT's on the discharge summary however this is a mistake and it should have been his PTR which should have been requested.

Yours sincerely

Dear Mr Bremner

I would be grateful if you could see this 30 year old man who complains of dysuria and frequency with a negative mid-stream urine. He was investigated some years ago at the Genito-Urinary Department in Edinburgh where they diagnosed non-specific urethritis. However, treatments with Oxytetracycline, Utinor, Ciproxin have failed to relieve any of his symptoms. A full blood count, ESR, Urea and Electrolytes and blood glucose was normal although he did have a slightly raised Albumin at 48. Liver function tests were normal. I was really at a loss to know what else to offer Mr Mein and wondered if a I.V.P. would be indicated to exclude any renal pathology. I would be grateful for your opinion and advice on further management. Thank you for seeing him.

Kind regards.

Yours sincerely

Dr D J Owen

Dear Dr Owen

MR CRAIG MEIN 26/06/67 Unit No. 125914
142 WOODSTOCK AVENUE GALASHIELS TD1 2EG

Thank you for your letter about Craig Mein who complains of a variety of symptoms including pain on micturation lasting for one year and beening referred into the testicles. He also has some slight nausea and pain in the leg which consists of an exaggerated tactile response. However, there has been no blood in his urine he has not passed pus from the tip of the penis and he is otherwise well. I note that he attended the Genito-Urinary Department in Edinburgh where they thought he had NSU, however, treatments of various antibiotics have not helped.

It seems unlikely that further information would be obtained but I would agree that it would be worthwhile to exclude other pathology and I will arrange this. I will send you a copy of result in due course.

Yours sincerely

Mr D N Bremner
Consultant Surgeon

PATIENT HEALTH QUESTIONNAIRE (PHQ-9)

NAME: CRAIG MON

DATE: 10 MAY 06

Over the last 2 weeks, how often have you been bothered by any of the following problems?
(use "✓" to indicate your answer)

	Not at all	Several days	More than half the days	Nearly every day
1. Little interest or pleasure in doing things	0	1	2	3
2. Feeling down, depressed, or hopeless	0	1	2	3
3. Trouble falling or staying asleep, or sleeping too much	0	1	2	3
4. Feeling tired or having little energy	0	1	2	3
5. Poor appetite or overeating	0	1	2	3
6. Feeling bad about yourself—or that you are a failure or have let yourself or your family down	0	1	2	3
7. Trouble concentrating on things, such as reading the newspaper or watching television	0	1	2	3
8. Moving or speaking so slowly that other people could have noticed. Or the opposite—being so fidgety or restless that you have been moving around a lot more than usual	0	1	2	3
9. Thoughts that you would be better off dead, or of hurting yourself in some way	0	1	2	3

add columns: 2 + 10 + 3

(Healthcare professional: For interpretation of TOTAL, please refer to accompanying scoring card.)

TOTAL: 15

10. If you checked off any problems, how difficult have these problems made it for you to do your work, take care of things at home, or get along with other people?

Not difficult at all _____
Somewhat difficult _____
Very difficult _____
Extremely difficult _____

Dear Ms Young,

Many thanks for your letter 25/5/10. I discussed the various options with Craig today and as you are probably aware clinical psychology has got a huge waiting list of about one year so I have advised him in the meantime to continue his treatment with yourself and depending on the outcome of that I may or may not need to refer on further.

Yours sincerely,

Dr Richard Leaver

Dear Dr Wright

Re: Craig W Mein, 142 Woodstock Avenue, Galashiels, TD1 2EG
DOB 26 06 1967

Craig was referred to the Borders Crisis Team by Gillian Myatt from psychiatric liaison following her assessment of him on ward 5 of the Borders General Hospital, had presented to A&E the day before where he had taken an overdose of 67 Amitriptyline 10mg tablets and 10 Quetiapine tablets. He was assessed by my colleague Gillian who referred him to us as an alternative to hospital admission as he was not keen to go into Huntlyburn.

I will not go into his personal history and past history as you will already have received a letter regarding that.

I saw Craig on the 3rd November 2016 at home where I found him to be casually dressed; there was evidence of self care. We spoke about his past events leading to his overdose, we spoke about historical child sexual abuse and he felt that he had lost his childhood. He stated that he was keen for therapy regarding this but acknowledges that this isn't the time at present. As you will be aware his father died suddenly and Craig took his overdose in response to this. He describes various life events. One being that he had been in prison in September for 21 days due to an ongoing court battle regarding a car crash. His [redacted] that week had also ended their 5 year relationship and he was obviously upset about this. Whilst visiting Craig it became apparent that he did not have any plans for the future, he was adamant that after the funeral, the next day he would take another overdose and stated that this time it would work. With regards to the overdose he was regretful that it didn't work, he felt that "life had dealt him a bad blow" and that he could see no future for himself. At this point I offered him admission to Huntlyburn ward, he refused this stating that he would be safe overnight as he would not take an overdose or kill himself out of respect for his [redacted] I arranged for a support phone call that evening which was conducted by one of my colleagues and I also arranged for out consultant psychiatrist to see him at home with a view of query detention or persuading him to come into the hospital following the funeral the next day. I phoned Craig on the 4th November 2016, he stated that he was not going to go to the funeral as he would find it too upsetting again he was stating that he intended to take an overdose and myself and our team leader went out to see Craig to try and persuade him to come into hospital but again he refused. I swiftly arranged a home visit with Dr Smith that day, Craig was tearful, remained focused on ending his life and wasn't willing to guarantee his safety, after discussion with Dr Smith he agreed to an informal admission to Huntlyburn ward for a place of safety and further assessment of his mood.

2606679792

NHS Confidential: Personal data about a patient

Due to him being admitted to Huntlyburn ward on 4th November 2016, we have discharged him from our caseload but will be looking to take him out on early discharge from Huntlyburn ward when his mood and suicidal ideation improves.

Yours sincerely

Nick Hares
CPN
