

Evidence Review Summary

Miss Imogen Kennedy

5 confirmed items · Generated 30 Jul 2026, 11:36

Other confirmed evidence (untagged) — 5 items

Other Low

"Edward feels asthma is a bit better on fostair inhaler but still using salbutamol quite a lot."

Adult health condition with possible links to stress or trauma from childhood abuse.

Source: test (DSAR upload) · test

Addiction Medium

"Edward reported he has no diazepam left. Shouldn't be correct. He gets his amounts on Mon Wed and Fri."

Indication of potential medication dependency, possible consequence of childhood trauma.
